5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Paragraph

1(a). Please write down the paragraph, policy or figure number that your representation relates to.:

5.1

1(b). Does your comment relate to one of the changes listed above?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

National Landscape, Ecology, Flood Risk and Heritage Considerations in Site Allocation Policies A number of site allocation policies contain material amendments, some of which are likely to affect site yield, in response to the allocation of sites within areas of National Landscape and with ecology, flood risk, heritage and other considerations. The amendments to an allocation for 700 homes on Land at St John's (Exmo_20) under Strategic Policy SD01: Exmouth and its development allocations are particularly significant in themselves and it is noted that there is an unresolved objection to the allocation of this site from Devon County Council as the Minerals and Waste Planning Authority because part of the site is within a Minerals Safeguarding Zone.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Paragraph

1(a). Please write down the paragraph, policy or figure number that your representation relates to.:

5.1

1(b). Does your comment relate to one of the changes listed above?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Further to representations to the first Regulation 19 draft, we consider that the council's response has not fully addressed the issues raised regarding the overall approach to allocations within the context of the duty to seek to further the conservation and enhancement of the National Landscapes.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

We previously advocated a landscape-led approach to informing site allocation choices. A landscape led approach, whether to all allocations or allocations in or affecting the National Landscapes, would look at landscape sensitivity and capacity and seek to understand the inherent landscape character and special qualities of that landscape, and thus whether the suggested mitigation measures would contribute to or erode natural beauty. There is no clear consideration of how development might further the purpose of designation and to what extent proposed measures simply mitigate harm. It is not always clear how assessment has led to the allocation, and there remains questions where site assessments flag up need for further landscape or heritage appraisals. For each site in/adjacent to National Landscapes, it should be possible to consider how it is conserving and enhancing natural beauty, cross reference with NPPF guidance on development in or affecting protected landscapes, and consider whether sites meet the

requirements of policies elsewhere in the plan – if it doesn't meet all these then the allocation should be reconsidered.

Your response to our previous representation noted that strategic alternatives assessed were assessed in the sustainability appraisal. This is fine for pattern of development and settlement hierarchy, however, fundamentally other alternatives could be; a. Engage para 11 (b)1.) of NPPF – not possible to meet objectively assessed housing need where the application of policies in this Framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area.

b. Consider alternatives where housing numbers can be provided in line with the settlement hierarchy without encroaching/affecting National Landscapes through design/density of other sites (within settlements or other sites) – for example at Honiton it is positive that Honi_12 is no longer proposed, but in terms of overall provision at Honiton the number allocated at GH/ED/39 has increased, which more than covers the removed site allocation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Paragraph

1(a). Please write down the paragraph, policy or figure number that your representation relates to.:

5.3

1(b). Does your comment relate to one of the changes listed above?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Planning on an area of ANOB should never be entertained. Exmouth is the 2nd largest town in Devon and green space within it are disappearing fast due to development of houses at Plum Park, Dinan way, plus the new road from Dinan way on to the Exeter road. We can not encroach on our natural habitat for the environment, nature and wildlife, going forward we should protect these spaces to help towards helping the reduction of global warming, instead of building houses we should be planting more trees, more natural flowers meadows for wild life and saving our planet. With the diverse weather we have had this year, extreme heat, down pours, cold snaps. There is a storm drain on castle lane adjacent st Margaret's view this is inadequate for purpose as it floods even with a small amount of rain, so recently the road has nearly been impassable, flooded and water streaming across the road into the stream which was full to the top. Plus it was like an ice rink with recent weather. With new houses being built on a downward slope to castle lane extra run off of surface water is going to increase this problem and create even more flooding in this area. Enlarging Littleham brook on the building ground is still not going to cope with the extra water at castle lane, when the tiny brook meanders around houses down to sea. Traffic and parking is a great issue in Exmouth where ever you go streets full of parked cars, pavements and in grass verges. Which is dangerous to other drivers who can not see adequately, pedestrians, school children, blind, deaf and disability scooters and more. Castle lane is what it says a lane, the traffic that uses it increases immensely when the caravan park, at Sandy Bay is open. So more traffic using this road due to more houses is to dangerous, it's not built for that much traffic. There is a pinch point where the traffic is

single file at the bottom of St Margaret's view due to 2 houses opposite one another adjacent to the road. 410 houses will mean 820 more cars, plus more for visitors. The traffic on the Salterton road already makes it very hard to get out of Capel lane, so with another entrance near McDonald's turning, which is also busy and hard to get in and out even with the road entrance improvements. It's just going to cause more congestion. To travel from Littleham crossroads to the caravan site, it's so busy at the shops, parked cars are always towing and growing, plus the HGV delivery to the co-op, it's a minefield to pass. There are parked cars all the way down to the turning for Castle Lane, bollards at Parminster Close, parked cars, turning into Plum Park and industrial site, parked cars everywhere, then the school entrance which is always obscured, then there is a bend with chevrons on the road that indicates no parking but it's full of cars, you go around that bend blind, confronted with fast oncoming traffic, Lorrie's and the bus. It's hazardous at best. Green Lane leading to Capel Lane is a bus route, cars are parked everywhere and in anyway a car can just be dumped, not parked. This road is an obstacle course. There is traffic calming on Capel Lane, these roads are not adequate for even more traffic. As is Exmouth, these roads are only way in and out of Exmouth is the Woodbury Road which is a speed track, two major accidents have happened just before Christmas and the Exeter road out to the 3052. These are the only two routes for emergency vehicles as well and with a greater population in Exmouth and greater need for these services, people are going to die as getting these services through and then on perhaps to hospital is going to be life threatening. Drive along the Exeter road on bin collection day, the hold ups are extreme. There is traffic poor bin men trying to do their job around Exmouth is beyond a challenge and their safety is paramount. There last and probably the most important is the question of all the extra amenities that will be required and even need now already, doctors, dentists, shops, schools, how can a secondary school take in more pupils when there's no room for expansion and it's already one of the biggest schools in Devon. Finally sewage, we have so many problems, polluting the sea from over flows, Maer Lane sewage works problems, the amount of sewage lorries always tooing and froing to Phear Park, and Budleigh Salterton has the same problems to, this is very serious to our general health and the environment, the sewers just can't cope. Exmouth is bursting at the seams, I think we have had our fill of houses, that aren't for locals as they are too expensive. Enough is enough.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Paragraph

1(a). Please write down the paragraph, policy or figure number that your representation relates to.:

5.6

1(b). Does your comment relate to one of the changes listed above?: No

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: NO

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: "The Local Plan strategy establishes Ottery St Mary as a Tier 2 settlement, and as such as an appropriate location for future growth and development." There is no definition of a Tier 2 Settlement in the document. This is required and the full assessment as to how this has been ascertained must be included.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Full description of the definition used for tier decisions, and the exact measurements used to determine this must be included.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:
NO

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Other Tier 2 Settlements mentioned include Sidmouth and Honiton. From the 2021 Census, the populations are: Ottery - 7,700 Honiton - 12,200 Sidmouth - 13,300 These are not comparable by size now, Honiton is 58% bigger than Ottery, with Sidmouth 73% bigger. A quick search suggests that: "In planning, a Tier 2 Settlement is a significant town or larger village with a good range of local services, employment, and public transport, making it more sustainable for development than smaller villages but less central than major towns (Tier 1)." Ottery Local Services are currently over stretched, be it schools, healthcare or library services. There are very few opportunities for new employment in the local area, and taking further farmland away for housing further reducing that employment option. Ottery public transport is really not of sufficient quality, frequency or reliability to make it a better option for commuting than private transport. Traffic around town because of the above is already difficult and in some places very dangerous. A lorry "falls off" the main Daisymount to Ottery road most years.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Ottery is not a Tier 2 Settlement by any relevant measurement that can see. Classify Ottery correctly, and document exactly what measurements and justifications were used.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Planning and considerations to significantly increase the number of residents needs to be in cooperation of all impacted parties. There doesn't seem to have been full interaction and cooperation with all parties. Travel, traffic, power, clean and waste water, healthcare, education, police and fire services. It all needs co-operation, and it hasn't been given due consideration.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I don't trust the council to act in the best interests of

me or the other constituents and affected parties. I need to be there to make sure they are held accountable.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Paragraph

1(a). Please write down the paragraph, policy or figure number that your representation relates to.:

5.6

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:

Otry_21

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Ottery St. Mary (OSM) is well known for its narrow streets and regular traffic congestion. A plethora of photographs and other evidence is available to support residents' existing frustration with access to facilities within the town as well as the ability to transit through particularly when residing in, or approaching from, the southern side of the town (i.e. site of Otry_21). I therefore believe it is NOT appropriate to add further houses on the southern side since: a. Prospective new residents will require places of employment and it is the duty of government and local authority to provide access to such. The vast majority of employment potential in the region resides in Exeter, at the airport, and in Honiton, ALL of which will require prospective residents of Otry_21 to travel through the centre of OSM in order to access them. b. Similarly, in order to access health facilities, schools and shopping, all prospective Otry_21 residents will have to transit Tip Hill and OSM centre. The limitations imposed on such journeys by the geography and road size make it totally inappropriate to locate further housing development at Otry_21. Housing to the north / north-west would not, however, suffer these issues. c. The present pedestrian and cyclist routes from Otry_21 into OSM are already unsafe, and the geography makes improvement largely impossible. There are typically multiple incidents along the route daily. It is therefore unsafe for prospective residents attempting to travel to doctors, places of work, schools and shops if sited at Otry_21. d. Sidmouth road is simply capacity-congested by geographic restrictions at Tip Hill (and single-lane in several locations), with many large farm and industrial vehicles also using the road. There is multiple evidence of lost wing-mirrors and even side-swipes on pedestrians on the route, thereby making Otry_21 unsuitable for the addition of yet a further traffic source. The Otry_21 site is also recognised as being within the "zone of influence" of the East Devon Pebblebed Heaths Special Area of

Conservation and Exe Estuary and East Devon Heaths Special Protection Areas. As a resident, I have seen badgers, bats, and dormice in the area. It is totally inconceivable that addition of 70 houses in the proposed site will not have a massively negative effect on these animals, and accordingly have a negative influence on the special protected areas.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: If

further housing is indeed mandated, it is clear that such should be sited on the northern / north-western side of OSM in order that reasonable access to the facilities described above (places of employment, doctors, schools and highways) can be provided.

Accordingly, my suggested wording for paragraph 5.6 is as follows: "The Local Plan strategy establishes Ottery St Mary as a Tier 2 settlement, and as such as an appropriate location for future growth and development. It is, however, recognised that geographic and historic restrictions apply to the road and pedestrian routes within the town, and accordingly preference for future growth and development should be focused on arease to the north and north-west of the town where access to major roads and facilities would not require transit through the town centre. Plan policy sets out land allocations for development and these are shown on the policies map along with other policy boundaries that are at the town." Additionally, in section 5.6, the paragraph "Gerway Farm (Otry_21)" should state: "This land at Gerway Farm, off Sidmouth Road, is deemed unsuitable for further housing as a result of the restrictions on the safe movement of traffic and pedestrians into and through Ottery St. Mary. Additionally, the site would be subject to Archaeological assessment and further flood risk assessment."

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Ottery St. Mary (OSM) is well known for its narrow streets and regular traffic congestion. A plethora of photographs and other evidence is available to support residents' existing frustration with access to facilities within the town as well as the ability to transit through particularly when residing in, or approaching from, the southern side of the town (i.e. site ot Otry_21). I therefore believe it is NOT appropriate to add further houses on the southern side since: a. Prospective new residents will require places of employment and it is the duty of government and local authority to provide access to such. The vast majority of employment potential in the region resides in Exeter, at the

airport, and in Honiton, ALL of which will require prospective residents of Otry_21 to travel through the centre of OSM in order to access them. b. Additionally, in section 5.6, the paragraph "Gerway Farm (Otry_21)" should state: "This land at Gerway Farm, off Sidmouth Road, is deemed unsuitable for further

housing as a result of the restrictions on the safe movement of traffic and pedestrians into and through Ottery St. Mary. Additionally, the site would be subject to Archaeological assessment and further flood risk assessment."

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The suggestion that Otry_21 should be considered suitable for large development causes a conflict across the requirements of housing, transport, and environment. Cooperation across these boundaries creates an impossible scenario and therefore including Otry_21 will not facilitate an effective Local Plan. The residents of Ottery St. Mary would not support the increased congestion, reduced safety, and damage to wildlife that development at Otry_21 would provide.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::

Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Devon Wildlife Trust considers the inclusion of this site for development is unacceptable and we object in the strongest possible terms. We consider that the proposed allocation is unsuitable for development both due to the location of the area within the wider ecological landscape and the habitat composition of the site itself. We note that the site was originally scoped out of being allocated in the Site Selection Report (August 2024) for a number of reasons, most significantly 'there are significant local levels of biodiversity interest at the site that could be adversely affected by development. The site promoter for a southern part of the site shows highway access to the south of the site coming through a length of Unconfirmed County Wildlife Site, which would clearly cause damage.' Proximity to Designated Sites The proposed Exmo_20 allocation lies directly adjacent to the southern extent of a number of sites which have been designated at the highest level. Exmo_20 lies within 10 metres of Pebblebed Heaths National Nature Reserve (NNR), East Devon Pebblebed Heaths Special Area of Conservation (SAC), East Devon Heaths Special Protection Area (SPA) and East Devon Pebblebed Heaths Site of Special Scientific Interest (SSSI). Devon Wildlife Trust Bystock Nature Reserve also lies within these designations. These sites include a strong element of public access. The proposed allocation lies within East Devon Pebblebed Heaths SSSI Impact Risk Zone (IRZ). Development of land situated within IRZs has potential to have a harmful effect on terrestrial SSSIs and the SACs that they underpin. Natural England consider residential development of 50 units or more likely to have an impact on the East Devon Pebblebed Heaths SSSI. It is understood the proposed allocation is for up to 700 dwellings. Natural England SSSI condition

assessments have been undertaken to determine the condition of East Devon Pebblebed Heaths SSSI, with several parcels which are considered ‘unfavourable recovering’ and ‘unfavourable declining’. Habitats are therefore clearly in a vulnerable condition, and this is likely to be significantly exacerbated by the development of Exmo_20. The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area (SNA). This area has been identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land at scale for development. The proximity of the European sites (SPA and SAC) to the proposed allocation raises considerations under the requirements of the Habitats Directive 1992 for these sites to be maintained or, where necessary, restored at a favourable conservation status (Article 3 (1)). Natural England has a clear presumption against any net increase in residential development within 400m of a heathland SAC. There is a substantial evidence base which demonstrates that urban development in the area around lowland heathland has an adverse effect on the quality of heathland interest features which underlie the designation of the European sites and SSSIs. Key references can be found at:

https://webarchive.nationalarchives.gov.uk/ukgwa/20140605111944/http://www.naturalengland.org.uk/regions/south_west/ourwork/heathlands/default.aspx The current East Devon Local Plan states ‘To help preserve the integrity of the East Devon Pebblebed Heaths, specifically on account of the impacts of domestic cats through bird predation, new dwellings will not be allowed on or within 400 meters of the Pebblebed Heaths.’ The current Second Regulation 19 Draft includes a policy which states ‘To help preserve the integrity of the East Devon Pebblebed Heaths, specifically on account of these potential impacts, new dwellings and tourist accommodation or other developments that may result in unacceptable impacts will not be permitted on or within 400 metres of the Pebblebed Heaths’. It is beyond the scope of this letter to detail the range and diversity of sensitive habitats and species which are supported by the NNR/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development. These include, but are not limited to: Disruption to the hydrology of heathland wetland through both drainage interception and enriched urban water discharges. ? Increased air pollution. ? Increased likelihood of arson/accidental fire. ? Damage to habitat and disturbance to wildlife caused by increased use of heathland for off road cycle and motorcycling. ? Increased recreational use, especially by dog walkers, leading to disturbance of ground nesting birds and habitat damage. ? Habitat change from heath to grassland through enrichment by dog faeces. ? Predation by domestic cats on reptiles and ground nesting birds. ? Presence of higher numbers of people and greater recreational use leading to more difficulties in managing the heaths effectively for their designated interests. ? Increased fly tipping of garden and other waste. It is important to note that many of these urban effects can operate

synergistically to exacerbate the adverse impacts on designated interest features. Due to the proximity of the proposed allocation to the SAC, it is incumbent on the local planning authority to undertake an Appropriate Assessment (AA) prior to adopting the Local Plan. It is unlikely that given the scale and proximity of the proposed Exmo_20 allocation to the SAC, that an AA could conclude that there would be no adverse effects on the integrity of the SAC, regardless of the over-arching strategic approach of the South-East Devon European Sites Mitigation Strategy (SEDESMS). Therefore, the authority would need to progress through the derogation process and seek permission from the Secretary of State demonstrating no suitable alternatives and proposing suitable compensatory measures. Devon Wildlife Trust would urge East Devon District Council to remove this allocation from the plan to avoid such impacts altogether.

Habitats/species within the Exmo_20 allocation boundary

The proposed allocation includes a number of areas of high ecological value. Several blocks of woodland are present, a number of which have been highlighted as Unconfirmed Wildlife Sites. These are areas which have been identified as potentially high value habitats, but for which access has not yet been obtained to allow detailed survey. These areas are identified by comprehensive assessment of aerial photography and are therefore likely to support habitat of high value for wildlife. A number of areas within Exmo_20 are listed in the Priority Habitat Inventory, which includes designated areas of ancient and deciduous woodland and other assigned habitats of importance. The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries. For example, nightjar travel away from heaths to feed and therefore development of habitat directly adjacent to heathland has the potential to negatively impact this species associated with primary designation habitats of the European sites. It is deeply concerning to hear that at the time of our comments dated 6 November 2024, enabling works appeared to have commenced on site, with tree felling to create access underway. We urge the LPA to ensure that such works are halted, with compensation measures undertaken to address any biodiversity loss which has occurred. We hope that the information presented above explains why the area encompassed within proposed allocation Exmo_20 is wholly unsuitable for development. We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan.

Revised text in the Second Regulation 19 Draft We note that the LPA has sought to address the significant concerns regarding this allocation with the provision of revised text within the Second Regulation 19 Draft. The revisions provided do not sufficiently address the points outlined above. Notwithstanding our strong objection to the inclusion of this allocation within the Local Plan, the following comments are provided: ‘Street lighting should be avoided, and new planting should provide screening’. As per our comments

above, this should be rephrased to stipulate the requirement for native planting. Native planting is particularly important in this area due to the sensitive location of the site in proximity to European designated sites. 'A natural buffer should be retained in the north-east of the site, along the B3179, to conserve foraging areas for nightjars opportunities for BNG and to maintain visual amenity adjacent to the East Devon National Landscape'. The inclusion of BNG in this sentence is confusing. Rewording is required. Additionality also needs to be considered here. 'Any car parking near to the SAC/SPA should be for uses that do not support recreational access to the SAC/SPA'. This statement is not feasible. Any parking provision in proximity to the SAC/SPA is likely to be utilised for recreational access into the SAC/SPA, regardless of what the parking is intended for. A clear statement restricting the development of parking areas within 400m of the SAC/SPA is required.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Devon Wildlife Trust considers the inclusion of this site for development is unacceptable and we object in the strongest possible terms. We consider that the proposed allocation is unsuitable for development both due to the location of the area within the wider ecological landscape and the habitat composition of the site itself. We note that the site was originally scoped out of being allocated in the Site Selection Report (August 2024) for a number of reasons, most significantly ‘there are significant local levels of biodiversity interest at the site that could be adversely affected by development. The site promoter for a southern part of the site shows highway access to the south of the site coming through a length of Unconfirmed County Wildlife Site, which would clearly cause damage.’ Proximity to Designated Sites The proposed Exmo_20 allocation lies directly adjacent to the southern extent of a number of sites which have been designated at the highest level. Exmo_20 lies within 10 metres of Pebblebed Heaths National Nature Reserve (NNR), East Devon Pebblebed Heaths Special Area of Conservation (SAC), East Devon Heaths Special Protection Area (SPA) and East Devon Pebblebed Heaths Site of Special Scientific Interest (SSSI). Devon Wildlife Trust Bystock Nature Reserve also lies within these designations. These sites include a strong element of public access. The proposed allocation lies within East Devon Pebblebed Heaths SSSI Impact Risk Zone (IRZ). Development of land situated within IRZs has potential to have a harmful effect on terrestrial SSSIs and the SACs that they underpin. Natural England consider residential development of 50 units or more likely to have an impact on the East Devon Pebblebed Heaths SSSI. It is understood the proposed allocation is for up to 700 dwellings. Natural England SSSI condition

assessments have been undertaken to determine the condition of East Devon Pebblebed Heaths SSSI, with several parcels which are considered ‘unfavourable recovering’ and ‘unfavourable declining’. Habitats are therefore clearly in a vulnerable condition, and this is likely to be significantly exacerbated by the development of Exmo_20. The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area (SNA). This area has been identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land at scale for development. The proximity of the European sites (SPA and SAC) to the proposed allocation raises considerations under the requirements of the Habitats Directive 1992 for these sites to be maintained or, where necessary, restored at a favourable conservation status (Article 3 (1)). Natural England has a clear presumption against any net increase in residential development within 400m of a heathland SAC. There is a substantial evidence base which demonstrates that urban development in the area around lowland heathland has an adverse effect on the quality of heathland interest features which underlie the designation of the European sites and SSSIs. Key references can be found at:

https://webarchive.nationalarchives.gov.uk/ukgwa/20140605111944/http://www.naturalengland.org.uk/regions/south_west/ourwork/heathlands/default.aspx The current East Devon Local Plan states ‘To help preserve the integrity of the East Devon Pebblebed Heaths, specifically on account of the impacts of domestic cats through bird predation, new dwellings will not be allowed on or within 400 meters of the Pebblebed Heaths.’ The current Second Regulation 19 Draft includes a policy which states ‘To help preserve the integrity of the East Devon Pebblebed Heaths, specifically on account of these potential impacts, new dwellings and tourist accommodation or other developments that may result in unacceptable impacts will not be permitted on or within 400 metres of the Pebblebed Heaths’. It is beyond the scope of this letter to detail the range and diversity of sensitive habitats and species which are supported by the NNR/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development. These include, but are not limited to: ? Disruption to the hydrology of heathland wetland through both drainage interception and enriched urban water discharges. ? Increased air pollution. ? Increased likelihood of arson/accidental fire. ? Damage to habitat and disturbance to wildlife caused by increased use of heathland for off road cycle and motorcycling. ? Increased recreational use, especially by dog walkers, leading to disturbance of ground nesting birds and habitat damage. ? Habitat change from heath to grassland through enrichment by dog faeces. ? Predation by domestic cats on reptiles and ground nesting birds. ? Presence of higher numbers of people and greater recreational use leading to more difficulties in managing the heaths effectively for their designated interests. ? Increased fly tipping of garden and other waste. It is important to note that many of these urban effects can operate

synergistically to exacerbate the adverse impacts on designated interest features. Due to the proximity of the proposed allocation to the SAC, it is incumbent on the local planning authority to undertake an Appropriate Assessment (AA) prior to adopting the Local Plan. It is unlikely that given the scale and proximity of the proposed Exmo_20 allocation to the SAC, that an AA could conclude that there would be no adverse effects on the integrity of the SAC, regardless of the over-arching strategic approach of the South-East Devon European Sites Mitigation Strategy (SEDESMS). Therefore, the authority would need to progress through the derogation process and seek permission from the Secretary of State demonstrating no suitable alternatives and proposing suitable compensatory measures. Devon Wildlife Trust would urge East Devon District Council to remove this allocation from the plan to avoid such impacts altogether.

Habitats/species within the Exmo_20 allocation boundary

The proposed allocation includes a number of areas of high ecological value. Several blocks of woodland are present, a number of which have been highlighted as Unconfirmed Wildlife Sites. These are areas which have been identified as potentially high value habitats, but for which access has not yet been obtained to allow detailed survey. These areas are identified by comprehensive assessment of aerial photography and are therefore likely to support habitat of high value for wildlife. A number of areas within Exmo_20 are listed in the Priority Habitat Inventory, which includes designated areas of ancient and deciduous woodland and other assigned habitats of importance. The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries. For example, nightjar travel away from heaths to feed and therefore development of habitat directly adjacent to heathland has the potential to negatively impact this species associated with primary designation habitats of the European sites. It is deeply concerning to hear that at the time of our comments dated 6 November 2024, enabling works appeared to have commenced on site, with tree felling to create access underway. We urge the LPA to ensure that such works are halted, with compensation measures undertaken to address any biodiversity loss which has occurred. We hope that the information presented above explains why the area encompassed within proposed allocation Exmo_20 is wholly unsuitable for development. We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan.

Revised text in the Second Regulation 19 Draft We note that the LPA has sought to address the significant concerns regarding this allocation with the provision of revised text within the Second Regulation 19 Draft. The revisions provided do not sufficiently address the points outlined above. Notwithstanding our strong objection to the inclusion of this allocation within the Local Plan, the following comments are provided: ‘Street lighting should be avoided, and new planting should provide screening’. As per our comments

above, this should be rephrased to stipulate the requirement for native planting. Native planting is particularly important in this area due to the sensitive location of the site in proximity to European designated sites. 'A natural buffer should be retained in the north-east of the site, along the B3179, to conserve foraging areas for nightjars opportunities for BNG and to maintain visual amenity adjacent to the East Devon National Landscape'. The inclusion of BNG in this sentence is confusing. Rewording is required. Additionality also needs to be considered here. 'Any car parking near to the SAC/SPA should be for uses that do not support recreational access to the SAC/SPA'. This statement is not feasible. Any parking provision in proximity to the SAC/SPA is likely to be utilised for recreational access into the SAC/SPA, regardless of what the parking is intended for. A clear statement restricting the development of parking areas within 400m of the SAC/SPA is required.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The land allocations have been based on a flawed decision-making process, specifically: (1) an inaccurate sustainability appraisal (it does not include up to date information on risks to the water environment, and the impact of climate change, (2) an inaccurate Habitats Regulations assessment (e.g. for the Exe Estuary, there is only consideration of the impact of recreation, not water quality), (3) a very weak evidence base on the impacts of climate change (beyond flood risk), and the specific risks to the water environment, (4) no or limited consideration of the existing evidence, including the findings and recommendations of the Water Cycle Study regarding the Exe Estuary, and the latest information from catchment-based projects in East Devon, (5) an overall poor understanding of the impacts of climate change, particularly on the water environment, and (6) inadequate consultation with the community and other stakeholders. Our focus is particularly on the development around the Exe Estuary (Lympstone, Exmouth, and Woodbury), and we have clear evidence to show that the allocation of large numbers of houses in these areas is not sustainable and does not comply with the Habitats Regulations designed to protect the Exe Estuary (a European wildlife site/ SPA).

