Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Full name: Philippe Planel

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Woodbury Common is a site that carries not just one but several layers of national and international ecological protection.

It is a site of Specific Scientific Interest (SSSi), it is a Special Protection Area (SPA), Special Area of Conservation (SAC), It is a Statutory Nature Area (SNA), it is protected as part of the Local Nature Recovery Strategies (LNRS, sometimes referred to in context with nature-based actions as LNRA) and it is a Natural Nature Reserve (NNR), (which incidentally is the highest level of conservation protection available under UK legislation.)

The Common is also in the process of being included in the local nature recovery strategy of Devon as high value land.

This is one of the most highly designated conservation areas in the South West of England.

Not to mention that the actual site that has been put forward for the development of Exmo_20, has itself has been designated as a strategic natural area for its importance as a link between The Common and The Sea.

To consider placing a major housing development on the edge of Woodbury Common is quite simply a huge step in the wrong direction not only for Biodiversity but also for our Obligations under National Planning Policy and Environmental Law.

The Mitigation Hierarchy which I'm sure the committee is familiar with, asks first and foremost; can another site provide the same outcome with less harm?

This proposed site, adjacent to an Extremely protected landscape surely fails that basic test.

The Woodbury Common is not just a local treasure it forms part of the network of Rare Lowland Heath, which is home to species found nowhere else in Britain, making it critical to our national biodiversity strategy.

To build 700 houses, and all the Infrastructure and support systems that those houses would need, with the inevitable impacts of noise pollution, light pollution, traffic, not to mention domestic animals and human pressure, all so close to this important, sensitive and rare habitat runs counter to the very purpose of its protected status.

Let us not forget that the damage done by proximity is not easily mitigated by buffer zones and fences, and won't undo the stress placed upon a fragile ecological system by such a scale of development.

Saying no to the allocation of this site is not a rejection of progress. True progress means choosing sites that allow us to meet our housing needs without undermining the fragile natural world of which we have a duty as educated civilised, moral and hopefully responsible citizens to protect.

If the site were to be given a greenlight by the committee what precedent would it set for property developers in the future wishing to build large scale projects at the doorstep of highly sensitive and protected conservation areas?

What Hope will nature have if the leaders of today do nothing to protect it?

It is clear for all to see that we are living in a time when so many global leaders are choosing to make short sighted, irrational decisions that are not only illogical but laugh in the face of the incredibly hard work of so many predecessors whose tireless efforts built systems, not only for conservation, but also to create checks and balances for the protection of all going forward.

Surely, as the living custodians of this land, it is our duty to preserve the significance and power of those systems and protections. May it not be us that the finger of future generations gets pointed at along with the slur “it was they that let us down”.

I live in hope that the committee will choose not to align itself with the kind of illogical and immoral decision making and behaviour that is creating unprecedented destruction the world over.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: There are other locations that do not carry the same level of Ecological Sensitivity where development could proceed with significantly less risk to Wildlife, Habitat and the integrity of a protected area.

If the committee truly honours mitigation hierarchy and the values behind SSSI, SPA, SNA, LNRA, and NNR protections then I believe the only reasonable decision is to seek an alternative location.

Please submit my objection to the mega housing development EXMO 20 near Budleigh Salterton.

We are losing our beautiful countryside that makes Devon, Devon, at an alarming rate with endless ruinous and harmful housing developments taking over green and pleasant land. Greenbelt land that should be used for nature protection and food production.

We are experiencing a catastrophic loss in wildlife habitat and biodiversity with many species facing serious threat and extinction. Sewage is dumped into our beautiful rivers and polluting our seas.

Community services are overwhelmed. Roads are heaving with traffic. Budleigh Salterton will be harmed and overwhelmed.

I implore you to protect our natural world.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduced size of EXMO_20. More green space amongst houses, no street lighting.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Billy reed

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove access from the B3179 and significantly reduce the size of EXMO_20

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) ... are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from local plan or significantly reduce and limit easy access to the pebblebed heaths removing access to the B3179.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from local plan or revert to EXMO_20B and significantly reduce size.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from local plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would Overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when Considering the Exmo_20 allocation. The site's and the local area's Topography makes the potential cycling and walking options less viable, Which is not apparent on the policy maps. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was Calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence Documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing

policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not Employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly

needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving everytime residents went anywhere and returned home. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. In view of the above, East Devon Natural Landscape does not support the adoption of this land as an area for development. 2. Or if non-adoption is not possible due to other demands, such as

housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1. My preferred option would be to remove EXMO_20 from the Local Plan. Local facilities are already stretched to breaking point and more houses will exacerbate the situation. Also, sewerage facilities at Exmouth and Budleigh Salterton are already subject to major failures (Exmouth's failings have attracted national interest) . An increase in housing stock will cause yet more failures as SouthWest Water are already fighting a losing battle against failure of parts of their infrastructure 2. If this is not possible, then reduce the size of EXMO_20. 3. Site should not be accessed from the B3179. Road is not suited to the potential increase in traffic 4. Have a much more distant boundary from the valuable natural amenity of the Heathland Pebblebeds

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Pauline Ann Richards

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 Mitigation Hierarchy as set out in NPPF para 32. The LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. 2. Little consideration has been given to how the already overloaded sewerage system for Exmouth will be able to cope with this increased flow. 3. Policy TR03 of the NPPF December 2023 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand (the B3179 is a narrow road which is already heavily used and large lorries already cause problems for oncoming traffic) and it is not possible to address such impacts planning permission should be refused.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1. The size of Exmo_20 should be reduced 2. The site should not be accessed from the B3179

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am emailing in connection with the local plans to build new homes within Exmouth. I might have already done it. Sorry if I have.

I object to the proposed plans of part 04 on the Local Plan (known as the lawn) for the following reasons:-

1) It is a Wood Pasture Priority Habitat that has many ancient trees and is home to many endangered species, some of them on the red list.

2)The parkland was probably laid out when 'Whimsey' house was built in mid 1700s. Some of the oldest Luccombe Oaks in country are on this site.

3)The National Planning Policy Standing Advice is that planning should be refused because there is narrow field with ancient woods each side, this is a corridor for the wildlife.

4) I also understand that the plan is to alter a stream, which runs underground through the middle of field. This currently takes run off from commons. Therefore any hard

landscaping could lead to serious flooding into Exmouth. We already have enough excrement going into the sea. We don't want this to get even worse. Not only does it affect the Marine life that lives in the sea, but local residents and businesses too.

5) The access to this site is off Higher Marley Road, which will lead to more traffic trying to get onto Dinan Way or over the Common, this site leads up to 400m from Pebblebed Heaths.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I don't envy your job of trying to find land that is ok to use for much needed affordable and sustainable housing.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Myself and my family have lived at XX (for data protection reason) Capel Lane, Exmouth for the past 11.5 years. What once was a quiet, safe area has become saturated with housing estates on every available green space. In the last few years in excess of 3000 houses have been built in one square mile of here, and yet you now propose to build even more on what was an area of outstanding natural beauty. I strongly oppose this ridiculous proposal to build 410 houses on the fields to the left and right of the Littleham cycle track for several reasons. I must use my democratic right to object to the destruction of our precious National Landscape.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(c). If the comment is related to a site, please state the site reference here::

Exmo_04a, Exmo_20, Lymp_14

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Exmo_04a Exmo_20 & Lymp_14 are all developments on the very edge of Exmouth. These contravention the EDDC policy statements that state - TR01 - developments will prioritise walking, cycling & public transport - Development should be located and designed to ensure that walking, wheeling, cycling and public transport should bear the natural first choice for short local journeys, or as part of a longer journey. Walking and cycling routes must be prioritised in new development (specifically including where land is allocated for development) – such routes should be coherent, direct, safe, comfortable and attractive. Where appropriate, cycle paths should be segregated from pedestrians to reduce the potential for conflict (for example, where high usage levels are anticipated). Proposals for walking and cycling routes should be aligned with the Local Transport Plan and, where relevant, the Clyst Valley & New Communities and Countywide Local Cycling and Walking Infrastructure Plans. New development (specifically including where land is allocated for development) should facilitate access to high quality public transport through its location, layout, and, where necessary, contributions to public transport services and/or facilities TR03 - Where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they are supported by a transport statement or transport assessment, and a subsequent travel plan In relation to the 3 sites, all located on the very outskirts of Exmouth; All are located at least 3 miles from Exmouth Centre & the Railway station The 3 sites proposed will all rely on the use of the car, completely going against the Strategic policy that EDDC has outlined. 1. They are not within easy public transport reach 2. if you can get to them - The existing bus routes are infrequent with most having an hourly service at best 3. the planned access to these sites have no

pathways or cycleways and has no space to create them 4. all developments proposed are on already narrow country lanes that are over used and even now are not fit for purpose 5. The proposed developments may lead to increased isolation & costs for those that do not have the use of a car. Undertaking basic tasks - shopping, visiting Doctors, dentists etc and socialising - will all increase costs eg the use of Taxi and are not sustainable.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_04a, lymp_14

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposed inclusion of Exmo_04a & Lymp_14 in the EDDC local plan is ill thought through & detrimental to the local area for the following reasons; Access to the 2 combined sites via Higher Marley Rd is unsafe with what is currently a country lane. It has no pedestrian pathway & is too narrow to accommodate one. The proposed access is on a bend in the road & this road is already used as a dangerous rat run from the B3179. The junction to the B3179 is also on a bend with poor visibility & is dangerous in itself! The B3179 is already very busy and narrow in places & is not fit for purpose without any further development. The width of the Higher Marley Road does not permit the Highway code recommendation of passing a cyclist (or pedestrian) by a width of 2 meters. Any improvements would involve removal of mature protected trees & hedgerows. Police are already aware of the speeding issues along this road and adding further traffic is unacceptable & dangerous. The development itself encroaches on the countryside buffer between Exmouth & the Pebblebed Heaths which is designated a SSSI site. The site itself is home to protected animal & bird life which are known to live here, not least the Barbastelle bat, one of the rarest mammals in the UK. The entire site is home to many trees subject to TPO's. There are ancient, veteran & many mature trees not least wonderful examples of the Lucombe Oak, so special to this part of Devon. Any felling & disturbance of these trees will be unacceptable. Having a root protection area around these trees will not be sufficient for the real & lasting damage that will be caused to the wildlife & the tress by digging attenuation ponds, building a foul water pumping station & giving public access to the site. The site already has drainage issues with

discharges from the higher grounds of Pine Ridge & Black Hill. Flooding in gardens & fields on the edge of this site is a regular known feature. There is currently no mains drainage (or mains gas) available to existing properties in Higher Marley Rd who use septic tanks/cesspools. Additional houses will only add to Exmouth's already overloaded sewage systems, so evident in the town over the last 12 months. The increased risk of flooding to the already built up Goodmores Estate would increase. The development, with lack of pedestrian & cyclist access is far from the rail and bus services network, with the town centre over 3 miles away, requiring the need to use a car. The lack of local infrastructure and the burden on schools, health centres etc is also of concern. I also note that this was not a development for the preferred category (1) when the Local plan was being considered (and was rejected for the last Local Plan) I therefore ask that these sites be removed from the Local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Nil - these sites should be removed from the local plan for the reasons outlined above.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179,

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant

detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed

development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly

designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off

leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Revert to 20b as previously proposed

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure the democratic process is followed. The current process of placing objections is so obscure and difficult for ordinary members of the public to follow that it is cannot be described as democratic.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

EXmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of EXmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of EXmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "EXmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

Full name: Nicholas Rorke

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously propose

Full name: Nicholas Rorke

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

Full name: Nicholas Rorke

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the See Stop Exmo.20 Facebook page for full comments SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of

Exmo-20. Do not access the site via B3179. Move the settlement boundary further away from the Pebblebed Heaths. evert to 20b as previously proposed.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I do not represent the town council but ask as an individual town councillor for consideration of my concerns about some of the major proposals within the plan.

- The proposal to build 22000 new dwellings in East Devon by 2042 is an increase of 33% on the 66786 dwellings in East Devon recorded in the 2021 census. It has been stated that this is a requirement of government policy. I question this interpretation of government policy. If in fact this is a requirement of government policy I think it is a bad policy, which will result in significant harm to the environment of East Devon and significant carbon emissions, which will contribute to global warming.

<https://democracy.eastdevon.gov.uk/documents/s25869/App1Housing%20Strategy%202025-30%20consultationdraftdec24.pdf> .

- It is proposed that 13000 of these new homes will be built in and around Exmouth, while an estimated 1248 homes in the town have “no usual residential household” e.g. . second homes/ holiday lets.

- In order to build these 13000 new homes, it is proposed to build on and destroy some of our heritage of beautiful rural areas around the town, including areas within the National Landscape.

- Social housing need will not be met in spite of the proposed house building . Within East Devon Currently 6000 people are on the social housing waiting list. Only 4000 ‘affordable homes’ are planned to be built.
- Infrastructure is unable to meet the needs of the current population The population of Eat DEvon increased by 13.8% between 2011 and 2021, More thanin any other area in Devon and Cornwall. This has resulted in increased road congestion, increased discharges of sewage into the sea, rivers and estuaries and increased pressure on health, social care and education services. Exmouth can only be accessed by one frequently gridlocked A road and a half hourly rail link. There is no indication within the current infrastructure plan - https://eastdevon.gov.uk/media/2270747/idp-review-2017_report.pdf of needs of the proposed increase of population being met.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I moved to this area of East Devon 3 years ago having worked in Salford and Greater Manchester for 35 years. I am sure you all recognize what a beautiful area this is but as some coming from outside, what you have here is completely unique and priceless and the jewel in the crown I'd the Pebbled Heath. I have lived all over the UK and there is no other area that I have found that is such a large area of natural heathland, so filled with biodiversity and yet affording access to the local population for recreation. It's a very fine balance but remarkably you have succeeded in achieving this. Much of that success is due to the hard work of environmental protection legislation and the work of dedicated people wanting to preserve this natural sanctuary for future generations. I met Karim Rabik very soon after moving here and he and I have identical views on this development so I'm submitting his letter (a transcript of one of the best speech's I've heard give at a planning meeting) as my argument for changing the planning committee's decision on Exmo-20. The Woodbury Common is a site that carries not just one but several layers of national and international ecological protection. It is a site of Specific Scientific Interest (SSSi), it is a Special Protection Area (SPA), Special Area of Conservation (SAC), It is a Statutory Nature Area (SNA), it is protected as part of the Local Nature Recovery Strategies (LNRS, sometimes referred to in context with nature-based actions as LNRA) and it is a Natural Nature Reserve (NNR), (which incidentally is the highest level of conservation protection available under UK legislation.) The Common is also in the process of being included in the local nature recovery strategy of Devon as high value land. This is one of the most highly designated conservation areas in the South West of England. Not to mention that the actual site that has been put forward for the development of Exmo_20, has itself has been designated as a strategic

natural area for its importance as a link between The Common and The Sea. To consider placing a major housing development on the edge of Woodbury Common is quite simply a huge step in the wrong direction not only for Biodiversity but also for our Obligations under National Planning Policy and Environmental Law. The Mitigation Hierarchy which I'm sure the committee is familiar with, asks first and foremost; can another site provide the same outcome with less harm? This proposed site, adjacent to an Extremely protected landscape surely fails that basic test. There are other locations that do not carry the same level of Ecological Sensitivity where development could proceed with significantly less risk to Wildlife, Habitat and the integrity of a protected area. The Woodbury Common is not just a local treasure it forms part of the network of Rare Lowland Heath, which is home to species found nowhere else in Britain, making it critical to our national biodiversity strategy. To build 700 houses, and all the Infrastructure and support systems that those houses would need, with the inevitable impacts of noise pollution, light pollution, traffic, not to mention domestic animals and human pressure, all so close to this important, sensitive and rare habitat runs counter to the very purpose of its protected status. Let us not forget that the damage done by proximity is not easily mitigated by buffer zones and fences, and won't undo the stress placed upon a fragile ecological system by such a scale of development. Saying no to the allocation of this site is not a rejection of progress. True progress means choosing sites that allow us to meet our housing needs without undermining the fragile natural world of which we have a duty as educated civilised, moral and hopefully responsible citizens to protect. If the site were to be given a greenlight by the committee what precedent would it set for property developers in the future wishing to build large scale projects at the doorstep of highly sensitive and protected conservation areas? What Hope will nature have if the leaders of today do nothing to protect it? If the committee truly honours mitigation hierarchy and the values behind SSSI, SPA, SNA, LNRA, and NNR protections then I believe the only reasonable decision is to seek an alternative location. It is clear for all to see that we are living in a time when so many global leaders are choosing to make short sighted, irrational decisions that are not only illogical but laugh in the face of the incredibly hard work of so many predecessors whose tireless efforts built systems, not only for conservation, but also to create checks and balances for the protection of all going forward. Surely, as the living custodians of this land, it is our duty to preserve the significance and power of those systems and protections. May it not be us that the finger of future generations gets pointed at along with the slur "it was they that let us down". I live in hope that the committee will choose not to align itself with the kind of illogical and immoral decision making and behaviour that is creating unprecedented destruction the world over. Sincerely Karim Rabik

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sue Rothera

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Sue Rothera

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate t consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Just such an important issue for future generations and to make sure environmental protection for this vital site is respected.