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Address the fundamental flaws in the Local Plan. Use an integrated catchment-based approach to assess risks to the water environment, and the impact of climate change

(e.g., regarding the Exe Estuary, including the streams draining to the estuary). Review and update the allocations around the Exe Estuary (Lympstone, Exmouth, and Woodbury).

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: See comments in 2(b).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Same as 2(c) - Address the fundamental flaws in the Local Plan. Use an integrated catchment-based approach to assess risks to the water environment, and the impact of climate change (e.g., regarding the Exe Estuary, including the streams draining to the estuary). Review and update the allocations around the Exe Estuary (Lympstone, Exmouth, and Woodbury).

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Our comments in 2(b) demonstrate that EDDC has failed in its duty to cooperate in environmental protection.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: We have identified significant fundamental flaws in the decision-making process for the East Devon Local Plan - particularly regarding the sustainability appraisal, compliance with the Habitats Regulations, and compliance with national policy and NPPF on protecting the water environment and adapting to climate change.

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

National Landscapes (NL) and Policies SD01, SD03, SD04, SD06, SD08, SD15, SD16, SD22 and SD23 Policy OL02 provides strong protection for the NL areas. Quote: "The highest level of protection will be given to the landscape and scenic beauty of the National Landscapes (NLs) in East Devon: A. Development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities, character and natural beauty of the NL (including the coastline, where relevant); B. Major development in a NL will only be permitted in exceptional circumstances and where it can be demonstrated to be in the public interest; and East Devon Local Plan 2020 to 2042 – Second Regulation 19 Publication Draft 223 C. Any relevant National Landscape Management Plans will be a material consideration in decision making. This policy will also apply to the Heritage Coast. This policy applies across the whole plan area including the Cranbrook Plan area". However there are a significant number of proposed development sites which are within the NLs, or have an affect upon its setting or appearance. • Exmo_20: (P85 Local Plan) - this site is outside the NL, with a buffer strip at the top of the site, but does not avoid harm to its character and beauty. • Exmo_17: 410 new homes within the NL. Most, if not all, of these sites cannot be justified as exceptional circumstances. In relation to the very large housing allocations on the eastern side of Exmouth, (Exmo_17 and Exmo_20) the OVA are very concerned

about the lack of infrastructure and necessary support facilities, such as medical, dental, social, educational and highway capacity to accommodate the large increase in population arising from 1,110 new homes in this area. These developments will be closer to Budleigh Salterton than Exmouth town centre, so detailed consideration of the significant impacts this will have on this much smaller settlement must be undertaken, with full public discussion and consultation. The OVA request that this cannot be allowed to proceed without watertight and absolute guarantees for relevant infrastructure to accommodate this planned growth.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We have already made comments about the current dire sewage situation in the River Otter catchment. Building an additional 1,833 homes will only make the situation much worse.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: We wish to explain why we consider it is wrong to have so many housing sites within the National Landscapes.

Lymp_07

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To ensure a coordinated and comprehensive approach, DCC recommends that the Exmo_23 and Lymp_07 allocations could be covered by a single section (similar to the approach for Exmo_08 and Exmo_16), reading as follows: “The land south of Courtlands Lane (within the Exmo_23 allocation) will form a small-scale development on the northern side of Exmouth to accommodate around 12 new homes. The site at Courtlands Cross north of Courtlands Lane (within the Lymp_07 allocation) will accommodate around 100 new homes and 0.4 hectares of employment land. The field to the west of the housing allocation land is allocated for delivery of sports pitch uses and associated low key ancillary facilities as part of a viable package of planning obligations. Built development at this site, located on the two south-easterly fields, will need to be particularly sensitively designed to avoid potential for adverse impact on nearby heritage assets and to avoid adverse landscape impacts. These allocations will need to come forward on the basis of an agreed coordinated access strategy for both Exmo_23 and Lymp_07 allocations that clearly demonstrates how sustainable transport will be designed and implemented. Particular importance is attached to retention of the East Devon Way footpath, in a spacious corridor, across the Lymp_07 site in a north-south direction. There should also be safe off-street pedestrian and cycle access that provides for east-west movement through the area for existing and future users linking into adjacent areas such as Lympstone Manor. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes.

Through this coordinated access strategy, particular account will need to be taken of providing active travel links to the wider network and towards the town centre with alterations to vehicular access along Courtlands Lane.”

You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: It is noted that the policy wording for Exmo_20 now states the need for a detailed heritage assessment to be submitted as part of a planning application. DCC considers that the proposed allocation occupies a large area within a landscape where minimal formal archaeological work has been undertaken and contains evidence of prehistoric activity in the form of findspots of flint tools and funerary monuments on the higher ground to the north. In addition, this proposed allocation area lies in proximity to the church of St John- in-the-Wilderness, originally the 15th century parish church and protected as a grade II* listed building. Given the archaeological potential of the proposed development site, DCC requests that any proposals for development should be informed and supported by an appropriate level of heritage information. This should take the form of the results of a geophysical survey and field evaluation of the areas affected by the proposed development. To make the need for archaeological assessment clear, and align with the requirements set out in other site allocation policies, DCC requests the policy wording is amended to include “A detailed heritage and archaeological assessment...”.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_04a

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Comments relating to Lymp_14 and Exmo_04a: DCC also recommends that the policy text relating to the Lymp_14 and Exm_04a allocations should identify the need for localised improvements to enhance sustainable travel modes with wording as follows:

Land at Marley Drive (Exmo_04a) This site is allocated for around 50 new homes. The site supports a number of significant mature trees with areas of biodiversity value within the site and to its boundaries which will demand particular sensitivity in respect of site design and implementation to avoid damage and delivery of onsite habitats should reflect and link into adjoining priority habitats. There will need to be pedestrian and cycle access through this site into Site Lymp_14 and thereafter on into Goodmores Farm. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes.”

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_18

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Clinton Devon Estates are the owners of a very large area of land within East Devon. As part of its interests, the Estate undertakes residential and commercial development and manages substantial farming and forestry operations. The main issue addressed at that SPC meeting was whether access, be it primary or secondary, should be permitted to Exmo_18 from Salterton Road. This reflected officers' previous concerns over the potential impact on the National Landscape and visual approach to the town centre. The commentary at the meeting focused on ensuring that the openness and visual experience when entering Exmouth from the east is taken into consideration, rather than seeking to impose restrictions on the height of any development at Exmo_18. It was acknowledged that Exmo_17, on the southern side of Salterton Road, sits across from Exmo_18, and that future development of Exmo_17 will alter the view at the entrance to the town. The SPC voted to approve the inclusion of secondary access from Salterton Road adopting wording, set out in the meeting, which related to the design of that access, to minimise the impact on the setting of the National Landscape. At no point during either of the two recent SPC meetings was it proposed or agreed, that the site at Exmo_18 should be subdivided into rigid zones such as the "southern third", nor that any zone should be subject to any special constraints or specific height restrictions. On the contrary, explicit support was shown toward development across the site, including the southern part. There was clear confirmation that the site is a logical extension of an existing, successful business park and important to Exmouth's

future economic function. Restricting the height of the development based on an unspecified topographical feature pre-empts site specific master planning and design work. The SPC's concerns regarding any development fronting Salterton Road/B3178 will be appropriately addressed during the planning process. Ultimately, the acceptability of any development within the southern part of the land on the nearby National Landscape can be assessed as part of any future planning application and, if necessary, changes made to the proposal at that point. Given the concerns outlined above, the policy in respect of Exmo_18 is currently unsound in that it includes limitations which are likely to undermine the deliverability of commercial use on the land. As worded, the policy does not meet the NPPF requirements (at paragraph 36) which requires that local plan policies be justified and effective. We therefore propose an amendment to the policy wording to overcome these concerns.

The Estate has provided representations to the Council as part of previous consultations on the draft local plan and via the related call for sites process. They therefore have considerable interest in the policies and objectives as now set out in the current draft of the plan. On behalf of Clinton Devon Estates, we have therefore reviewed the plan and therefore make the following comments in connection with the proposal to allocate the land to the east of Liverton Business Park under draft Strategic Policy SD01. This policy states:

“This land, to the east of Liverton Business Park is allocated for employment uses and will form an extension to the existing business park and extends to around 2.7 hectares in size. Development should take account of the relationship between the site and the East Devon National Landscape, with particular care taken to ensure that any development in the southern third of the site is sensitively designed and kept below the level of the ridgeline to the south. To avoid adverse landscape and visual impacts on the National Landscape and its setting, primary vehicular access should be taken from the Liverton Business Park. Any secondary access from Salterton Road should be carefully designed and screened to minimise any impacts on the setting of the National Landscape. Existing hedges to the southern and eastern site boundaries should be reinforced and appropriately managed and additional trees planted.” [Our underlining] We welcome the previous Strategic Planning Committee's (SPC) support for the addition of a secondary access to the site from Salterton Road and its decision to amend the draft policy wording to allow for this. However, we have serious concerns over the new requirement to keep development at the southern third of the site “below the level of the ridgeline to the south.” The wording underlined, which was not discussed during the SPC meeting held on 25th November 2025, introduces a new unnecessary, unjustified, and ambiguous planning restriction. There is no clearly defined or obvious

ridgeline to the south when standing at the Salterton Road/B3178 boundary of Exmo_18. The ridgeline could be set by the hedgerow on the southern side of Salterton Road, but its limited height would effectively preclude any development at the southern end of Exmo_18.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Suggested Amendment to Policy Wording for Exmo_18

In summary, the inclusion of the drafting shown underlined above was not explicitly or implicitly endorsed by the SPC and does not define a measurable ridgeline capable of supporting a firm policy restriction. Therefore, we request that the text is revised as follows, with the struck through text to be removed: “Development should take account of the relationship between the site and the East Devon National Landscape, with particular care taken to ensure that any development in the southern third of the site is sensitively designed. To avoid adverse landscape and visual impacts on the National Landscape and its setting, primary vehicular access should be taken from the Liverton Business Park. Any secondary access from Salterton Road should be carefully designed and screened to minimise any impacts on the setting of the National Landscape. Existing hedges to the southern and eastern site boundaries should be reinforced and appropriately managed and additional trees planted.”

3West Developments remain supportive of the allocation and are fully committed to delivering the policy as drafted. 3West can confirm that the site is suitable, available, and deliverable. The company is actively progressing ongoing technical work, including the preparation of technical reports and will be progressing pre-application and consultation. 3West Developments is located approximately 5 miles from the site and is fully committed to the site's deliverability. However, we propose a small number of text amendments to ensure the policy operates effectively in practice:

- The policy wording should explicitly recognise that there may be circumstances where the removal of hedges and/or trees is necessary to enable an appropriate and viable scheme to come forward, and that any such loss should be weighed within the overall planning balance.
- The policy currently requires that development within the Mineral Consultation Area must be designed so as not to constrain any potential future mineral extraction. 3West Developments consider this to be overly restrictive. Instead, where discussions with the Minerals Authority conclude that the area is not suitable for mineral working, it should not be unnecessarily sterilised from development. The policy should be amended to reflect this position and provide greater flexibility.
- In relation to heritage, we consider the inclusion of the term 'extensive area' within the draft policy to be unnecessary and recommend its removal to ensure the policy is

sound. The extent of land to be kept free from development should instead be determined through the detailed heritage assessment required by the policy.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Our attendance is necessary to effectively discuss the points raised in these representations.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

2.23 3West Developments note the changes made to Policy SD01 since previous consultation stages and welcome the additional clarity provided in respect of heritage, biodiversity, minerals safeguarding and access considerations. The majority of these amendments reflect matters already addressed, or capable of being addressed, through the St. Johns Vision Statement and Addendum submitted previously and therefore do not undermine the suitability or deliverability of the allocation.

2.24 3West Developments are committed to the delivery of this site and can confirm that the draft allocation is deliverable. Heritage

2.25 3West Developments note the strengthened requirement for a detailed heritage assessment, explicitly referencing St John in the Wilderness church, and the establishment of an 'extensive' area around the church within which built development will not be permitted.

2.26 3West, however, consider that it is unnecessary for the word 'extensive area' to be included within the draft policy and recommend that this is omitted to ensure the policy is sound. The area of land to be kept free from development should be informed by the detailed heritage assessment required by this policy. An area of land has been kept free

from development around the church as indicated within the Vision Statement and Addendum, which has been informed by the Site's technical assessment and demonstrates how development can be concentrated in the southern parts of the site while preserving the setting and significance of the church. The allowance for open space (non-sports pitch uses) within this area, subject to no adverse heritage impacts, is welcomed and will assist in achieving high-quality placemaking. Minerals Safeguarding

2.27 3West Developments acknowledge that the northern parts of the site fall within a Mineral Safeguarding Area and a wider Mineral Consultation Area as defined in the Devon Minerals Plan. 3West Developments note the requirement for a Mineral Resource Assessment and, where appropriate, prior extraction. While the importance of safeguarding mineral resources is recognised, it is considered important that these requirements are applied in a proportionate and pragmatic manner, reflecting the likelihood of extraction being economically viable and deliverable within the plan period. Early engagement with the Mineral Planning Authority, as recommended by the policy, will be undertaken to ensure that mineral considerations do not unnecessarily constrain or delay development. The policy also indicates that development in the Mineral Consultation Area must be designed in a way to not constrain any future mineral working. 3West Developments disagree with this rigid approach and consider rather, should discussions with the Minerals Authority confirm that this area is not suitable for mineral working, then the area should not be sterilised from development. This should be reflected within the policy wording and flexibility introduced accordingly. Access Through Safeguarded Area

2.28 The explicit exception allowing for the provision of an access road and associated footway/cycleway through the safeguarded area, subject to sensitive design is also welcomed. This reflects the essential role of this infrastructure in delivering the site and supports sustainable transport objectives. 3West Developments can confirm that this is reflected within the current concept masterplan. Tree and Hedgerow Retention

2.29 The Policy requires existing hedges and trees within the site to be retained and reinforced with additional planting and habitat creation. 3West Developments are developing a scheme that will seek to meet this policy objective, however, strongly consider that the policy should be reworded to state 'where possible'. There must be acknowledgement within the policy wording that there may be instances where hedges and/or trees are required to be removed to allow for a suitable scheme to be delivered, and any loss must be considered in the overall planning balance.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

McMurdo Land Planning and Development Ltd on behalf of Stuart Partners Ltd.

Policy SD01 allocates Exmo_20 for social and community facilities, 700 homes and 2ha employment land. The north eastern part of Exmo_20 is within the Mineral safeguarding Area (MSA). Whilst the SA suggests that the presence of the MSA within this allocation is of limited concern, this conclusion fails to consider the buffer which will be required between any permanent development and any mineral working and the implications for site capacity and deliverability. It is relevant that Devon County Council (DCC) has objected to this allocation on the basis that it has the potential to sterilise underlying sand and gravel and constrain future working within parts of the MSA inconsistent with the NPPF and Devon Minerals Plan. Whilst DCC have recommended steps to address this concern, the policy amendments do not reflect these recommendations. Despite allocation, the deliverability and capacity of this site is questionable in the absence evidence to address DCC's objection

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::

Exmo_4a, Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The developability of sites

6.7 Whilst a detailed assessment of the developability (or deliverability) of sites has not been undertaken for the purposes of these representations, given that the position will change on an ongoing basis up until this is examined, the preceding charts illustrate that the supply is likely to be materially lower than suggested in the emerging Local Plan.

6.8 Indeed, it is immediately apparent from the emerging Local Plan that a number of proposed allocations face significant challenges which will need to be overcome in order for these to be developed including for example at Land at St John's (Exmo_20).

6.9 Strategic Policy SD01 identifies that if this proposed allocation is to be developed, it will need to provide an extensive area of land around the Grade II* Listed St John in the Wilderness Church in the western parts of the site to avoid unacceptable harm to this heritage asset. This is explained in greater detail in the Site Selection Report Addendum which identifies that the development of this site has the potential for significant heritage harm which will necessitate either the exclusion of the most harmful parts of the site from the allocation or a policy requirement to restrict the use of these areas to non-harmful uses. On either basis, the Addendum recognises that dependent on the extent of other constraints this may reduce the number of homes that may be deliverable on this site.

6.10 Strategic Policy SD01 also indicates that the northern parts of this site are within a Minerals Safeguarding Area such that these areas should not be developed unless it is

demonstrated that the mineral resource is not of current or potential economic value.

R001v1 | NT | January 2026 17

6.11 The Policy also identifies that parts of the site are of biodiversity importance which will need to be protected and enhanced. These included unconfirmed wildlife sites which run cover sections of the western and eastern parts of the site, and which will be unable to be developed.

6.12 The Policy also recognises that no development should occur within 400m of the Pebblebed Heaths SAC/SPA which covers a significant proportion of the northern part of the site, and that owing to the proximity of the site to these designations, SANGs will need to be provided which is likely to further constrain the amount of developable land.

6.13 Similarly, the Policy requires an appropriate buffer to be maintained along the north-east of the site to conserve foraging areas for nightjars and that this buffer will also be required to ensure that the development does not adversely affect the setting of neighbouring East Devon National Landscape to which great weight should be afforded as set out in paragraph 182 of the NPPF.

6.14 The Policy then also requires that the development provides heathland in the north-eastern part of the site as landscape enhancement.

6.15 The Policy then proceeds to identify the potential for unacceptable adverse highways impacts which will need to be resolved before any development can come forward.

6.16 In light of these numerous constraints, substantial parts of the site will be unable to be developed. This in turn places doubt on the viability of the delivery of any homes on this site, but even if it is able to be demonstrated that some homes could be delivered, firstly these wouldn't be expected to contribute to the supply for an extensive period whilst these numerous constraints are resolved, and secondly it is likely that far fewer than 700 homes would be able to be acceptably accommodated in any event.

6.17 Whilst Land at St John's is just one example, it provides an indication of the fact that as has proved to be the case historically, fewer homes will be delivered than anticipated by the housing trajectory, such that the emerging Local Plan will need to provide sufficient headroom to allow for this, and based on the preceding analysis a 9.7% headroom will be grossly insufficient.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 – Land at St. Johns The above increase at Exmo_04a is considered to be doubly important, considering the very serious concerns that have been raised over the deliverability of the Land at St. Johns, certainly in terms of the overall quantum. Significant concerns have been raised by local residents and key stakeholders, particularly with regard to heritage impact, impact on mineral resources and possible impact on the National Landscape. Whilst this is recognized in the supporting text relating to Exmo_20, these issues are yet to be resolved and must cause considerable doubt to be raised over both the quantum of development that can be delivered and also the timescales for its delivery. Taking all of the above into account, whilst the proposed allocation at Exmo_04a is supported in principle, the overall quantum should be increased in order to assist with the additional housing need requirements emphasized within the Pegasus' report, along with the significant concerns over the deliverability of other proposed allocations, in particular Exmo_20 (Land at St. Johns). I trust that the above is satisfactory but please do not hesitate to contact me if you have any queries. Yours faithfully,

Exmo_04a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_04a – Land at Marley Drive, Exmouth Rubix maintains its support for proposed allocation Exmo_04a (Land at Marley Drive, Exmouth) in principle. However, as advised in representations submitted previously, it is considered that the proposed quantum of c.50 dwellings is insufficient as the site can accommodate significantly more than this, taking into account the site characteristics and constraints. Rubix submitted an outline planning application in February 2025, seeking approval for residential development of the above site for up to 130 dwellings, public open space, landscaping, sustainable urban drainage system and engineering works, with vehicular access off Higher Marley Road (Application ref: 25/0078/MOUT). The Concept Masterplan submitted with the application (Ref No: RS402/120 Rev.H – attached), illustrates how the site can be developed for this higher quantum, whilst retaining significant areas of parkland and incorporating additional tree planting to mitigate for the small loss of existing trees required to accommodate the development. The Plan also allows for pedestrian/cycle links, both to the adjoining proposed allocation (Lymp_14) and the existing development at Goodmores Farm. The Concept Masterplan has had significant regard to various surveys undertaken in respect of ecology/biodiversity, landscaping and arboriculture, and has been designed to ensure that the development maintains the overall landscape/parkland character of the site. The loss of parkland on the site can be adequately mitigated through the provision of new parkland elsewhere within the District and arrangements are in place to secure this. Consultee responses received to

the above planning application indicate that the principle of developing the site for c.130 dwellings is acceptable. Responses can be summarized as follows:

1. Highways – no objection, subject to conditions. Access onto Higher Marley Road is acceptable
2. Natural England – no objection
3. Contaminated Land officer – no objection, subject to conditions
4. Environmental Health - no objection, subject to conditions
5. Housing Enabling Officer - no objection, subject to conditions
6. County Archaeologist - no objection, subject to conditions
7. South West Water – no objection Rubix is currently in discussion with the Council's ecologist, arboriculturist and landscape officers regarding the layout and it is anticipated that amendments to the scheme will overcome current concerns. Minor issues relating to drainage are also in the process of being resolved with the LLFA.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Rubix maintains its view that an allocation of c.50 dwellings fails to make efficient use of the site in terms of achievable residential densities, considering in particular its very sustainable location on the edge of the Tier 1 settlement of Exmouth. This is clearly a suitable and available site, with the outline application also emphasizing its short-term deliverability. In addition, East Devon DC cannot currently demonstrate a five-year supply of housing land, falling well below this target at just 2.97 years (December 2024). In such circumstances, and considering NPPF paragraphs 129 - 130, the Council should be seeking to maximise development densities at this proposed allocation, taking into account prevailing environmental and other constraints. In this regard, the Exmo_04a allocation is inconsistent with national planning policy and its overall quantum should be increased to around 130 dwellings.

1(c). If the comment is related to a site, please state the site reference here.:

Lymp_07, Exmo_20, Lymp_09, Lymp_10a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

[This representation also applicable to Development in the Towns and Villages chapter paragraphs 5.1 to 5.3]

As set out in previous representations we are disappointed that the Part 2 Regulation 19 Consultation continues to overlook additional opportunities for housing provision at Exmouth (including sites previously identified at earlier stage of the Plan). There remains significant capacity at Exmouth for a range of smaller sites to come forward that can benefit from existing infrastructure and accessibility. This would provide greater resilience to the Plan as a whole, particularly in light of the uncertainties around Marlcombe and other larger allocated sites.

Courtlands Cross (Lymp_07): We note no further changes have been identified to the Courtlands Cross allocation and support this. The current outline planning application for the site under determination by EDDC demonstrates how a design and landscape development on the northern edge of Exmouth can be achieved that delivers a number of clear benefits.

This includes energy efficient homes to meet local needs (including affordable housing); provision of recreational benefits through new sports pitches and a financial contribution towards a new club house; delivery of local employment opportunities; significant areas of landscaping and public space; provision of ecological habitat and enhanced pedestrian routes and connections to the wider network. The application has addressed all technical consultee comments and demonstrates that there are no outstanding constraints to development.

Land at St John's (Exmo_20): We, alongside other respondents to the original Regulation 19 Plan consultation raised significant concerns regarding the inclusion of the St John's site at a late stage of the Plan's preparation having been previously rejected on the basis of its constraints and uncertainty of delivery (as acknowledged by officers during the site selection process).

Our previous representations highlighted the following issues:

- The site's distance from existing services and facilities rendering it unsustainable;
- Increased separation as a result of the proposed northern access onto the B3179;
- The potential for rat running on unsuitable roads and capacity issues on the existing highway network;
- Ecological sensitivities given proximity to European sites and existing extensive woodland and wildlife sites within its boundaries;
- Harm arising from impacts on the setting of Grade II* St John's Church which contributes significantly to its special interest and is a designated asset of the "highest significance" and the likelihood of the developable area being significantly reduced as a consequence; and
- Uncertainties regarding the feasibility, viability and timing of delivering the essential infrastructure to support the site.

The Part 2 Regulation Consultation version provides additional text regarding most of the matters listed above, therefore recognising the importance of the above matters, but simply seeks to defer these critical matters to the need for further work and assessment. This further work should have been done prior to the allocation of the site and assumptions in terms of the acceptability of the site and its capacity for residential development. Assumed numbers are likely to be significantly reduced on the basis of the heritage, mineral and ecological constraints yet does not appear to have been taken

into consideration in the review of the policy and overall housing provision within the Plan.

Importantly a reduction in capacity will render the delivery of necessary infrastructure even less viable and prevent any redress of the site's distance and separation from existing services and facilities. Therefore, the Plan will not be promoting sustainable development.

The changes to the policy wording do little to address the fundamental concerns raised regarding this site, which received a substantial number of objections at the original Regulation 19 stage. We continue to believe that it is clearly a more sustainable strategy to deliver a range of sites which provide good access and connectivity options to existing services and facilities whilst offering opportunities for enhancement of existing infrastructure to support the growth of the town.

Land at Hulham Road (Lymp_09 and Lymp_10a): Given the uncertainties around St John's and Marcombe alongside other large allocations within the Plan, we are disappointed that the Part 2 Regulation 19 consultation version of the Plan continues to omit my client's site at Hulham Road. This is despite its identification in earlier versions of the Plan, officers' recommendation that it should be included in the Regulation 19 Plan and the supporting submissions previously made.

The exclusion of the site by Members on the basis of impact on trees and connectivity was unfounded as demonstrated by the current outline planning application for the site under determination by EDDC. This demonstrates how tree loss is minimal and sets out a number of improvements along Hulham Road that would significantly improve highway safety and the walking environment for pedestrians, as well as providing safe crossing points to the south to match desire lines that link to the existing footpath network. Importantly DCC Highways raise no objection to the planning application and no inherent technical constraints have been identified that would prevent the development of the site.

The site was also wrongly referred to during the site selection process as being within in the adopted Coastal Preservation Area (CPA) when it is not. Although proposed to be included in the CPA under the Emerging Plan, evidence has been provided that shows the site does not demonstrate visual openness or have views to and from the sea or to

have any visual connection that would warrant its inclusion in a revised CPA boundary. The review undertaken by Pegasus has been submitted as part of both the Regulation 18 and Regulation 19 Plan consultations.

Our position remains that there are no good reasons for the Plan not to allocate the Hulham Road site. It represents a logical extension to the town and will support a high-quality residential development alongside important highway improvements. It is a site that is relatively unconstrained nor overburdened by infrastructure requirements. The site can come forward quickly to support delivery in the earlier stages of the Plan period and provide much needed resilience to the Plan's strategy. Without having a range of sites within Exmouth the Plan will over rely on housing delivery from site's like St John's which are more constrained and difficult to bring forward, particularly given the significant uncertainties around the deliverability of that site as highlighted above.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

We believe further growth at Exmouth should be provided for through the allocation of further sites. This will underpin the Plan's strategy to ensure sufficient housing growth in the town throughout the Plan period, including at an early stage. The site at Hulham Road is unconstrained and has been identified as a preferred choice site based on its suitability. There are no impediments to its delivery and as such it can make an important contribution to the Plan. Policy SD01 should therefore be modified to include land at Hulham Road (Lymp_09 and Lymp_10a) as an allocation. Further work should be undertaken to underpin the allocation at St John's to address some of the clear delivery issues set out in these representations and raised as matters to be addressed within the relevant policy wording of the allocation. If these cannot be overcome and/or result in implications for quantum and delivery, then this does bring significant doubt as to whether the site should continue to be allocated.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To elaborate further on these and previous representations made on the Plan, including providing evidence to support the necessary Modification of the Plan.

Full name: Elliot Jones

Organisation (where relevant): Planning Potential

Other party name (if relevant): Bloor Homes

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::

Exmo_17

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Strategic Policy SD01 – Exmouth and Its Development Allocations Bloor Homes

continue to strongly support the allocation of Exmo_17: Land to the South of Littleham for 410 homes with 1.6ha employment space and supporting community uses.

Regarding this, please reference the representation submitted to the First Regulation 19 Draft. In terms of the minor changes to the policy, as set out in the Second Regulation Draft, we would comment as follows. The policy amended slightly in respect of its location within the East Devon National Landscape. It now states: 'The site is located in the East Devon National Landscape and particular sensitivity will need to be taken in respect of design and development approaches to conserve and enhance the natural beauty of the site and its wider landscape setting.' Bloor Homes support this minor change. The site's location within the National Landscape has driven the approach to the site's proposed development in discussions with EDDC, East Devon National Landscape and the local community. Bloor are acutely aware of the need to create a landscape-led development that reflects the sensitivity of the site and ensure the wider beauty of the National Landscape is conserved and enhanced.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: In addition, the following requirement is included within the allocation: 'New circular pedestrian and

cycle routes should be provided within the site, together with connections to the wider network, including the South West Coast Path and to local services in Littleham and to the Liverton Business Park.’ The provision of a new circular pedestrian and cycle routes is supported by Bloor Homes. The emerging masterplan for the site includes a new circular footpath and cycle routes through the site to ensure that there are wider connections to the wider network. The new cycle and pedestrian routes are at the heart of the accessibility and sustainability strategy to the site. Bloor Homes support this minor change.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear sir/ madam

I write in opposition of the above planning request.

The area in question backs on to my own field where I keep my horses so I know the land well.

I have a number of concerns with this proposal but will limit to 3 main areas:

Access Drainage Wildlife

Firstly, access to and from the site is to be via higher marley road. For planners unfamiliar with the area, the current access to the land is between oak trees (all with TPO's) so should not be able to be widened. All the oak trees along the hedge line (including my own) have TPO's and as such, will dictate the size of the access to the site. Access and egress is onto a bend in higher Marley road. The road is narrow and there are regularly small accidents on this corner as oncoming traffic meet traffic heading towards the common. It is further hampered by large trees overhead which

cause a great deal of shadow and so motorists can be driving in bright conditions to sudden shade and be faced with a car in the middle of the road.

I have permission (from the landowners of the land in question) to ride my horses in their field when conditions are suitable. Exiting from the gateway on to higher Marley Road is not a pleasant experience. Visibility between the bordering oak trees is extremely limited and cars travel far too fast. Despite copious amounts of high viz clothing on myself and my horse, it is difficult to see us at the gateway. My riding position means I am quite high up and have better visibility of oncoming traffic than car drivers would so have always been able to safely judge my exit. With the volume of traffic using a small lane, significant traffic from a new build site and coupled with numerous, almost daily small accidents at the bend it is difficult to understand why this proposal would even be considered. I strongly suggest planners take some time to visit the site, particularly in morning and evening ‘rush hour’ when higher Marley road is used as a cut through.

Drainage. Anyone who already lives on higher Marley road will attest the run off from Woodbury common is significant. Building on the site will only increase the problems of drainage. Planners are welcome to visit my own field and witness first hand the impact of water run off from the pebble bed heaths. The land in question, which I know well, is very wet and boggy as it takes run off from the common and surrounding areas. Building on this land would only worsen this.

Wildlife and conservation. This land is WOODPASTURE PRIORITY HABITAT. It is home to many endangered species, as detailed in the ecological report. Many are on red list. There are many veteran /ancient trees on site. The parkland pre dates the old mansion Marley House and was probably laid out when previous house ‘Whimsey’ was built in mid 1700s. Some of the oldest Luccombe Oaks in country are on this site. This site should have protections to stop building. National Planning Policy Standing Advice is that planning should be refused yet EDDC have put this forward for building. As well a parkland there is narrow field with ancient woods each side, this is a corridor for the wildlife. I am already seeing far more deer in my small field than ever before. Presumably displaced from ‘Goodmores’ . Further destruction of their habitat will drive them out, into gardens and surrounding areas. I have personally seen two killed this last year on higher Marley road as they were trying to cross to get into Bystock Woods.

I oppose this planning proposal in the strongest possible terms. This area of Exmouth is not built for the volumes of traffic it is already dealing with. Further development, without significant infrastructure improvements is, frankly, insanity.

I would be very happy to meet planners at my field and discuss all of these concerns.

Yours faithfully

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am emailing because I have given up in despair trying to use the Commonplace portal to comment on Exmo20 primarily but also Exmo17.

All my comments apply to both schemes but especially Exmo20.

It is a misnomer to call this Exmouth. It is in fact far nearer to Budleigh where the already stretched services especially medical and sewerage are already unable to cope.

The Exmo 20 site will maroon residents away from existing public transport and lead to extra traffic on already inadequate roads. It is no better than a B road.

The intention to build 22,000 new dwellings in East Devon by 2042 is an increase of 33%

The Infrastructure is unable to meet the needs of the current population which increased by nearly 14% between 2011 and 2021. This is greater than any other part of Devon and Cornwall.

This has lead to increased road congestion, more sewage in the sea, rivers and estuaries. There has been pressure on health, social care and education services. I can find no reference in the plan to the provision of these much needed improved services.

I am appalled by the impact both these schemes will cause to the unique environment and species in the acclaimed Pebblebed area.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am emailing my response to Exmo20 primarily, but also Exmo17, as I have found the commonplace portal is far from being user friendly.

All my comments apply to both schemes, but especially to Exmo20.

It is a misnomer to call this a proposal for Exmouth. The site is far nearer to Budleigh Salterton and accessed by a narrow B road running away from Exmouth.

Services and facilities in the small town of Budleigh are already stretched to breaking point. Sewerage and the constant threat of water and sea pollution are a particular issue in a town which has had no significant investment in infrastructure in years.

I can see no reference to the necessary infrastructure developments to mitigate any issues from day one of any building. The Exmo 20 site will maroon residents beyond walking distance to either Exmouth(4 miles to the centre) or Budleigh (2 miles) and lead to extra traffic on already inadequate roads. There will be a significant effect on air quality.

The intention to build 22,000 new dwellings in East Devon by 2042 is an increase of 33%. It is not clear which data/ figures ie local or national, have been consistently used in proposals , but it is an excessive number of houses for Exmouth and Budleigh.

The impact both these schemes will cause to the unique Pebblebed environment and species has not been fully addressed in the proposals. There will be significant damage to the unique area and considerable light pollution in an area that is currently dark. The development is on land rising upwards which means the lights will be seen far and wide and from the other side of the Exe estuary.

The proposal appears to be in conflict or at variance either many of the stated aims of the NPPF of December 23 and should be rejected and further reviewed.

A smaller development, with less damaging impact should be considered which ties the proposed housing to Exmouth.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the See Stop Exmo.20 Facebook page for full comments SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: In my opinion this development should be considerably reduced as the impact on the historical setting of the church, natural environment as well as the town itself will be immense. The infrastructure is already stretched to the limit. I presume the developer has drawn up a Sewage Management Scheme to ensure the network as a whole is not further overloaded as a result of the development? Also as far as I can see there is no visible access to the site. I suggest if this vast development goes ahead then the current 'Welcome to East Devon Area of Outstanding Natural Beauty' sign on the Exmouth to Budleigh Salterton be taken down, as it will be totally inappropriate.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: ***
Personal details have been removed ***

I object to the proposed planning of buildings on Exmo-17 in the local plan for the following reasons.

1. Large housing should not be built on National Landscape.
2. It would be cheaper to build more affordable houses on non National Landscape land.
3. exit from this site will cause traffic chaos.
4. Sewage system is not fit for purpose.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heath SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heath SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I would like to lodge a complaint regarding the outrageous plan to build so many many homes on what is considered a beautiful area with all the RSPB and other conservation orders on this land.

It is under National and International ecological protection. It's a special area of conservation. I can't understand for the life of me why anybody would choose Such a habitat filled, and environmentally beautiful piece of Land to demolish and fill with concrete.

I understand that the small pockets of Land which were available in Woodbury and Lympstone were probably uneconomical compared to a larger piece of Land, which would be more cost-effective. Unfortunately, this piece of Land is really really not suitable for building any home on.

Dinan way is becoming more of a Cranbrook, eyesore. There are houses they still unsold as there are in many other housing estates.

There are enough vacant premises i.e. shops flats and many more Brownfield sites which could be converted into living accommodation for those that need it. Obviously, this is not economical for most building companies so let's carry on and demolish whatever piece of Green land we have left.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It breaks planning rules: Exmo_20 goes against national planning policy, so the plan is unsound and not legally compliant. It makes protecting nature harder: With too many houses planned, the strategies needed to protect the Pebblebed Heaths SPA/SAC/SSSI don't make sense. Exmo_20 should be removed. There are errors in the evidence: Mistakes in the council's housing reports (HOU-002 and HOU-001) make the plan's housing policies unreliable. These errors need fixing, and the plan should go back out for consultation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It breaks planning rules: Exmo_20 goes against national planning policy and the Local Plan, so the allocation is unsound. Getting there relies on cars: The main road access is 2.3 miles from Budleigh Salterton and 4 miles from Exmouth. That means almost everyone would need to drive, increasing traffic and emissions. It doesn't fit the settlement hierarchy: Building here would put too much pressure on Budleigh Salterton and goes against the Local Plan's rules about how towns should grow. The council didn't fully check impacts: The Local Planning Authority didn't properly assess whether Budleigh Salterton could handle this extra housing or its effects on the town. Walking and cycling aren't realistic: The hills and the site's location make cycling or walking to shops, schools, or services impractical, which goes against sustainable transport policies.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It breaks planning rules: The Exmo_20 site goes against national planning policy and the Local Plan's transport policies. Because of this, the allocation is unsound. It would lock people into car use: The site is in a remote location, with the main access coming off the B3179. This means most residents would have no real choice but to drive everywhere, leading to more traffic and emissions. Walking and cycling aren't realistic: There's no clear evidence that people living here could easily walk or cycle to shops, schools, jobs, or services. Recent changes to transport policy say walking and cycling must be the first choice, which this site clearly doesn't support. The layout makes travel even worse: People living in the southern part of the site would have to drive over 1km just to get out of the development and onto the main road. That's a daily car trip before even reaching a destination, which shows how poorly designed and unsustainable the site is. Nearby towns would feel the strain: Extra car journeys would add pressure to

roads in Budleigh Salterton and Exmouth, going against the Local Plan's strategy for managing growth and transport.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It breaks planning rules: The Exmo_20 allocation goes against national planning policy and the Local Plan. Because of this, the site allocation is unsound. Flood risk has been downplayed: The council's flood assessment barely mentions Withycombe Brook, even though Exmouth has a long history of flooding, with major events in 1960, 1983, and 2012. The site could make flooding worse: Exmo_20 is undeveloped land above the town. Rainwater from this site would run straight into nearby streams and into Withycombe Brook, which flows through heavily populated parts of Exmouth. Building here increases the risk of flooding for people living downstream. Proper flood-risk checks weren't done: Planning rules require councils to choose sites that avoid flood risk wherever possible. That step wasn't properly followed for Exmo_20, meaning the site was selected without fully considering safer alternatives. Climate change hasn't been factored in: The flood risk assessment doesn't properly account for heavier rainfall

and more extreme weather caused by climate change, which increases the danger for future residents and existing communities.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
REMOVE EXMO_20 FROM LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It breaks planning rules: The Exmo_20 site goes against national planning policy and the Local Plan. Because it doesn't follow these rules, the allocation is unsound and shouldn't be included. It sits in a key nature buffer: Exmo_20 is inside a Strategic Nature Area that acts as a buffer between Exmouth and the Pebblebed Heaths, which are highly protected. The land supports Nightjars (a protected bird species) and forms part of a wildlife corridor linking habitats to the coast. Building here would damage nature protection goals: Development would weaken the purpose of the protected Heaths, break up important habitats, and harm features like veteran trees, ancient woodland, and hedgerows. It also conflicts with Devon County Council's planned Local Nature Recovery Area, due to be designated under the Environment Act. Wildlife experts strongly object: Devon Wildlife Trust says this site contains nationally important habitats and species, and that building here would cause serious harm to the integrity of the protected Heaths. Strategic Nature Areas are meant to be improved for wildlife,

not built on. It creates serious legal and planning problems: Exmo_20 cannot be developed without damaging internationally protected habitats. Because of this, its allocation directly conflicts with planning law and Local Plan policies and should be removed from the plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. REMOVE EXMO_20 FROM LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It goes against planning rules: The Exmo_20 site conflicts with national planning policy and Local Plan heritage policies. Because of this, the allocation is not sound. It would seriously damage an important historic site: Building a development of this size around St John in the Wilderness Church (a highly protected historic building) would harm its setting, the churchyard, and the remains of the surrounding Medieval Saxon settlement. The landscape would lose what makes it special: This area is valued for its remoteness, dark skies, and “wilderness” feel. Even with a buffer zone, that character would be permanently damaged. Historic England has raised concerns: Much of Exmo_20 sits within the church’s setting. A new access road from the B3179 on the northern side would make the harm worse and could open the door to more development pressure in the future. Better options haven’t been properly explored: Historic England recommends looking at other access options from the south, shrinking or reshaping the

site, or limiting the size and type of development to areas that are less sensitive and easier to justify.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It breaks planning rules: The Exmo_20 site goes against national planning policy and the Local Plan. Because it conflicts with these rules, the allocation is unsound and not legally compliant. There's no realistic way in or out: The main access would be from the B3179, but this would need major road changes that haven't been properly designed, costed, or approved by Devon County Council. Right now, there's no confirmed, workable access to the site. Traffic problems would get worse: Building here would push more traffic onto the B3179, increasing congestion and air pollution. That pollution would also affect the nearby Pebblebed Heaths, which are protected for wildlife. The council's own habitat assessment raises red flags: The Habitats Regulations Assessment says there isn't enough certainty to rule out harm to the Pebblebed Heaths

from air quality impacts. In simple terms, they can't prove this development wouldn't damage the site. The precautionary approach hasn't been followed: Planning and environmental law say harm should be avoided first, not dealt with later. Exmo_20 was allocated anyway, even though the risks aren't fully understood or avoided. High legal risk: The council's own mitigation strategy admits that mitigation can't be assumed without solid evidence. Because there's no scientific certainty that impacts can be properly mitigated, including Exmo_20 is legally unsafe.

Exmo_20 allocation conflicts with key national planning policies and the Local Plan.

Because it goes against these rules, the site is considered unsound and not legally

compliant. The wildlife buffer is too small: A 400-metre buffer from the Pebblebed

Heaths has been suggested, but science shows this isn't enough. Cats can roam more

than 2km, and even one attack can wipe out a Nightjar nest. This means the current

buffer doesn't properly protect wildlife and doesn't follow the precautionary approach.

It relies on plans that don't exist yet: Exmo_20 depends on a mitigation strategy and a

habitat assessment that haven't been completed. When impacts aren't fully

understood, planning rules say development should be pulled back. At the very least,

the land closest to the Heaths (including the 400m zone) should be removed from the

site. The land is important for protected species: The site provides feeding habitat for Nightjars, a protected bird species. Extra pressure from dogs, walking, and cycling hasn't been properly assessed at the site level, even though this is a known risk. Ecology experts are raising red flags: Groups like Devon Wildlife Trust, the RSPB, and the East Devon National Landscape Partnership all say a 400m buffer isn't enough. They've called for a major rethink of the site size, housing numbers, and boundaries, with development kept closer to existing settlements instead. Better options were available: There are other sites that could deliver housing with fewer environmental impacts, especially since the plan already includes more homes than needed due to outdated population data. This makes choosing Exmo_20 hard to justify. Natural England isn't satisfied: The policy is unclear about employment land and how buffers will work. Natural England recommends a stronger natural buffer along the B3179, moving development boundaries away from protected land, and securing green space through legal agreements to meet basic planning standards.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It breaks national and local planning rules: Allocating Exmo_20 goes against multiple national planning policies and the Local Plan. Because it conflicts with these rules, the site allocation is not sound and does not meet legal requirements. Nature protection hasn't been properly dealt with: The site sits right next to the Pebblebed Heaths, which are heavily protected for wildlife. There's no clear or proven plan showing how damage to habitats and species could be avoided or fixed. The council's own habitat assessment says there is an "inherent conflict," and there's still no solution. The law was applied in the wrong order ("People over Wind" breach): Exmo_20 was approved before the legally required Appropriate Assessment was completed. This goes against the precautionary approach set out in the "People over Wind" court ruling (and is also

relevant to the “Dutch N” case), which says impacts on protected sites must be fully assessed before a site is chosen. Better sites were ignored: Planning rules say that if a site needs major mitigation, the council must show it has considered better options first. That didn’t happen here. Other sites that caused fewer environmental problems were available, but they weren’t properly assessed. Too many houses are already planned: The housing numbers are based on outdated population data, meaning the plan includes more homes than are actually needed. This removes any argument that Exmo_20 is required to meet housing demand. Real damage to local wildlife is likely: Devon Wildlife Trust has said the site acts as a buffer for nearby protected land. Building here would shrink and damage important habitats, even though they sit just outside the official protected boundary. The council failed in its legal role: As the “Competent Authority,” the council has not properly carried out its legal duties to protect wildlife under habitat and species regulations.

REVISIT THE SITE ALLOCATIONS WITH THE ACTUAL FACTS

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Why Exmo_20 shouldn't be in the plan It failed from the start: Exmo_20 failed the 2022 HELAA assessment, which means it should have been rejected straight away. Because of that failure, it should never have been considered for development at all. The site was recreated after it failed: After Exmo_20 failed, two new sites (Exmo_20a and Exmo_20b) were created in November 2022 to get around that failure. ***** approved Exmo_20a even though officers advised against it, then later merged both sites back together and called it Exmo_20 again. ***** were shown misleading maps: The maps used to support the decision included land that isn't available, homes that already exist, and even a church with a graveyard. This made the site look much bigger and more suitable than it really is. Important environmental protections were left out: The site's protected

environmental designations (SAC/SPA) weren't shown, and its closeness to Budleigh Salterton was ignored, even though both are highly relevant. Rules to protect nature were broken: The site was chosen before the legally required Appropriate Assessment was completed in January 2025. The Habitat Regulations Assessment even says there is an "inherent conflict" with protected habitats, and that conflict still hasn't been resolved. This goes against the "People over Wind" legal ruling. False claims were made in official documents: The Regulation 19 Sustainability Appraisal wrongly said Exmo_20 passed the HELAA, which isn't true. The rules were changed after the fact: A May 2022 Site Selection Methodology clearly ruled out sites like Exmo_20 that failed HELAA. That document was later removed and replaced in December 2024 with a new version that suddenly allowed failed sites to be allocated. Evidence was changed during consultation: Key evidence documents were altered while the public consultation was still ongoing. On top of that, the plan already includes more housing than the district actually needs, which weakens any argument that this site is "necessary." High legal and planning risk: Because of all these procedural mistakes, misleading information, and legal problems, allocating Exmo_20 is unsafe, unsound, and not compliant with planning law. (I think I may have submitted this under the wrong email address - didnt realise an email address was already logged in thanks

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Policy conflict: Exmo_20 allocation conflicts with NPPF (Dec 2023) paragraph 16(d); the Plan is therefore unsound and not legally compliant. Housing over-supply: The Plan uses outdated ONS data (Feb 2025) rather than the latest 2024 ONS figures, resulting in an inflated housing figure (1,188 vs 1,156; 22-year requirement 20,342). Over-allocation undermines any overriding need justification for development, including Exmo_20. Mitigation hierarchy implications: Incorrect housing figures remove justification for multiple mitigation strategies required to protect Pebblebed Heath SPA/SAC/SSSI; Exmo_20 should be removed. Evidence errors: Numerical and mathematical errors in HOU-002 (Oct 2025) and HOU-001 (Nov 2025) compromise the Plan's housing policy foundation and require correction and reconsultation. Clarity and unambiguity: NPPF

16(d) requires plans to be clear so decision-makers understand how to respond to development proposals; current errors and inconsistencies violate this principle.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Policy conflict: Exmo_20 allocation conflicts with NPPF (Dec 2023) paragraph 109, Local Plan policy TR01, and paragraph 11.6; allocation is therefore unsound. Access and distance: Primary vehicular access is 2.3 miles from Budleigh Salterton and 4.0 miles from Exmouth, highlighting reliance on private vehicles. Settlement hierarchy: Allocation would overwhelm Budleigh Salterton and conflicts with the Local Plan settlement hierarchy. Local planning oversight: Budleigh Salterton's capacity and impacts were not adequately considered by the LPA in assessing the site. Sustainable transport limitations: Local topography and site location make cycling and walking impractical, contrary to sustainable transport policies, not evident on policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Policy conflict: Exmo_20 allocation conflicts with NPPF (Dec 2023) paragraph 32 and is therefore unsound. Retrospective SSM changes: The Local Planning Authority altered the Site Selection Methodology (SSM) after 11 Dec 2024, presenting a December 2024 version in the Regulation 19 evidence library that was not used for site selection, falsely claiming it was, with no record of the original May 2022 version. Nolan Principles risk: Retrospective alteration and misrepresentation of evidence may breach the Nolan Principles of public life. HELAA failure: The original May 2022 SSM disqualified Exmo_20, as it failed the HELAA stage for suitability and achievability, including sites within 400m of Pebblebed Heaths SAC. Procedural unsoundness: Exmo_20 was

included despite clearly failing Stage 2 site sifting criteria, undermining transparency and proper plan-making.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Policy conflict: Exmo_20 allocation conflicts with NPPF (Dec 2023) paragraph 170b and Local Plan paragraph 3.6 and policy AR01(b); allocation is therefore unsound. Flood risk: Strategic Flood Risk Assessment (Level 1) only mentions Withycombe Brook in a footnote; Exmouth has multiple historic flood pathways (1960, 1983, 2012). Site vulnerability: Exmo_20 is greenfield land above the town, with tributaries and surface water runoff flowing directly into Withycombe Brook, which passes through densely populated wards. Procedural failure: The Local Planning Authority has not applied the required sequential, risk-based approach to site selection to avoid flood risk to people and property, contrary to national policy. Climate change impact: Flood risk assessment

does not account for current or future climate change effects, increasing the potential hazard to residents.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Policy conflict: Exmo_20 allocation conflicts with NPPF (Dec 2023) paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191; also conflicts with Local Plan policies PB01–PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24. Allocation is therefore unsound.