You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: The Woodbury Common is a site that carries not just one but several layers of national and international ecological protection. It is a site of Specific Scientific Interest (SSSi), it is a Special Protection Area (SPA), Special Area of Conservation (SAC), It is a Statutory Nature Area (SNA), it is protected as part of the Local Nature Recovery Strategies (LNRS, sometimes referred to in context with nature-based actions as LNRA) and it is a Natural Nature Reserve (NNR), (which incidentally is the highest level of conservation protection available under UK legislation.) The Common is also in the process of being included in the local nature recovery strategy of Devon as high value land. This is one of the most highly designated conservation areas in the South West of England. Not to mention that the actual site that has been put forward for the development of Exmo_20, has itself has been designated as a strategic natural area for its importance as a link between The Common and The Sea. To consider placing a major housing development on the edge of Woodbury Common is quite simply a huge step in the wrong direction not only for Biodiversity but also for our Obligations under National Planning Policy and Environmental Law.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: such a vital issue needs local representation to ensure environmental policy and laws are given sufficient consideration for future generations

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple

other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.”

Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John’s (Exmo_20)) that “new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths” there is no means of preventing people or

domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands.” Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a ‘wilderness’ setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that “Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified”

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main

access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

Objection 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st & 2nd Regulation 19 evidence library falsely claiming to be, with no record of the May 2022 version. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected since the site failed the HELAA stage, being not suitable or achievable. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. Objection 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. Objection 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be

reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals".

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Fiona E Shaw

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This proposed development is a greenfield site which is just 400 metres from a Site of Special Scientific Interest (SSSI) which forms the core of a much larger protected area that is also a Special Protection Area (SPA), a Special Area of Conservation (SAC) and a National Nature Reserve (NNR). The East Devon Pebblebed Heaths which are located just a few miles outside Budleigh Salterton are a site of critical importance for rare habitats, diverse species like Dartford warblers and nightjars, and unique geological features like the pebblebed ridge. The infrastructure of Budleigh Salterton is unable to cope with any more development. Budleigh is a seas side town with limited employment options. The roads in this area are not suitable for an increase in vehicular traffic.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan as this site is totally unsuitable for a development of this size.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification

will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Remove Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. Full name: Thomas Shillitoe

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East

Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Remove Exmo_20 from the Plan

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution

and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that "A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths". The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The proposed mitigation strategy required to justify the

sites selected is not known and could have a significant impact on the neighbouring authorities of Teignbridge & Exeter. The existing recreational impacts mitigation strategy includes these two authorities. [attached map of existing recreational impacts mitigation strategy]

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The allocation sites were selected prior to an Appropriate Assessment and are reliant on a yet to be determined air quality mitigation strategy. Once this has been determined there will be a duty to cooperate regarding this strategy should its reach be beyond EDDC.

Full name: Thomas Shillitoe

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Remove Exmo_20 from the Plan

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The policy is based on the Sustainability Appraisal which is reliant upon the Site Selection Methodology. My comments are as follows: Objection 1. It is not possible to follow the significant changes made to the Sustainability Appraisal, as there is no Schedule of Changes and no tracked changes version. I am therefore unable to make comments in accordance with the consultation requirements which states “Only make new representations if you are commenting on the specific changes listed in the Schedule of Changes, or if you did not respond to the first consultation”. The Schedule of Changes and a tracked changes version need to be made available and permitted to be consulted upon. [attached evidence: 2nd Regulation 19 consultation SA Commonplace page] Objection 2. There appears to be such significant changes to the Sustainability Appraisal that it is fundamentally a different document providing very different justification to the previous 1st Regulation 19 version, not least regarding the inclusion of HELAA failed sites such as Exmo_20. This appraisal has been retrospectively written based on consultation feedback regarding its shortcomings. The decisions made prior cannot rely on a subsequently fabricated document to provide evidence to somehow inform decisions such that they change from unsound to sound. The retrospectively created Site Selection Methodology (v2 December 2024) is now significantly relied upon in a futile attempt by the LPA to provide justification. The Exmo_20 site’s inclusion in the draft Local Plan is unjustified and unsound. Objection 3. Exmo_20 should be marked blue “failed site sifting” on the map on page 384 as it was deemed unsuitable & unachievable in the HELAA and in accordance with the Site Selection Methodology (May 2022) failed site sifting. The site’s current inclusion in the draft Local Plan is unjustified and unsound. [attached evidence: Site Selection

Methodology (May 2022)] Objection 4. Exmo_20 is falsely listed as a reasonable alternative on page 386 & 387. Firstly, the site was deemed unsuitable and unachievable, not just unachievable as stated. There has been no evidence provided demonstrating that site access, minerals and proximity to the Pebblebed Heaths can be addressed, with the access arrangements and impacts on the Pebblebed Heaths SAC/SPA/SSSI reliant on a viable agreed mitigation strategy and supporting HRA which are both absent from the Local Plan evidence, notably the HRA being a required Core Submission Document. Also note that the Exmo_20 site was selected for inclusion in the Local Plan prior to the Appropriate Assessment, in conflict with the ‘People over Wind’ CJEU ruling. Furthermore, the Exmo_20 site as submitted for assessment in the HELAA was not available, but was not checked despite this being one of the three HELAA assessments. The site therefore in fact failed all three tests, and should be stated to have been found unsuitable, unachievable & unavailable. The site’s current inclusion in the draft Local Plan is not legally compliant, unjustified and unsound.

Objection 5. On page 390 the SA states ” Sites on the north-eastern side of Exmouth, specifically Exmo_04, and Lymp_09, 10, 13, 14 and 17 lie especially close to the Pebblebed Heaths and as such development of these sites could lead to some of the greater adverse impacts and a large part of Site Exmo_04 falls within the existing 400 metre exclusion zone for development on account around domestic cat predation and recreation impacts”. The 400m exclusion zone relates to urban effect, not “recreation impacts”, demonstrating the LPA’s (as the Competent Authority) misunderstanding of the Habitats Regulations. Recreational effects are dealt with by a wholly different assessment and different mitigation. On page 391 of the SA, Exmo_20 is considered but with no mention of “could lead to some of the greater adverse impacts” for the sites listed on p390, despite Exmo_20 being the largest site and closest (adjacent to) site to the Pebblebed Heaths SAC/SPA/SSSI, demonstrating an inconsistent assessment. The latest HRA currently states an “Inherent Conflict”. There is now mention in the SA of the Strategic Nature Area and draft Nature Recovery Network but this has been added in further to the 1st regulation 19 consultation feedback and is material consideration in assessment of the site’s allocation, in accordance with Paragraph 180 & 181 of the NPPF December 2023. These factors provide evidence to demonstrate the land’s high biodiversity value to “establish coherent ecological networks”, not least as a support habitat for the Section 41 Principle Importance species ground nesting Nightjar. The site’s allocation needs to be reassessed with this evidence in mind, as currently the justification for its inclusion is unsound.

Objection 6. On page 392 of the SA, Exmo_20 is stated as being 85Ha and a map of a site this size was shown to the Strategic Planning Committee on 3rd September 2024, who were attracted by the large size of the site and voted for that site to be included in the draft Local Plan. The evidence provided was false, as that site did not exist as it was not available, therefore the decision was unsound. The site available was significantly and materially smaller, such that the committee was misled and the decision is therefore invalid.

Objection 7. On page 392

the SA states “The 400m buffer from the Pebblebed Heaths SPA/SAC coincides with the higher, more prominent parts of Exmo_20, meaning built development will not be permitted in this area and so reducing adverse landscape effects to a minor negative.” . The LPA refuse to use this wording in the Local Plan, stating multiple times that development including buildings can be located in the top 400m. The Local Plan should accord with the assessment in the SA, stating “No Built Development”. The viability of the site allocation should be reassessed due to this 400m constraint further compounding the significant and material reduction in the size of the site from the falsely claimed 85Ha, approved for allocation in the draft Local Plan on 3rd September 2024. -----

----- Objection 8. On page 396 the SA states “The north eastern part of Exmo_20 is in a mineral safeguarding area, but this largely coincides with the 400m buffer from the Pebblebed Heaths SPA/SAC where development will not be allowed in any case.” The LPA refuse to use this wording in the Local Plan, stating multiple times that development including buildings can be located in the top 400m. The Local Plan should accord with the assessment in the SA, with the 400 metres adjacent to the Pebblebed Heaths SAC/SPA/SSSI removed from the site allocation and the settlement boundary revised accordingly. The viability of the site allocation should be reassessed due to inability to construct the proposed access road without direct conflict with the SA’s conclusions, along with this additional 400m site area constraint further compounding the material reduction in the size of the site from the falsely claimed 85Ha, approved for allocation in the draft Local Plan on 3rd September 2024. Objection 9. On page 399 the SA states, regarding mitigation measures, “Mitigate impact upon Exe Estuary and Pebblebed Heaths SPAs – to be considered in the Habitats Regulations Assessment, though for areas of Exmo_04 and 20 within 400 metres of the Pebblebed Heaths mitigation would not be seen as possible. Exmo_04 can be amended to exclude the most sensitive area, resulting in Exmo_04a.” There is no justification or consistency in excluding part of Exmo_04 but not Exmo_20. The Local Plan should accord with the assessment in the SA, with the 400 metres adjacent to the Pebblebed Heaths SAC/SPA/SSSI removed from the site allocation and the settlement boundary revised accordingly. The viability of the site allocation should be reassessed due to inability to construct the proposed access road without direct conflict with the SA’s conclusions, along with this additional 400m site area constraint further compounding the material reduction in the size of the site from the falsely claimed 85Ha, approved for allocation in the draft Local Plan on 3rd September 2024.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised

wording for the relevant policy or paragraph. Please be as precise as possible.: Use the correct May 2022 Site Selection Methodology to inform the site selection process and the Sustainability Appraisal, to then in turn inform the Chapter 5 policies. (The December 2024 Site Selection Methodology was retrospectively created after the site selection process was complete).

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The policy is based on the Sustainability Appraisal which is reliant upon the Site Selection Methodology. My comments are as follows: Objection 1. It is not possible to follow the significant changes made to the Sustainability Appraisal, as there is no Schedule of Changes and no tracked changes version. I am therefore unable to make comments in accordance with the consultation requirements which states “Only make new representations if you are commenting on the specific changes listed in the Schedule of Changes, or if you did not respond to the first consultation”. Exmo_04 can be amended to exclude the most sensitive area, resulting in Exmo_04a.” There is no justification or consistency in excluding part of Exmo_04 but not Exmo_20. The Local Plan should accord with the assessment in the SA, with the 400 metres adjacent to the Pebblebed Heaths SAC/SPA/SSSI removed from the site allocation and the settlement boundary revised accordingly. The viability of the site allocation should be reassessed due to inability to construct the proposed access road without direct conflict with the SA’s conclusions, along with this additional 400m site area constraint further compounding the material reduction in the size of the site from the falsely claimed 85Ha, approved for allocation in the draft Local Plan on 3rd September 2024.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Use the correct May 2022 Site Selection Methodology to inform the site selection process and the Sustainability Appraisal, to then in turn inform the Chapter 5 policies. (The December 2024 Site Selection Methodology was retrospectively created after the site selection process was complete).

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.:

I await further information regarding the Air Quality at East Devon Heaths SAC / SPA and delivery of the strategy for mitigation of the potential adverse impact of rising vehicle emissions on the East Devon Heaths SAC / SPA, as there is no mitigation strategy currently shown as viable and no supporting HRA (currently showing adverse impacts) for the Local Plan, it is impossible to know the implications that a strategy would have. If the strategy has implication on neighbouring LPAs such as Exeter & Teignbridge, they need to be advised and be able to comment on a Regulation 19 plan which includes the mitigation strategy (and a supporting HRA) for EDDC to believe they have complied with their Duty to co-operate. The unknown air quality mitigation strategy could have significant implications as to the viability of Exeter & Teignbridge Local Plans if the strategy reaches into the neighbouring authorities similar to the existing recreational impacts mitigation strategy [recreational impacts mitigation strategy map attached]

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The December 2024 Site Selection Methodology was retrospectively created after the site selection process was complete. The unknown air quality mitigation strategy could have significant implications as to the viability of Exeter & Teignbridge Local Plans if the strategy reaches into the neighbouring authorities similar to the existing recreational impacts mitigation strategy.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind”. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32.

Full name: sally sinclair

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

OBJECTION 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt. In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, PL09 and PB04 and Paragraphs 11.2 of the Local Plan. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality”, due to the primary access to Exmo_20 being onto the B3179, sending traffic along the boundary of the Pebblebed Heath SAC/SPA/SSSI. Allocation of Exmo_20 is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance over mitigation. The Exmo_20 allocation is unlawful due to there being no reasonable scientific certainty presented for mitigation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6, 11.2 & 11.6 of the Local Plan. Exmo_20's limited access would significantly increase the need for car travel from the main access point proposed (B3179) to access facilities and services, being 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road, therefore an unsustainable location for development. This allocation would overwhelm Budleigh and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and local area's topography makes potential cycling and walking options less viable, which is not apparent on the policy maps.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: .

OBJECTION 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process, not the December 2024 amended version, presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality”, due to the primary access to Exmo_20 being onto the B3179, sending traffic along the boundary of the Pebblebed Heath SAC/SPA/SSSI. Allocation of Exmo_20 is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance over mitigation. The Exmo_20 allocation is unlawful due to there being no reasonable scientific certainty presented for mitigation

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt. In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Many of us have found the online objection process unnecessarily complex and difficult to use. This puts people off making an objection which is useful to yourselves but undemocratic and not inclusive - far from supposed government strategy. I hereby use email to express my objection to the proposal for Exmo -17. This is an area of outstanding natural beauty currently national landscape. People travel for hours to stay in this area for the natural beauty and peace from the ratrace that can be found. Your decision to build will destroy another corner of precious natural beauty which can never be recuperated. The site offers views across the fields towards the sea and encompasses the cycle path from Exmouth to Budleigh plus circular walks including the SW coast path. These are all leisure destinations for the tourist industry on which Exmouth and Budleigh are dependent. We are distinctive, peaceful nature based areas for tourists. Let's keep it that way. Exmouth has already taken its share of new builds with very little provision for affordable houses for our local essential workforce once again. We may need some new housing but focus on creating the right houses in the right places. Council housing in infill sites and use of empty properties need to be prioritised. Not to mention the crippled infrastructure of southwest water and all the sewage issues and poor road maintenance. More houses equates to greater demands on the infrastructure with higher populations using the same neglected systems and more cars pounding already damaged roads. Please stand up for our beautiful corner of East Devon. Make the case that this area is different in character from many areas - it is an area that a good percentage of the UK population use as a holiday destination precisely because it has not been destroyed by pollution/overcrowding and destruction of nature.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Don't just roll over and not fight for us. Visit the area - walk along the footpaths/ enjoy the views/ go birdwatching - don't just sign on the dotted line. Trusting you will take the right action to preserve our stunning East Devon.

Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Tourists travel for hours to visit this part of beautiful East Devon. Development here will destroy those calm spaces of nature and beautiful views that visitors and residents have come to appreciate. THIS IS VERY DIFFERENT FROM OTHER SITES HIGHLIGHTED FOR DEVELOPMENT AND SHOULD BE DEFENDED BY OUR REPRESENTATIVES. I think it is essential to remove Exmo_20 from the Local Plan and work harder to find alternative sites if necessary. Do not follow the government new rules blindly - fight for our area as it is special and is a destination for many escaping the rat race and seeking natural surroundings. The B3179 is a winding rural road providing views down the hill across the estuary and is a stunning entrance to Budleigh for tourists. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states "It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA" and the Plan HRA states "there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks." This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate

assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Move the settlement boundary away from the Pebblebed Heath and leave the views as they stand. keep noise and light pollution away from Bystock and Pebblebed heaths. Have you been there to see the wildlife such as the nightjars rising from their undergrowth nests? Have you sat and contemplated the peace of Bystock with the waterlilies in bloom, the dragon flies and the beavers building their dams? This is a special and different area. We need to treasure such spaces for the well-being of all and the fostering of nature. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding

European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John’s (Exmo_20)) that “new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths” there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands.” Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March ’26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands

and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I

wish to object to the above proposal on the following grounds: Housing need The primary housing need in Exmouth is for genuinely affordable homes of mixed tenure, including social rent, for residents on low incomes and local wages. It is unclear whether Exmouth Town Council's assessment of housing need has been properly consulted or reflected in this proposal. The majority of homes proposed for the prime National Landscape site Exmo-17 would be high-end properties, likely to be purchased by people from outside the area rather than addressing local need. Development on land outside the National Landscape would be significantly cheaper, allowing for a higher proportion of affordable and rented housing that Exmouth urgently requires. Furthermore, past experience shows that the final number of affordable homes delivered is often substantially lower than initially proposed. This raises serious doubts about whether this development would meaningfully address Exmouth's housing needs. Sustainable Transport The proposed development at Exmo_17 would introduce an estimated 800–900 additional vehicles onto the local road network. The main access road would be directly opposite the Liverton Trading Estate, a location already known as a major traffic bottleneck, with frequent queues of vehicles waiting to exit. The proposal includes a new roundabout and two pedestrian crossings on the main road into and out of Exmouth. These measures would significantly impede traffic flow, leading to increased congestion, higher air pollution, and longer journey times. For residents commuting to Exeter, where many jobs are located, the practical options would be to drive or to undertake a poorly connected public transport journey involving either two buses (running only every 30 minutes) or a combination of bus and train. This does not constitute sustainable transport and risks increasing car dependency. Landscape Site

Exmo-17 previously benefited from two landscape protections. East Devon District Council recently removed its Coastal Preservation Area status without adequate justification, despite hundreds of objections from local residents. Exmo-17 is on a large and highly valued area of National Landscape farmland, designated to be protected from large-scale development. EDDC has a statutory duty to “conserve and enhance” this landscape. This duty has been explicitly confirmed by *** Personal details have been removed ***; on behalf of the Housing Minister, *** Personal details have been removed ***; in a letter to our MP, , dated *** Personal details have been removed ***18 August 2025. The construction of a large housing estate on this site would neither conserve nor enhance the National Landscape. There is no compelling reason for the proposed industrial units to be located on this land. More appropriate and logical alternatives exist, including the Liverton Trading Estate directly opposite or site Exmo-18, both of which share the same landowner. The proposed vehicle access road would cut directly across the existing Exmouth–Budleigh cycle and footpath and would require the removal of mature trees and hedgerows. This well-used route provides safe, peaceful access for cyclists, dog walkers, children, recreational walkers, wheelchair users, and people using mobility scooters. Its loss or disruption would be dangerous and would represent a significant erosion of a valued and tranquil amenity within the National Landscape. Additionally, the landowner has recently terminated the lease of nearby National Landscape pastureland adjacent to Exmo-17. This raises concerns that approval of this development could set a precedent, leading to a “domino effect” of further estate developments on irreplaceable protected landscape. Historic Environment The proposed development would be in close proximity to Littleham’s medieval church, where Lady Nelson is buried, and to an old farmhouse on the site perimeter, the age and historic significance of which require further assessment. The fields at Exmo-17 are also clearly visible from the South West Coast Path along the World Heritage Jurassic Coast. Development on this scale would cause significant harm to the historic and scenic setting of this internationally important landscape.

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b, (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paras 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet shown to be achievable and viable; the mitigation strategy states "it was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA" and the plan HRA states "there is an inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks." This site was selected on 03/09/24 (without option to reconsider), with the draft local plan approved on 11/12/24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30/01/25 HRA, contrary to CJEU "People over the Wind". Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site

currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I have previously objected to this plan and would like to put forward my objection again.

The site proposed is nearer to Budleigh centre (2.3 miles) than to the centre of Exmouth (4.0 miles). Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179, even if widened, to access facilities and services, therefore an unsustainable location for development. The site allocation would overwhelm Budleigh Salterton, which has not been taken into account by the LPA when considering the Exmo_20 site. At present, our surgery and primary school are struggling to cope with the existing population.

I have seen that 'alternative sites' have been discounted for Exmouth, but surely 'brownfield first' might be a plan to consider. The website of Friends of the Earth states: "Done badly, new housing could exacerbate the climate and nature crises", and brownfield sites should be the first option. Those are also likely to be closer to urban and industrial areas where there will be employment. Friends of the Earth also states: "Wherever new homes are built, they need good public transport links and cycle routes, as well as good access to services. Without them, there's a danger of increased car dependency, which disadvantages those who can't drive or afford a car." Greenfield sites such as this one should surely be used for growing our own food instead of having to import it.

The existing population of Exmouth at the 2021 (last) census, was 35,488, the fifth largest settlement in Devon by population. This of course increases massively with the influx of visitors and tourists, not only in the summer but all year round. Exmouth has a long and fascinating history and with this plan, the thought that the planners/developers could think it desirable to build round St John in the Wilderness Church (grade II* listed) having a significant adverse effect on the tranquil surroundings of the church and churchyard seems incredible. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by the sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

The environmental and conservation impact of such a large development should not be dismissed. The site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of the site would undermine the conservation objections of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area aimed at combining existing wildlife sites and extending habitats. By building hundreds of houses? The site contains many veteran trees, ancient woodland and hedgerows which are at risk of becoming fragmented habitats. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography makes the potential cycling and walking option less viable, which is not apparent on the policy maps.

This extraordinary proposal for a vast building site next to the B 3179 that is used by all Budleigh and some Exmouth residents to get to Exeter by car. This road would have to be dramatically widened to cope with all the extra traffic involved, first for the building itself of 800+ houses, involving lorries and suppliers, and if each potential house then had one or two cars, the scenario would be nightmarish. The alternative route to Exeter from Exmouth to the west would also be impacted.

So for environmental, conservation and heritage reasons, I object to Exmo_20.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo20 development will have a negative impact on Pebblebed Heaths - a SSSI, an the habitat and species that it holds. The proposed buffer is far too small. There will be problems with traffic and increased visitor numbers to the Pebblebed heaths presenting a risk to the wildlife. Access to the proposed site is dangerous and will stress the road network with access by car in the isolated location. The proposed site harms the heritage setting of the St John's church. The proposed site could make flooding worse due to the topography of the area. The proposed site is nearer to Budleigh Salterton than Exmouth centre, putting overwhelming strain on Budleigh, and does not fit with the settlement hierarchy.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local plan.

Exmo 20

I'm writing as disagree with your planning to build. The Woodbury Common is a site not just that carries layers of national and international ecological protection. Woodbury Common as we all know is a very special place for nature and biodiversity.

I personally feel it makes no sense to build on green fields. And why the need to build 700 houses, and all the infrastructure and support systems that those houses would need. where is everyone coming from? Not to mention the traffic flow with possibly up to 3000 more cars. We already have too many pot holes! There are so many other locations off much bigger roads with much easier access to Exeter. Noise and light pollution and the wildlife. Devon and the surrounding areas are getting just so built up and the roads are not equipped for it.

Keep Devon plesent lets nurn it into a crowded mess. Keep Devon untouched and local and protect our space, animals and land. No more houses!!

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Move the settlement boundary away from the Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Paul Stock

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce the size of Exmo_20,

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to 20b as previously proposed

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Move the settlement boundary away from the Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan,

Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I would like to object to this development and would like it removed from the local plan. Reasons as follows:

- Large housing estates should not be built on National Landscape
- Building on land outside the National Landscape would be cheaper, making possible to build a bigger percentage of affordable homes.
- The exit from the site (Exmo_17) would create traffic chaos and the access road would go straight across the much used Exmouth to Budleigh cycle path which would be dangerous.
- These large scale developments will contribute to global warming.
- The proposed increase of new dwellings in East Devon is excessive and is destroying our heritage.
- There are estimated to be over 1200 houses in Exmouth that are second homes or holiday lets. Use these instead.
- Infrastructure is unable to cope with the needs of the current population without adding thousands more.
- Exmouth can only be accessed by one main road which is insufficient to serve the current population.

- Not a valid objection in planning terms but generally we have had enough of new large scale development everywhere. I have lived here all my life and Government and local policies are ruining the area. Where are all these people coming from and my children have had to move away because they can't afford to stay!

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound and not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the local plan. Being adjacent to the pebblebed heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable, the migration strategy states "it was not possible to screen out a likely significant effects for other units within the EDPHSAC and SPA" and the plan HRA states "there is inherent conflict in that the growth proposed in the plan would exceed threshold levels and there is , as yet, no means to mitigate or address the risk". This site was selected on 03.09.24 (without option or reconsider), with the regulations 19 draught local plan approved on 11.12.24, on the assumption that the mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU "People over Wind" ruling and the required precautionary approach, particularly relevant considering the CJEU "Dutch N" ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation hierarchy as set out in the NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable and less mitigation reliant sites to select and that the plan has an over supply of housing allocations due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that "The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the North. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries". The LPA demonstrates a cavalier attitude and widespread failings in its duties as the competent authorities under the conservation of habitats and species regulations. I reserve the right to comment further if, and when a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To whom it may concern,

I would like to express my objection to the labyrinthine procedure demanded by commonplace for East Devon District Council for this development. Many residents are still unaware of this, and the ones who have been made aware have found the commonplace site extremely difficult to navigate. I have put some objections on that site today but would like to add some more comments.

I have objected before to this extraordinary proposal for a vast building site next to the B 3179 that is used by all Budleigh and some Exmouth residents to get to Exeter by car. This road would have to be dramatically widened to cope with all the extra traffic involved, first for the building itself of 400 + houses, involving lorries and suppliers, and if each potential house, then had one or two cars, the scenario would be nightmarish. The alternative route to Exeter from Exmouth to the west would also be impacted.

The site proposed is nearer to Budleigh centre (2.3 miles) than to the centre of Exmouth (4.0 miles). Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179, even if widened, to access facilities and services, therefore an unsustainable location for development. The site allocation would overwhelm Budleigh Salterton, which has not been taken into

account by the LPA when considering the Exmo_20 site. At present, our surgery and primary school are struggling to cope with the existing population.

I have seen that 'alternative sites' have been discounted for Exmouth, but a contact at Friends of the Earth tells me that 'brownfield first' might be a plan to consider. Their website states: "Done badly, new housing could exacerbate the climate and nature crises", and brownfield sites should be the first option. Those are also likely to be closer to urban and industrial areas where there will be employment. Friends of the Earth also states: "Wherever new homes are built, they need good public transport links and cycle routes, as well as good access to services. Without them, there's a danger of increased car dependency, which disadvantages those who can't drive or afford a car." Greenfield sites such as this one should surely be used for growing our own food instead of having to import it.

The existing population of Exmouth at the 2021 (last) census, was 35,488, the fifth largest settlement in Devon by population. This of course increases massively with the influx of visitors and tourists, not only in the summer but all year round. Exmouth has a long and fascinating history - Byzantine coins were found on the beach in 1970. Evidence of people living at Exmouth Point goes back to the 11th century, when it was called Lydwicnaesse, meaning "the point of the Bretons". Two ecclesiastical parishes that make up Exmouth - Littleham and Withycombe Raleigh can be traced back to before Saxon times. The history of Exmouth makes it more incredible that the planners/developers could think it desirable to build round St John in the Wilderness Church (grade II* listed) which will have a significant adverse effect on the tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by the sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

The environmental and conservation impact of such a large development should not be dismissed. The site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of the site would undermine the conservation objections of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area aimed at combining existing wildlife sites and extending habitats. By building hundreds of houses? The site contains many veteran trees, ancient

woodland and hedgerows which are at risk of becoming fragmented habitats. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography make the potential cycling and walking option less viable, which is not apparent on the policy maps.

So, for environmental, conservation and heritage reasons, I object to Exmo_20.

Kind regards

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: There appears to be such significant changes to the Sustainability Appraisal that it is fundamentally a different document providing very different justification to the previous 1st Regulation 19 version, not least regarding the inclusion of HELAA failed sites such as Exmo_20. This appraisal has been retrospectively written based on consultation feedback regarding its shortcomings. The decisions made prior cannot rely on a subsequently fabricated document to provide evidence to somehow inform decisions such that they change from unsound to sound. The retrospectively created Site Selection Methodology (v2 December 2024) is now significantly relied upon in a futile attempt by the LPA to provide justification. The Exmo_20 site's inclusion in the draft Local Plan is unjustified and unsound. Exmo_20 should be marked blue "failed site sifting" on the map on page 384 as it was deemed unsuitable & unachievable in the HELAA and in accordance with the Site Selection Methodology (May 2022) failed site sifting. The site's current inclusion in the draft Local

Plan is unjustified and unsound. [attached evidence: Site Selection Methodology (May 2022)] Exmo_20 is falsely listed as a reasonable alternative on page 386 & 387. Firstly, the site was deemed unsuitable and unachievable, not just unachievable as stated. There has been no evidence provided demonstrating that site access, minerals and proximity to the Pebblebed Heaths can be addressed, with the access arrangements and impacts on the Pebblebed Heaths SAC/SPA/SSSI reliant on a viable agreed mitigation strategy and supporting HRA which are both absent from the Local Plan evidence, notably the HRA being a required Core Submission Document. Also note that the Exmo_20 site was selected for inclusion in the Local Plan prior to the Appropriate Assessment, in conflict with the 'People over Wind' CJEU ruling. Furthermore, the Exmo_20 site as submitted for assessment in the HELAA was not available, but was not checked despite this being one of the three HELAA assessments. The site therefore in fact failed all three tests, and should be stated to have been found unsuitable, unachievable & unavailable. The site's current inclusion in the draft Local Plan is not legally compliant, unjustified and unsound. On page 390 the SA states "Sites on the north-eastern side of Exmouth, specifically Exmo_04, and Lymp_09, 10, 13, 14 and 17 lie especially close to the Pebblebed Heaths and as such development of these sites could lead to some of the greater adverse impacts and a large part of Site Exmo_04 falls within the existing 400 metre exclusion zone for development on account around domestic cat predation and recreation impacts". The 400m exclusion zone relates to urban effect, not "recreation impacts", demonstrating the LPA's (as the Competent Authority) misunderstanding of the Habitats Regulations. Recreational effects are dealt with by a wholly different assessment and different mitigation. On page 391 of the SA, Exmo_20 is considered but with no mention of "could lead to some of the greater adverse impacts" for the sites listed on p390, despite Exmo_20 being the largest site and closest (adjacent to) site to the Pebblebed Heaths SAC/SPA/SSSI, demonstrating an inconsistent assessment. The latest HRA currently states an "Inherent Conflict". There is now mention in the SA of the Strategic Nature Area and draft Nature Recovery Network but this has been added in further to the 1st regulation 19 consultation feedback and is material consideration in assessment of the site's allocation, in accordance with Paragraph 180 & 181 of the NPPF December 2023. These factors provide evidence to demonstrate the land's high biodiversity value to "establish coherent ecological networks", not least as a support habitat for the Section 41 Principle Importance species ground nesting Nightjar. The site's allocation needs to be reassessed with this evidence in mind, as currently the justification for its inclusion is unsound. Objection 6. On page 392 of the SA, Exmo_20 is stated as being 85Ha and a map of a site this size was shown to the Strategic Planning Committee on 3rd September 2024, who were attracted by the large size of the site and voted for that site to be included in the draft Local Plan. They were misled, as that site did not exist as it was not available, therefore the decision was unsound. The site available was significantly and materially smaller, such that the decision cannot carry weight. On

page 392 the SA states “The 400m buffer from the Pebblebed Heaths SPA/SAC coincides with the higher, more prominent parts of Exmo_20, meaning built development will not be permitted in this area and so reducing adverse landscape effects to a minor negative.” . The LPA refuse to use this wording in the Local Plan, stating multiple times that development including buildings can be located in the top 400m. The Local Plan should accord with the assessment in the SA, stating “No Built Development”. The viability of the site allocation should be reassessed due to this 400m constraint further compounding the significant and material reduction in the size of the site from the falsely claimed 85Ha, approved for allocation in the draft Local Plan on 3rd September 2024. On page 396 the SA states “The north eastern part of Exmo_20 is in a mineral safeguarding area, but this largely coincides with the 400m buffer from the Pebblebed Heaths SPA/SAC where development will not be allowed in any case.” The LPA refuse to use this wording in the Local Plan, stating multiple times that development including buildings can be located in the top 400m. The Local Plan should accord with the assessment in the SA, with the 400 metres adjacent to the Pebblebed Heaths SAC/SPA/SSSI removed from the site allocation and the settlement boundary revised accordingly. The viability of the site allocation should be reassessed due to inability to construct the proposed access road without direct conflict with the SA’s conclusions, along with this additional 400m site area constraint further compounding the material reduction in the size of the site from the falsely claimed 85Ha, approved for allocation in the draft Local Plan on 3rd September 2024. On page 399 the SA states, regarding mitigation measures, “Mitigate impact upon Exe Estuary and Pebblebed Heaths SPAs – to be considered in the Habitats Regulations Assessment, though for areas of Exmo_04 and 20 within 400 metres of the Pebblebed Heaths mitigation would not be seen as possible. Exmo_04 can be amended to exclude the most sensitive area, resulting in Exmo_04a.” There is no justification or consistency in excluding part of Exmo_04 but not Exmo_20. The Local Plan should accord with the assessment in the SA, with the 400 metres adjacent to the Pebblebed Heaths SAC/SPA/SSSI removed from the site allocation and the settlement boundary revised accordingly. The viability of the site allocation should be reassessed due to inability to construct the proposed access road without direct conflict with the SA’s conclusions, along with this additional 400m site area constraint further compounding the material reduction in the size of the site from the falsely claimed 85Ha, approved for allocation in the draft Local Plan on 3rd September 2024.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Please stop the building of a huge estate and industrial buildings on our protected farmland, an Area of Outstanding Natural Beauty (now known as 'National Landscape') on the edge of Exmouth.