Strategic Nature Area: Exmo_20 lies within SNA 368, an important buffer between Exmouth and the internationally and nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting Nightjar foraging (SPA qualifying species and Section 41 priority species) and a wildlife corridor to the coast. Conservation risk: Development would undermine conservation objectives of the SPA, fragment habitats including veteran trees, ancient woodlands, and hedgerows, and conflict with Devon County Council's upcoming Local Nature Recovery Area designation (March 2026) under the

Environment Act 2021. Expert ecological advice: Devon Wildlife Trust states the site contains nationally important habitats and species, and development would cause significant adverse effects on SAC integrity. SNAs should be enhanced, not allocated for housing. Legal and planning implication: Exmo_20 cannot be developed without harming internationally designated habitats; its allocation is therefore incompatible with NPPF and Local Plan policies and should be removed.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Policy conflict: Exmo_20 allocation conflicts with NPPF (Dec 2023) paragraph 206 and Local Plan policies HE02 and OL01(D); allocation is therefore unsound. Heritage impact: Development of this scale surrounding St John in the Wilderness Church (Grade II* listed) would cause significant harm to the church's setting, its churchyard, and the surrounding Medieval Saxon settlement. Landscape and character: The area is defined by remoteness, dark skies, and a 'wilderness' character, which would be irreversibly harmed even with a buffer zone. Historic England concerns: Exmo_20 covers land within the church's setting. A northern access road from the B3179 would further harm the setting and increase future development pressure. Mitigation / alternatives: Historic England recommends exploring alternative access from the south, adjusting the site

boundary, or restricting the scale and type of development to what can be justified in less sensitive areas.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Policy conflict: Exmo_20 allocation conflicts with NPPF (Dec 2023) paragraphs 16c, 92, 114b, 114d, 180e & 181, and Local Plan paragraph 3.6, policies TR01, OL09, PB04, and paragraph 11.2; it is therefore unsound and not legally compliant. No viable access: Primary access proposed via the B3179 would require major, uncertain, and uncosted highway works, not confirmed by Devon County Council. Cumulative impacts: Traffic along the B3179 would increase congestion and air pollution, affecting the Pebblebed Heaths SAC/SPA. HRA concerns: The Habitats Regulations Assessment (18.11.25) confirms “currently not sufficient certainty to rule out adverse effects in integrity...air quality” for the Pebblebed Heaths. Precautionary approach & mitigation hierarchy: Allocation contradicts the required precautionary approach and the Environment Act

2021's mitigation hierarchy (avoidance over mitigation). Legal risk: The Mitigation Strategy confirms "mitigation cannot be assumed without evidence" (People over Wind; Sweetman). Inclusion of Exmo_20 is therefore unlawful, as no reasonable scientific certainty exists to support mitigation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. REMOVE EXMO_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Policy conflict: Exmo_20 allocation conflicts with NPPF (Dec 2023) paragraphs 16c, 32, 181, 185, 186b & 188; also conflicts with Local Plan paragraph 3.6 and policies PB01–PB04, OL02. The allocation is therefore unsound and not legally compliant. Habitat and species risk: The site borders Pebblebed Heaths SAC/SPA/SSSI. Providing SANGS of sufficient quality and convenient location is unlikely to prevent residents from using the Heaths for dog walking, cycling, and other recreation, causing harm to protected habitats and species. Nightjar predation risk: Research shows “just one event leading to predation is enough to end a nesting attempt” (Langston et al., 2007). Without evidence mitigating this risk, the LPA must apply the precautionary principle. RSPB concerns: Mitigation for sites near the Heaths,

especially Exmo_20, is unlikely to be effective. Risks include: Loss of foraging habitat
Land-use change from farmland to public open space Increased cat predation on
ground-nesting birds Increased recreational pressures (dogs off leads, cycling, walking)
Insufficient SANG provision: RSPB note a high risk that proposed SANGs and public
open space will not prevent damaging levels of recreation from new residents. Proximity
to Heaths: Policy SD01 prevents development within 400m of the Pebblebed Heaths,
but there is no way to prevent human or cat access. Risk increases the closer dwellings
are built to the Heaths.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: TO ENSURE CORRECT LEGAL PROCEDURE FOLLOWED

You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
REMOVE EXMO_20 FROM PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
policy conflict: Exmo_20 allocation conflicts with NPPF (Dec 2023) paragraphs 16c, 32, 73b (footnotes 7 & 38), 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c; also conflicts with Local Plan paragraph 3.6 and policies PB01–PB04, OL02. It is therefore unsound and not legally compliant. Insufficient buffer: A minimum 400m buffer from Pebblebed Heaths SAC/SPA/SSSI is proposed, but scientific evidence shows cats can roam over 2km and even a single predation event can destroy a Nightjar nesting attempt. Current mitigation is therefore inadequate and inconsistent with precautionary principles. Reliance on untested mitigation: Exmo_20's inclusion depends on a mitigation strategy and HRA that do not yet exist. Without these, a precautionary approach requires removing at least the 400m of land adjacent to the Heaths. Significance of the site:

Exmo_20 contains functionally linked foraging habitat for Nightjar (SPA qualifying species and Section 41 priority species). Recreational pressures (dogs off-leads, cycling, walking) are not assessed at site level. Professional ecological concern: Multiple bodies (DWT, RSPB, East Devon National Landscape Partnership) state a 400m buffer is insufficient, recommending significant reassessment of scale, housing numbers, and boundaries, with development concentrated closer to existing settlements. Mitigation hierarchy and alternative sites: Allocation is hard to justify given multiple viable, less mitigation-reliant sites exist and housing numbers are over-allocated due to use of outdated ONS data. Natural England recommendation: Policy is unclear on employment uses and buffer provision. NE recommends a natural buffer along the B3179, pulling settlement boundaries away from the SAC/SPA, and securing green space via S106 agreements to meet sound planning requirements.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Failed HELAA assessment: Exmo_20 did not pass the initial 2022 HELAA, automatically failing site sifting; it should never have been considered for allocation. Post hoc site creation: Exmo_20a and Exmo_20b were created in November 2022 to circumvent the HELAA result; councillors allocated Exmo_20a against officer advice and merged it with Exmo_20b to form Exmo_20. Misleading information: Site maps presented to councillors included unavailable land, existing houses, and a church with graveyard, exaggerating site size and availability. Omission of environmental designations: SAC/SPA designations were not shown; site's proximity to Budleigh Salterton ignored. Breaches "People over Wind" ruling: Site was selected before the Appropriate Assessment (Jan 2025), despite HRA noting an "inherent conflict" with protected habitats, which remains unresolved. False statements in evidence: Regulation 19 Sustainability Appraisal incorrectly claimed Exmo_20 passed HELAA. Post hoc methodology: May 2022 Site Selection Methodology (disqualifying Exmo_20) removed; replaced with December 2024 version allowing failed sites to be allocated. Mid-consultation evidence changes & housing over-allocation: Evidence documents were altered during consultation; total housing exceeds district requirement, undermining any "overriding need" justification. Legal and soundness risk: Procedural, factual, and legal irregularities render Exmo_20's allocation unsound and non-compliant.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally

compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

remove exam_20 from local plan

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Policy conflict: Exmo_20 allocation conflicts with NPPF (Dec 2023) paragraphs 16c, 32, 73b (footnotes 7 & 38), 180d, 180e, 181, 185a, 186b, 188 & 191c, and Local Plan paragraph 3.6, policies PB01–PB04 and OL02; therefore it is unsound and not legally compliant. Habitat mitigation uncertainty: The site is adjacent to Pebblebed Heaths SAC/SPA/SSSI, and mitigation for habitats and species has not been shown as achievable or viable. Plan HRA states “there is inherent conflict” and no means yet exist to mitigate the risks. Procedural breach – “People over Wind”: Exmo_20 was allocated on 3 Sept 2024, approved in the Regulation 19 draft on 11 Dec 2024, before the Appropriate Assessment in the 30 Jan 2025 HRA, contrary to the CJEU “People over Wind” and precautionary approach requirements, also relevant to the “Dutch N” ruling. Failure to apply Mitigation Hierarchy: NPPF paragraph 32 requires allocations with known mitigation needs to be justified against the hierarchy. LPA has not undertaken this assessment; other viable, less mitigation-reliant sites existed. Housing over-supply: The plan uses outdated ONS data, leading to over-allocation and undermining any “overriding need” justification for Exmo_20. Ecological impacts: Devon Wildlife Trust notes the site acts as an ecological buffer; development would degrade and reduce supportive habitats outside designated boundaries. Competent Authority failings: The LPA has shown widespread failures in its duties under the Conservation of Habitats and Species Regulations.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to object to policy Exmo_20, housing allocation on Woodbury Common near the archery club.

I live in Topsham and regularly visit neighbouring areas to the proposed allocation such as Bystock Nature Reserve and adjacent areas which have exceptional quality for wildlife, peace and quiet and the feeling that one is far away from urban life and able to commune with nature. This is magical, rare and should be protected. Even with a buffer zone on to the proposed new housing, the large number of new car journeys will be heard, the smell will be different. The countryside will be urbanised.

As there will be no jobs with the housing, this proposal will drive a large number of new car journeys daily through Woodbury Common and probably into Exeter, adding to the already overloaded roads. If each house has 2 cars (some may have more) that will be 1,400 x 2 journeys per day = 2,800 new car journeys.

I imagine there will be negative impacts on access to services such as GPs and dentists in Budleigh, Exmouth, Woodbury and Topsham. It is already very very difficult to see a doctor at the GPs in Topsham as a result of new housing.

Is it not possible to build flats - rather than houses - at high densities on another site to increase the housing figures to meet your targets? There are too many detached executive style houses being built around Exeter as it is.

There is little benefit to communities left in planning if it cannot protect exceptional landscapes such as this. It has become simply a regulator for the private sector to do what it wants. *** Personal details have been removed ***, where are you when we need you?

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to object to the proposed development at Exmo-17 for the following reasons:

1. Large housing estates should not be built on National Landscape - this is an area of outstanding natural beauty and as such everything possible should be done to protect it

2. Building on land outside the national landscape would be cheaper therefore making it possible to build more affordable homes which is what the area needs.

3. The exit from this proposed site will cause chaos being so close to the Liverton park junction and Capel Lane which are both already busy

4. The access road for the site cuts across the very busy and much used cycle path therefore endangering its many users - children, elderly, cyclists, families etc The road / development would also necessitate the felling of a number of mature trees

5. The National Planning Policy Framework is clear that planning decisions should contribute to and enhance the natural and local environment, including by protecting and enhancing valued landscapes. National Landscapes are afforded the highest status of protection in relation to landscape and scenic beauty, reflecting their importance under long established legislation. In practice, permission for development in or affecting these areas can only be granted by the local planning authority, a national park authority where relevant, or the Planning Inspectorate acting on behalf of the Secretary of State, and only in exceptional circumstances. I do not believe the need to develop this area is an exceptional circumstance when other sites in East Devon are available.

6. The local sewage system is already unable to cope with the needs of current houses. Additional houses built on this site will cause further pollution issues.

7. There is no reason to build the proposed industrial buildings on this land. Logically they should be built on the trading estate opposite or Exmo-18, both of which have the same landowner

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I feel I must write to you concerning the ridiculous proposal for Exmo_20. I know the Government keep telling us we need more housing and they have to be built somewhere but surely not on an Area of Outstanding Natural Beauty; we already have Cranbrook and lots more huge building sites around Exeter, when the sea is full of sewerage, the roads are full of potholes and congested, the hospitals can't cope, the police can't cope. Do we need more concrete? - so more flooding not to mention the wildlife and precious open space. I hate to think what this area is going to be like in a couple of years and once it's done there is no going back!

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically

supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Exmo_20’s allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site’s and the local area’s topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between

plan- makers and communities...local organisations and statutory consultees. Paragraph 109 states that Significant development should be focussed on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Remove Exmo-20 from the local plan. made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear Sir/Madam,

Please find below my objections related to the EXMO_20 plan. Please ensure that my objections are included as part of the regulation 19 local plan consultation.

Kind regards,

*** Personal details have been removed ***

Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other

units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations.

Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging

habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.”

Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke,

R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John’s (Exmo_20)) that “new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths” there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands.”

Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which

must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a ‘wilderness’ setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that “Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March ’26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a

Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development.

Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

Objection 9 Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography

makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

Full name: Blain Bishop

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I would like to express my objection to the EXMO_20 plan for the following reasons.

Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply

of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations.

Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the

new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.”

Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s

allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands."

Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation.

Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I would like to express my objection to the EXMO_20 plan for the following reasons.

Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states "It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA" and the Plan HRA states "there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks." This site was selected on 03.09.24

(without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations.

Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as

dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.”

Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke,

R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John’s (Exmo_20)) that “new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath” there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands.”

Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heath. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality

(EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation.

Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a ‘wilderness’ setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that “Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified”

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the

Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development.

Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20’s B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the

southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

Objection 9 Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

I object to this development for environmental, heritage & due to the poor infrastructure it provides.

Kind regards

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

9.. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Judith Anne Bishop

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

9.. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Gary Ronald Bishop

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

9.. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Gary Ronald Bishop

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed -For Q4 select YES Skip Q4a and 4b

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Gary Ronald Bishop

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town

settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage

of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heath. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this

building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk

pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. 9.. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement

hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". POLICIES REFERRED TO IN SUGGESTED OBJECTIONS National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan- makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that

Significant development should be focussed on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, and which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscapes and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset from development within its setting should require clear justification. Assets of the highest significance, notably....grade I and II * listed buildings should be wholly exceptional.2nd Regulation 19 Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be permitted unless mitigation measures are established that can be shown to be effective

with clarity provided in respect of means and assurance of implementation. Where avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017 Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. PolicyTR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be Made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5 miles). Factors such as topography also influence walking choices. Paragraph 13.10 aims to protect irreplaceable habitats and important features. Paragraph 13.11 states that some habitats, including ancient woodlands and veteran trees are irreplaceable due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon

has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Gary Ronald Bishop

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

SUGGESTED OBJECTIONS TO EXMO_20 (V.7) 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development

within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20’s current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced

housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed

development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heath. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its

churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses

in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. 9.. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site

allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". POLICIES REFERRED TO IN SUGGESTED OBJECTIONS National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan- makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals, preference should be given to

accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, and which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscapes and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset from development within its setting should require clear justification. Assets of the highest significance, notably....grade I and II * listed buildings should be wholly exceptional. 2nd Regulation 19 Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be

permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017. Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. Policy TR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be Made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5 miles). Factors such as topography also influence walking choices. Paragraph 13.10 aims to protect irreplaceable habitats and important features. Paragraph 13.11 states that some habitats, including ancient woodlands and veteran trees are irreplaceable due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon

has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Paul Blackmore

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I would like my strong objection to the above, proposed development to be noted; for the following reasons;

(1) Large housing estates should not be built on National Landscape. (2) that building on land outside the National Landscape would be cheaper, making possible to build a bigger percentage of affordable homes. (3) that the exit from this site (Exmo-17) would create traffic chaos and the access road would go straight across the much-used Exmouth to Budleigh cycle/footpath, endangering users. (children/elderly/cyclists/families/dogs).

I would also like to add a further reason for my objection;

Clinton Devon ended the lease to Woodlands farm, of fields around Quentance farm, some 84 acres. There's a rumour that Clinton Devon is selling this land to Bloor Homes. If this is true, it indicates that Clinton and Bloor are confident that EDDC will allow them to build on another large tranche of protected National Landscape. This is the domino-effect that could happen if Bloor Homes are allowed to build a big estate on Exmo_17. This land is too precious to present and future generations for it to be destroyed.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitat and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocation against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site

boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would see precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed, as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significant greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape. As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduce housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed

Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPP December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6 policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. Clarke, R.T. (2007) 'What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*?' *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01

explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph

20).... we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development an associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified. 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 and 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It als conflicts with paragraph 3.6, policy AR01(b)of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathway with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook

currently has significant flood risk are without yet considering current and future impacts from climate change. The greenfield Exmo_2 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking and cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, use for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below: criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Pla The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local

area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". POLICIES REFERRED TO IN SUGGESTED OBJECTIONS National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan- makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significan adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigatio measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on locations which are o can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes.

Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife- rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, in which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscape and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset from development within its setting should require clear justification. Assets of the highest significance, notably....grade I and * listed buildings should be wholly exceptional.2nd Regulation 19 Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where avoidance of adverse impacts cannot be achieved proposals will only proceed if there is

no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impact. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017. Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. Policy TR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5 miles). Factors such as topography also influence walking choice. Paragraph 13.10 aims to protect irreplaceable habitats and important features. Paragraph 13.11 states that some habitats, including ancient woodlands and veteran trees are irreplaceable due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Chris Boorman

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I believe that this plan is wrong and should be stopped for the following reasons: 1. The infrastructure to support such a development simply does not exist in this part of Devon - our roads are too small for the 1,400 additional cars (estimated as two cars per household); We do not have enough Doctors and schools for the 2,800 additional humans (estimated at 2 adults and 2 children average per house); South West Water have no capability to support the existing community - let alone the additional 700 homes being built. 2. It is in conflict with many parts of NPPF and the local plan. Specifically, the allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. 3. It will negatively impact the Pebblebed Heaths - being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing

allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Please REMOVE Exmo_20 entirely from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Lisa Boorman

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I

wish to object to this part of the new local plan. I believe it should be stopped for the following reasons: 1. We do not have sufficient infrastructure to support the creation of 700 new homes at this location - our roads are small and will not support the additional 1,400 cars (averaging two per home); We do not have enough doctors and schools to support the additional 2,800+ people (averaging 2 adults and 2 children per home); South West Water do not have the capability to support the additional 700 homes (they are failing to support the existing housing stock here already). NO-ONE IS

GUARANTEEING THESE CAPABILITIES AHEAD OF THE PROPOSED DEVELOPMENT. 2.

These plans will negatively impact the Pebbled Heaths. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. Rare birds / bats and other animals will be impacted by this - with no agreed mitigation plan.

3. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and un-costed highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. 4. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing

development encircling it. 5. I also understand that Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b,

188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Richard Boud

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: There are a number of points I want to make about this scheme which will be hugely detrimental and contravenes a swathe of policies set up to protect existent transport, well being of those in the locale and the environment of the commons. I cannot think of a worse place to develop into housing. 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as

is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National

Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths". The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that "the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI, it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that "just one event leading to predation is enough to end that nesting attempt" [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that "In the RSPB's view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John's (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development". "The RSPB is very concerned that the St John's allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated

heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on the B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC

ENGLAND state in their response to the 1st Regulation 19 consultation that “Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to 1st Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the

NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts

with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". POLICIES REFERRED TO IN THE SUGGESTED OBJECTIONS National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan-makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the

protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, and which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscapes and nature conservation. Paragraph 206 states that any harm to the

significance of a designated heritage asset from development within its setting should require clear justification. Assets of the highest significance, notably....grade I and II * listed buildings should be wholly exceptional. 2nd Regulation 19 EDDC Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The only modification is a complete removal of Exm - 20 from the plan and quota system . It is highly detrimental and non compliant in toto.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I have outlined this above.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove thr scheme in toto . No modification is sufficient. As above .

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: As above

Exmo_04

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I grew up in Exmouth and have watched my home town grow into an unrecognisable sprawl . There are very few green and historic areas left now, and Exmo_04 is a prime example of such a space, existing against the odds. it is a highly precious ecological space to sustain the local wildlife and habitation growing there and tended for more than 200 years. Please respect them as last vestiges of eco diversity, a home for rare species, and an important part of Exmouth's character and history. I implore you to take this unique area out of the plan , which will save it from being unjustly wrecked for ever. It is completely irreplaceable.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear planning officer and EDD councillors,

I wish to object in the strongest possible terms to your current plan for Exmo_20 . I have lived in this area since 1966 , worked here, and seen housing exponentially encroach on our precious green fields, with key access roads becoming almost impossible to use at peak times due to increased urbanisation. We are now at a critical time to either preserve the health of our countryside and seaside way of life , it's iconic beauty and health , and our tourist industry, or see it sunk under a vast housing estate , which will kill off so very much. In particular , the Exmo _20 plan is patently disastrous. It must be halted and I implore you to lead on this , contrary to any quota imposed by central government. No justification on a projected balance of cost / benefit is logical. If you have nowhere else to put houses then it is even more important you do not spoil what we do have -where is there any net gain in that? You give houses to some and take away a living from others.

Here are my further in depth comments for which I have evidence and experience.

1. The site is almost adjacent to Pebblebed Heaths (aka our much beloved Woodbury common) and 2.3 miles from my town, Budleigh Salterton. Huge impact is inevitable on

us, and our traditional green farm scape. Pebblebed Heathland is deservedly an internationally double protected environment , much pressurised by urban life especially now, as Exeter is much expanded and yet another close-by town is on its way, namely Marcombe . A proposed 400 m buffer (the main mitigation suggested by the proposers) is way too small to mitigate any wildlife harm . Now and for the future . The urban, air and human pollution damage will be irrevocable .

It would be a devastating loss hereabouts and nationally since it is a gem of our county and region and no heathland area in the world is any more protected environmentally than this.

2. My second biggest cause for objection is the likelihood of actually cutting off the town of Budleigh S and its river Otter area , which the tax payer has recently helped to develop via LORP. I suspect ambulances will often struggle to get in and out at peak times as the roads have v limited capacity . Roads will therefore be at standstill . One exit road goes through a vulnerable historic conservation area of the town . It is regularly at a stand still even now. I say this as a medical doctor with experience of such ambulance / fire service threat and trauma.

Thank you for listening to the concerns of myself, and the whole town and indeed , the wider Pebblebed concerned charities . Please don't forget our responsibility to those who deserve a place to enjoy visiting away from urban stress feeding our tourist economy and lives already embedded here - the unspoilt town and its remarkable green setting .

We need you to act with courage and evidence- based conviction on this. Heavy hearts of councillors (as spoken of at the last meeting when, to my great horror, so many voted in favour) must be turned into resolve to draw lines away from community disaster.

Yours faithfully , *** Personal details have been removed ***

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: There are raft of policies that this plan transgresses on. please refer to the charities comments which include the RSPB the Devon wildlife trust and the CPRE. i am completely aghast that you could possibly consider any justification sufficinet for destroying much of our town, our livelihood and the Heaths. they are internationall protected . Visitors to the town will be ectremely compromised also. we are likely to face grid lock and roads are already a highly sensitive matter . They pass through conservation area and historic areas germain to our economy and town's livelihood and living spaces. no joined up thinking seems to have occured as regards the likely pressure on roads at standstill by the river (the only other exit from the town to Exeter) , the associated tax payers interest in the health and accessibility of LORP, the new eco tourism pressures and Marlcombe knock on effect we and the Pebblebed Heath face , as well as the other infrastructure issues this plan will grossly excacerbate.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: as above, nil. no mitigation is relevant . all should be axed.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant

detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Other party name (if relevant): N/A

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed

development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off

leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly

designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection to Exmouth-17

We both wish to object strongly as we believe the following:-

1 Large housing estates should not be built on National Landscapes.

2 If housing was built outside the area of N Landscapes it would be cheaper and the result is that a higher percentage of suitable houses could be provided.

3 I believe the exit from the proposed Exmouth 17 site would cause chaos and endanger life, plus create chaos due to crossing the busy and well used cycle path etc. Dog walkers, elderly people and children in particular.

4 The current infrastructure does not cope at all with what it has to deal with, in particular the SWW sewerage system which currently fails too regularly in Exmouth and Budleigh Salterton, dumping sewerage regularly into our seas plus leaching into our brooks and rivers. How can you possibly allow any more building in this area until SWW put this right.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Our objections to Exmo_20 are as follows:

To build these proposed 13000 new homes you will be destroying beautiful and peaceful heritage countryside within the National Landscape, with exquisite nearby common land to include the pebble bed area.

The proposed site is going to cause danger and chaos on the unsuitable road where entry and exit will be sited. Already it's a dangerous road to commute or drive on and cannot cope with further traffic on the road to get to Exeter, Exmouth or Budleigh Salterton. There are already frequent accidents and near misses on this road due to congestion, the fact it is a rural road and people getting impatient and overtaking dangerously, plus the frequent use of the road by heavy commercial vehicles etc.

In addition to the road congestion problems where grid lock is currently frequent NOW when trying to commute, even more serious in our estimation is the lack of a capable and sufficiently fit for purpose sewerage system. This system as I'm sure planners already are aware of is already SERIOUSLY failing, with sewerage regularly being discharged by SWW into our sea around Exmouth, Sandy Bay and Budleigh Salterton, with additional breaches into local rivers and brooks due to leaks and pumping station failures. The plans SWW have to remedy these serious problems will be years away from

preventing the disgraceful and unsafe seas we often cannot swim in due to high levels of E. coli etc. Putting further pressure on this weak and failing system by building housing here, with an already unfit sewerage infrastructure would be appalling, when the problem is already known and proven.

Finally, the proposed housing will only provide 4000 homes for social housing rather than what is actually needed for the 6000 people East Devon on the list currently.

This is not the correct place to be building for many reasons, the main ones we have listed above and we wish to object strongly against this proposed development.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: 1)

The infrastructure of Budleigh Salterton is not able to cope with such an increase in population, and would lead to Budleigh & Exmouth losing their separate identities 2) an alternative site should be selected, which would be more suitable, and not overwhelm Budleigh Salterton 3) the site is too close to the Pebblebed Heaths, a site of scientific importance 4) the Grade II listed St John's Church and burial ground would be significantly impacted by such a large housing development. 5) this plan would have a detrimental effect on the surrounding designated wildlife sites, and have a very bad effect on all the native species, isolate habitats, trees and hedgerows; an irreplaceable habitat which, once lost, is gone forever? 6) the ability of the water drainage system in this area is cope is very dubious, and can only lead to more flooding in the area 7) more traffic in a location already unable to cope! Exmouth, and soon Budleigh, are almost "no go" areas already; traffic queues, lack of parking and ghastly amounts of traffic are unacceptable.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objections to building on Exmo_17 (National Landscape):

Chapter 8: Housing Needs: The real need in Exmouth is for houses of mixed tenure, including social rent, for people on low wages. Has Exmouth Town Council's assessment of housing need been consulted? The vast majority of houses proposed for the prime site of Exmo_17 would be high-end, bought by people from outside the area. Past experience tells us that the number of affordable houses will likely be fewer than proposed.

Chapter 11: Sustainable Transport: The proposed estate on Exmo_17 would bring a further 800-900 vehicles onto local roads. The access road would be directly opposite the Liverton Trading Estate, which is a well-known bottleneck with queues of cars waiting to exit. A new roundabout has been proposed, plus two pedestrian crossings on the busy main road into and out of Exmouth. Traffic would be significantly held up at this point, causing increased air pollution and slowing drivers' progress. To reach Exeter, where the jobs are, the choice would be to drive there, or to catch two buses (passing every half hour) or to catch a bus plus a train.

Chapter 12: Landscape: Exmo_17 had two protections until EDDC, without any justification, recently removed its Coastal Preservation area status, despite hundreds of

objections from residents. It is a very large, precious area of National Landscape farmland that is protected against large-scale developments. EDDC's duty is to 'conserve and enhance' it. (***) Personal details have been removed (***) on behalf of the Housing Minister, (***) Personal details have been removed (***), has confirmed this in a letter to our MP, (***) Personal details have been removed (***), of 18th August 2025). In no way is building a large estate on Exmo_17 conserving or enhancing it. There is no reason to build the proposed industrial units on this land. Logically, they should be built on the Trading Estate opposite or Exmo_18, both of which have the same landowner. The proposed vehicle access road would go straight across the existing Exmouth to Budleigh cycle/foot path and would require the felling of mature trees and bushes. This well-used path gives safe, tranquil access to cyclists, dog walkers, children, recreational walkers and people in wheelchairs and on mobility scooters. We think this is dangerous and a loss of a peaceful amenity within the National Landscape. The landowner has recently terminated the lease to a nearby farm of National Landscape pastureland adjacent to Exmo_17. Could it be that they are hoping for a domino effect, building further estates on our irreplaceable National Landscape?

Chapter 15: Historic Environment: The proposed estate would be close to Littleham's medieval church where Lady Nelson is buried. There is also an old farmhouse on the perimeter (age?). These National Landscape fields are in plain view from the coast path that runs along the World Heritage Jurassic Coast.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The impact of 700 houses has not been considered sufficiently; there seems to be little thought regarding the infrastructure requirements to support this development.

The main issue is access using the existing B3179 which has dangerous hidden intersections (Western Ting Tong, Dalditch Lane, St John's Road). The B3179 is the main route from Budleigh Salterton through Woodbury to Exeter and the M5. The road is lined with mature trees on both sides and cannot be widened without destroying the associated wildlife. The plan states that there will be little use of cars because of the footpaths and cycle paths to be built, but this is ridiculous because the entrance opposite the Exmouth Archery Club is around 400 feet above sea level and only a few people may walk or cycle to the centre of Exmouth or Budleigh Salterton.

The integration of the traffic requirements including Budleigh Salterton, Woodbury and Clyst St George should be studied or is not evident in the planning documents. The connection with the A376 at Clyst St George in particular, is a frequent bottleneck.

Apart from access to the site the other impacts are: Rare wildlife on the adjacent and protected pebble heath, the destruction of woodland and hedgerows, the loss of valuable farmland, the need to consider the capacity of schools and doctors' surgeries and the already overloaded sewage treatment plants.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Big objection to the building of 410 houses on fields opposite McDonald's on Salterton Road Exmouth.

I did attend an open meeting at Bidmead a few months ago and asked a representative as to what he called affordable -£250,000 ??and he just walked away! Also, because it will go over the cycle path a lady representative said a bridge would most likely be built similar to one on their site in Exeter.

Bloor homes have a very poor reputation of just throwing up houses and do we need more houses as the ones being built on Dinan Way are still empty!

I will be really upset if it is given the go ahead - all those lovely fields, wildlife and views Gone!!! And still no affordable houses for local people.

Let's hope common sense will kick in.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing with respect to the proposed development of 410 homes and associated areas at the Littleham, Exmouth site and wish to record my objection to the plans.

1. The proposed development is within an existing area of the National Landscape and protected countryside (formerly an area of outstanding natural beauty).

2. The creation of these proposed homes will lead to a loss of the national landscape and greatly affect the enjoyment of existing residents and visitors to the area.

3. The water run off from the housing will inevitably cause flooding of the Littleham village area during heavy rain (as has occurred during 2025)

4. Sewage infrastructure is already struggling to cope with present demands leading to sewage pollution into the sea at Exmouth. This was significantly worse during 2025 and confidence in South West Water in improving the situation is very low.

5. Existing infrastructure in the Exmouth area is presently stretched and the addition of further homes in an already high populated area will only exacerbate the situation.

6. The provision of over 400 homes will negatively affect the landscape, biodiversity and tranquility of the existing National Landscape.

7. The national cycling network / footpath which is heavily used by residents will be severely impacted by an access road built to access the new development. This will inevitably lead to accidents and near misses when pedestrians and cyclists are in close proximity with vehicles.

I do hope that the planners, developers and land owners are able to take these valid points into consideration during the consultation process.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: David Brunwin

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km of on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling and walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate t consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Exmo_20 should be removed from the local plan for the reason stated in 3(b)

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnotes 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound and not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02, of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling and walking, which is also yet to be assessed at a site level and therefore

a precautionary approach must be applied at a strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable and less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan for reasons stated in 3(b)

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnotes 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c of the NPPF December 2023 and is unsound and not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02, of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore, selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable and less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a careless attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

reasons why this absolute monstrosity should not go ahead:

The extra pressure this is going to place on Budleigh and Exmouth in terms of: Schools GPs The roads Sewerage and drainage? The system can't cope now - as you well know!! 700 houses which will then no doubt become 1000+++ 700 houses = the likelihood of another AT LEAST 1000 extra cars coming and going on a daily basis! (I pity the cars that have to go in the Sidmouth direction because the road surface is simply appalling and extremely narrow. In the other direction, no doubt Woodbury will bear the brunt!! Employment? Who is going to live there?? The devastation of wildlife and natural environment. I believe it encroaches on pebblebed heath land! Flooding further into Exmouth, due to land above it being concreted over!! This is NOT the place for such a huge development!!

Apart from the obvious objections such as lack of infrastructure - sewers, schools, doctors, pharmacies, employment etc., this development is going to have a huge impact on Budleigh Salterton because it would be so close to it! Already in the summer months the access roads to Budleigh or Sidmouth due to the sheer volume of the traffic and huge numbers of people could spoil the unspoilt charm and attraction of Budleigh. We all know what happens when roads or developments take place - not longer afterwards, more will follow! I'm just wondering how long it will be before development will begin around the new link road off Dina's I believe the proposed site is close to pebblebed heaths, which are of special scientific value. What about the wildlife? And who is going to live there? I was told that the new town proposed near Exeter airport is accepting a large percentage of occupants from large cities. Will this have an impact on the demographic of Devon should a similar percentage in this development to satisfy this and the last government's loss of control on immigration. Also, we all know what happens once development begins - it leads to further development!! Take the development outside Budleigh on the E. Budleigh Road, which is being gradually extending! I'm sure once the link Road off Dinan Way is completed, development will follow shortly after!! We need to be protecting our farmland and green spaces.

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant

detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

Full name: Mathew Cairns

Other party name (if relevant): N/A

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

Other party name (if relevant): N/A

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed

development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Other party name (if relevant): N/A

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off

leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly

designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Full name: Edmund Cairns

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I believe that Exmo_20's allocation would overwhelm Budleigh Salterton's services and facilities in particular, and generate an unacceptable increase in traffic to/from both Budleigh Salterton and Exmouth to the significant detriment of both communities. As I understand it, the proposed access onto the B3179 would need major work which has not been properly costed and planned. But even with that work, the allocation would lead to unacceptable congestion on already busy roads and to air pollution. As I also understand, a host of expert organisations - the Devon Wildlife Trust, RSPB, Natural England and Historic England - have warned of unacceptable environmental and other impacts, and some have raised the possibility of reducing the scale and changing the boundary of the site to reduce some of them. But the key point is that the whole allocation is unsound because of its PROXIMITY to vital habitats, and at least as importantly its ISOLATION from existing communities and existing roads (and rail) that could cope with increased traffic.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Basically, remove Exmo_20 from the Local Plan. Substantially reducing its size, and avoiding access from the B3179 might mitigate the damaging impacts. But that doesn't get away from the key point that this allocation is too isolated from existing services and transport infrastructure that could cope.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The transport infrastructure is inadequate to handle the extra demand. The additional time and congestion will deter tourists and shoppers from visiting Budleigh Salterton, leading to a negative impact on commercial enterprises in Budleigh Salterton. The town is already struggling commercially, and this Development will make things worse, particularly during the construction phase when access to Budleigh Salterton by residents and visitors alike will be construction traffic.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Avoid using the B3179 to access the Development, including during construction.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The negative impact to Budleigh Salterton has not been addressed simply because of the pattern of the town boundaries.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Patrick Camp

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The road system from Clyst St George through to Budleigh Salterton is far too restrictive to handle further traffic. It already has queueing at the dangerous junction of the B3179 and B3180 and delays and accidents will increase exponentially with additional traffic. The proposed development will lead to accidents with consequent injury to people and financial impact.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The roads and junctions on the B3179 and B3180 must be improved to handle traffic flows safely and smoothly, or... Have no access to the site from the B3179

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The plan fails to address the impact to travelling to and from Budleigh Salterton and the M5. This includes additional congestion, travel time, pollution and, especially, road traffic incidents and accidents.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I write to object to the proposal of development Exmo_20. Firstly I would like to say how objecting is not an easy process -trying to find the relevant information on EDDC planning website is a nightmare & it is only through internet searches that I have found this email to send my objection to. The grounds I object on are; Sewerage issues - currently not adequately investigated or resolved for the existing local houses served. Environmental impact, negative irreversible damage to wildlife & their habitat, destruction of mature trees, loss of fields, which act as natural drainage & habitat for wildlife. Infrastructure is already overloaded. Roads are dangerous & congested, Dr's dentists, schools are already at maximum capacity. The area is AONB & should be protected as such! There are alternatives - redevelop old buildings that are not utilised, reduce second home ownership, look for sites not destroying natural green spaces - none of these have been explored.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We volunteer with CDE on the Pebblebed heaths and we feel it is bvery important to maintain these precious facilities. Building so many houses in such close proximity seems really shortsighted. Not only formthe point of view of the construction vehicles but also once finished the amount of increased traffic will be enormous.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We do need more housing in the area but it needs to be affordable and it needs to have to required infrastructure including schools , shops and adequate sewage systems to cope with so many more houses.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I

would like to object to the building of 700 homes nr St John in the Wilderness Exmouth..... between Budleigh Salterton and Exmouth. my objections are as follows;

- Damage to the heathland (SSSI) and close to the Pebblebed heaths. This would result in loss of wildlife habitat and be detrimental to animal wellbeing. Surely we should be protecting our open spaces and their animals and plants. This area is protected heathland. We will loose wildlife and plant species. The Pebblebed Heaths are a very highly regarded conservation site. It contains thousands of rare species and rare habitats.
- Loss of good agricultural land resulting in increased foodmiles which is detrimental to the environment and higher prices
- Increase in flooding caused by water run off from large concreted areas...already issues with drainage in heavy rain
- Insufficient old sewage system that already struggles to cope in both Exmouth and Budleigh. More housing waste would cause more issues which will effect both Budleigh and Exmouth. We have already seen a dip in tourists and it makes the sea unswimmable in again directly affecting locals and tourists. The beautiful sandy beach at Exmouth and pebble beach at Budleigh will become no go areas again for swimming and pleasure for both tourists and locals. System cant cope at present so what hope in the future with this amount of housing.
- Narrow roads around B3179 will result in traffic congestion with increased number of large vehicles especially whilst building takes place. Rds not designed for so

many large vehicles and HGV lorries. This will have an impact on local people, tourists and the general ambiance of the area. Increased car numbers means increased accidents and journey times on rds not suited to this. A376 Exeter to Exmouth will become busier slowing journey times.

- The junction of B3179 and A376 will become a horrendous bottleneck of a junction....dangerous with increased vehicle numbers.
- There is insufficient infrastructure to support a development of this size. Poor roads ..poor road conditions ..poor access to main rd..lack of facilities eg. shop school etc
- Residents of new development would have to use Budleighs facilities or Exmouths. This would put a huge strain on Budleigh in particular...longer waits at Drs, dentists, more traffic in Budleighs narrow streets, less parking for Budleigh residents and tourists, r the Budleigh primary school i believe is already fairly full and again tlarge numbers of extra pupils could cause more traffic chaos in morning and pm pickup running the risk of car and pedestrian accidents. Budleigh does not have the facilities to cater for so many extra potential users from another 700 homes nearby.. Will ruin the town for existing residents and tourists
- Services will be further overstretched and traffic increased. This is unacceptable in the narrow streets of Budleigh where a lot of residents are retired and come to live in their retirement.
- I am concerned also of the effect it will have on the tranquil beautiful church of St John and the area of the medieval settlement. The tranquility will be shattered, the sense of remoteness lost, These reasons above are why the Exmo-20 should not go ahead.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to object to the proposed 700 house development at the edge of Exmouth. Although there are many reasons why such a huge project is contra-indicated, I will, for your benefit, concentrate on one aspect: sewage.

For the first three months of 2025, South West Water had 100 spills of sewage directly into the sea, amounting to 1115 hours. Multiply that by 4, and it provides an estimate for the whole of 2025, which would be 4460 hours of sewage pouring into the sea. This amounts to 185 days of overflow, or more than half of the year.

By a rough estimate, 700 houses will mean about 800 kilos of human feces, together with 365,000 litres of water flushed down the toilet to dispose of this feces.

Given that Southwest water cannot manage the current level of waste water safely, it is ludicrous to imagine that they would somehow be able to dispose safely of discharge from a further 700 houses.

For this reason alone, the development poses a risk to public health and should not be allowed to proceed.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate t consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heath SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heath SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: reduce the size of Exmo_20

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Do not access the site via Southern wood

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East

Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Exmouth 04 is small parcel of land off Higher Marley Road, Exmouth. > This land is known as The Lawn, it is WOODPASTURE PRIORITY HABITAT, it is home to many endangered species, as detailed in ecological report, many are on red list. There are many veteran /ancient trees on site. The parkland pre dates the old mansion Marley and was probably laid out when previous house 'Whimsey' was built in mid 1700s. Some of the oldest Luccombe Oaks in country are on this site. This site should have protections to stop building. National Planning Policy Standing Advice is that planning should be refused. As well as the parkland there is narrow field with ancient woods each side, this is a corridor for the wildlife. There is a stream which runs underground through middle of field, this would be diverted. This area takes run off from commons, hard landscaping could lead to serious flooding into Exmouth. The access to this site is off Higher Marley Road, which will lead to more traffic trying to get onto Dinan Way or over the Common, this site is 400m from Pebblebed Heaths.

You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: move the settlement boundary away from Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: William Cathery

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: A 400 metre buffer zone from the Pebblebed Heaths which is a critical home for nature (including a key ground nesting area for the nationally rare Nightjar and other ecologically significant species) is not sufficient; the light pollution and noise pollution, including from increased traffic, is of real concern, as well as predation from pets (e.g. cats, who can roam up to 2km) and the impact of increased recreational use of the heaths. Merely stating that there will need to be mitigation of adverse highway impacts is not sufficient; the B3179 is a dangerous road, and the impact on commuter traffic and towns like Woodbury has not been adequately considered. Sandygate roundabout and Clyst St George roundabout which are already a problem for commuters at peak times will be even more heavily congested, and this will detrimentally impact commuters from Exmouth, Budleigh, Woodbury and the surrounding areas. The reality is that this is not an Exmouth development site; it is significantly closer to the town of Budleigh Salterton (2.3 miles) and the impact of the development on this small town and its infrastructure has not been adequately considered; it will increase the town's population by approximately 30% overnight, which will have a devastating impact on local schools, and in particular Budleigh's primary school (which is already over PAN), the sewerage network and GP surgery. The designation as an Exmouth site is inaccurate and therefore not legally compliant. Comments to address concerns throughout are vague and non-committal and significantly more detail is required as to the specific measures they will employ to make Exmo_20 viable. For example, how will adverse highway impacts be mitigated against? How will they determine the size of the buffer to Pebblebed Heaths? How will they ensure local infrastructure is updated to accommodate a new development?

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Reduce the size of the development significantly, and move the boundary and access away from Pebblebed Heaths. Ensure the impact on Budleigh and its infrastructure is properly considered before any development is approved and include significantly more detail on how the adverse impacts of the development will be mitigated against in the Plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: For the same reasons as set out above

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: As above

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the allocation of Exmo_20, as it conflicts with national planning policy and is therefore unsound and not legally compliant. The Local Plan includes an over-supply of housing because it does not use the most recent ONS data, as required. The figure of 1,188 in the Plan was based on February 2025 data, before the 2024 ONS figures were published, and is therefore invalid. Corrected figures reduce the housing requirement significantly, meaning many policies in the Plan that rely on an overriding need to justify impacts or harm, including mitigation for the Pebblebed Heaths SPA/SAC/SSSI, are no longer justified. Exmo_20 should be removed from the Plan, as it requires multiple mitigation measures for internationally and nationally protected habitats. In addition, evidence documents contain further numerical errors that must be corrected and re-consulted on, as accurate figures are essential for a sound Local Plan. Plans must be clear and unambiguous so decision-makers can understand how to respond to development proposals, which is not the case here.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the allocation of Exmo_20 as it conflicts with national planning policy and the Local Plan and is therefore unsound. The main access to the site is over 2 miles from Budleigh Salterton and 4 miles from Exmouth by road. Developing Exmo_20 would place significant pressure on Budleigh Salterton, conflicting with the settlement hierarchy and overwhelming local services. The Local Plan does not appear to have properly considered the impact on Budleigh Salterton. In addition, the steep and uneven local topography makes walking and cycling to nearby towns difficult, meaning the site would be highly car-dependent—something not reflected on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the allocation of Exmo_20, as it conflicts with national planning policy and is therefore unsound. The Local Plan Authority (LPA) has attempted to retrospectively change the Site Selection Methodology (SSM) to justify including Exmo_20. The original SSM from May 2022, used during the Regulation 18 process, would not have allowed Exmo_20 to be selected because it clearly rules out sites within 400m of the Pebblebed Heaths SAC. After the draft Local Plan was approved in December 2024, an amended version of the SSM was presented in the Regulation 19 evidence library, claiming to have been used for site selection, when it was not. This appears misleading and raises concerns about transparency and adherence to proper planning principles. The original methodology confirms that only sites that are suitable, available, and achievable should be considered, and Exmo_20 does not meet these criteria due to its proximity to protected habitats. The CommonPlace platform used for this consultation is difficult and unuser-friendly, making it hard for members of the public to submit their views. The process is clunky and discouraging, effectively limiting meaningful public engagement. Awareness of the proposed Exmo_20 development has been minimal, with very little public promotion, meaning the consultation has largely taken place “under the radar” and lacks transparency. Overall, the consultation process is poor, does not genuinely encourage community input, and prevents residents from fully engaging with decisions that will affect their local area.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to the allocation of Exmo_20, as it conflicts with national planning policy and the Local Plan and is therefore unsound. The site's location would force residents to rely heavily on cars. The main proposed access from the B3179 is indirect and inconvenient, meaning residents would need to drive long distances just to reach everyday services and facilities in Budleigh Salterton or Exmouth. Cycling and walking are unlikely to be practical, particularly given the isolated location and the road layout. Policy changes now make walking and cycling a mandatory priority, which Exmo_20 cannot realistically meet. Development here would therefore be unsustainable, generating a large number of car journeys and adding to traffic congestion, pollution, and safety risks. Housing on the southern part of the site would require residents to drive at least 1 km on-site each time they travel anywhere, further highlighting the unsuitability of this location for new development.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the allocation of Exmo_20 because it conflicts with national planning policy and the Local Plan and is therefore unsound. The site sits above Exmouth and drains into Withycombe Brook, which flows through some of the most populated areas in the town. The brook has a history of flooding, with recorded events in 1960, 1983 and 2012, and current flood risk is already significant. Future climate change will only make flooding worse. The Strategic Flood Risk Assessment barely acknowledges Withycombe Brook, and the Local Plan has not properly applied the sequential, risk-based approach required to avoid putting people and property in flood risk areas. Allocating Exmo_20 would increase flood risk to the town and is therefore inappropriate. The Common has heavy clay soils, which are prone to waterlogging and poor drainage. This makes the land less suitable for development and increases the risk of surface water flooding. Disturbing these soils through construction could also damage the natural habitat and lead to erosion, runoff, and other environmental problems.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the allocation of Exmo_20 as it conflicts with national planning policy and the Local Plan and is therefore unsound. The Exmo_20 site forms part of a Strategic Nature Area that acts as an important buffer between Exmouth and the Pebblebed Heaths, which are internationally and nationally protected for wildlife. The land supports wildlife linked to the Heaths, including foraging habitat for the Nightjar, a protected ground-nesting bird, and provides an important wildlife corridor between the Heaths and the coast. Devon County Council is in the process of designating this area as part of a Local Nature Recovery Area, aimed at protecting and expanding habitats in line with national environmental goals. Developing Exmo_20 would directly undermine these aims. The site contains veteran trees, ancient woodland and hedgerows, which would become fragmented and degraded if development went ahead. Devon Wildlife Trust has strongly objected to the allocation, stating that the entire site lies within a Strategic Nature Area identified for its nationally important habitats and wide range of species. They advise that this land should be enhanced for nature recovery, not allocated for development, and that development would cause significant harm to the Pebblebed Heaths and the wildlife they support. For these reasons, Exmo_20 should not be allocated for development. Bystock Ponds provide an important and sensitive habitat for beavers, a protected species whose presence depends on clean water, quiet surroundings and connected wetland habitats. Development at Exmo_20 would risk disturbing this habitat through increased noise, lighting, human activity and changes to water flow and quality. Additional traffic, drainage and recreational pressure could disrupt the ponds and the surrounding landscape that beavers rely on for shelter and feeding. Any

compromise to this habitat would undermine local nature recovery efforts and the significant ecological value of Bystock Ponds, and should be avoided.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the allocation of Exmo_20 as it conflicts with national planning policy and the Local Plan and is therefore unsound. Exmo_20 would surround the Grade II* listed Church of St John in the Wilderness, causing serious harm to its setting. The church and churchyard sit within a historic medieval settlement area that is valued for its quiet, remote character, dark skies and strong sense of isolation. This “wilderness” setting is a key part of the church’s significance and would be permanently damaged by a large housing development encircling it, even if a buffer were left around the building. Historic England has raised strong concerns, stating that much of Exmo_20 lies within the setting of this highly significant heritage asset and that development could cause considerable harm. They also highlight that the proposed access road from the B3179 would itself damage the setting and could lead to further development pressure in the future. Historic England advises that alternative access and development options in less sensitive areas should be explored. For these reasons, Exmo_20 should not be allocated.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the allocation of Exmo_20 because it does not comply with national planning policy or the Local Plan and is therefore unsound. There is no clear or viable access to the site. The current proposal relies mainly on access from the B3179, but this would require major highway works that are uncertain, uncosted and have not been confirmed as acceptable by Devon County Council. Without this certainty, the site cannot be considered deliverable. The impacts of additional traffic on the B3179 have also not been properly assessed. Increased congestion and vehicle emissions would affect both local residents and the nearby Pebblebed Heaths, which are highly protected for their wildlife. The combined impact of this development with other nearby sites has not been adequately considered. The Habitats Regulations Assessment confirms that there is not enough certainty to rule out harm to the Pebblebed Heaths from air pollution. This is largely because traffic from Exmo_20 would travel along the edge of the Heaths. Allocating this site despite this uncertainty goes against the required precautionary approach and the principle that harm should be avoided in the first place, rather than relying on unproven mitigation. At present, there is no clear evidence that the environmental impacts of Exmo_20 can be safely mitigated. Without this certainty, the site should not be allocated. I reserve the right to comment further if and when a full Habitats Regulations Assessment and a robust mitigation strategy are provided, and I request to be notified if this information becomes available. The B3179 is already heavily congested, particularly during peak commuter times with traffic travelling to and from Exeter. Adding traffic from Exmo_20, which would generate well over 1,400

additional cars, would significantly worsen congestion on an already busy route. The road is narrow in places, has hidden dips and poor visibility, and is regularly used by pedestrians, cyclists and horse riders crossing between the Heaths. There have been a number of accidents along this stretch, and it is widely regarded as a potential accident hotspot. Further development would increase the risk to road users and make existing safety problems worse.

Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the allocation of Exmo_20 as it conflicts with national planning policy and the Local Plan, and is therefore unsound. The site is directly adjacent to the Pebblebed Heaths, which are internationally and nationally protected for their wildlife. A buffer of at least 400 metres between new development and the protected sites has been proposed, mainly to reduce impacts such as cat predation and increased recreational pressure. However, this distance is not sufficient. Domestic cats are known to roam well beyond 400 metres, particularly in more rural locations, and ground-nesting birds such as the Nightjar are especially vulnerable to predation. Even a single predation event can cause nesting failure. Given the importance of the Nightjar as a protected species, a significantly larger buffer is required to follow a genuinely precautionary approach. The allocation of Exmo_20 relies on a mitigation strategy and Habitats Regulations Assessment (HRA) that are not yet complete or proven to work. The current evidence does not demonstrate that the impacts on the Pebblebed Heaths can be avoided or adequately reduced. In the absence of robust and deliverable mitigation, the precautionary approach requires at least the removal of the area of the site closest to the protected habitats, and potentially a much greater reduction. The land closest to the Heaths provides important supporting habitat for wildlife and helps reduce disturbance. Increased dog walking, cycling and general recreational use would place additional pressure on the protected sites, and these impacts have not yet been properly assessed at site level. Until this is done, impacts must be addressed at a strategic level through a much larger buffer and a reduced development footprint. This

concern is shared by professional ecological bodies. Devon Wildlife Trust, the RSPB and the East Devon National Landscape Partnership have all raised objections. East Devon National Landscape has stated that a 400-metre buffer is not large enough to prevent damage from increased visitor numbers, traffic and access, and that development would further fragment surrounding habitats. They support either the removal of Exmo_20 from the Plan or a significant reduction in its size, with development pulled closer to the existing town and a much larger green buffer retained next to the Heaths. The allocation is also difficult to justify because there are other sites available that are less sensitive and would require far less mitigation. In addition, the Local Plan includes more housing land than necessary, due to not using the most up-to-date population data. Natural England has also raised concerns, recommending that development be pulled further away from the protected sites and that a clear natural buffer be secured, potentially through planning obligations. This would provide clearer and more effective protection for the Pebblebed Heaths. For these reasons, Exmo_20 should not be allocated in its current form. At the very least, the site boundary and housing numbers should be significantly reduced, with a much larger buffer between development and the Pebblebed Heaths.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound, as it conflicts with national planning policy and the Local Plan. The site lies adjacent to the Pebblebed Heaths SAC/SPA/SSSI and relies on extensive habitat and species mitigation that has not been shown to be achievable or effective. The mitigation strategy confirms that likely significant effects on the designated sites cannot be ruled out, and the Plan HRA acknowledges that proposed growth would exceed acceptable thresholds with no identified means of mitigation. Exmo_20 was selected and the draft Local Plan approved on the assumption that a mitigation strategy would be provided later, with an Appropriate Assessment only undertaken afterwards. This approach fails to apply the required precautionary principle and is inconsistent with established legal requirements for habitat protection. Where sites with known mitigation needs are proposed, clear justification through the mitigation hierarchy is required. This has not been undertaken. The allocation is particularly difficult to justify given the availability of alternative, less mitigation-dependent sites and an overall over-supply of housing caused by the failure to use the most up-to-date population data. Devon Wildlife Trust has stated that the site currently acts as an important buffer between Exmouth and the highly designated land to the north, and that development would result in the degradation and loss of ecologically supportive land outside the designated boundaries. Overall, these issues demonstrate serious failings by the LPA in its duties as the Competent Authority under habitat protection legislation.

Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Joanna Chalker

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of

sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function

of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The remote location of the Exmo_20 site from nearby town centres, its steep topography and the proposal that the main access point is on the B3179, all result in a number of concerns: 1. The topography of the site and local area makes potential walking and cycling options less realistic (paragraph 11.6 of the Local Plan), meaning that residents are likely to have to drive to get anywhere, resulting in a significant increase in car travel in the area. This conflicts with paragraph 109 of the National Planning Policy Framework December 2023 (NPPF) and with Policy TR01 and paragraph 11.2 of the Local Plan, and therefore makes Exmo_20 unsound. 2. The main access point on B3179 will necessitate long car journeys due to this location being distant by road from town centres and places of employment – drivers have a long and complex route to any facilities and services. Indeed, some drivers will even have a long drive to exit the site from some locations on the site. All this conflicts with paragraphs 92 and 109 of the NPPF and therefore makes Exmo_20 unsound. 3. Cumulative and in-combination effects on the B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. Traffic along the B3179 has been steadily increasing in recent years as drivers from parts of Exmouth (eg Dinan Way area) use the B3179 as an alternative route to get to Exeter. Congestion near Clyst St George (and Clyst St Mary) has been getting worse and at peak times it can take 30 minutes longer to get to Exeter than it did 10 years ago. There are no meaningful public transport alternatives from the isolated location proposed. Exmo_20 is only going to worsen all of this. This conflicts with paragraph 114(d) of the NPPF and Policy OL09. 4. The proposed access point on the B3179 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. The site allocation runs the risk of overwhelming

Budleigh Salterton's town centre and access. This would conflict with the settlement hierarchy. Overall, the increased car use due to the isolated location, requiring a long drive even to exit the site, never mind to access facilities and services, coupled with limited opportunities for sustainable transport (in part due to the topography), means that Exmo_20 is in conflict with (i) paragraphs 92, 109 and 114(d) of the NPPF, (ii) policies TR01, TR03 and OL09, and (iii) paragraphs 3.6 and 11.2 of the Local Plan. All this makes Exmo_20 fundamentally unsound. I also have concerns about the location of the site, being part of Strategic Area 368, which I understand is identified as an important buffer between Exmouth and the Pebblebed Heaths. I am a member of Devon Wildlife Trust and have seen their submission that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development... We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC." I am also aware that East Devon National Landscape wants the site not to be adopted as development land. I therefore believe that the environmental impact of development of Exmo_20 would contravene paragraphs 16c, 181, 185(a), 186(c), 188, 191 of the NPPF, as well as Policies PB01, PB02 and PB04 and paragraphs 3.6, 13.10 and 13.24 of the Local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

I strongly urge East Devon District Council not to include the proposed allocation to Exmo_20 within its Local Plan. Failing that, there needs to be: - a VERY significantly reduced housing number, closer to the existing Exmouth town settlement, preserving a greater rural boundary between the site and Pebblebed Heaths and giving more opportunity for sustainable transport; and - no access from the B3179 - the main access should be on the Exmouth town side of the development, thus avoiding traffic pollution along the Pebblebed Heaths and giving more opportunity for sustainable transport. However, only the complete removal of Exmo_20 from the Local Plan will properly address all of the very significant concerns I have with this proposed development site.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Please be as precise as possible.: I would like to register my utter dismay at the plans to build 700 new homes in the Ting Tong area. I have been unable to swim in the sea for the past year due to the filth that SWW is pumping into the sea. Their complete failure to manage the existing flow of sewage will only be exacerbated by this development. *** Personal details have been removed *** should be ashamed of themselves. Where is the reassurance that SWW are going to be able to deal with this development. The River Otter is practically dead due to the sewage in it.

We have already had the Goodmore development. Years ago my family owned some of that land and lived in the big house there. Thank the Lord they are dead as they would be horrified.

We need the council's word that SWW will be able to cope with this development. Also how on earth will the top road cope with all the traffic? I often see deer in that field. Where will they go? This is such a beautiful place to live but it is slowly being turned into a concrete jungle. I feel very distressed and sad.

Regards,

*** Personal details have been removed ***

STOP EXMO_20

To who it may concern,

I would like to express my objection to the labyrinthine procedure demanded by commonplace for East Devon District Council for this development. Many residents are still unaware of this, and the ones who have been made aware have found the commonplace site extremely difficult to navigate. I have put some objections on that site today but would like to add some more comments.

I have objected before to this extraordinary proposal for a vast building site next to the B 3179 that is used by all Budleigh and some Exmouth residents to get to Exeter by car. This road would have to be dramatically widened to cope with all the extra traffic involved, first for the building itself of 400 + houses, involving lorries and suppliers, and if each potential house then had one or two cars, the scenario would be nightmarish. The alternative route to Exeter from Exmouth to the west would also be impacted.

The site proposed is nearer to Budleigh centre (2.3 miles) than to the centre of Exmouth (4.0 miles). Exmo_20's limited access arrangements would significantly increase the

need for car travel from the main access point proposed on the B3179, even if widened, to access facilities and services, therefore an unsustainable location for development. The site allocation would overwhelm Budleigh Salterton, which has not been taken into account by the LPA when considering the Exmo_20 site. At present, our surgery and primary school are struggling to cope with the existing population.

I have seen that 'alternative sites' have been discounted for Exmouth, but a contact at Friends of the Earth tells me that 'brownfield first' might be a plan to consider. Their website states: "Done badly, new housing could exacerbate the climate and nature crises", and brownfield sites should be the first option. Those are also likely to be closer to urban and industrial areas where there will be employment. Friends of the Earth also states: "Wherever new homes are built, they need good public transport links and cycle routes, as well as good access to services. Without them, there's a danger of increased car dependency, which disadvantages those who can't drive or afford a car." Greenfield sites such as this one should surely be used for growing our own food instead of having to import it.

The existing population of Exmouth at the 2021 (last) census, was 35,488, the fifth largest settlement in Devon by population. This of course increases massively with the influx of visitors and tourists, not only in the summer but all year round. Exmouth has a long and fascinating history - Byzantine coins were found on the beach in 1970. Evidence of people living at Exmouth Point goes back to the 11th century, when it was called Lydwicnaesse, meaning "the point of the Bretons". Two ecclesiastical parishes that make up Exmouth - Littleham and Withycombe Raleigh can be traced back to before Saxon times. The history of Exmouth makes it all the more incredible that the planners/developers could think it desirable to build round St John in the Wilderness Church (grade II* listed) which will have a significant adverse effect on the tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by the sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

The environmental and conservation impact of such a large development should not be dismissed. The site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of the site would undermine the conservation objections of the

SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area aimed at combining existing wildlife sites and extending habitats. By building hundreds of houses? The site contains many veteran trees, ancient woodland and hedgerows which are at risk of becoming fragmented habitats. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography makes the potential cycling and walking option less viable, which is not apparent on the policy maps.

So for environmental, conservation and heritage reasons, I object to Exmo_20.

Kind regards, *** Personal details have been removed ***

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to protest against the proposed development of combined housing and industrial units on National Landscape Land, formerly known as an Area of Outstanding Beauty, on the outskirts of Exmouth. It is astounding that this proposal is being considered with regard to land which has a protected status, already a dwindling resource, and cherished by the community.

Bisected by the proposed road network, the well used and much appreciated cycle/foot path between Budleigh Salterton and Exmouth used by cyclists/ families/ dog walkers/ pedestrians/ disabled persons seeking recreation and sanctuary away from traffic would be changed beyond recognition. The suburban spread of Exmouth into this National Landscape Land, outstandingly beautiful because of its green fields and natural open spaces, makes a mockery of these labels. Where will it stop?

The increased traffic on local roads, already in dire need of repair, will only exacerbate the situation and add more traffic hazards. Above all, how can S.W. Water, already failing to treat our sewage properly and supply us with water that doesn't leak away into the ground, cope with any further development? Neighbouring Budleigh Salterton has already suffered a downgrade in its bathing water quality - which poses a serious health risk to residents and holiday makers alike. Surely, the company needs to put its house in order before servicing more properties.

There is no doubt that the nation needs more housing, but first we need the provision of a strong, future-proof, well planned infrastructure, providing education, healthcare, efficient sewage treatment, community spaces and services, instead of stuffing extra housing willy nilly into any empty space.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This is massive over development of greenbelt land in an area that has been hammered in the last few couple of years. The proposed 'development' is the size of a village and will cause a detrimental impact on the traffic (have you been on our roads recently?) not to mention another massive loss to nature and biodiversity. How this is even being considered when it is right next door to pebble bed heaths with all the nature there is astonishing. The quality of life for us in east Devon is going down massively with the huge influx of houses going up on every field around exmouth. The increase in traffic, pollution, the loss of nature and peace is having a detrimental impact on many people I know that like me are born and bred in Devon. This is Devon not some metropolis with an endless supply of jobs. I ask you consider when does this end? When there are no fields left? A line has to be drawn as we are losing everything dear to us in the rural county of Devon. This is a huge over development and grossly out of proportion to the area and I plead for you to reject it, history will be kind to you if you do.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Please remove Exmo_20 from the plan. 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This proposed development is just far too big and imposing for the local area. In my opinion, it will only negatively impact the local community and environment. Exmouth is plenty big enough, and it can barely manage its current sewage system! Our doctors are at full capacity and the roads are so busy and already in such a bad state of disrepair. This will all only get worse with more housing and more people moving into the area. Please consider the quality of life of the local people and the surrounding nature, this is one of the few beautiful areas left in the country, the reason why people come here for holidays, please don't ruin it! Also see the following reasons: Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states "It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA" and the Plan HRA states "there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks." This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU "People over Wind" ruling and the required precautionary approach, particularly relevant considering the CJEU "Dutch N" ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing

allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to object to the building of a large housing estate on protected National Landscape.

Building on land outside the National Landscape would be cheaper, making it possible to build a bigger percentage of affordable homes which are desperately needed in Exmouth.

Additionally, the exit from the Exmouth-17 site would create traffic chaos and the access road would go straight across the much used Exmouth to Budleigh cycle/footpath, endangering children, elderly, cyclists, families and dogs.

Please care about the people of Exmouth. We have a wonderful community and it would be amazing if you could provide more affordable houses for the youngsters in need (Exmouth's future) and at the same time avoid building on our beautiful protected National Landscape.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town

settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage

of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this

building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified”

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heath and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b)of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk

pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. Objection 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. Objection 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the

settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. Objection 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals".

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan,

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Gary Coles

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Move the settlement boundary away from the Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”.

Chapter 8: Housing Needs

The real need in Exmouth is for houses of mixed tenure, including social rent, for people on low wages. Has Exmouth Town Council's assessment of housing need been consulted?

The vast majority of houses proposed for the prime site of Exmo_17 would be high-end, bought by people from outside the area.

Past experience tells us that the number of affordable houses will likely be fewer than proposed.

Chapter 11: Sustainable Transport

The proposed estate on Exmo_17 would bring a further 800-900 vehicles onto local roads. The access road would be directly opposite the Liverton Trading Estate, which is a well-known bottleneck with queues of cars waiting to exit.

A new roundabout has been proposed, plus two pedestrian crossings on the busy main road into and out of Exmouth. Traffic would be significantly held up at this point, causing increased air pollution and slowing drivers' progress. To reach Exeter, where the jobs are, the choice would be to drive there, or to catch two buses (passing every half hour) or to catch a bus plus a train.

Chapter 12: Landscape

Exmo_17 had two protections until EDDC , without any justification, recently removed its Coastal Preservation area status, despite hundreds of objections from residents. It is a very large, precious area of National Landscape farmland that is protected against large-scale developments.

EDDC's duty is to 'conserve and enhance' it. (***) Personal details have been removed (***) on behalf of the Housing Minister, (***) Personal details have been removed (***) has confirmed this in a letter to our MP, (***) Personal details have been removed (***) of 18th August 2025). In no way is building a large estate on Exmo_17 conserving or enhancing it.

There is no reason to build the proposed industrial units on this land. Logically, they should be built on the Trading Estate opposite or Exmo_18, both of which have the same landowner.

The proposed vehicle access road would go straight across the existing Exmouth to Budleigh cycle/foot path and would require the felling of mature trees and bushes. This well-used path gives safe, tranquil access to cyclists, dog walkers, children, recreational walkers and people in wheelchairs and on mobility scooters. We think this is dangerous and a loss of a peaceful amenity within the National Landscape.

The landowner has recently terminated the lease to a nearby farm of National Landscape pastureland adjacent to Exmo_17. Could it be that they are hoping for a domino effect, building further estates on our irreplaceable National Landscape?

The proposed estate would be close to Littleham's medieval church where Lady Nelson is buried. There is also an old farmhouse on the perimeter (age?).

These National Landscape fields are in plain view from the coast path that runs along the World Heritage Jurassic Coast.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am e-mailing about this proposed development of houses and business premises in this location It is a part of a national landscape of beauty I believe and should be treated as such This being said any new developments within Exmouth at this time should be carefully thought through The infrastructure within Exmouth is already under immense pressure, not only healthcare educational and road networks even sewage Please, before agreeing to new developments, take these issues very seriously EMO-17 is an area where people of Exmouth do not want to see development of any kind

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20 do not access the site via B3179 nor via Southern Wood.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. 1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate t consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20 and do not access the site via B3179 nor via Southern Wood.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Richard Cosgrave

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20 and do not access the site via B3179 nor via Southern Wood.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Richard Cosgrave

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20 and do not access the site via B3179,

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear Planning team We understand how difficult this decision must be and how you are being pressured by the national government, however after much thought we feel the choice of Exmo-17, a large area opposite Liverton Trading Estate is the worst possible choice., for the reasons given below.

1. For years there has been the Green Belt, which has limited development and we can see that towns may have to expand into this land but this is in an area categorised as an Area of Outstanding National Beauty (now National Landscape). It would be very sad if it were to become another messy estate, such as Goodmores, where developers have ignored many of the environmental restrictions placed by the council and seem to be constructing a treeless desert.

2. Of course once the area is breached then other estates will rapidly follow, leading to the National Landscape designation becoming laughable and more of the beauty of our area disappearing. One reason for this is that building on this land will be cheaper for developers.

3. Developers who build there will not build the kind of houses that the government wants. Why would you build affordable housing when the chance of 4 and more bedroom houses with sea and beautiful countryside views will sell for so much more? Live West has not built the agreed amount at Goodmores and the council can do nothing about this.

4. The road Exmo-17 would be built on is dangerous and friends of ours were nearly killed exiting the Liverton estate only last year. One has been left with life changing injuries.

5. The access road will also cross the Exmouth to Budleigh cycle path endangering its many users at a time when cycling in the area is being promoted by the council. There are also walkers (like us), people exercising their dogs and children who use this path.

6. Of course all the schemes will object on environmental grounds and this one is no exception. Apart from the threat to wildlife, we all need beautiful views and green spaces for mental health and these views create a particularly lovely exit from Exmouth.

7. And, as you well know, any development will put an enormous strain on our already strained water and sewerage system and this particular choice will only encourage further building, as stated above in Point 1.

Yours sincerely

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I believe that Exmo_20's allocation would overwhelm Budleigh Salterton's services and facilities in particular, and generate an unacceptable increase in traffic to/from both Budleigh Salterton and Exmouth to the significant detriment of both communities. As I understand it, the proposed access onto the B3179 would need major work which has not been properly costed and planned. But even with that work, the allocation would lead to unacceptable congestion on already busy roads and to air pollution. As I also understand, a host of expert organisations - the Devon Wildlife Trust, RSPB, Natural England and Historic England - have warned of unacceptable environmental and other impacts, and some have raised the possibility of reducing the scale and changing the boundary of the site to reduce some of them. But the key point is that the whole allocation is unsound because of its PROXIMITY to vital habitats, and at least as importantly its ISOLATION from existing communities and existing roads (and rail) that could cope with increased traffic. Note also the struggles that SW Water has had dealing with sewage in the area recently. Tankers night and day streaming from Lime Kiln car park to Exmouth. The system already cannot cope. I also believe that our environment cannot always take more development. If you look at what our countryside looked like 100 or even 50 years ago, the rate of development is obvious and unsustainable. There has to be a point when we say NO. We have to try to save what we still have, for the future health, mental and physical of our children and, we hope, our children's children.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove it from the local plan. Development cannot continue to be on green land. It has to be on brownfield sites. And it has to be closer to transport infrastructure.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a

reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk

that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20

currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified”

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b)of

the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3:

Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan.

Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. Objection 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. Objection 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with

Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change

of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: remove exmo_20 from the local plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove exmo_20 from the local plan revert to 20b as previously planned

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Stephen Crook

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The development proposed at Exmo_20 could and should be located on an alternative site where it would cause less or no harm to the Pebblebed Heaths(SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20 * Do not access the site via the B3179 * Do not access the site via Southern Wood * Revert to Exmo_20b as previously proposed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Increase in traffic on small, poor roads. Without dedicated transport infrastructure there will be a large increase in traffic, especially at certain times, leaving for work / school and then coming home from school then work. There are no footpaths planned or on site schools so every child and working person will be making trips by car. The site is not suitable for such an increase in traffic 2. The proposal for a large development so close to Pebblebed Heath and all its unique landscapes and endangered wildlife is astonishing on the part of the planners. There is no mitigation possible that would account for the damage that would be done. 3. Health infrastructure. I see no provision for health care on site. The burden of new housing of this scale is likely to overwhelm local primary health care, especially in an area with a high proportion of elderly residents

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1. Road widening and speed restrictions on current roads to make them suitable for the increase in traffic burden. Footpaths to local shops and schools to decrease the number of car journeys. Extra bus routes to the development to decrease the number of bus journeys . 2. I do not believe there is any mitigation to the damage to local wildlife

and environment. Remove Exmo_20 from the list of sites 3. Provide new GP surgery for the development

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate t consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179,

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and

supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Reduce the size of the Exmo_20 housing allocation to reduce impact on the area and bring it more in line with local housing needs.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st & 2nd Regulation 19 evidence library falsely claiming to be, with no record of the May 2022 version. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected since the site failed the HELAA stage, being not suitable or achievable. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Revert to 20b as previously proposed to reduce the impact on and proximity to the Pebbled Heaths.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Edward Cudworth

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan as the access to both Budleigh Salterton and Exmouth is not suitable without adding significant traffic to the already strained road network, especially on the B3179.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20 allocation to reduce the amount of housing that produce waste water, and hard surfaces (roads, paving, tarmac etc) that exasperate surface water flood risks.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. The current proposal to have the majority/bulk of the access onto the B3179 is not appropriate. This is an already busy, narrow, unlit and dangerous stretch of road that sees regular traffic accidents and debris in the road from the fragile banks and surrounding trees. To make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I have recently been made aware of the plan to build 700 houses on the outskirts of Exmouth. I wish to object to this scheme.

Such a large increase in houses, I am concerned that the amenities will not be in place to support the scheme. With the current SWW treatment works being unable to cope with the sewage from the town, I cannot see that another 700 houses will help the situation. A large increase in houses will also need an appropriate increase in healthcare, GP's and school places. Has this been taken into account? I question how and where traffic from such a large estate will be dealt with, The roads in the area are already overcrowded.

I am a volunteer with the Pebblebed Heaths Conservation Trust. I see from the map it will be a road width's away from the heathland. I have carried out surveys this Spring in the area, counting Dartford Warblers, a very rare and important resident of the heath. Our survey came within a stone throw of the proposed project. Such a large new area of houses will impact on this and other rare species on the heath due to their proximity.

All in all, this is a very large area of proposed housing in the wrong place. I object to the plan to build so many houses here.

2(c). 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing as a local resident to object to the proposed development on Exmo_17, which lies within a protected National Landscape.

Exmouth needs genuinely affordable homes for local people, not predominantly high-end housing in a sensitive landscape.

The development would add hundreds of extra vehicles to already congested roads

I walk the Exmouth–Budleigh path regularly with my dogs and also cycle and run along it, as do many of my friends. I also spend time on the South West Coast Path. The proposed access road would cut across the cycle and footpath, require the loss of mature trees, and all the poor animals and creatures and wild life living there .

For these reasons, I strongly object to the development of Exmo_17 and urge the council to protect this precious landscape.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of the NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations as a result of not using the "most recent data published at the time", ONS data, as is mandatory (MHCLG - Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. The figure should be reduced to 1,156 with 80% being 925, with a 22 year plan requirement of 20,342 (not including rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and, since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the Plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath Special Protection Area (SPA), Special Area of Conservation (SAC), Site of Special Scientific Interest (SSSI). Further numerical and mathematical are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and consulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of the National Policy Planning Framework (NPPF) December 2023 states that "Plans should contain policies that are clearly written and unambiguous so that it is evident how a decision maker should react to development proposals".

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: In the interest of local democracy, fairness and openness of the planning system

Full name: Paul De'Athe

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03 and therefore unsound. It also conflicts with paragraphs 3.6 & 11.2 of the Local Plan. It's evident that Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main proposed access point on the B3179 (roughly opposite the existing Archery Club), to access services and facilities further afield. It has not been demonstrated that sufficient regularly needed local services can be accessed by either cycling or walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as cycling or walking being a likely first transportation choice is now considered mandatory rather than desirable. The isolated nature of the location and Exmo_20's B3179 proposed access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services in either Budleigh Salterton or Exmouth on roads unsuitable for large volumes of traffic. Regarding housing in the southern part of the site, the use of the B3179 as the access point would need a minimum of 1km on-site driving every time prospective residents went anywhere and returned home, that in itself raising additional vehicular emissions within the site and around the B3179 entrance and exit.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: In the interests of local democracy, fairness and openness of the planning system

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and is therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and local area's topography makes the potential cycling and walking options far less viable, which is not apparent on the policy maps. Cycling and/or walking along the B3179 would not be something to be undertaken lightly given the nature of the road with high hedges and no footway.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and local area's topography makes the potential cycling and walking options far less viable, which is not apparent on the policy maps. Cycling and/or walking along the B3179 would not be something to be undertaken lightly given the nature of the road with high hedges and no footway. The 3D representation of the area specific to Exmo_20 has been uploaded below and serves to show the topography of the watershed and its height above Bystock Fishponds that could potentially be adversely affected by increased runoff from the B3179 occasioned by increased vehicular movement from Exmo_20.

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in clear conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraphs 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is NO viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179 but in order to make this viable would need major, uncertain and uncoded highway works, NOT confirmed by Devon County Council. Cumulative and in-combination effects on the B3179 must be considered, both in terms of traffic disruption, congestion and accompanying air pollution affecting the adjacent Pebblebed Heaths. The Habitats Regulation Assessment (18.11.25) confirms that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary to the Pebblebed Heath. The allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy over avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's in the plan is therefore unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am distressed to see the council's proposals to build a huge estate on National Landscape land.

1. Firstly large housing estates should not be built on a protected AONB (National Landscape).

2. It would be cheaper to build on land outside the National Landscape area, and would make it possible to build a bigger percentage of affordable homes.

3 The exit from the site (Exmo-17) would create traffic chaos and the access road would go straight across the busy Exmouth to Budleigh cycle/footpath endangering users such as children, cyclists, families, dogs, etc.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Firstly the web link Commonplace is complicated and not easily accessible, essentially for people whose computer abilities are limited.

This could be perceived as a deliberate obstruction to allowing people to access the ability to lodge objections. Penultimately this would affect the data/figures for any responses.

I wish to lodge my complaints AGAINST the above housing proposals as below:

1) The Proposed Development is very close to an area of ANOB and pebblebed heaths. Surrounded by Woodbury Common to the east and St John's Woodlands to the west. The destruction of woodland containing veteran trees and wildlife habitat. This is also incorporating area close to St Johns in the Wilderness Church which is a historic church.

2) The B3179 is entirely unsuitable for the excess traffic volume that will be created. The traffic will be accessing the road through Woodbury Village via B3179 to access EXeter and M5 Junction; and the B3180 across Woodbury Common to access A30/Exeter Sky Park. Woodbury Village narrow is unsuitable for volume of traffic and HGVs. The route

via Woodbury Common/West Hill is also narrow and unsuitable for traffic and HGVS. The A376 Lympstone to Exeter has had no improvement/widening for traffic capacity and will result in Commuter traffic bottleneck.

3) Insufficient infrastructure in the proposed location: A) No access to public transport, forcing people to use vehicles. At a time when we are supposed to be adopting “Green Transport” Strategy. There will be at least 700 to 1400 extra vehicles registered to the residential area and using the roads. B) Insufficient Doctors Surgery. C) Insufficient schools. D) inadequate and currently failing sewerage system. This is already failing to serve the towns of Exmouth and Budleigh Salterton.

4) Pollution from vehicles and human activity. 5) Environmental damage.

MY VOTE IS THE OBJECTION TO THE PROPOSAL OF EXMOU_20

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Delete the allocation

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: .

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation

would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the

protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths". The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that "the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that "just one event leading to predation is enough to end that nesting attempt" [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that "In the RSPB's view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John's (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development". "The RSPB is very concerned that the St John's allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed

development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a

‘wilderness’ setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that “Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March ’26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and

supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. 9.. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if

not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". POLICIES REFERRED TO IN SUGGESTED OBJECTIONS National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan- makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible,

compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, and which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscapes and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset from development within its setting should require clear justification.