I feel strongly that large housing estates should not be built on protected National Landscape. Whereas building on land outside the National Landscape would be cheaper, and would make possible a bigger percentage of affordable homes.

Also, the exit from this site (Exmo-17) would create traffic chaos and the access road would go straight across the much-used Exmouth to Budleigh cycle/footpath, endangering users (children/elderly/cyclists/families/dogs).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Please, please, please reconsider because once the AONB and National Landscape are built upon they will be gone forever.

Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to voice my objection to the designation of Exmo_17 in the draft local area plan as building land despite its status as an AONBs - or National Landscapes as they are being described now. National Landscapes seem to have the same status and protections as National Parks. They should only have large developments on them in exceptional circumstances.

While not an expert in these matters, my understanding as a layman is that development in such a precious environment should be a last resort and only considered as an option when all alternatives have been thoroughly investigated and no viable alternative site identified. One only has look across the Salterton Road to see that this is far from the case with swathes of land around the industrial estate which could easily be built on.

Could it be that the land owner, Clinton estates, is withholding access to such land in order to promote Exmo 17 as it is a more lucrative site for the development of high value homes? If so I suggest that EDDC is not following the required process and seems to have an undue interest in accommodating Clinton Estates scheme. Can we have some transparency of what is going on here and visibility of the process that leads EDDC to believe no other sites are viable?

I am given to understand that the EDDC , without any justification, recently removed a designation of Coastal Preservation area status on this land, despite hundreds of objections from residents to prepare the way for development. Why would it do this? Additionally a very misleading sign has been recently erected to suggest that the National Landscape area starts beyond the land allocated to EXMO-17. This gives a strong and incorrect visual impression that EXMO-17 is not on National Landscape land.

Furthermore, the Jurassic Coast is England's only natural World Heritage Site and recognized globally for its scientific and educational significance.

Has any consideration been given to the effect of such development on the UNESCO Jurassic Coast designation? This was inscribed in December 2001 for its outstanding universal value in geology, fossils, and landforms, not its housing estates. It is THE primary hook used for promoting Exmouth for Tourism. Hence I would argue that this places even more importance on maintaining this coastal landscape and not squandering it.

Could it be the planning strategy objective has already been decided and what we are seeing now is a pretence of public consultation to arrive magically at the preconceived outcome?

To be clear, I am not against building houses. We are told Exmouth needs affordable houses for purchase and rent (although I can't find reference to how EDDC have established the level of need). But time and time again we have seen developments claiming to give Exmouth what it needs, being sold as second homes and to private landlords with no covenants or controls on occupancy. A site such as EXMO -17 is clearly not going to be used for affordable houses. With its location and views it is going to be used for sizeable, expensive properties, unaffordable to most of the folk in Exmouth seeking a home. Equally we have seen such developments approved with clauses to provide specific assets to the environment or the community only for the developer to renege on such agreements with EDDC taking little or no action.

I have copied in other parties because of the growing concern that EDDC is bypassing key requirements in order to achieve a result that it has already agreed with Clinton Estates. It seems better to raise the issue now rather than waiting until its an establish fact, as few "mistakes" of this kind are ever corrected retrospectively!

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to object to the proposed development at Exmo-17 for the following reasons:

1. Large housing estates should not be built on National Landscape - this is an area of outstanding natural beauty and as such everything possible should be done to protect it

2. Building on land outside the national landscape would be cheaper therefore making it possible to build more affordable homes which is what the area needs.

3. The exit from this proposed site will cause chaos being so close to the Liverton park junction and Capel Lane which are both already busy

4. The access road for the site cuts across the very busy and much used cycle path therefore endangering its many users - children, elderly, cyclists, families etc The road / development would also necessitate the felling of a number of mature trees

5. The National Planning Policy Framework is clear that planning decisions should contribute to and enhance the natural and local environment, including by protecting and enhancing valued landscapes. National Landscapes are afforded the highest status of protection in relation to landscape and scenic beauty, reflecting their importance under long established legislation. In practice, permission for development in or affecting these areas can only be granted by the local planning authority, a national park authority where relevant, or the Planning Inspectorate acting on behalf of the Secretary of State, and only in exceptional circumstances. I do not believe the need to develop this area is an exceptional circumstance when other sites in East Devon are available.

6. The local sewage system is already unable to cope with the needs of current houses. Additional houses built on this site will cause further pollution issues.

7. There is no reason to build the proposed industrial buildings on this land. Logically they should be built on the trading estate opposite or Exmo-18, both of which have the same landowner

Full name: Kim Tanton-Mohan

Exmo_04, Lymp_14

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Exmouth 04. On the grounds that this land, known as The Lawn, is WOODPASTURE PRIORITY HABITAT, it is home to many endangered species, as detailed in ecological report, many are on red list. There are many veteran /ancient trees on site. Some of the oldest Luccombe Oaks in the country are on this site. This site should have protections to stop building. National Planning Policy Standing Advice is that planning should be refused yet EDDC have put this forward for building. As well a parkland there is narrow field with ancient woods each side, this is a corridor for the wildlife. There is a stream which runs underground through middle of field, this would be diverted. This area takes run off from commons, hard landscaping could lead to serious flooding into Exmouth. The access to this site is off Higher Marley Road, which will lead to more traffic trying to get onto Dinan Way or over the Common, this site leads up to 400m from Pebblebed Heaths. I would also like to object to Lymp 14, the land you have to go through to get to Exmouth 04.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmouth 04. On the grounds that this land, known as The Lawn, is WOODPASTURE PRIORITY HABITAT, it is home to many endangered species, as detailed in ecological report, many are on red list. There are many veteran /ancient trees on site. Some of the oldest Luccombe Oaks in the country are on this site. This site should have protections to stop building. National Planning Policy Standing Advice is that planning should be refused yet EDDC have put this forward for building. As well a parkland there is narrow field with ancient woods each side, this is a corridor for the wildlife. There is a stream which runs underground through middle of field, this would be diverted. This area takes run off from commons, hard landscaping could lead to serious flooding into Exmouth. The access to this site is off Higher Marley Road, which will lead to more traffic trying to get onto Dinan Way or over the Common, this site leads up to 400m from Pebblebed Heaths. I would also like to object to Lymp 14, the land you have to go through to get to Exmouth 04.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Delete the site

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Trudie Tarry

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 1 Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration

of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of

recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this

building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified”

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heath and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk

pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. Objection 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Paul Tarry

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Katie Taylor

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: I

have objected before to this extraordinary proposal for a vast building site next to the B 3179 that is used by all Budleigh and some Exmouth residents to get to Exeter by car. This road would have to be dramatically widened to cope with all the extra traffic involved, first for the building itself of 400 + houses, involving lorries and suppliers, and if each potential house then had one or two cars, the scenario would be nightmarish. The alternative route to Exeter from Exmouth to the west would also be impacted.

The site proposed is nearer to Budleigh centre (2.3 miles) than to the centre of Exmouth (4.0 miles). Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179, even if widened, to access facilities and services, therefore an unsustainable location for development. The site allocation would overwhelm Budleigh Salterton, which has not been taken into account by the LPA when considering the Exmo_20 site. At present, our surgery and primary school are struggling to cope with the existing population.

I have seen that 'alternative sites' have been discounted for Exmouth, but a contact at Friends of the Earth tells me that 'brownfield first' might be a plan to consider. Their website states: "Done badly, new housing could exacerbate the climate and nature crises", and brownfield sites should be the first option. Those are also likely to be closer to urban and industrial areas where there will be employment. Friends of the Earth also states: "Wherever new homes are built, they need good public transport links and cycle

routes, as well as good access to services. Without them, there's a danger of increased car dependency, which disadvantages those who can't drive or afford a car." Greenfield sites such as this one should surely be used for growing our own food instead of having to import it.

The existing population of Exmouth at the 2021 (last) census, was 35,488, the fifth largest settlement in Devon by population. This of course increases massively with the influx of visitors and tourists, not only in the summer but all year round. Exmouth has a long and fascinating history - Byzantine coins were found on the beach in 1970. Evidence of people living at Exmouth Point goes back to the 11th century, when it was called Lydwicnaesse, meaning "the point of the Bretons". Two ecclesiastical parishes that make up Exmouth - Littleham and Withycombe Raleigh can be traced back to before Saxon times. The history of Exmouth makes it all the more incredible that the planners/developers could think it desirable to build round St John in the Wilderness Church (grade II* listed) which will have a significant adverse effect on the tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by the sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

The environmental and conservation impact of such a large development should not be dismissed. The site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of the site would undermine the conservation objections of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area aimed at combining existing wildlife sites and extending habitats. By building hundreds of houses? The site contains many veteran trees, ancient woodland and hedgerows which are at risk of becoming fragmented habitats. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography makes the potential cycling and walking option less viable, which is not apparent on the policy maps.

So for environmental, conservation and heritage reasons, I object to Exmo_20.

Full name: Dr Hugh Taylor

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I am contacting you to register my objection to the Exmo_20 proposal for 700 more homes on green land just outside Exmouth. This would place an even greater strain on what are already inadequate levels of infrastructure such as sewerage and roads as well as services such as healthcare, education etc. Exmouth has seen a very rapid growth in housing over recent years without any upgrades to services etc. To add a further 700 homes and potentially 3000 or more residents is, frankly, ridiculous. Get the necessary support infrastructure and services in place before adding to an already overburdened system. I also strongly object to yet another erosion of green space and associated natural environment.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
Delete the allocation

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am contacting you to register my objection to the Exmo_20 proposal for 700 more homes on green land just outside Exmouth. This would place an even greater strain on what are already inadequate levels of infrastructure such as sewerage and roads as well as

services such as healthcare, education etc. Exmouth has seen a very rapid growth in housing over recent years without any upgrades to services etc. To add a further 700 homes and potentially 3000 or more residents is, frankly, ridiculous. Get the necessary support infrastructure and services in place before adding to an already overburdened system. I also strongly object to yet another erosion of green space and associated natural environment.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Delete the allocation

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7)180d, 180e, 181,185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/ cycling being a likely first

choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km onsite driving every time residents went anywhere and returned home. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath

SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals".

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: remove exmo_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals".

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: remove exmo_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Katherine Thoburn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently propose as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town

settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI, it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage

of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, PL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heath. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the 1st Regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this

building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” 6. Allocation to Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to 1st Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk

pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been

taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals".

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Brenda Mary Thomas

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that

“The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations.

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)].

Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”.

The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory.

NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.”

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John’s (Exmo_20)) that “new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths” there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands.”

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan.

There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation.

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Delete Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF

December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations.

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)].

Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”.

The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory.

NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.”

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions

arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John’s (Exmo_20)) that “new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths” there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands.”

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan.

There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation

Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation.

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I would like to express my objection to the labyrinthine procedure demanded by commonplace for East Devon District Council for this development. Many residents are still unaware of this, and the ones who have been made aware have found the commonplace site extremely difficult to navigate. I have put some objections on that site today but would like to add some more comments.

I have objected before to this extraordinary proposal for a vast building site next to the B 3179 that is used by all Budleigh and some Exmouth residents to get to Exeter by car. This road would have to be dramatically widened to cope with all the extra traffic involved, first for the building itself of 400 + houses, involving lorries and suppliers, and if each potential house then had one or two cars, the scenario would be nightmarish. The alternative route to Exeter from Exmouth to the west would also be impacted.

The site proposed is nearer to Budleigh centre (2.3 miles) than to the centre of Exmouth (4.0 miles). Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179, even if widened, to access facilities and services, therefore an unsustainable location for development. The site allocation would overwhelm Budleigh Salterton, which has not been taken into account by the LPA when considering the Exmo_20 site. At present, our surgery and primary school are struggling to cope with the existing population.

I have seen that 'alternative sites' have been discounted for Exmouth, but a contact at Friends of the Earth tells me that 'brownfield first' might be a plan to consider. Their website states: "Done badly, new housing could exacerbate the climate and nature crises", and brownfield sites should be the first option. Those are also likely to be closer to urban and industrial areas where there will be employment. Friends of the Earth also states: "Wherever new homes are built, they need good public transport links and cycle routes, as well as good access to services. Without them, there's a danger of increased car dependency, which disadvantages those who can't drive or afford a car." Greenfield sites such as this one should surely be used for growing our own food instead of having to import it.

The existing population of Exmouth at the 2021 (last) census, was 35,488, the fifth largest settlement in Devon by population. This of course increases massively with the influx of visitors and tourists, not only in the summer but all year round. Exmouth has a long and fascinating history - Byzantine coins were found on the beach in 1970. Evidence of people living at Exmouth Point goes back to the 11th century, when it was called Lydwicnaesse, meaning "the point of the Bretons". Two ecclesiastical parishes that make up Exmouth - Littleham and Withycombe Raleigh can be traced back to before Saxon times. The history of Exmouth makes it all the more incredible that the planners/developers could think it desirable to build round St John in the Wilderness Church (grade II* listed) which will have a significant adverse effect on the tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by the sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

The environmental and conservation impact of such a large development should not be dismissed. The site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of the site would undermine the conservation objections of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area aimed at combining existing wildlife sites and extending habitats. By building hundreds of houses? The site contains many veteran trees, ancient woodland and hedgerows which are at risk of becoming fragmented habitats. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography

makes the potential cycling and walking option less viable, which is not apparent on the policy maps.

So for environmental, conservation and heritage reasons, I object to Exmo_20.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We strongly object to plan EXMO-20 for many reasons. 700 new house development in an area of outstanding natural beauty is disgusting. The change to the area will be immense. The amount of traffic on the B3179 will be dreadful, more pollution and disruption. The wild life would be badly damaged and the Pebblebed Heaths. It would increase the sewage badly and the flood risk is severe. The town of Budleigh Salterton does not need extra population for the doctors, school etc etc. We hope our objections will be listened to.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation conflicts with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188-figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation conflicts with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation conflicts with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. The topography of the proposed site in itself would be considered quite challenging for both cyclist and walkers (despite the belief that they are both considered good for your health and wellbeing) who would likely opt for other forms of transport, increasing the burden on the local transport infrastructure

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. Added to that, the runoff of water into the Withycombe Brook over the past years has increased in volume, causing marked erosion of the brook, including (with potential danger to houses already lining the brook) erosion around the bases of the large trees that line the bank at the lower end of the site. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible

to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of these falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, whilst opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain, and unpriced highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths, plus with the additional cars (which will be extremely noticeable) on our already heavily congested roads through the town (s) highlight the unattainable nature of the site for both people and the climate. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states, “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. unpriced I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland

SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation conflicts with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188-figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation conflicts with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20's allocation conflicts with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. The topography of the proposed site in itself would be considered quite challenging for both cyclist and walkers (despite the belief that they are both considered good for your health and wellbeing) who would likely opt for other forms of transport, increasing the burden on the local transport infrastructure.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. Added to that the runoff of water into the Withycombe Brook over the past years has increased in volume, causing marked erosion of the brook, including (with potential danger to houses already lining the brook) erosion around the bases of the large trees that line the bank at the lower end of the site. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

Allocation of Exmo_20 conflicts with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible

to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of these falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, whilst opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain, and unpriced highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths, plus with the additional cars (which will be extremely noticeable) on our already heavily congested roads through the town (s) highlight the unattainable nature of the site for both people and the climate. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states, “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. unpriced I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland

SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan - argument Health and well-being. In terms of health and well-being, the NPPF emphasises the importance of creating healthy and sustainable communities. The lack of school places , GP surgeries and the additional cars (that will be extremely noticeable) on our already heavily congested roads through the town (s) highlight the unattainable nature of the site for both people and climate, contravening the EDDC's own Climate Emergency Action Plan and pledge to achieve carbon neutral council by 2040. This application fails to address these important point

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heath SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heath SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Do not access the site via Southern Wood. Vehicular access to the site via Meadow View Road and Southern Wood are already congested roads, with private vehicles parked on pavements through many areas, pedestrian access with prams and mobility scooters are forced into the road to pass.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove the Exmo_20 allocation from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_04

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I object to the development of land at Exmouth known as Exmouth 04 or the Lawn. The land is a wildlife corridor and is home to many endangered species as detailed in the ecological report. Many of these are on the red list. There are many ancient trees on site. No doubt these will be deemed dangerous and removed if planning is approved.