Assets of the highest significance, notably....grade I and II * listed buildings should be wholly exceptional. 2nd Regulation 19 Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017 Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. PolicyTR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be Made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5

miles). Factors such as topography also influence walking choices. Paragraph 13.10 aims to protect irreplaceable habitats and important features. Paragraph 13.11 states that some habitats, including ancient woodlands and veteran trees are irreplaceable due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats lastly, the local sewerage system is already in adequate and the actions by SWW are not effective in Budleigh with many outflows occurring with even a few mm of rain. The large number of outflows will affect both Budleigh Salterton and Exmouth. There appears to have been little or no increase in treatment capacity. The work has mostly concerned with shifting the sewerage from one region to another.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, - Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: We have not heard about the changes directly from county council

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Elizabeth Donnelly

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove this site from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

- Proposals adjacent and very close to the Pebblebed Heaths (Special Areas of Conservation, Special Protection Areas, Site of Special Scientific Interest). Wildlife must be protected in this area! Noise & pollution from housing/new roads would also impact wildlife. Similarly woodland must be protected - it takes a very long time for woodland, habitats and new wildlife to establish and once this is removed it would never be the same again. The level of housing and infrastructure proposed in this area is of too great a scale! Building housing / associated infrastructure in this area will impact the tranquillity of heritage assets (St John in the Wilderness Church) and natural habitats for wildlife. - Exmouth already is very busy in the summer, but currently still achieves being a relaxing destination for locals and tourists to enjoy the rest of the year. Building SO many more houses (which comes with it typically 2 vehicles per house, families, surplus requirements for local services) will put so much pressure on the existing schools, services and transport networks in the area. The roads will become too busy. Exmouth will lose it's relaxing charm. We need to protect these beautiful coastal areas and not overwhelm them.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I would like to express my objection to the labyrinthine procedure demanded by commonplace for East Devon District Council for this development. Many residents are still unaware of this, and the ones who have been made aware have found the commonplace site extremely difficult to navigate. I have put some objections on that site today but would like to add some more comments.

I have objected before to this extraordinary proposal for a vast building site next to the B 3179 that is used by all Budleigh and some Exmouth residents to get to Exeter by car. This road would have to be dramatically widened to cope with all the extra traffic involved, first for the building itself of 400 + houses, involving lorries and suppliers, and if each potential house then had one or two cars, the scenario would be nightmarish. The alternative route to Exeter from Exmouth to the west would also be impacted. The site proposed is nearer to Budleigh centre (2.3 miles) than to the centre of Exmouth (4.0 miles). Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179, even if widened, to access facilities and services, therefore an unsustainable location for development. The site allocation would overwhelm Budleigh Salterton, which has not been taken into account by the LPA when considering the Exmo_20 site. At present, our surgery and primary school are struggling to cope with the existing population. I have seen that 'alternative sites' have been discounted for Exmouth, but a contact at Friends of the Earth tells me that 'brownfield first' might be a plan to consider. Their website states: "Done badly, new housing could exacerbate the climate and nature crises", and

brownfield sites should be the first option. Those are also likely to be closer to urban and industrial areas where there will be employment. Friends of the Earth also states: "Wherever new homes are built, they need good public transport links and cycle routes, as well as good access to services. Without them, there's a danger of increased car dependency, which disadvantages those who can't drive or afford a car." Greenfield sites such as this one should surely be used for growing our own food instead of having to import it. The existing population of Exmouth at the 2021 (last) census, was 35,488, the fifth largest settlement in Devon by population. This of course increases massively with the influx of visitors and tourists, not only in the summer but all year round. Exmouth has a long and fascinating history - Byzantine coins were found on the beach in 1970. Evidence of people living at Exmouth Point goes back to the 11th century, when it was called Lydwicnaesse, meaning "the point of the Bretons". Two ecclesiastical parishes that make up Exmouth - Littleham and Withycombe Raleigh can be traced back to before Saxon times. The history of Exmouth makes it all the more incredible that the planners/developers could think it desirable to build round St John in the Wilderness Church (grade II* listed) which will have a significant adverse effect on the tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by the sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it. The environmental and conservation impact of such a large development should not be dismissed. The site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of the site would undermine the conservation objectives of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area aimed at combining existing wildlife sites and extending habitats. By building hundreds of houses? The site contains many veteran trees, ancient woodland and hedgerows which are at risk of becoming fragmented habitats. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography makes the potential cycling and walking option less viable, which is not apparent on the policy maps. So for environmental, conservation and heritage reasons, I object to Exmo_20. *** Personal details have been removed ***

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_17

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The area is part of the major attractions of Exmouth on the eastern edge of the town. EDDC are intent on redefining the borders of the East Devon National Landscape: that is contrary to the Countryside and Right of Way (CROW) 2000 Act. Section 85 of the Countryside and Right of Way Act 2000 (as amended by the Levelling-up and Regeneration Act2 in December 2023) requires ‘relevant authorities’, in exercising or performing any function that affect AONBs in England, to ‘seek to further the purpose of conserving and enhancing the natural beauty of the Area of Outstanding Natural Beauty.’ It states that this is a 'statutory duty', not discretionary, and is a strengthening of the previous ‘duty of regard’.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Brownfield sites and land that is outside the National Landscape should be given priority on this matter.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the current plans to build 450 houses along with industrial and other

development as set out by East Devon District Council planning proposal 25/0002/EIA as Exmo_17. Increased traffic would cause further deterioration in the state of local roads plagued by potholes. Increased housing is likely to cause more flooding problems and will contribute to South West Water's continuing issues with sewage disposal.

Exmo_17 would impact an Area of Outstanding Natural Beauty (or National Landscape) which has local historical , environmental and farming importance.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Anthea Downes

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Allocation of Exmo_20 is in conflict with para 16c, 32, 73b, 180d, 180e, 181, 185a, 186a, 186b, 188 and 191c of the NPPF Decmber 2023 and is unsound and not logally compliant. It also conflicts with policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The infrastucture has not been considered and the response of SW Water has been unsatisfactory. We have had problems in this area with sewage in the rivers Otter and Exe and the sea at Exmouth and Budleigh. The road which is proposed as the access point opposite the Archery Club is already very busy and it would prove extremely difficult for people to get to work in Exeter from Budleigh. There is also the year round influx of tourists most of whom come by car. The site and the road are also closer to Budleigh than Exmouth and our surgery and primary school are already suffering from inadequate facilities. With an enlarged population this would be insupportable. This area is next to Woodbury Common and the Pebblebed Heaths SAC/SPA/SSSI which are already under threat from illegal motorbike scrambling, and unrestrained dogs causing harm to the highly designated protected habitats and species. A precationary approach should be applied by the Competent Authority, the LPA.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

There is no way that this scheme can work unless the road is vastly widened, also damaging the environment. A contact at Friends of the Earth has told me that brownfield sites are being subject to 'land banking'. Surely these sites which are being hoarded could be built on instead of green fields which could be used for farming if the farmers are not continually being penalised for producing food for the country. This leads to importing food which is also bad for the environment. Brownfield sites would also tend to be closer to industrial areas where there is employment. We understand there is a need for housing but this seaside area is already a tourism hot spot. The coastal area below this planned development is also supposed to be protected, but would inevitably be impacted by this number of houses, cars etc.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: As above, this Allocation of Exmo_20 is in conflict with paragraphs of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with the Local Plan. It also is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance for mitigation. The greenfield Exmo_20 is in contravention of earlier reports of growing flood risk to Exmouth, and also has not taken account of the impact on existing wildlife sites and Local Nature Recovery Area, or any environmental and heritage considerations in the National Landscape.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. The area is adjacent to the Pebblebed Heaths and further housing and vehicle traffic would consequently have a negative impact on local wildlife. The area has a wilderness setting, particularly around St John's Church; increased artificial light from housing and street lighting would have a damaging effect in this regard. Increased housing is likely to cause more flooding problems and will contribute to South West Water's continuing issues with sewage disposal. Increased traffic is certain to cause damage to local roads which are already plagued by potholes.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear Sir/Madam,

I wish to submit a formal objection to the proposed site allocation Exmo 20 within the East Devon Local Plan, on the grounds that the proposal is unsound, unsustainable, and contrary to the principles of sustainable development as set out in the National Planning Policy Framework (NPPF).

1. Highway Capacity, Safety, and Lack of Mitigation

The existing highway network is already operating beyond safe and practical capacity, particularly during peak hours and the summer tourist season. Additional development at this location would significantly increase vehicle movements on a road network that is already congested, unsafe, and inadequately designed.

I have personally reported safety concerns to Devon Highways regarding the T-junction towards Exeter. This junction is unlit, poorly configured, and increasingly dangerous. I was informed that Devon Highways cannot currently afford to install traffic signals, which demonstrates that there is neither the funding nor the delivery certainty required to mitigate further traffic growth.

The allocation of Exmo 20 appears to rely on assumptions of future mitigation that are neither funded nor guaranteed. This conflicts with the NPPF requirement that development should only be permitted where the residual cumulative impacts on the road network are not severe.

2. Lack of Supporting Physical Infrastructure

There is insufficient supporting infrastructure to accommodate further population growth in this area.

Local wastewater and drainage infrastructure appears to be under significant strain. The visible decline in seawater quality is deeply concerning. The condition of the sea this year was such that I did not feel safe swimming. This is unacceptable for a coastal community and raises serious concerns about the cumulative environmental impact of continued development without necessary upgrades to sewage and treatment capacity.

No clear, funded, or deliverable infrastructure improvements have been demonstrated to accompany this allocation.

3. Education Capacity Constraints

Local secondary education provision is already at capacity. Exmouth Community College and Simonds College are full. Grammar school provision is extremely limited, with Colyton Grammar unable to accommodate all qualifying pupils.

As a result, my own child was forced to attend Torquay Grammar School, requiring an excessively long and unsustainable daily journey from Budleigh. This is not a reasonable or equitable outcome for families.

The allocation of Exmo 20 fails to demonstrate how additional demand for school places will be met. This is inconsistent with the NPPF requirement that development should be supported by appropriate social infrastructure.

4. Environmental Harm and Impact on Protected Landscapes

The site lies in proximity to the Pebblebed Heaths, an environmentally sensitive and valued landscape. These habitats are irreplaceable and form a key part of East Devon's ecological network.

Further development risks habitat fragmentation, biodiversity loss, recreational pressure, and long-term degradation of protected environments. This would conflict with national and local policies requiring the protection and enhancement of natural capital and biodiversity net gain.

5. Loss of Green Space and Local Character

East Devon's rural and coastal character is fundamental to its identity, economy, and community wellbeing. Continued greenfield development erodes this character irreversibly.

Exmouth has already experienced extensive recent housing growth. Infrastructure is now stretched to its limits. The cumulative impact of further allocations has not been adequately assessed.

6. Inadequate and Inaccessible Public Engagement

I also wish to formally object to the consultation process itself.

Budleigh Salterton has a disproportionately elderly population, many of whom are not digitally confident. The consultation website was extremely difficult to navigate, even for me. The process involved unclear references (e.g. SD01), excessive scrolling, and a confusing series of links before reaching the final response section.

When attempting to submit my objection on a mobile phone, the website crashed twice. The layout, terminology, and navigation are not accessible for many users, particularly elderly residents and those with disabilities.

This raises serious concerns about digital exclusion and whether the consultation process meets the standards of fairness, accessibility, and inclusivity required for meaningful public participation.

Furthermore, I only became aware of this consultation two weeks ago. Communication to local residents has been inadequate, especially given the scale and long-term consequences of these proposals.

Conclusion

The allocation of Exmo 20 is unsound because:

- The highway network is unsafe and at capacity
- No funded or deliverable transport mitigation exists
- Sewage and drainage infrastructure is inadequate
- Schools are already full
- Sensitive habitats are at risk

Second Regulation 19 Consultation – East Devon Local Plan – Responses by Chapter

- Greenfield land is being lost unnecessarily
- Public engagement has been inaccessible and poorly communicated

For these reasons, I strongly object to the inclusion of Exmo 20 in the East Devon Local Plan.

Yours faithfully, *** Personal details have been removed *** Budleigh resident

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Andrew Drodge

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo-20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: for locals to be heard

Full name: Sally Eade

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. The road junction at the halfway house is already gridlocked at many times of the day. It will become virtually impossible to exit with the additional cars - having an impact on everyone in the area and knock on impacts on work efficiency, pollution etc.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: scrap the proposal to build here

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to

use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: if the development goes ahead for it to be significantly ie no greater than 25% of the suggested size and the buffer to be increased to 1000m.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: for locals to be heard

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European

Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

There is not the sewage capacity in the area to support increased housing of this kind. We have raw sewage being pumped into the sea and rivers in Exmouth and Budleigh. There is no way that more housing should be allowed to happen when we can't manage the services for the housing that we have and until the sewage management is resolved this should be put on long term hold. Currently sewage from Budleigh is being taken by tanker along the road to Exmouth and poured into the ocean there - before being washed east back to Budleigh. Counsellors need to get a grip of this and stand up the pressure that they are being put under to build. We need to develop brownfield sites and small scale infill builds not huge developments like this.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Stop pursuing Exmo_20 until sewage issues fully resolved for the long term.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The voices of the locals are not being heard.

Full name: Sally Eade

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Shear volume of houses is unreasonable for this site - it will turn Exmouth and Budleigh into a 'super town' but without the infrastructure to cope. The pebblebed heath site will be impacted negatively but increased number of people using it - if there are 4 people per household this is an additional 2800 within close proximity.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan completely.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I feel that the local community is not being listened to in their objection to this huge development.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Allocation of Exmo_20 is in conflict with paragraphs 206 of the December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (Grade 11* listed) will have significant adverse effects on the remote, tranquil surroundings of the Church and Churchyard. The area around the Church and surrounding buildings, a Medieval Saxon Settlement site, is characterised by dark skies and a sense of remoteness; a 'Wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 & TR03, and, therefore, unsound. It also conflicts with paragraphs 3.6, 11.2 & 11.6 of the Local Plan. Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179 to access facilities and services, being 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road, therefore an unsustainable location for development. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmouth_20 allocation. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heath SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heath SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant.

The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound.

The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. Objection 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan.

Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound.

In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan.

The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats.

Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery

Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”.

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan.

A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it.

HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the

proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified”

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan.

There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation.

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland

SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands."

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)].

Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths

SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”.

The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory.

NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.”

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Below are all the appropriate objections against building 700 new homes in east Devon , budleigh area / our home .

Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA

has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations.

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I want to raise an objection to the proposal to create a road which cuts directly through the Budleigh Salterton cycle path to Salterton Road.

The cycle path is a vital resource for local residents. Not only does the pathway give access to an area of natural beauty it is used by hundreds of people per day for walking, cycling and dog walking. Children are taught to bike ride on this pathway. Race organisers use this cycle path for events on a frequent basis. Disabled residents from the nearby properties use the pathway as an easy route to access with mobility scooters. This is the main route for people like myself who do not live close to the seafront and do not have easy access to other places to exercise. Personally I suffer from an anxiety disorder for which I take fluoxetine medication and walking this route with my dog is vital for my mental wellbeing when in the past I have had severe struggles with even being able to leave the house.

If a road is created to intersect this pathway it will be a huge disruption to all of these activities. Runners will no longer be able to use the pathway for events and races and will also have to pause their run to wait for traffic, I personally would worry about being able to walk my dog off lead for fear of her running into a road and there are no other nearby routes for off lead walking, parents will have to closely monitor their children for fear of traffic, bike riders will also be disrupted from travelling the route to Budleigh Salterton and these people are our towns workers who need this route to go to work.

All of these concerns are practical concerns but there will also be a huge impact of the wildlife in the area and pollute the natural beauty of the area. Birds, squirrels, foxes, voles which are all present along this cycle path will now be at risk from traffic.

There are already roads accessible without ruining this area. Castle Lane already links to Salterton Road and so the creation of a new road is unnecessary, disruptive and destructive.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is

a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that "just one event leading to predation is enough to end that nesting attempt" [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be

required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To
East Devon District Council, Local Plans Team

I wish to strongly object to the Exmo_20 plan. I think it should be at the very least reduced in size, and the proposed settlement boundary moved further away from the Pebblebed Heaths. Reducing housing number and concentration of development by moving further southwest would allow a greater rural buffer between it and the Heaths.

Also this proposed site for Exmo_20 would increase the need for car travel. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.00 miles from Exmouth. Exmo_20 settlement would overwhelm the Budleigh Salterton facilities, e.g. parking, medical services, sewage disposal, and the topography does not show potential options for cycling and walking.

Sincerely,

*** Personal details have been removed ***

1(c). If the comment is related to a site, please state the site reference here::
Exmo_04a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to oppose this proposed development. I am very much aware that more housing is required and indeed if I believed that the majority of these proposed houses were going to be social housing one might be more accepting of such a development although the environmental concerns would of course still remain.

Exmouth 04 is small parcel of land off Higher Marley Road, Exmouth. This land is known as The Lawn, it is WOODPASTURE PRIORITY HABITAT, it is home to many endangered species, as detailed in ecological report, many are on red list. There are many veteran /ancient trees on site. The parkland pre dates the old mansion Marley and was probably laid out when previous house 'Whimsey' was built in mid 1700s. Some of the oldest Luccombe Oaks in country are on this site. This site should have protections to stop building. National Planning Policy Standing Advice is that planning should be refused. As well as the parkland there is narrow field with ancient woods each side, this is a corridor for the wildlife. There is a stream which runs underground through middle of field, this would be diverted. This area takes run off from commons, hard landscaping could lead to serious flooding into Exmouth. The access to this site is off Higher Marley Road, which will lead to more traffic trying to get onto Dinan Way or over the Common, this site is 400m from Pebblebed Heaths.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I am writing to oppose this proposed development. I am very much aware that more housing is required and indeed if I believed that the majority of these proposed houses were going to be social housing one might be more accepting of such a development although the environmental concerns would of course still remain.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_04a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing as a resident of Exmouth to formally oppose the plans to build houses on the area known as The Lawn, off Higher Marley Road. This area is home to endangered species and a number of ancient trees, and forms both a physical and environmental break between the growing town of Exmouth and Woodbury Common. Additionally extra traffic on that road would be beyond its capacity.

I chose to move to Exmouth 21 years ago because of its character which is slowly but surely being eroded and replaced with something generic and bland. I have seen huge degradation in the roads, sewage, and maintenance of the town and believe that the council should be looking to rectify this, not extend the town further and place additional burdens on an already overstretched infrastructure; as well as making every effort to preserve what remaining character the town has and protecting the rural belt and its habitat and wildfire.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The consequences for water run-off from a site whose location is higher than Exmouth seem to be ignored in a cavalier manner. Impermeable surfaces, roads/paths/roofs will rapidly accelerate run-off placing strain on the existing water courses and leading to flood potential. Green field sites mitigate flood risk, urban sites advance flood risk. Nature provides a natural sponge, urban structures remove that effect. Modern floods are not just the consequence of heavier than normal rainfall but also more artificially created impermeable surfaces and rapid drainage systems overloading watercourses. The Withycombe brook will require a strategy that compensates for the inevitable added flow as a consequence of Exmo_20. It is surprising that at these times where climate change is becoming a reality there is so little regard for the changes to hydrological systems such proposals will produce.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Develop a strategy, funded and in liaison with other responsible bodies for water management to avoid flooding in Exmouth. Reduce the size of Exmo_20

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To hear at first hand how planners consider it sound to create a potential flood risk.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The traffic generated from 700 new homes each with at a conservative estimate 1.8/2 cars is highly significant but added to the fact the the B3179 is a narrow rural road means that for safety reasons alone a considerable highway improvement scheme would be required paid for by? Has this been quantified to any meaningful extent? Consider the junction between the B3179 and Hullum Road which is already congested at peak times, together with the B3180 junction with the road to Woodbury where there are frequent long delays at this dangerous spot. The roads in their current state are simply inadequate. Where is the joined up thinking? How will more cyclists manage on roads designed for small cars with no cycle lanes in the vicinity and none planned. Footpaths for pedestrians to access bus stops, and the thought of buses on the B3179 or B318?

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Redesign the road system including public transport. Was the Ronda link road designed with all these new proposals in mind , definitely not. it is an awful place to locate 700 homes without seeing the total picture of the consequences which will be so damaging.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Roger Fetherston

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Too many people, too close to the Pebblebed heathlands will lead to significant and highly damaging degradation of the ecosystem. The very quality that makes the environment as attractive will be lost for ever. It will be impossible to restrict numbers and the behaviours of people on the heathlands. There is a totally inadequate monitoring or controlling of behaviour at present and many do not comply to guidance such as dogs on leads, no dogs in Squabmoor reservoir, no motor bikes, leave no litter. This is with no great numbers of houses right on the edge of the pebblebeds.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The 400 meter buffer is totally inadequate and seems a 'sop' allowing planners to say look how carefully regarded the environment and protected it. From 700 homes, people, and all the accompaniments that brings.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Roger Fetherston

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The damage to the pebble bed ecosystem would be permanently damaging. Such a precious environment cannot be adequately protected by a mere 400metre buffer zone from predation by cats, dogs, humans cycling, motor bikes. It is nonsense to believe it will be adequate. The heathlands are a small area of great significance with species such as the nightjar, dartford warbler, dragon flies, lizards, butterflies, moths, frogs, toads, snakes not to mention the rich flora. All this threatened by ill judged urban expansion because it meets a target!!!!

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce size by at least 60%. Increase the buffer zone to at least 800 metres. reconsider road access and the unsuitable proposal that takes traffic to very margins of the heathlands.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To have my voice heard.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 represents a large urban extension set on the margins of Exmouth, within a mile of Budleigh Salterton, adjacent to an invaluable set of heathland habitats recognised nationally as significant, within an infrastructure already unable to adequately cope with water/sewage systems, with road access totally unsuitable for what would be probably another 1250 vehicles at least, with no pedestrian access to nearest shops. Exmo_20 is an example of the very worst urban planning. It is simply an expedient to meet a 'target' because it is said there is no where else. What logical reason is that? The environmental damage as admitted has not been quantified with habitat loss and disturbance highly damaging. Consider the number of dogs, cats and human interference that will permanently damage such a fragile ecosystem as the pebble beds.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

The very qualities you, as a council, and we as residents value is threatened here. Exmo_20 is too large by far, it is too close to the heathlands, has inadequate roads and should be honestly reviewed. It is too significant to just meet a target. Please take this opportunity to step back and consider how this would change the environment for ever with nothing positive to offer other than ticking a box and ignoring public feeling. Site access via the

B32179 is completely unsatisfactory. The road was never built or designed for such a level of traffic as would result from these proposals.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I believe my voice should be heard and I wish to hear at first hand justification for this ill-judged and highly damaging proposal.

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17/Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Please note I object to all the future housing sites/industrial sites planned around and near Exmouth, Woodbury and Lymptone and want you to stop the building of a huge estate and industrial buildings on our protected Area of Outstanding Natural Beauty (now known as 'National Landscape') on the edge of Exmouth.

(1) Large housing estates should not be built on National Landscape or on or near Areas Of Outstanding Beauty.

(2) Building on land away from the National Landscape would be cheaper, making possible to build a bigger percentage of affordable homes.

3) The exit from this site (Exmo-17) would create traffic chaos and the access road would go straight across the much-used Exmouth to Budleigh cycle/footpath, endangering users.

4) Already sewage problems at Plum Park are known and toilets in the town are filling up bubbling with water when rains heavy

More houses is always detrimental to wildlife. Added stress for humans lives as roads, places become gridlocked and the plumbing/sewage facilities cannot cope with more people living in and around Exmouth.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I write to express my deepest concerns for the proposed development of over 400 homes at the site known as EXMO17.

The proposed site is National Landscape land and as such is national parkland.

As well as being national parkland the siting of any housing development in this location is totally unsuited.

1. There is no infrastructure support in place and especially sewage capacity. As a resident of Exmouth for 20 years i have witnessed the increasing pollution by Southwest water of the discharge of sewage into the sea EVERY TIME IT RAINS for hours and hours. As a cold water swimmer all year round, the available times for swimming in clean sea water has drastically reduced and especially since other housing developments have been built ie Plum Park which shares the same lack of capacity of the sewage infrastructure.

2. Road congestion in Exmouth with its one road in, one road out has again dramatically increased and if EXMO17 and EXMO20 developments are built, several extra hundreds cars will further add to the congestion problem. There is limited capacity to accommodate extra vehicles. The exit from the proposed development would further add to congestion and there are clear safety issues.

3. It is not clear who all these proposed houses are for? Already we have two new very large developments at Dinan way and 100s of other existing houses for sale in and around the town. Are they being targetted to second hime owners? Councils from other UK counties wishing to off-load problem tenants such as what happened at Newcourt? We dont need more pressure on our limited social services.

4. There are no NHS dentists in the town, GP surgeries are full and Exmouth has limited employment opportunitues.

It appears that greed us fuelling the sell off of these areas of natural beauty in the surrounding area around our town. Short term gain for long term problems. There is no consideration by EDDC to take into account the quality of life that is threatened by the development if these sites.

The building companies do not care - once they have had their money, they will have no concern about the damage they have created sanctioned by EDDC. Who will deal with the flooding, the extra sewage in the sea, the loss of natural habitats for the nature they destroyed. Will EDDC provide compensation to residents for the destruction of the right to enjoy living in Exmouth? What funds are being set aside for claims post house building? Are developers being asked to set aside sums for the ongoing damages their developments cause or will the town and new Unitary bodies have to pay compensation and soend tax payers money mopping up the mess?

These proposed new developments are not suitable for our town and its high time EDDC pointed this out to this disasterous government which is clueless.