As well a parkland there is narrow field with ancient woods each side. There is a stream which runs underground through the middle of the field. This area takes run off from commons, hard landscaping could lead to serious flooding into Exmouth. The access to this site is off Higher Marley Road, which will lead to more traffic trying to get onto Dinan Way or over the Common, this site leads up to 400m from Pebblebed Heaths.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Resident's comments on inclusion of Exmo-17 in Local Plan:

- Large housing estates should not be built on protected National Landscape
- Building on land outside the National Landscape would be cheaper, making possible a bigger percentage of affordable homes
- The single highway exit from this site would create traffic chaos
- The access road would have to go straight across the much-used Exmouth to Budleigh cycle/footpath, endangering users (children/elderly/cyclists/families/dogs)

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. Objection 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. Objection 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and

HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals".

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan,

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will

also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to oppose the Exmo20 planning application. The reasons for my opposition are:- The infrastructure is in no way fit for increased housing in Exmouth. The sewage system is already overloaded with far more spillages than the sea and environment should have to cope with. This is a holiday destination and when visitors realise the sea is a sewer the holiday trade with disappear. That will impact our restaurants, cafes and attractions. The road system can barely manage now. I was born in Exmouth, and ever since I can remember the road to Exeter was going to be improved. This has not happened apart from Clyst St George to Clyst st Mary. Has anyone researched the number of houses already for sale in the area? Do we need anymore? Where are these home owners going to work? Where are the children going to go to school? What arrangements are being put in place for medical care? This is all part of planning! The government may say we need more housing but they don't need to be all in East Devon. Exmouth and Exeter have been spoilt by the characterless housing estates that have been built. Call a halt, sit back and take a good look at what is really required.

Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to formally and strongly object to the proposed large-scale residential and industrial development on site EXMO_17 within the current Local Plan Review. This site falls within the boundaries of a legally designated National Landscape (formerly an Area of Outstanding Natural Beauty - AONB), and your duty, as confirmed by the Housing Minister's representative, is to 'conserve and enhance' this precious environment. The construction of hundreds of houses and industrial units constitutes wholesale destruction, not conservation or enhancement. My objections are based on the following critical points detailed in the relevant chapters of the Local Plan review:
Chapter 12: Landscape and Environmental Protection

- **Destruction of National Landscape:** This site is a large, irreplaceable area of protected farmland. The removal of its Coastal Preservation Area status by EDDC, despite widespread resident objection and lack of clear justification, is unacceptable. Building a vast estate here is a direct contravention of the statutory duty to protect the National Landscape.
- **The Precedent of Development Creep (Domino Effect):** I am extremely concerned that the approval of this application would set a dangerous precedent for future, successive developments. If EXMO_17 is approved, I fear it will mark the beginning of systematic encroachment on our National Landscape, eventually escalating from hundreds of houses to potentially thousands, a pattern that has been observed in other developments across Exmouth. The recent termination of the lease on adjacent National Landscape pastureland by the landowner strongly suggests they are hoping for this "domino effect" and planning further estates on our irreplaceable protected land.

- **Irresponsible Industrial Zoning:** There is no logical or justifiable reason to place industrial units on this protected landscape when sites such as the existing Liverton Trading Estate or the adjacent site EXMO_18 (both reportedly under the same landowner) are available and more appropriate.
- **Destruction of Tranquil Amenities:** The proposed access road would run directly across the well-used, peaceful Exmouth to Budleigh cycle/foot path. This action would necessitate the felling of mature trees and bushes, destroying a vital, safe, and tranquil amenity used by cyclists, dog walkers, children, and people with mobility issues. This represents an indefensible loss of amenity within the protected landscape.
- **Visual Impact:** These fields are a crucial part of the viewscape from the World Heritage Jurassic Coast path, and their destruction will cause significant visual harm to this globally important area. Chapter 11: Sustainable Transport and Air Quality
- **Severe Traffic Congestion:** The proposed estate would inject an estimated 800 to 900 additional vehicles onto local roads. The main access is slated to be directly opposite the Liverton Trading Estate—an existing, notorious bottleneck.
- **Increased Pollution:** The proposed new roundabout and two pedestrian crossings on the main route in and out of Exmouth will cause significant traffic holdups and delays. This will lead to increased idling and air pollution in an already busy area, directly contradicting sustainable development goals.
- **Poor Job Connectivity:** The transport options for future residents heading to Exeter (where most employment is centred) are extremely poor, requiring a lengthy drive, or a multi-stage, infrequent journey involving two buses or a bus and a train. This lack of practical public transport actively encourages car use. Chapter 8: Housing Needs and Tenure
- **Failure to Meet Local Need:** The true housing need in Exmouth is for mixed-tenure housing, particularly for social rent homes to support local, low-waged families.
- **Displacement, Not Provision:** The vast majority of houses proposed for this prime site are projected to be high-end properties, likely to be purchased by people moving into the area, doing little to address the existing local affordability crisis.
- **Affordable Housing Doubt:** Past development experience gives little confidence that the stated number of "affordable" homes will actually be delivered or maintained as proposed. In conclusion, the development of EXMO_17 is fundamentally unsustainable, environmentally destructive, contrary to your statutory duty to conserve and enhance the National Landscape, and presents a severe risk of setting a precedent for further, destructive expansion into protected land. I urge you to remove site EXMO_17 from the Local Plan and pursue alternative, brownfield, and less environmentally sensitive sites

to meet housing targets. I look forward to receiving confirmation that my objection has been recorded.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

- Breach of Habitat Regulations: The allocation fails the 'Appropriate Assessment' test under the Conservation of Habitats and Species Regulations 2017. The Council's own HRA (dated 30.01.25) admits it cannot mitigate the impact on the Pebblebed Heaths SAC/SPA. Under the 'People over Wind' ruling, the Council cannot legally include a site where mitigation is not already shown to be 'achievable and viable.'
- Failure of the Precautionary Principle: By selecting a site with known, unmitigated risks to European protected species (like the Nightjar), the Council has failed in its duty as the Competent Authority.
- Procedural Unsoundness (NPPF Para 32): The Council failed to follow the Mitigation Hierarchy (Avoidance > Mitigation > Compensation). There are other viable sites that do not require this level of complex habitat mitigation, making the selection of EXMO_20 legally unjustifiable.
- Duty to Consult: The Council has ignored the categorical objections from statutory bodies including Natural England, Historic England, and the Devon Wildlife Trust. Proceeding against the specific legal advice of these bodies regarding the protection of the Grade II* Church and the Heaths constitutes a failure of the legal process in plan-making

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to the inclusion of EXMO_20 in the Local Plan. The allocation is unsound, not legally compliant, and in direct conflict with the NPPF (Dec 2023) and

multiple Local Plan policies (PB01-PB04, TR01, OL02). My specific objections are as follows: 1. Failure of Habitat Protection (Legal Non-Compliance) The site is adjacent to the Pebblebed Heaths SAC/SPA/SSSI. The HRA (30.01.25) admits that growth exceeds threshold levels and no viable mitigation strategy exists. Proceeding without "reasonable scientific certainty" regarding mitigation (e.g., cat predation, nitrogen deposition, and recreational pressure) violates the "People over Wind" and "Dutch N" legal rulings. The 400m buffer is insufficient for ground-nesting birds like the Nightjar. 2. Irreversible Heritage Harm (NPPF Para 206) Development would encircle the Grade II listed St John in the Wilderness Church*, destroying its "wilderness" setting and tranquil, dark-sky character. Historic England has expressed significant concern regarding this "considerable harm" to an asset of the highest significance. 3. Lack of Sustainable Access & Transport (NPPF Para 114) There is no viable access. Primary access via the B3179 is uncoded, unconfirmed by Highways, and would send heavy traffic directly along the boundary of protected heaths, increasing air pollution. The site is isolated—2.3 miles from Budleigh Salterton and 4.0 miles from Exmouth—making car dependency mandatory and violating Policy TR01. 4. Environmental Degradation & Flood Risk The site is within Strategic Nature Area 368. Development would fragment ancient woodland and veteran trees, undermining the Local Nature Recovery Strategy. Additionally, the LPA has failed to apply the sequential test for flood risk; developing this greenfield site risks increased runoff into the Withycombe Brook, threatening downstream residents with fluvial flooding. 5. Flawed Selection Methodology & Data The LPA's Site Selection Methodology (May 2022) originally ruled out sites within 400m of the Heaths; the retrospective change to justify EXMO_20 is unsound. Furthermore, the housing figures rely on outdated ONS data, resulting in an over-supply that negates the "overriding need" required to justify such ecological harm. Conclusion EXMO_20 must be removed from the Local Plan. I reserve the right to comment further should a revised HRA or mitigation strategy be provided.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove site EXMO_20 entirely from the Local Plan as it is unsustainable and legally non-compliant due to unmitigable impacts on the Pebblebed Heaths SAC/SPA. • Revert the settlement boundary to its previous position (20b) to maintain the essential rural buffer between Exmouth and the Pebblebed Heaths. • Exclude the 400m buffer zone adjacent to the Pebblebed Heaths from any future development plans to prevent irreversible damage from domestic predation (cats) and recreational pressure. • Remove proposed site access via the B3179 and Southern Wood, as these are unviable and would send high-

volume traffic through protected habitats. • Recalculate housing targets using the most recent mandatory ONS data to remove the current "over-supply" which is being used to justify the destruction of this sensitive site.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The allocation is legally non-compliant under the Conservation of Habitats and Species Regulations 2017 and the 'People over Wind' ruling. It is unsound as it fails the NPPF Para 32 Mitigation Hierarchy and ignores the expert advice of Natural England and Historic England."

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 and 7) 180d, 180e, 181, 185a, 186b, 188 and 191c, of the NPPF December 2023 and is unsound and not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and the Local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I write in regard to the proposed development, I strongly believe that the building of this development should not take place on National Landscape. Would not the building development, if built on land outside National Landscape, be more cost effective and thus enable the building of more affordable homes percentage wise? Affordable homes are vitally important in our local area. In addition, the exit for this site would, in my opinion as a regular driver and user of the cycle and footpaths, create traffic chaos in the area and endanger users of these footpaths in particular which are used by children, elderly and families.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6, 11.2 & 11.6 of the Local Plan. Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179 to access facilities and services, being 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road, therefore an unsustainable location for development. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: sandra Walford

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath SAC/SPA/SSSI. Allocation of Exmo_20 is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance over mitigation. The Exmo_20 allocation is unlawful due to there being no reasonable scientific certainty presented for mitigation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: reducing the size of exmo20 and move the settlement boundary away from the pebblebed heath. There must also be a guarantee of a proficient amount of affordable housing within the development not off site.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Proposal conflicts with many aspects of NPPF Dec 2023 and policies PB01, PB02, PB03, PB04 and OL02 of the local plan. New developments should be close to existing settlements where there is access to public transport, shops, schools, doctors etc. The distances to Budleigh Salterton and Exmouth are not sustainable in planning terms. There is no public transport available and the existing access to Dalditch Lane is very dangerous for vehicles. The new development would make the road even more dangerous as each dwelling is likely to have at least one vehicle. The number of people using the nearby pebble heath commons would increase considerably. Many people who move or live in the area have dogs which are very detrimental to the wildlife posing a severe threat to some rare species. The infrastructure in Exmouth namely traffic, parking, sewers, medical services is already at full stretch and adversely affecting the existing residents. The development's overwhelming long term issue however may be increasing the flood risk. The amount of extra rainfall now being experienced will not be absorbed by building in the proposed area.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The first objective of the site is stated as 'to accommodate A. Social and Community facilities'. No outline specifications what these facilities are required to be is given. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving everytime residents went anywhere and returned home. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objective Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate t consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate t consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local plan and in doing so, do not access the site via Southern Wood.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Full name: Sarah Ward

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". 4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure that all points are considered and the local community is heard, they see the day to day living/operations/traffic/wild life etc.

Full name: David Ward

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This area should not be developed upon, we need some green space left in Devon and the infrastructure - especially the roads and sewerage system in this area are not capable of coping with hundreds more houses. Raw sewage is regularly dumped locally in the sea by SW Water who can't cope with current output and if you've tried to drive from or to Exeter from budleigh at busy times you would know how congested the traffic is on inadequate roads. Specific objections are: Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states "It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA" and the Plan HRA states "there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks." This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU "People over Wind" ruling and the required precautionary approach, particularly relevant considering the CJEU "Dutch N" ruling. Furthermore selecting sites with known mitigation requirements requires clear

justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by

increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths". The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that "the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that "just one event leading to predation is enough to end that nesting attempt" [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that "In the RSPB's view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John's (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development". "The RSPB is very concerned that the St John's allocation in particular will have damaging impacts on the designated heathland

SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil

surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a ‘wilderness’ setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that “Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified”

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March ’26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge

East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. Objection 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is

assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

Objection 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

Objection 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals".

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Ian Wasson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: If the mineral area is to be excluded, why show it in the whole mapped out area proposed for development. Also, if you show the whole dedicated area for exmo 20 how can you actually ensure development is concentrated in the south of the area? The current traffic lights at the new Dinan Way junction on the main Exmouth to Exeter road shows just how much of a traffic bottleneck there will be heading towards the B3179 with the vast additional number of cars currently travelling this way, only made worse if exmo 20 goes ahead. exmo 20 really is a badly drawn up policy

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Laura Watson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This development will have a significant bad impact on the pebblebedheath, wildlife, traffic congestion and local services. This is not suitable for a local plan and most of the people who will benefit from this will be outsiders.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove from the local plan, it's far too big and imposing on the town.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I add my name to object against the EXMO20 development proposal in the draft Local Plan. Like many others, the Commonplace portal has confused and confounded my attempts to object through that, so please register this email in lieu of your preferred consultation method.

I ask you to remove EXMO 20 in its entirety from the Local Development Plan. You will be well aware of all of the issues raised in the attached document, which include issues from national organisations including the RSPB, regional experts including the Devon Wildlife Trust, and local concerns such as those from the Otter Valley Association.

There is little need to reiterate all of this expert, science based and comprehensive judgement against EXMO20.

My particular objections concern nature and environment. You will know that the UK has a biodiversity crisis, recognised by Defra and with Natural England reporting that nearly 1 in 6 English species are threatened with extinction (State of Nature report). The importance of the EXMO 20 area in buffering national and international biodiversity sites cannot be over-estimated. The area itself is of immense biodiversity value, including UK BAP Priority Habitat such as Woodland Pasture: you will be aware that Priority Habitats are of principal importance for biodiversity in Section 41 of the NERC Act. UK Red List species use the site, including yellowhammers, greater horseshoe and Barbastelle bats, and dormice - you'll be aware of much more detail in the Ecological Report

25/00718/MOOR. Biodiversity Net Gain cannot address the damage and loss of habitat that EXMO 20 would bring to our particular area.

I'm also aware that EDDC data for housing need has been questioned and that 17,000 houses are estimated to be required, rather than 20,909: a 19% reduction in perceived need. The allocation of land for housing should also take account of the land already banked by house builders not just in EDDC but across Devon county, rather than providing new land for the entire allocation. The impact of EXMO 20 within the National Landscape will inevitably destroy the landscape value of this, and surrounding area, once and for all, contrary to the objectives of the National Landscape designation.

I endorse the considerable concern for water and sewage provision, with the current lamentable infrastructure shortcomings resulting in the town losing its bathing water quality status, and little being done to remedy the situation. Major water and sewage upgrading is required to cope with extra demands of significant new housing, which South West Water appears unable to provide.

In conclusion, I reiterate my request, made in view of compelling evidence, that EXMO 20 is removed from the Local Plan

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Delete Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I

add my name to object against the EXMO20 development proposal in the draft Local Plan. Like many others, the Commonplace portal has confused and confounded my attempts to object through that, so please register this email in lieu of your preferred consultation method.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am very concerned about the proposed Local Plan particularly the proposal in it to build more than 400 houses and industrial units on the fields to the immediate East of Littleham church, Exmo_17 (National Landscape). This proposal would have a negative effect on Exmouth in many ways. The area is part of an Area of Outstanding Natural Beauty (or National Landscape) and is one of the major attractions of Exmouth and particularly the eastern edge of the town. National Landscapes are also regional and national assets and should be protected as such. Building on them on this scale should be very much a last resort. There is a briefing document dated November 2024, Guidance for Local Planning Authorities, produced by the National Landscapes Association which makes this very point and indeed in stronger terms. It states that Section 85 of the Countryside and Right of Way Act 2000 (as amended by the Levelling-up and Regeneration Act2 in December 2023) requires ‘relevant authorities’, in exercising or performing any function that affect AONBs in England, to “seek to further the purpose of conserving and enhancing the natural beauty of the Area of Outstanding Natural Beauty.” It states that this is a ‘statutory duty’, not discretionary, and is a strengthening of the previous ‘duty of regard’. When it comes to site allocation, the guidance states that if promoting a site allocation would not align with the duty to seek to further the conservation and enhancement of natural beauty, then consider amending or deleting a site allocation (For example, choosing NOT to allocate a particular site within or close to the AONB boundary)

It is extremely difficult to see how building 400 odd houses and industrial units on the AONB is in any way seeking to further the conservation and enhancement of the natural beauty of the AONB. In fact, clearly it is doing the opposite and therefore it would seem to me East Devon would be failing in its statutory duty if it were allow this allocation to remain in the plan.

As far as I can see the plan as a whole is very weak indeed on the question of AONBs. In its calculations and projections it seems to ignore the fact that planning and development in AONBs are totally different to in none-NL areas. Both areas seem to be just lumped in together. This seems particularly significant in an area like East Devon as it has such a high proportion of AONB land. This must call into question as to whether or not the plan as a whole can be considered a reliable enough document to underpin so many planning decisions for such a long period of years. The Protections on National Landscapes. When considering applications for development within National Parks, the Broads and National Landscapes, permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest' National Landscapes Association Alongside the NPPF (National Planning Policy Framework) is the strengthened Protected Landscapes Duty outlined in Section 245 of LURA 2023. This duty creates an obligation amongst public bodies and statutory bodies to 'seek to further' the purposes of Protected Landscapes whenever exercising functions that affect land in these areas, a change to the previous wording which necessitated relevant authorities needed only to 'have regard to' these purposes. This change necessitates proactive measures be taken rather than the more passive action that preceded it. The purposes of National Landscapes are to 'Conserve and enhance the beauty of the area. *** Personal details have been removed ***', Housing Minister, in a letter to *** Personal details have been removed *** MP Development within a National Landscape is not prohibited, but great policy weight is given to conserving and enhancing the landscape and scenic beauty within these designations. This weight is strengthened by the Levelling Up and Regeneration Act 2023, which places a duty on all relevant authorities, including Local Planning Authorities, to seek to further the statutory purposes of the area. Guidance for relevant authorities on seeking to further the purposes of Protected Landscapes was published by Defra on 16th December 2024. A high level of protection for National Landscapes is also reflected in EDDCPlan Policy OL02. This states that, "A. Development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities, character and natural beauty of the NL (including the coastline, where relevant); B. Major development in a NL will only be permitted in exceptional circumstances and where it can be demonstrated to be in the public interest; and; C. Any relevant National Landscape Management Plans will be a material consideration in

decision-making. We will be reminding the Local Planning Authority of their policies and duties around Coastal Protection Areas and National Landscapes, respectively, in our response to the Regulation 19 consultation. I thank you for your consideration in this important matter.

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to raise the following objections to building on Exmo_17 (National Landscape)

Chapter 8: Housing Needs: The real need in Exmouth is for houses of mixed tenure, including social rent, for people on low wages to make housing affordable for local people.

Has Exmouth Town Council's assessment of housing need been consulted?

The vast majority of houses proposed for the prime site of Exmo_17 would be high-end, bought by people from outside the area.

If estates were built outside the National Landscape, the land would be cheaper, giving scope for building a bigger percentage of the affordable/rentable houses we need.

Past experience tells us that the number of affordable houses will almost certainly be fewer than proposed, putting profits over people.

Chapter 11: Sustainable Transport: The proposed estate on Exmo_17 would bring a further estimated 800-900 vehicles onto local roads.

The access road would be directly opposite the Liverton Trading Estate, which is a well-known dangerous and uncontrolled bottleneck with queues of cars waiting to exit.

A new roundabout has been proposed, plus two pedestrian crossings on the busy main road into and out of Exmouth.

Traffic would be significantly held up at this point, causing increased air pollution and slowing drivers' progress.

To reach Exeter, where the jobs are, the choice would be to drive there, or to catch two buses (passing every half hour) or to use an unreliable bus service plus a frequently delayed or cancelled train.

Chapter 12: Landscape: Exmo_17 had two protections until EDDC, without any justification, recently removed its Coastal Preservation area status, despite hundreds of objections from residents.

It is a very large, precious area of National Landscape farmland that is protected against large-scale developments.

EDDC's duty is to 'conserve and enhance' it. (***) Personal details have been removed (***) on behalf of the Housing Minister, (***) Personal details have been removed (***) has confirmed this in a letter to our MP, (***) Personal details have been removed (***) of 18th August 2025). In no way is building a large estate on Exmo_17 conserving or enhancing it.

There is no reason to build the proposed industrial units on this land.

Logically, they should be built on the Trading Estate opposite or Exmo_18, both of which have the same landowner.

The proposed vehicle access road would go straight across the existing Exmouth to Budleigh cycle/foot path and would require the felling of mature trees and bushes.

This well-used path gives safe, tranquil access to cyclists, dog walkers, children, recreational walkers and people in wheelchairs and on mobility scooters.

I believe that this is dangerous and a loss of a peaceful amenity within the National Landscape.

The landowner has recently terminated the lease to a nearby farm of National Landscape pastureland adjacent to Exmo_17.

Could it be that they are hoping for a domino effect, building further estates on our irreplaceable National Landscape?

Chapter 15: Historic Environment: The proposed estate would be close to Littleham's medieval church where Lady Nelson is buried.

There is also an old farmhouse on the perimeter.

These National Landscape fields are in plain view from the coast path that runs along the World Heritage Jurassic Coast.

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:

Exmo_08, Exmo_16, Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We would like to express our very strong objections to the new homes planned for Littleham!

Firstly, Exmouth is already struggling with sewage problems - these new homes will only add to the problem. Secondly, have the planners/developers/council thought of all the extra stress this will add to the already busy doctors/dentists and local schools? Probably not, as no matter what local residents say, their views seem to be taken in total disregard.

This area is classed as an Area of Outstanding Natural Beauty! How come they are allowed to get planning for so many houses.

We have a whole estate of new homes being built at Goodmores, Dinan Way - already adding to what I've said above. Why does no-one listen to the obvious!

Exmouth does NOT NEED ANY MORE NEW HOMES no matter what the developers say. Please listen to the objectors.

I do hope this email is read and not deleted into the junk mail folder!

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Mr. & Mrs. M. J. White

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The above Local Plan has serious omissions, and the following points are inadequately mentioned. Additional housing development must recognise the pressures and demands on existing services as listed below, and make provision for additional needs of the many extra residents. This must be included in any Local Plan.

Any planning permission for additional housing in Exmouth for development schemes of 100 or more dwellings must have the following requirements:

- additional provision/capacity for doctors' surgeries;
- additional provision for schools in all age groups;
- detailed provision showing the capacity for sewage disposal;

All of the above must be quantified according to and in proportion to the number of dwellings.

Full name: Joannah Whiteley

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Greatly Reduce the size of Exmo_20 Donot access the site via B3179

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town

settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage

of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this

building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified”

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heath and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk

pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. Objection 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. Objection 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has

not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. Objection 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". -----

LIST OF POLICIES REFERRED TO IN SUGGESTED OBJECTIONS (FOR YOUR REFERENCE ONLY) National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan-makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals, preference should be given to accessible sites

which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 170b states that development should not increase flood risk elsewhere Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, and which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscapes and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset from development within its setting should require clear justification. Assets of the highest significance, notably....grade I and II * listed buildings should be wholly exceptional. 2nd Regulation 19 Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where

assessment fails to rule out effects on integrity development proposals will not be permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017 Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. Policy TR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be Made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5 miles). Factors such as topography also influence walking choices. Paragraph 13.10 aims to protect irreplaceable habitats and important features. Paragraph 13.11 states that some habitats, including ancient woodlands and veteran trees are irreplaceable

due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Karen Williams and Michael Williams

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am objecting strongly to above proposed development Due to the damage to special site of scientific interest and destruction of national landscape, and also loss of good agricultural land. Increased food miles due to loss of agricultural land Increased risk of flooding due to runoff due to concreting over fields Narrow roads leading to traffic congestion. Bottleneck on A376 Exeter to Exmouth. Insufficient infrastructure...potholes due to lorries HGVs Insufficient sewage systems to cope with more houses Pollution on beaches, damage to Tourism Insufficient schools, GP surgeries, increased pressure on the Royal Devon and Exeter university Hospitals trust.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This must not proceed

Full name: Margaret Wilson

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to formally object to the inclusion of the Exmo_20 allocation in the East Devon Local Plan. I contend that this allocation is unsound and not legally compliant due to significant environmental risks, unsustainable traffic implications, inadequate infrastructure, and direct conflicts with both the National Planning Policy Framework (NPPF) and the Council's own Local Plan policies. My objection is based on the following grounds:

1. Severe Environmental Impact and Habitat Loss The proposed site is adjacent to the Pebblebed Heaths, an Internationally and Nationally designated site (SAC/SPA/SSSI). Developing this land undermines the protection of these critical habitats in several ways:

- **Failure of Mitigation Strategy:** The allocation relies on a mitigation strategy that has not yet been proven achievable. The Habitats Regulations Assessment (HRA) admits there is "currently not sufficient certainty to rule out adverse effects on integrity" regarding air quality and the Heaths. Proceeding without a confirmed strategy violates the precautionary approach required by the "People over Wind" CJEU ruling.
- **Threat to Protected Species:** The site supports the European Nightjar, a ground-nesting bird and qualifying feature of the SPA. The proposed 400m buffer is scientifically insufficient. Studies indicate domestic cats, which inevitably accompany housing developments, can roam over 2km, posing a severe predation risk where "just one event... is enough to end that nesting attempt".

- **Destruction of Strategic Nature Areas:** The entire site lies within Strategic Nature Area 368, which acts as a vital wildlife corridor and buffer between Exmouth and the Heaths. Devon Wildlife Trust has stated that development here would result in the degradation and loss of ecologically supportive environments.

2. **Unsustainable Traffic and Transport Infrastructure** The Exmo_20 allocation promotes an unsustainable dependency on private vehicles and lacks viable infrastructure:

- **Unviable Access:** The primary access is proposed via the B3179. Making this viable would require major, uncertain, and uncosted highway works that have not been confirmed by Devon County Council.
- **Air Pollution:** Increased traffic congestion on the B3179 will increase nitrogen deposition on the adjacent Pebblebed Heaths, further damaging the protected habitat.
- **Car Dependency:** The site is geographically isolated, located 2.3 miles from Budleigh Salterton and 4.0 miles from Exmouth town centre. The topography and distance make walking or cycling unviable for accessing services, forcing residents to drive for daily needs. This directly conflicts with Local Plan Policy TR01, which mandates that walking and cycling should be the natural first choice for transport.

3. **Flood Risk and Poor Infrastructure Planning** The allocation fails to adequately address flood risks associated with the development:

- **Risk to Withycombe Brook:** The site sits above the town, with runoff flowing directly into tributaries of the Withycombe Brook, which has a history of significant flooding.
- **Failure of Sequential Approach:** The Local Planning Authority (LPA) has failed to employ the required risk-based sequential approach to site selection to avoid flood risk to people and property, violating NPPF Paragraph 170b and Local Plan Policy AR01(b)

4. **Harm to Heritage Assets** The development surrounds the Grade II listed Church of St John in the Wilderness. Historic England has warned that development here could result in "considerable harm" to the setting of this asset, which is characterised by its remoteness and dark skies.

5. **Conflict with Planning Policies** The allocation of Exmo_20 undermines specific policies designed to protect the district:

- **NPPF Violations:** The allocation conflicts with Paragraphs 180, 181, 186, and 188 regarding the protection of habitats and biodiversity. It also violates Paragraph 109 regarding sustainable transport and limiting the need to travel.

- Local Plan Policy Conflicts: PB01 & PB04: Fails to protect international and national sites and fails to rule out adverse effects on integrity. OL02: Fails to contribute to the conservation of special landscape qualities. Conclusion The inclusion of Exmo_20 is based on a Site Selection Methodology that appears to have been retrospectively altered after the original Regulation 18 process, potentially conflicting with the Nolan Principles. Because the site cannot be developed without significant, unmitigated harm to the environment and the local transport network, I urge the Council to find this allocation unsound and remove Exmo_20 from the Local Plan entirely.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I should like to object to Exmo_20 on the following grounds.

- Risk to Withycombe Brook: The site sits above the town, with runoff flowing directly into tributaries of the Withycombe Brook, which has a history of significant flooding.
- Failure of Sequential Approach: The Local Planning Authority (LPA) has failed to employ the required risk-based sequential approach to site selection to avoid flood risk to people and property, violating NPPF Paragraph 170b and Local Plan Policy AR01(b)

The Pebblebed Heaths form part of the network of Rare Lowland Heath, home to species found nowhere else in Britain, making it critical to our national biodiversity strategy. To put 700+ houses close by runs counter to the very purpose of its protected status. We are the most wildlife depleted country in Europe. We MUST reverse this trend.

As well as Exmo-20 there are many more applications pending with potential adverse effects on this immediate area. At the last count we could get another 1744 houses around the Exmouth area, including Lymptone, Exton and Woodbury among others.

Our terrible sewage problems have not yet been dealt with. Another 1744 houses (and that's only this year's planning applications) HAS to be adding insult to injury. Before anything more is built the infrastructure should be planned for and dealt with. Therefore I should like to object to Exmo_20 on the grounds that the chaotic water and sewage services must be in order before any more building takes place.

An extra 1744 households blocking the sewage pipe work just after breakfast every day doesn't bear thinking about!

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I would like to object to Planning Application Exmo_20 on the following grounds.

St John in the Wilderness Church The objection relates to the word 'Wilderness'. The huge development surrounding this Saxon settlement with its church and surrounding buildings will destroy this sense of remoteness, with dark skies and wilderness setting, which the NPPF identifies as an asset of the highest significance. Opening up this area to future pressure for development and associated harm will contribute to the never-ending expansion of this whole area around Exmouth.

Everyone agrees there should be more housing (I think) but the vast increase in housing in and around Exmouth should now stop. If you have to dig up yet more wonderful (it was) Devon countryside, THINK before you decide on using the most sensitive areas. And why always use East and South Devon as a dumping ground for disillusioned and often wealthy Londoners. In fact I feel sorry for newcomers coming to their 'dream' area. They will soon be as stressed and experience further disillusionment as the existing residents do. Traffic here is already unsustainable.

Stand up to government dictats and algorithms. There MUST be another way.

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I have had great difficulty accessing the EDDC Planning website. I am therefore sending an email and would be grateful if you could let me know if you have received this comment/objection.

I would like to object to the supersized 700+ housing estate with access onto the B3197.

51 years ago *** Personal details have been removed *** chaired a small local committee whose aim was to stop two championship golf courses being built on prime common land between Hawkerland and Woodbury Castle. The application was proposed by Clinton Devon Estates and supported by Devon County Council. In 1974 *** Personal details have been removed *** and the golf courses were stopped. Woodbury Common had been saved earning huge gratitude from a delighted public. Clinton Devon Estates are justly proud of the internationally renowned Pebblebed Heaths which had so nearly been dug up and destroyed.

Are we again having to fight for the survival of this unique landscape? To build 700+ houses close to the Pebblebed Heaths is the height of folly. This development will lead to the degradation and loss of this ecologically prized area. Dogs are already a major problem on the common with dog mess often spreading out from the four car parks

which is truly disgusting. There is also a noticeable drop in riding horses on the Common as dogs frequently worry and bite their legs. Hoof prints are now also non-existent as riders are too scared to risk their horses. Wildlife is also at risk, particularly at nesting time. 700 households will surely want to exercise their dogs on the Common on their doorstep - with what result?

The LPA demonstrates a cavalier attitude and widespread failings as the Competent Authority under the Conservation of Habitats and Species Regulations.

I object whole-heartedly to this Planning Application.

2(c). Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted.... Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused.

The above statement fits EXMO_20 which should immediately be refused planning permission.

"Development in the Towns and Villages" Chapter 5 on 'Commonplace' platform.
Exmo_20, (700 houses) Lymp_01,(8) Lymp_07,(100) Lymp_14(59), Meeting Lane(42), Strawberry Hill(42), Exmo_17(410), Exmo_08 and Exmo_16 combined(45),Exmo_06(44), Marley Drive (50), New Police Station and housing(20+), Wood_06 (236), Exton (53). These applications in this area alone amount to an extra 1744 houses with cars, dogs, cats and people. The Exmouth Road would be almost permanently blocked with traffic. To avoid this the Dinan Way link road will be ignored and the Woodbury route used which will be hideous for the middle of the village and the consequence build up of traffic at the roundabouts at Clyst St. George. The roads and lanes to Budleigh Salterton, and the town itself, will be overwhelmed. These are the applications for this year in this small and incredibly busy area. What about the applications next year...?

There has to be some joined up, logical thinking.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Wildlife sites 2nd Regulation 19 local plan. Policy PB01 states that international followed by nationally designated sites must be given uppermost protection.

Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts.

The Exmo_20 site would be adjacent to the Pebblebed Heaths. "A 400m buffer to the protected site does not seem sufficiently large enough to protect the site from disturbance and damage caused by increased visitor number, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape". East Devon National Landscape Partnership.

You wrote the policies - please abide by them.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I would like to object to the Exmo_20 planning application on the following grounds.

Traffic emissions, dogs and cats and the effect of traffic on Woodbury: There will be additional nitrogen deposition from the increase in traffic arising from the new development which could prove very detrimental to birdlife and other wildlife on the Pebblebed Heaths. Dogs are at present a particular problem to wildlife when off the lead. The subsequent increase in the cat population from such a huge development close to the heaths will greatly disturb ground nesting birds.

Traffic through Woodbury: The most obvious way for traffic heading for Topsham or Exeter and beyond, from the exit onto the B3179, is to travel close to the common and down through Woodbury. A huge increase in traffic in the centre of the village of Woodbury will result in traffic jams and emissions as well as a danger to pedestrians trying to cross the road to the post office/shop, as well as residents living on Broadway. This is already a dangerous crossroads. There is no doubt that Woodbury would be very badly affected, especially as there is the potential for exits onto Globe Hill from two large housing estates either side of the hill. (Wood_06).

Traffic will also go through to the Sidmouth Road at Half Way House. As there is no roundabout (what a short sighted omission when expensive work was carried out here a

few years ago!) there will be massive traffic queues trying to get onto the Sidmouth Road or crossing the road for Ottery St. Mary and the A30.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Remove Exmo_20 from the Local Plan

Full name: Florence Wilson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function

of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries". The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that "just one event leading to predation is enough to end that nesting attempt" [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that "A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support

significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is

a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this

falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1

Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. 9.. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles

from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". POLICIES REFERRED TO IN SUGGESTED OBJECTIONS National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan- makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals,

preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, and which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscapes and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset from development within its setting should require clear justification. Assets of the highest significance, notably....grade I and II * listed buildings should be wholly exceptional. 2nd Regulation 19 Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be

permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017. Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. Policy TR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be Made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5 miles). Factors such as topography also influence walking choices. Paragraph 13.10 aims to protect irreplaceable habitats and important features. Paragraph 13.11 states that some habitats, including ancient woodlands and veteran trees are irreplaceable due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon

has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Local voices need to be heard

Full name: LAURA WILSON

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Strong views of the local community need to be heard and actioned. Exmo_20 needs to be removed from the Local Plan

Full name: LAURA WILSON

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Strong views and opinions of the local community need to be heard

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heath SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heath SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function

of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Full name: Florence Wilson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Full name: Florence Wilson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Plan has an over-supply of housing allocations. It does not use the latest ONS data which is mandatory. At present the allocation site acts as a buffer between the excessively urban area of ~Exmouth and the highly designated land to the north. Any development in the proposal would result in degradation and loss of ecologically important area just outside the site boundaries. The LPA does not adhere to the Conservation of Habitats and Species Regulations.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Excessive over-crowded, huge unsustainable rise in already traffic filled roads and lanes leading to terrible traffic jams and queues. Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Florence Wilson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then

the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified”

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It conflicts with NPPF (Dec 2023) paragraph 16(d). The Plan over-allocates housing because it does not use the most recent ONS data, contrary to MHCLG guidance on housing and economic needs assessment (“most recent data published at the time”). The 1,188 figure cited at paragraph 3.11 was calculated in February 2025, prior to the 2024 ONS data and is thus invalid. The figures should be revised to 1,156, 80% = 925, and a 22-year requirement of 20,342 (avoiding rounding errors)—a reduction of 567. Many policies rely on a compelling need to justify harm/impact; if the baseline numbers are wrong, the justification falls away, including under the mitigation hierarchy. Exmo_20 must therefore be removed, particularly given its multiple, unresolved mitigation dependencies affecting the Pebblebed Heaths SPA/SAC/SSSI. Additional numerical/mathematical errors in HOU-002 (Oct 2025) and HOU-001 (Nov 2025) must be corrected and re-consulted upon, as they underpin the Plan’s housing strategy. NPPF 16(d) also requires clear, unambiguous policy drafting so that decision-makers can consistently apply policies—a test the current Plan does not meet. Closing and Reservation of Rights Given the above, Exmo_20 should be deleted from the Local Plan. Its inclusion conflicts with key NPPF provisions, habitats legislation, the mitigation hierarchy, and sound plan-making practice, and it fails the tests of soundness and legal compliance. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided for the Local Plan, and request that I am notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraph 109 and with Local Plan policy TR01 and paragraph 11.6. The main vehicular access is ~2.3 miles from Budleigh Salterton town centre and ~4.0 miles from Exmouth town centre. This allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. The LPA has not adequately considered Budleigh Salterton when evaluating Exmo_20. Furthermore, the local topography markedly reduces the viability of walking and cycling, a constraint not evident on policy maps, thereby undermining sustainable travel objectives.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to 20b as previously proposed

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraph 32. The LPA appears to have retrospectively altered the Site Selection Methodology post 11.12.2024 (after Regulation 19 publication approval). The May 2022 SSM, used at Regulation 18, states at Stage 2 (Site Sifting) that only “reasonable alternatives” progress, including: (a) Site suitable, available, and achievable in the HELAA; with subtext clarifying: “It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.” A December 2024 version was then presented in the Reg 19 evidence library as if used for selection, when it was not. This undermines procedural integrity and raises serious concerns regarding adherence to the Nolan Principles, as well as the robust consideration of reasonable alternatives mandated by NPPF 32.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraphs 92 and 109 and with Local Plan policies TR01 and TR03, and paragraphs 3.6 and 11.2. Exmo_20 would materially increase car dependency, requiring convoluted journeys from the proposed B3179 access to reach everyday services. The Plan fails to demonstrate that regularly needed services are accessible by walking/cycling, and recent changes to TR01 mean active travel is mandatory rather than aspirational. The site's isolation and access arrangements create inherently unsustainable development, with substantial vehicle trips to Exmouth and Budleigh Salterton. If housing is focused in the southern part, residents would face at least 1km on-site driving each time they enter/leave—further entrenching unsustainable patterns.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: S Winn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraph 170(b) and with Local Plan paragraph 3.6 and policy AR01(b). The Strategic Flood Risk Assessment (Level 1) gives Withycombe Brook scant attention (only a footnote in Table 5-3), despite recorded fluvial flooding in 1960, 1983, and 2012 and numerous significant flood pathways in Exmouth. Exmo_20 is a greenfield site upslope of the town, with tributaries and runoff feeding Withycombe Brook—which traverses the most populous wards in East Devon. The LPA has not applied the required sequential, risk-based approach to avoid increasing flood risk to people and property, including current and future climate impacts.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraphs 16(c), 25, 180(d), 181, 185(a), 186(a), 186(c), 188, and 191 and with Local Plan policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11, and 13.24. Exmo_20 lies within Strategic Nature Area 368, a key buffer between Exmouth and the Pebblebed Heaths SAC/SPA/SSSI, providing supporting Nightjar foraging habitat and a wildlife corridor between the Heaths and the coast. Development would undermine the SPA's conservation objectives. Devon County Council is in the final stages of designating the site as a Local Nature Recovery Area (LNRS, publication expected March 2026) to combine and extend habitats in line with the Environment Act 2021. The site supports veteran trees, ancient woodlands, and hedgerows susceptible to fragmentation. Devon Wildlife Trust's Regulation 19 response states that the entirety of the allocation falls within an SNA of national habitat importance, and that "it is not appropriate to consider allocation of this land for development" and "not feasible to develop this site without causing significant adverse effects on the integrity of the SAC." DWT strongly urges the Council not to include this allocation. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided, and request notification accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraph 206 and with Local Plan policies HE02 and OL01(D). A development of this scale, encircling the Grade II* St John in the Wilderness Church and its churchyard, would irreversibly harm the area's remote, tranquil, dark-sky 'wilderness' setting, which includes a Medieval Saxon settlement landscape context. Historic England warns that much of the site lies within the church's setting, such that "considerable harm" could result to a heritage asset of the highest significance (NPPF 206(b)). HE is also concerned about the long access road from the B3179, which would itself cause harm and invite further development pressure. HE advises exploring southern access and, if evidence supports development only in less sensitive southern areas, amending the site boundary and restricting the quantum and range of uses accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It conflicts with NPPF (Dec 2023) paragraphs 16(c), 92, 114(b), 114(d), 180(e), and 181 and with Local Plan paragraph 3.6, policies TR01, OL09, PB04, and paragraph 11.2. There is no viable access to the site. The proposed primary access via the B3179 would require major, uncertain, and uncosted highway works not confirmed by Devon County Council, and the cumulative/in-combination effects on the B3179 (congestion and air pollution) must be assessed—particularly given the road runs along the boundary of the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.2025) confirms insufficient certainty to rule out adverse effects on integrity relating to air quality for the EDPH SAC/SPA. This runs counter to the precautionary approach and the mitigation hierarchy's primacy of avoidance (as embedded by the Environment Act 2021). The mitigation strategy itself recognises "Mitigation cannot be assumed without evidence (People over Wind; Sweetman)." In short, no reasonable scientific certainty has been presented to lawfully include Exmo_20. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided, and request notification accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It conflicts with NPPF (Dec 2023) paragraphs 16(c), 32, 181, 185, 186(b), and 188 and with Local Plan paragraph 3.6 and policies PB01, PB02, PB03, PB04. Given the site's adjacency to the Pebblebed Heaths SAC/SPA/SSSI, it is unlikely that SANG of adequate quality, scale, and geographic convenience could divert substantial recreation (dog walking, cycling, walking) away from the Heaths. As Langston et al. (2007) emphasise, a single predation event can end a nesting attempt—underscoring the need for a precautionary approach by the LPA. The RSPB's Regulation 19 response reinforces that mitigation is unlikely to avoid damaging impacts on heathland habitats and species, including additional nitrogen deposition from traffic, increased cat predation on ground-nesting birds, and recreation impacts (dogs off lead) the closer dwellings are sited to the Heaths. SANG/public open space is unlikely to be sufficient to avert damaging increases in usage. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided, and request notification accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It conflicts with NPPF (Dec 2023) paragraphs 16(c), 32, 73(b) (footnotes 7 and 38), 180(d), 180(e), 181, 185(a), 186(a), 186(b), 188, and 191(c) and with Local Plan paragraph 3.6 and policies PB01, PB02, PB03, PB04, and OL02. At minimum, 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded to address urban effects including cat predation. However, given evidence that cats can roam over 2km [Hall et al., 2016; Metsers, Seddon & van Heezik, 2010; HRA 4.10] and that European Nightjar is a qualifying SPA feature and Section 41 species, the precautionary distance should be materially greater than the pragmatic 400m [Underhill-Day, 2005]. As Langston et al. (2007) note, “just one event leading to predation is enough to end that nesting attempt.” Exmo_20’s inclusion rests on mitigation and HRA that do not yet support the Plan. In their absence, the Competent Authority must apply a precautionary approach, at the very least removing 400m at the interface with the designated site, acknowledging the area’s functionally linked foraging habitat for Nightjar and the likelihood of greater buffers being required to mitigate recreation pressure (dogs off lead, cycling, walking). Site-level assessments of recreation impacts have not been undertaken, necessitating strategic-level precaution. This aligns with DWT, RSPB, and East Devon National Landscape Partnership, the latter stating at Regulation 19: “A 400m buffer...does not seem significantly large enough... It also further fragments the surrounding habitat... As such, [we] support the non-adoption of this site... Or... a significant reassessment of the scale and boundary... including a reduced housing number and concentration of development closer to the existing town settlement...” Natural England further advises that policy clarity and a natural buffer in the northeast along the B3179 are required, and suggests pulling the

settlement boundary away from the SAC/SPA and securing a green buffer via S106 as “clear, sound planning.” Given the availability of alternative, less mitigation-dependent sites and a plan over-supply arising from out-of-date ONS data, Exmo_20 cannot be justified. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided, and request notification accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It conflicts with NPPF (Dec 2023) paragraphs 16(c), 32, 73(b) (footnotes 7 and 38), 180(d), 180(e), 181, 185(a), 186(b), 188, and 191(c) and with Local Plan paragraph 3.6 and policies PB01, PB02, PB03, PB04, and OL02. Being directly adjacent to the Pebblebed Heaths SAC/SPA/SSSI, the allocation depends on significant mitigation for habitats and species that has neither been demonstrated as achievable nor viable. The mitigation strategy acknowledges that “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA concedes “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” The site selection on 03.09.2024 and the Regulation 19 approval on 11.12.2024 proceeded on the assumption that a mitigation strategy would follow, with an “appropriate assessment” only on 30.01.2025, which is contrary to the CJEU People Over Wind ruling and the precautionary approach—particularly relevant in light of the CJEU “Dutch N” rulings. Under NPPF paragraph 32, selecting sites with known mitigation dependencies demands robust justification against the mitigation hierarchy. No such step was undertaken; Exmo_20 is especially difficult to justify given the availability of multiple alternative sites with less reliance on mitigation and a plan-wide over-allocation stemming from failure to use the latest ONS data. As Devon Wildlife Trust stated at Regulation 19: “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries.” Overall, the LPA’s approach falls short of its

duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided, and request notification accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It conflicts with NPPF (Dec 2023) paragraph 16(d). The Plan over-allocates housing because it does not use the most recent ONS data, contrary to MHCLG guidance on housing and economic needs assessment (“most recent data published at the time”). The 1,188 figure cited at paragraph 3.11 was calculated in February 2025, prior to the 2024 ONS data and is thus invalid. The figures should be revised to 1,156, 80% = 925, and a 22-year requirement of 20,342 (avoiding rounding errors)—a reduction of 567. Many policies rely on a compelling need to justify harm/impact; if the baseline numbers are wrong, the justification falls away, including under the mitigation hierarchy. Exmo_20 must therefore be removed, particularly given its multiple, unresolved mitigation dependencies affecting the Pebblebed Heaths SPA/SAC/SSSI. Additional numerical/mathematical errors in HOU-002 (Oct 2025) and HOU-001 (Nov 2025) must be corrected and re-consulted upon, as they underpin the Plan’s housing strategy. NPPF 16(d) also requires clear, unambiguous policy drafting so that decision-makers can consistently apply policies—a test the current Plan does not meet. Closing and Reservation of Rights Given the above, Exmo_20 should be deleted from the Local Plan. Its inclusion conflicts with key NPPF provisions, habitats legislation, the mitigation hierarchy, and sound plan-making practice, and it fails the tests of soundness and legal compliance. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided for the Local Plan, and request that I am notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

First choice would obviously be to remove Exmo_20 from the plan entirely for the reason outlined above. Second choice would be to reduce the size considerably of Exmo_20 to the site originally identified in the initial stages of the local plan, site Exmo_20b, which would mitigate many of the concerns outlined.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To Provide strong opinion

Full name: Tracey Winn

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraph 109 and with Local Plan policy TR01 and paragraph 11.6. The main vehicular access is ~2.3 miles from Budleigh Salterton town centre and ~4.0 miles from Exmouth town centre. This allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. The LPA has not adequately considered Budleigh Salterton when evaluating Exmo_20. Furthermore, the local topography markedly reduces the viability of walking and cycling, a constraint not evident on policy maps, thereby undermining sustainable travel objectives.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: First choice would obviously be to remove Exmo_20 from the plan entirely for the reason outlined above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraph 32. The LPA appears to have retrospectively altered the Site Selection Methodology post 11.12.2024 (after Regulation 19 publication approval). The May 2022 SSM, used at Regulation 18, states at Stage 2 (Site Sifting) that only “reasonable alternatives” progress, including: (a) Site suitable, available, and achievable in the HELAA; with subtext clarifying: “It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.” A December 2024 version was then presented in the Reg 19 evidence library as if used for selection, when it was not. This undermines procedural integrity and raises serious concerns regarding adherence to the Nolan Principles, as well as the robust consideration of reasonable alternatives mandated by NPPF 32.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraphs 92 and 109 and with Local Plan policies TR01 and TR03, and paragraphs 3.6 and 11.2. Exmo_20 would materially increase car dependency, requiring convoluted journeys from the proposed B3179 access to reach everyday services. The Plan fails to demonstrate that regularly needed services are accessible by walking/cycling, and recent changes to TR01 mean active travel is mandatory rather than aspirational. The site's isolation and access arrangements create inherently unsustainable development, with substantial vehicle trips to Exmouth and Budleigh Salterton. If housing is focused in the southern part, residents would face at least 1km on-site driving each time they enter/leave—further entrenching unsustainable patterns.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: First choice would obviously be to remove Exmo_20 from the plan entirely for the reason outlined above. Second choice would be to reduce the size considerably of Exmo_20 to the site originally identified in the initial stages of the local plan, site Exmo_20b, which would mitigate many of the concerns outlined.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To Provide strong opinion