Its up to EDDC to say no and accurately present the reasons why no further building of more houses should go ahead.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to register my objection to the proposed/possible Exmo_20 development. I am a relatively new resident in Budleigh Salterton and yet I can already tell from my experience;

- Population growth in East Devon is running significantly ahead of the South West and UK averages (2011 to 2021 growth of 13.8% compared to 7.8 and 6.3% respectively for S West & UK). While recognising that this puts pressure on you as planners, it does not mean that developments should be allowed to proceed at the request and profit of property developers without there being especially strong planning measures to protect the area's SSI & AONB, World Heritage categorisation and unique natural beauty and ecosystems. You need to be safeguarding that for future generations and not be in an apparently zealous rush to encourage further population growth.

- I see no evidence in the Exmo_20 proposal that proper consideration has been given to sewage infrastructure. The River Otter is very polluted, primarily due to upstream housing developments which have been carried out without adequate development of the sewage infrastructure. It is in the worst 20% of rivers in Devon & Cornwall for pollution. Prior to Christmas there was the ridiculous scenario of BS sewage being taken to Exmouth by tanker, only to then be pumped into the sea anyway due to stormwater overload. There should be no further developments until this basic infrastructure is sorted.

- The roads to Exeter , where presumably most of the Exmo_20 residents would be working, are in a poor state of repair, badly potholed and endless delays due to road closures at Woodbury. The high St road surface in BS is an awful state . Many new residents will come here to shop. Again, your plan appears to not address the need for the existing infrastructure to be improved.
- You will be aware of the proximity of the development to the Pebblebed Heath . This is a priceless ecological treasure that is being put at severe risk , with the buffer zone of only 400m appearing to be completely inadequate.

I would strongly advocate that the Exmo_20 development be shelved , or at the very least be delayed until all the existing infrastructure problems are fully resolved and other alternatives (to compromising the ecosystem) have been exhausted.

Thank you for your consideration .

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20, and move the settlement boundary away from the Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20, and move the settlement boundary away from the Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20, and move the settlement boundary away from the Pebblebed Heaths

Exmo_17

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The destruction of the extensive bat, badger, and slow worm habitat, protected agricultural hedges, the two dozen mature oak trees (bordering the cycle path in the middle of Exmo_17), will never be able to be mitigated locally, as all the land nearby is earmarked for development or being farmed. There is nowhere else in Exmouth that combines these habitats with the public access, sustainable transport link (cycle path) undeveloped open space with footpaths, dark skies, and clean air. It is a huge draw to visitors who come to this exact spot in their thousands every year from the nearby caravan site, from Exmouth via the cycle route, and from Budleigh at the other end of the cycle path. This is a unique environment which is not heathland but valuable top grade farmland being managed in a way which gives habitat for hundreds of species. In order to comply with 30By30 and multiple environmental commitments which EDDC and the Govt have committed to, the destruction of this National Landscape Site is a backward step and will contribute to not just flooding locally, but climate change and species extinction in the south west. The bird life in the protected hedges is extensive and varied, and the bats living within this site (and badgers in the ground underneath it) are protected. Environmental commitments must be respected and land found elsewhere. To destroy this area will cause a huge drop in visitor numbers which will affect tourism in this area and people's livelihoods will be adversely affected. Why would people visit a housing estate on holiday? They will go elsewhere.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_17 from the local plan and substitute with land not within the national landscape nor which is home to protected mammals and invertebrates, to comply with 30By30 and the Govt's environmental commitments and those of this Local Authority.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The site Exmo_17 is visible from the Jurassic Coast World Heritage Site and is only 1km away from the Heritage Site. The World Heritage Site Setting is protected by the National Landscape designation and the CPA, which EDDC has tried to remove, however only the Secretary of State can change the Buffer Zone or Protections acting as a buffer zone, of a World Heritage Site. EDDC's unilateral actions in trying to lift the CPA from fields in Exmo_17 are not supported by the Jurassic Coast World Heritage Site's Articles of Inclusion and any changes to the site's setting, which includes the coastal land, puts the designation of the whole site at risk. The whole of Exmo_17 will be visible from the Jurassic World Heritage site, a site of global significance. It is an incursion of urban sprawl into an area covered at present by two levels of protection which EDDC is desperately trying to ignore or lift, to make up their housing target numbers. This is incorrect management of an incredibly important site, the Jurassic coast WHS,, and its surrounding protected area.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_17

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The site allocations are flawed. If it is proposed to build within National Landscape, one can build on land outside the NL but with a view of it. The allocations do not stand up to scrutiny. Exmo_24 which has been refused for allocation, due to the aforementioned “view of the NL”, is not within the NL and could provide equally good transport links, it is only across the main road. The way in which some sites have been allocated and others not allocated in this Plan, makes no sense and therefore the Plan is terribly flawed. It is common sense to use up all the available land outside the National Landscape before you build in a protected area and plainly EDDC has not done that, nor does their rationale of “building in the public interest” stand up to scrutiny, as these houses will be unaffordable to anyone but homeowners in the southeast and home counties – a market which is already well served, here in East Devon, and which does not represent housing need, only location preference. There is no public interest rationale for building in a national landscape when the completed houses will be unaffordable to ordinary people living and working here.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_17

from the Local Plan and include Exmo_24 instead, or other sites not in the designated national landscape.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_17

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This is not just one development in a National Landscape, it is the first of many which will be proposed and marketed to south-eastern buyers as “situated within the National Landscape” so the houses will be a premium price. Very few will be affordable and certainly not so for local people, therefore local housing need will not be addressed. For this reason, the supposed overriding “in the public interest” descriptor/justification of building in a National Landscape does not apply, because the “public interest” is not to provide second homes or houses for southeast retirees, there are plenty of those on the market already. The public interest is addressing housing need for people in this County, on the housing list and for working families, and developing Exmo_17 will not do a thing to help those people, therefore it’s not in the “public interest”. Houses currently on the market are not selling, due to the extraordinary prices in East Devon, which will only be exploited by the developer when new houses are marketed as being “in a National Landscape”. This allocation was never in the public interest, it is merely a money-making scheme by the landowner, which will deprive future generations of our heritage.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXmo-17

from the Local Plan and purchase or allocate land outside the national Landscape so the premium price addition of being within a NL does not apply to any housing allocation which is supposed to address housing need in East Devon.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The site is wholly within a protected National Landscape. EDDC was never supposed to be able to list Exmo_17 due to its CPA and NL designations, but these have been treated as if they don't exist and the CPA is "lifted" from two fields within Exmo_17 which were specifically included by the landowner, the *** Personal details have been removed *** family, in the National Landscape (then AONB) in 1962. *** Personal details have been removed *** requested these two fields in Exmo_17 were included within the AONB during a consultation prior to the finalising of the AONB boundary in 1962. The *** Personal details have been removed *** family had good reason for putting those fields in the AONB (now National Landscape) and they insisted on drawing the "built area Boundary" at that exact point. This is just the first "domino" in a set of developments which are to be brought forward by *** Personal details have been removed *** Devon Estates which will tarmac the National Landscape from Liverton to Quentance Farm and take many hundreds of acres away from our East Devon National Landscape. This initial site, Exmo_17, is the site which will remove any idea of the National Landscape being a protected area and open the rest up to destruction. It is impossible to "sensitively build and landscape" 410 houses into a protected area, it will neither conserve or enhance it, the dark sky will be further eroded, protected species will be wiped out here, along with mature oak trees, protected agricultural hedges and the hundreds of insect bird and wildlife species living there. As the built area boundary advances this will cause catastrophic loss of habitat and turn this rural area into an urban one, destroying the character of the village, and setting up a Nature deficit which cannot be mitigated either in this area or elsewhere – there is no nearby space for nature mitigation which has not been earmarked for development. This site, the first of

many planned by the landowner, will effectively destroy the EDNL as a protected area and a space for nature in East Devon.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_17

from the Local Plan and use land outside the National Landscape, EDDC has compulsory purchase powers and a lot of land to choose from, before it should be developing within the NL. Just because the landowner seeks profit, does not mean future generations should lose our National Landscape forever.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

There is significant flood risk to the valley as Exmo_17 is on a south-facing slope which extends downwards into the valley floor, where there is a polluted Brook already overtopping due to runoff from other developments, and where road and farm flooding is taking place right now. Fast flowing water comes down the valley on the red clay soil and apparently has not been mitigated properly from prior developments, as it is causing serious flooding and bogging of farmland, private property, the graveyard, and other sites on the Allocation List. It is obvious one cannot build at the top of a valley without rendering the land downhill impossible to develop and without affecting several Listed properties, including a 1000-year old Church and its graves, several thatched cottages and a listed farmhouse. The water runoff from huge developments does not run tidily into ponds – the sheer weight of the developments compresses the soil, makes it less permeable to water moving through it, and runoff increases from the vast tarmacked areas, driveways, roofs, and road drains. All of this will go down the valley towards a Brook which is over capacity right now, running next to homes where people live, and miring ground which is also up for development or where people are trying to farm.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_17

from the Local Plan and find the necessary houses from a part of East Devon not within the National Landscape and which would not cause flood risk downhill.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently

serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support

significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is

a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this

falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1

Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. 9.. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles

from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". POLICIES REFERRED TO IN SUGGESTED OBJECTIONS National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan- makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals,

preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable a

Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: A large housing estate should not be built on National Landscape. This is destroying farmland, ruining family farms and wildlife. Once destroyed our beautiful landscape will be gone forever. As a tourist area we need to retain our countryside to allow tourism to flourish. Building on land outside the National Landscape would be cheaper, making possible a bigger percentage of affordable homes. Homes should be being built for current residents of exmouth to enable young people to leave home. Why not build pods as they are doing in Tiverton outside of the national landscape. These are cheap and small and would make affordable housing. This would not put extra pressure on our services as locals could buy and they already live here. We cannot accommodate more people from outside the area The exit from this site (Exmo17) would create traffic chaos and the access road would go straight across the much-used Exmouth to Budleigh cycle/footpath, endangering users (children/elderly/cyclists/families/dogs). There is insufficient capacity on the roads to Exeter to deal with the current traffic without adding more *** Personal details have been removed ***

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_17 should be removed from the Local Plan as it is unsuitable for development due to its location within sensitive landscapes. The site lies within the East Devon National Landscape and historically within the Coastal Preservation Area (until a recent underhand and strategic change of site boundary to exclude Exmo_17). Both of which are designated to protect the undeveloped character and scenic quality of the coastline and surrounding countryside. Development would result in irreversible harm to landscape, visual amenity, and the setting of Littleham and Exmouth, contrary to national and local policy. Early site assessments found Exmo_17 unsuitable and not a preferred allocation, citing landscape sensitivity, heritage impact, and pressures on local infrastructure. These constraints remain unaddressed, yet the site has been included primarily to meet national housing targets rather than on the basis of planning merit. The partial reduction of the Coastal Preservation Area to accommodate development further undermines established protections without sufficient evidence that the landscape or coastal character is no longer of value. Allocating Exmo_17 would therefore fail tests of justification, consistency with national policy, and sustainability, and would set a precedent for further greenfield development in protected areas.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: For these reasons [above], Exmo_17 is not a sound allocation and should be excluded from the Local Plan.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: It follows that Exmo_17 must be removed from the Local Plan. This is confirmed in a statement concerning Exmo_17 by Natural England:

Statement by Natural England regarding Exmo_17.

In this instance, we would draw your attention to the National Planning Policy Framework (NPPF), the East Devon National Landscape's Management Plan, the Environment Act 2021, and section 245 of the Levelling up and Regeneration (LURA) Act 2023. As regards the NPPF, sections 2, 13, 14, 15 and 16 are all especially relevant to Protected Landscapes. Notably, in this instance, s.15 paragraph 190 states that 'when considering applications for development within National Parks, the Broads and National Landscapes, permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest' (*italics added*). Also, in s.2 paragraph 11.d.i., where National Landscapes and National Parks are described as areas or assets of particular importance, the policies of which provide a strong reason for refusing development.

Alongside the NPPF is the strengthened Protected Landscapes Duty outlined in Section 245 of LURA 2023. This duty creates an obligation amongst public bodies and statutory bodies to 'seek to further' the purposes of Protected Landscapes whenever exercising

functions that affect land in these areas, a change to the previous wording which necessitated relevant authorities needed only to ‘have regard to’ these purposes. This change necessitates proactive measures be taken rather than the more passive action that preceded it. The purposes of National Landscapes are to ‘Conserve and enhance the beauty of the area’. Importantly, this statutory purpose is very similar to that which governs National Parks. Unfortunately, this is often not recognised, with the relevant authorities often viewing National Landscapes as a ‘secondary’ or ‘weaker’ designation. This misguidance is perhaps an unfortunate outcome of chronic, inadequate resourcing of National Landscape teams.

Similarly, the Environment Act 2021 established the statutory obligation to produce Local Nature Recovery Strategies (LNRS) as well as ensure a mandatory 10% biodiversity net gain for ‘almost all development in England’. In the first instance, Devon County Councils LNRS explicitly references the East Devon National Landscape as a key landscape for ‘Devon Special Species’, highlighting its importance in achieving local environmental plans.

Lastly, relevant authorities should pay significant attention to the National Landscape’s Management Plans when making planning decisions. These plans, reviewed and published every 5 years in accordance with the statutory obligations of the Countryside and Rights of Way (CROW) Act, are produced on behalf of the local councils that host the National Landscape, and the local council adopts the Management Plan as part of its own policy. Given that the Local Authority is the Local Planning Authority for planning decisions, and the National Landscape’s Management Plan becomes a council document, not an external recommendation or oversight.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objections to building on Exmo_17 (National Landscape).

The chapters stated refer to those in the Commonplace questionnaire.

Chapter 8: Housing Needs

The real need in Exmouth is for houses of mixed tenure, including social rent, for people on low wages. Has Exmouth Town Council's assessment of housing need been consulted?

The vast majority of houses proposed for the prime site of Exmo_17 would be high- end, bought by people from outside the area, increasing the local population and putting further stress on the inadequate infrastructure, particularly water supply and sewage disposal systems. There is no shortage of high-end houses for sale in Exmouth so no more are needed.

Past experience tells us that the number of affordable houses will likely be fewer than proposed.

Chapter 11: Sustainable Transport

The proposed estate on Exmo_17 would bring a further 800-900 vehicles onto local roads. The access road would be directly opposite the Liverton Trading Estate, which is a well-known bottleneck with queues of cars waiting to exit.

A new roundabout has been projected plus two pedestrian crossings on the busy main road into and out of Exmouth. Traffic would be significantly held up at this point, causing increased air pollution and slowing drivers' progress. To reach Exeter, where the jobs are, the choice would be to drive there, to catch two buses (passing every half hour) or a bus plus a train.

Chapter 12: Landscape

Exmo_17 had two protections until EDDC , without any justification, recently removed its Coastal Preservation area status, despite hundreds of objections from residents. It is a very large, precious area of National Landscape farmland that is protected against large-scale developments. This land serves two nearby farms: losing these fields would put both farms in jeopardy.

EDDC's duty is to 'conserve and enhance' it. (***) Personal details have been removed (***) on behalf of the Housing Minister, (***) Personal details have been removed (***) has confirmed this in a letter to our MP, (***) Personal details have been removed (***) of 18th August 2025). In no way is building a large estate on Exmo_17 conserving or enhancing it. There are no 'exceptional circumstances' justifying building a large estate on this National Landscape: there is land outside the National Landscape that could be used instead. As far as being 'in the public interest' is concerned, the losses far outweigh the benefits. There is no reason to build the proposed industrial units on this land either. Logically, they should be built on the Trading Estate opposite, or Exmo_18, both of which have the same landowner.

The proposed vehicle access road would go straight across the existing Exmouth to Budleigh cycle/foot path and would require the felling of mature trees and bushes. This well-used path gives safe, tranquil access to cyclists, dog walkers, children, recreational walkers and people in wheelchairs and on mobility scooters. We think this is dangerous and a loss of a peaceful amenity within the National Landscape.

The landowner, Clinton Devon Estates, has recently terminated the lease to a nearby farm of 84 acres of National Landscape pastureland adjacent to Exmo_17. Could it be that they are intending a domino effect, building further estates on our irreplaceable National Landscape? If the rumour is true, that the landowner has sold or will be selling the land next to Exmo_17 to Bloor Homes, it would confirm their confidence that the District Council will allow them to keep building on National Landscape in the future.

Chapter 15: Historic Environment

The proposed estate would be close to Littleham's medieval church where Lady Nelson is buried. There is also a grade 2 listed farmhouse, Mountain Farmhouse, on the perimeter.

These National Landscape fields are in plain view from the coast path that runs along the World Heritage Jurassic Coast, which is one reason why these fields had Coastal Preservation Area protection until EDDC recently removed it, simply to facilitate building the proposed estate.

In conclusion, National Landscape is officially equal in importance and protection to National Parks. It follows that Exmo_17 must be removed from the Local Plan. This is confirmed in a statement concerning Exmo_17 by Natural England:

Statement by Natural England regarding Exmo_17.

In this instance, we would draw your attention to the National Planning Policy Framework (NPPF), the East Devon National Landscape's Management Plan, the Environment Act 2021, and section 245 of the Levelling up and Regeneration (LURA) Act 2023. As regards the NPPF, sections 2, 13, 14, 15 and 16 are all especially relevant to Protected Landscapes. Notably, in this instance, s.15 paragraph 190 states that 'when considering applications for development within National Parks, the Broads and National Landscapes, permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest' (italics added). Also, in s.2 paragraph 11.d.i., where National Landscapes and National Parks are described as areas or assets of particular importance, the policies of which provide a strong reason for refusing development.

Alongside the NPPF is the strengthened Protected Landscapes Duty outlined in Section 245 of LURA 2023. This duty creates an obligation amongst public bodies and statutory bodies to 'seek to further' the purposes of Protected Landscapes whenever exercising functions that affect land in these areas, a change to the previous wording which necessitated relevant authorities needed only to 'have regard to' these purposes. This change necessitates proactive measures be taken rather than the more passive action that preceded it. The purposes of National Landscapes are to 'Conserve and enhance the beauty of the area'. Importantly, this statutory purpose is very similar to that which governs National Parks. Unfortunately, this is often not recognised, with the relevant authorities often viewing National Landscapes as a 'secondary' or 'weaker' designation. This misguidance is perhaps an unfortunate outcome of chronic, inadequate resourcing of National Landscape teams.

Similarly, the Environment Act 2021 established the statutory obligation to produce Local Nature Recovery Strategies (LNRS) as well as ensure a mandatory 10% biodiversity net gain for 'almost all development in England'. In the first instance, Devon County Councils LNRS explicitly references the East Devon National Landscape as a key landscape for 'Devon Special Species', highlighting its importance in achieving local environmental plans.

Lastly, relevant authorities should pay significant attention to the National Landscape's Management Plans when making planning decisions. These plans, reviewed and published every 5 years in accordance with the statutory obligations of the Countryside and Rights of Way (CROW) Act, are produced on behalf of the local councils that host the National Landscape, and the local council adopts the Management Plan as part of its own policy. Given that the Local Authority is the Local Planning Authority for planning decisions, and the National Landscape's Management Plan becomes a council document, not an external recommendation or oversight.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_04a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmouth 04 is small parcel of land off Higher Marley Road, Exmouth. This land is known as The Lawn, it is WOODPASTURE PRIORITY HABITAT, it is home to many endangered species, as detailed in ecological report, many are on red list. There are many veteran /ancient trees on site. The parkland pre dates the old mansion Marley and was probably laid out when previous house 'Whimsey' was built in mid 1700s. Some of the oldest Luccombe Oaks in country are on this site. This site should have protections to stop building. National Planning Policy Standing Advice is that planning should be refused. As well as the parkland there is narrow field with ancient woods each side, this is a corridor for the wildlife. There is a stream which runs underground through middle of field, this would be diverted. This area takes run off from commons, hard landscaping could lead to serious flooding into Exmouth. The access to this site is off Higher Marley Road, which will lead to more traffic trying to get onto Dinan Way or over the Common, this site is 400m from Pebblebed Heaths.

Thank you for your consideration.

1. ALLOCATION OF EXMO_20 IS IN CONFLICT WITH PARAGRAPHS 16C, 32, 73B- (Specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6 policies PB01, PB02, PB03, PB04, AND OL02 OF THE LOCAL PLAN. Being adjacent to the Pebble Bed Heaths SAC/SPA/SSSI the allocation relies on significant habitat and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states "it was not possible to screen out a likely Significant Effect for other units within the EDPH SAC and SPA" and the Plan HRA states "there is an inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks" This site was selected on 03/09/24 (without option to reconsider), with the draft local plan approved on 11/12/24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30/01/25 HRA, contrary to CJEU "People over Wind". Furthermore selecting sites with no mitigation requirements requires clear justification when assessing allocations against Mitigation Hierarchy as set out in NPPF paragraph 32. 2. Allocation of Exmo_20 is in conflict with paragraph 16c, 32, 73b (specifically footnote 38+7) 180d, 180e, 181, 185a, 186a, 186b, 188+191c of the NPPF December 2023 and is unsound as not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 & OL02 of the Local Plan. A minimum of 400m adjacent to the Pebble Bed Heaths SAC - SPA-SSSI must be excluded from the EXmo-20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km (HRA 4.10), and considering the ground nesting NIGHTJAR is a qualifying feature of the SPA, so a clear and significant predation risk it

would seem precautionary for this distance to be significantly more than the pragmatic 400m (Underhill-Day 2005) currently proposed as it is recognised but just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling and walking which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level 3. Allocation of Exmo_20 is in conflict with paragraphs 16c,92, and 114b, 114d,180e +181 of the NPPF Dec2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 & PB04 and Paragraphs 11.2 of the Local Plan. The current proposal is to have the majority/bulk of the access onto B3179, but to make this viable would require MAJOR uncertain and uncOSTed hi-way works, not confirmed by Devon County Council. Cumulative and in-combination effects on Regulations Assessment (18/11/25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to air quality", due to the primary access to Exmo_20 being onto the B3179 which would sent traffic along the boundary Pebble Bed Heath SAC-SPA-SSS1. Allocation of Exmo-20 is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance over mitigation. The Exmo-20 allocation is unlawful due to there being no reasonable scientific certainty presented for mitigation

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is falsely listed as a reasonable alternative on page 386 & 387. Firstly, the site was deemed unsuitable and unachievable, not just unachievable as stated. There has been no evidence provided demonstrating that site access, minerals and proximity to the Pebblebed Heaths can be addressed, with the access arrangements and impacts on the Pebblebed Heaths SAC/SPA/SSSI reliant on a viable agreed mitigation strategy and supporting HRA which are both absent from the Local Plan evidence, notably the HRA being a required Core Submission Document. Also note that the Exmo_20 site was selected for inclusion in the Local Plan prior to the Appropriate Assessment, in conflict with the 'People over Wind' CJEU ruling. Furthermore, the Exmo_20 site as submitted for assessment in the HELAA was not available, but was not checked despite this being one of the three HELAA assessments. The site therefore in fact failed all three tests, and should be stated to have been found unsuitable, unachievable & unavailable. The site's current inclusion in the draft Local Plan is not legally compliant, unjustified and unsound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Ann Gillham

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh it's most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the Local Plan. An alternative site to Exmo_20 for housing allocation should be selected, one which was deemed available, achievable & suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. Exmo_20 would cause harm to the heritage assets, most significantly St John in the Wilderness Grade II* listed church and churchyard, drastically altering the attractive rural setting for worship & burials which currently exists. This is contrary to POLICY HE02. Exmo_20 would have a detrimental effect on the adjacent designated wildlife sites and destroy the "tranquility, wildness and dark skies" of the countryside, which is contrary to POLICY OL01. Exmo_20 development would be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would cause harm to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9. Exmo_20 is in conflict with POLICY OL09 and POLICY PB04 as the Habitats Regulations Assessment (30.01.25) states that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA) such that the Plan fails the

integrity test. Development of Exmo_20 on heavy clay subsoil with ineffective soakaways, would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already beyond its design capacity. This is in conflict with POLICY AR01B. Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location is unsustainable development as people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
Remove EXMO_20 from the proposal

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As a professional ecologist I can see a number of issues with the proposed EXMO_20 site. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. I endorse the existing and very well stated comments that follow: "The LPA appears to demonstrate a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for

potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would see precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed, as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significant greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape. As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the

East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6 policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. Clarke, R.T. (2007) 'What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*?' Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John’s (Exmo_20)) that “new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths” there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore

unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a ‘wilderness’ setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that “Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 20).... we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development an associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified.

6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 and 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local

Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathway with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk are without yet considering current and future impacts from climate change. The greenfield Exmo_2 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been

demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking and cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, use for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below: criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are

incorrect, there is no justification, not least in the Mitigation Hierarchy assessment Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". POLICIES REFERRED TO IN SUGGESTED OBJECTIONS National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan- makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on locations which are o can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity an congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and

allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife- rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration o creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, an which is like;y to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment ha concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscape and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset fro development within its setting should require clear justification. Assets of the highest significance, notably....grade I and * listed buildings should be wholly exceptional.2nd Regulation 19 Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impact Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and

Species Regulations 2017 Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. Policy TR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5 miles). Factors such as topography also influence walking choice. Paragraph 13.10 aims to protect irreplaceable habitats and important features. Paragraph 13.11 states that some habitats, including ancient woodlands and veteran trees are irreplaceable due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats. In addition the presence of Hazel dormice, a European Protected Species, throughout the woodland around Bystock Pools and by inference all linked hedgerows would be threatened by the introduction of domestic pets (particularly cats). There are no proven ways to prevent predation of dormice by domestic cats. What provision has been made for the Lesser horseshoe bat colony close to Bystock House? what will the impact be of reducing the immediately available foraging habitat for this colony.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the local plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sophie Glanfield

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Significantly reduce number of houses in EXMO_20

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sophie Glanfield

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of EXMO_20 and remove access to the B3179

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of EXMO_20 significantly.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: EXMO_20 should be removed from the local plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sophie Glanfield

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) ... are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Full name: Sophie Glanfield

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the local plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring roundingErrors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Exmo_20 should be removed from the plan, failing that access to the B3179 should be removed.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sammy Glanfield

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) ... are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from strategic plan or reduce size back to EXMO_20B

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Reduce the size of EXMO_20 significantly or remove it from the strategic plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.