Full name: Tracey Winn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraph 170(b) and with Local Plan paragraph 3.6 and policy AR01(b). The Strategic Flood Risk Assessment (Level 1) gives Withycombe Brook scant attention (only a footnote in Table 5-3), despite recorded fluvial flooding in 1960, 1983, and 2012 and numerous significant flood pathways in Exmouth. Exmo_20 is a greenfield site upslope of the town, with tributaries and runoff feeding Withycombe Brook—which traverses the most populous wards in East Devon. The LPA has not applied the required sequential, risk-based approach to avoid increasing flood risk to people and property, including current and future climate impacts.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: First choice would obviously be to remove Exmo_20 from the plan entirely for the reason outlined above. Second choice would be to reduce the size considerably of Exmo_20 to the site originally identified in the initial stages of the local plan, site Exmo_20b, which would mitigate many of the concerns outlined.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To provide a strong opinion

Full name: Tracey Winn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraphs 16(c), 25, 180(d), 181, 185(a), 186(a), 186(c), 188, and 191 and with Local Plan policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11, and 13.24. Exmo_20 lies within Strategic Nature Area 368, a key buffer between Exmouth and the Pebblebed Heaths SAC/SPA/SSSI, providing supporting Nightjar foraging habitat and a wildlife corridor between the Heaths and the coast. Development would undermine the SPA's conservation objectives. Devon County Council is in the final stages of designating the site as a Local Nature Recovery Area (LNRS, publication expected March 2026) to combine and extend habitats in line with the Environment Act 2021. The site supports veteran trees, ancient woodlands, and hedgerows susceptible to fragmentation. Devon Wildlife Trust's Regulation 19 response states that the entirety of the allocation falls within an SNA of national habitat importance, and that "it is not appropriate to consider allocation of this land for development" and "not feasible to develop this site without causing significant adverse effects on the integrity of the SAC." DWT strongly urges the Council not to include this allocation. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided, and request notification accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: First choice would

obviously be to remove Exmo_20 from the plan entirely for the reason outlined above. Second choice would be to reduce the size considerably of Exmo_20 to the site originally identified in the initial stages of the local plan, site Exmo_20b, which would mitigate many of the concerns outlined.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound. It conflicts with NPPF (Dec 2023) paragraph 206 and with Local Plan policies HE02 and OL01(D). A development of this scale, encircling the Grade II* St John in the Wilderness Church and its churchyard, would irreversibly harm the area's remote, tranquil, dark-sky 'wilderness' setting, which includes a Medieval Saxon settlement landscape context. Historic England warns that much of the site lies within the church's setting, such that "considerable harm" could result to a heritage asset of the highest significance (NPPF 206(b)). HE is also concerned about the long access road from the B3179, which would itself cause harm and invite further development pressure. HE advises exploring southern access and, if evidence supports development only in less sensitive southern areas, amending the site boundary and restricting the quantum and range of uses accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It conflicts with NPPF (Dec 2023) paragraphs 16(c), 92, 114(b), 114(d), 180(e), and 181 and with Local Plan paragraph 3.6, policies TR01, OL09, PB04, and paragraph 11.2. There is no viable access to the site. The proposed primary access via the B3179 would require major, uncertain, and uncoded highway works not confirmed by Devon County Council, and the cumulative/in-combination effects on the B3179 (congestion and air pollution) must be assessed—particularly given the road runs along the boundary of the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.2025) confirms insufficient certainty to rule out adverse effects on integrity relating to air quality for the EDPH SAC/SPA. This runs counter to the precautionary approach and the mitigation hierarchy's primacy of avoidance (as embedded by the Environment Act 2021). The mitigation strategy itself recognises "Mitigation cannot be assumed without evidence (People over Wind; Sweetman)." In short, no reasonable scientific certainty has been presented to lawfully include Exmo_20. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided, and request notification accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It conflicts with NPPF (Dec 2023) paragraphs 16(c), 32, 181, 185, 186(b), and 188 and with Local Plan paragraph 3.6 and policies PB01, PB02, PB03, PB04. Given the site's adjacency to the Pebblebed Heaths SAC/SPA/SSSI, it is unlikely that SANG of adequate quality, scale, and geographic convenience could divert substantial recreation (dog walking, cycling, walking) away from the Heaths. As Langston et al. (2007) emphasise, a single predation event can end a nesting attempt—underscoring the need for a precautionary approach by the LPA. The RSPB's Regulation 19 response reinforces that mitigation is unlikely to avoid damaging impacts on heathland habitats and species, including additional nitrogen deposition from traffic, increased cat predation on ground-nesting birds, and recreation impacts (dogs off lead) the closer dwellings are sited to the Heaths. SANG/public open space is unlikely to be sufficient to avert damaging increases in usage. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided, and request notification accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It conflicts with NPPF (Dec 2023) paragraphs 16(c), 32, 73(b) (footnotes 7 and 38), 180(d), 180(e), 181, 185(a), 186(a), 186(b), 188, and 191(c) and with Local Plan paragraph 3.6 and policies PB01, PB02, PB03, PB04, and OL02. At minimum, 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded to address urban effects including cat predation. However, given evidence that cats can roam over 2km [Hall et al., 2016; Metsers, Seddon & van Heezik, 2010; HRA 4.10] and that European Nightjar is a qualifying SPA feature and Section 41 species, the precautionary distance should be materially greater than the pragmatic 400m [Underhill-Day, 2005]. As Langston et al. (2007) note, “just one event leading to predation is enough to end that nesting attempt.” Exmo_20’s inclusion rests on mitigation and HRA that do not yet support the Plan. In their absence, the Competent Authority must apply a precautionary approach, at the very least removing 400m at the interface with the designated site, acknowledging the area’s functionally linked foraging habitat for Nightjar and the likelihood of greater buffers being required to mitigate recreation pressure (dogs off lead, cycling, walking). Site-level assessments of recreation impacts have not been undertaken, necessitating strategic-level precaution. This aligns with DWT, RSPB, and East Devon National Landscape Partnership, the latter stating at Regulation 19: “A 400m buffer...does not seem significantly large enough... It also further fragments the surrounding habitat... As such, [we] support the non-adoption of this site... Or... a significant reassessment of the scale and boundary... including a reduced housing number and concentration of development closer to the existing town settlement...” Natural England further advises that policy clarity and a natural buffer in the northeast along the B3179 are required, and suggests pulling the

settlement boundary away from the SAC/SPA and securing a green buffer via S106 as “clear, sound planning.” Given the availability of alternative, less mitigation-dependent sites and a plan over-supply arising from out-of-date ONS data, Exmo_20 cannot be justified. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided, and request notification accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It conflicts with NPPF (Dec 2023) paragraphs 16(c), 32, 73(b) (footnotes 7 and 38), 180(d), 180(e), 181, 185(a), 186(b), 188, and 191(c) and with Local Plan paragraph 3.6 and policies PB01, PB02, PB03, PB04, and OL02. Being directly adjacent to the Pebblebed Heaths SAC/SPA/SSSI, the allocation depends on significant mitigation for habitats and species that has neither been demonstrated as achievable nor viable. The mitigation strategy acknowledges that “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA concedes “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” The site selection on 03.09.2024 and the Regulation 19 approval on 11.12.2024 proceeded on the assumption that a mitigation strategy would follow, with an “appropriate assessment” only on 30.01.2025, which is contrary to the CJEU People Over Wind ruling and the precautionary approach—particularly relevant in light of the CJEU “Dutch N” rulings. Under NPPF paragraph 32, selecting sites with known mitigation dependencies demands robust justification against the mitigation hierarchy. No such step was undertaken; Exmo_20 is especially difficult to justify given the availability of multiple alternative sites with less reliance on mitigation and a plan-wide over-allocation stemming from failure to use the latest ONS data. As Devon Wildlife Trust stated at Regulation 19: “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries.” Overall, the LPA’s approach falls short of its

duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and mitigation strategy are provided, and request notification accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant, as it conflicts with NPPF (December 2023) paragraph 16(d). 1. Housing need figures are incorrect and do not use the most recent mandatory ONS data The Plan is based on outdated and invalid housing need calculations, directly contrary to MHCLG’s requirement that authorities must use “the most recent data published at the time” when applying the standard method. The housing need figure of 1,188 quoted in paragraph 3.11 was calculated in February 2025, before the release of the 2024 ONS data, and therefore cannot lawfully be relied upon. Using the correct most recent ONS dataset reduces the figure to 1,156, which equates to 925 at the 80% adjustment. Over a 22-year plan period, this produces a requirement of 20,342, with no rounding distortion—representing a reduction of 567 dwellings. Because the plan has been constructed on the basis of inflated housing numbers, many policies—particularly those seeking to justify environmental harm through an asserted overriding need—are fundamentally undermined. Incorrect housing figures invalidate the Mitigation Hierarchy assessment and remove any justification for allocating highly constrained or environmentally damaging sites such as Exmo_20. 2. Exmo_20 is incompatible with a corrected housing requirement Once the correct housing need is applied, the Plan has an oversupply of allocations, eliminating any necessity for selecting high-risk, mitigation-dependent sites. Exmo_20 requires multiple, complex, and unproven mitigation strategies due to its impact on internationally and nationally designated Pebblebed Heaths SPA/SAC/SSSI. Under the Mitigation Hierarchy, avoidance must be the first step. With no demonstrable need for this site, and given the severe environmental constraints, Exmo_20 must be removed from the plan. 3. Significant numerical and methodological errors undermine the evidence base Further

numerical and methodological inaccuracies appear in the supporting evidence (HOU-002, October 2025, and HOU-001, November 2025). These documents form the foundation of the Local Plan's housing strategy. Until corrected and re-consulted upon, the underpinning evidence base cannot be considered robust or legally compliant. 4. Failure to produce clear, unambiguous policies breaches NPPF 16(d) NPPF paragraph 16(d) requires that: "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals." The use of incorrect data, contradictory evidence, and retrospectively altered figures produces a Plan that is neither clear nor transparent, and therefore fails this fundamental national policy test. Conclusion The use of outdated housing need figures, the presence of uncorrected errors in key evidence documents, the absence of any overriding requirement for Exmo_20, and the failure to apply the Mitigation Hierarchy all render the allocation unsound and not legally compliant. Exmo_20 must therefore be removed from the Local Plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound as it conflicts with NPPF (December 2023) paragraph 109, and is contrary to Local Plan Policy TR01 and paragraph 11.6. 1. The allocation would create an unsustainable pattern of movement The proposed main vehicular access for Exmo_20 is located 2.3 miles by road from the centre of Budleigh Salterton and 4.0 miles by road from the centre of Exmouth. This distance, combined with the isolated siting of the access point, would inevitably result in high levels of car dependency, contrary to the requirement in NPPF 109 to promote and prioritise sustainable transport modes. 2. The allocation conflicts with the settlement hierarchy and places disproportionate pressure on Budleigh Salterton The site's proximity to Budleigh Salterton means that the town—despite its designation lower in the settlement hierarchy—would experience a disproportionate increase in traffic and demand for services. The Local Planning Authority has failed to consider the impact on Budleigh Salterton when assessing Exmo_20, despite the settlement being the closest service centre for many residents of the proposed development. This omission results in a flawed assessment and places the allocation in conflict with Policy TR01 and Local Plan paragraph 11.6, both of which require development to be located where sustainable travel and appropriate service access can genuinely be achieved. 3. Topography significantly limits viable walking and cycling options Although policy maps imply walkable and cyclable connections, the actual topography of Exmo_20 and the surrounding area—including gradients and indirect route alignments—makes active travel far less feasible in practice. This undermines any assumption that walking or cycling would form realistic alternatives to car use for accessing shops, healthcare, schools, or community services in either Budleigh Salterton or Exmouth. As a result, the

allocation directly contradicts the policy expectation that development should support a shift to sustainable transport modes. Conclusion The distance to key service centres, the inevitable rise in car dependency, the unassessed impact on Budleigh Salterton, and the practical limitations on walking and cycling all demonstrate that Exmo_20 fails to comply with NPPF paragraph 109 and relevant Local Plan transport policies.

Accordingly, the allocation is unsound and should be removed from the Local Plan.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound, as it is in direct conflict with paragraph 32 of the NPPF (December 2023). 1. The Site Selection Methodology was retrospectively altered The Local Planning Authority has attempted to retrospectively amend the Site Selection Methodology (SSM) in order to justify the allocation of Exmo_20. The SSM dated May 2022 is the version that was actually applied to the Regulation 18 process. However, after 11 December 2024—the date on which the Draft Local Plan was approved for Regulation 19 publication—the SSM was altered, and a new December 2024 version was inserted into the Regulation 19 evidence library. This amended version was not the methodology used to select sites. Presenting it as though it were used constitutes a misrepresentation of process, raises serious concerns about transparency, and is behaviour that appears inconsistent with the Nolan Principles of openness and integrity. 2. The original SSM would not have allowed Exmo_20 to be selected The May 2022 SSM—the only legitimate methodology for the Regulation 18 stage—contains wording that clearly prevents Exmo_20 from progressing: Stage 2: Site Sifting “Only sites which meet criteria a), b) and c) are carried forward to Stage 3.” Criterion a: “Site is assessed as ‘suitable, available and achievable’ in the HELAA.” Subtext point 6: “It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA, but, if not, such sites should be sifted out at Stage 2.” Exmo_20 lies within 400m of the Pebblebed Heaths SAC/SPA/SSSI. Under the original methodology, the site should have been automatically sifted out and therefore could not legitimately proceed to the next stage of assessment. 3. Failure to follow an established, transparent, and consistent methodology breaches NPPF paragraph 32 NPPF paragraph 32 requires plan-making to follow: transparent, evidence-based, and

proportionate, consistent, assessment processes. Retrospectively amending the methodology after site selection, and then presenting that altered methodology as if it had been used, constitutes a clear procedural failure and undermines the validity of the allocation. This failure also prevents meaningful evaluation of reasonable alternatives, making the plan unsound. Conclusion Exmo_20's allocation is based on a retrospectively altered and misapplied Site Selection Methodology, contrary to the requirements of NPPF paragraph 32 for transparent, consistent and properly evidenced plan-making. The legitimate methodology used at Regulation 18 explicitly ruled out sites within 400 metres of the Pebblebed Heaths SAC—meaning Exmo_20 should never have been taken forward. For these reasons, Exmo_20 is unsound and should not be allocated or reverted back to 20b as previously proposed

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert back to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Chair and Chief officer have been clearly dismissive of strong public opinion in constant unprofessional manner

Full name: Stephen Winn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound as it conflicts with NPPF (December 2023) paragraphs 92 and 109, as well as Local Plan policies TR01 and TR03, and with paragraphs 3.6 and 11.2 of the Local Plan. 1. The allocation would generate unsustainable travel patterns Exmo_20 is located in a position that would substantially increase car dependence, directly contrary to NPPF paragraph 92 (supporting healthy, inclusive, safe places) and paragraph 109 (prioritising sustainable transport). The proposed primary access onto the B3179 requires residents to take a convoluted and extended route to reach essential services and facilities. This layout encourages car use rather than discouraging it. 2. Walking and cycling access to services has not been demonstrated No evidence has been provided to show that residents could realistically access regular, day-to-day services on foot or by bicycle. This is a fundamental deficiency, particularly because the Local Plan's revised Policy TR01 now treats walking and cycling as a mandatory first-choice mode of travel, rather than an optional or desirable one. The isolated siting of Exmo_20 and its distance from key services means the allocation cannot comply with the Local Plan's sustainable transport policies. 3. The proposed access via the B3179 embeds car dependency The B3179 access point places residents at a significant distance from both Budleigh Salterton and Exmouth. As housing is proposed within the southern extent of the site, access via the B3179 would require: at least 1 km of internal vehicle travel before reaching the site exit, followed by further driving to reach any meaningful service provision. This design is inherently car-centric and incapable of supporting modal shift to sustainable transport, in direct conflict with NPPF paragraphs 92 and 109 as well as policies TR01, TR03 and Local Plan paragraph 11.2. Conclusion The allocation of Exmo_20 would lock in unsustainable

travel patterns, increase private car usage, and undermine both national and local sustainable transport objectives. It fails to provide good access to services by walking or cycling, relies on an inefficient and remote access point, and is incompatible with policies requiring development to prioritise sustainable modes of travel. Accordingly, the allocation is unsound and should be removed from the Local Plan or revert back to the previously proposed 20b.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert back to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Chair of SPC and chief officer have continued to dismiss public opinion and undertake a very unprofessional and biased consultation throughout

Full name: Stephen Winn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound as it conflicts with NPPF (December 2023) paragraph 170(b) and with Local Plan paragraph 3.6 and policy AR01(b). 1. Failure to follow the sequential, risk-based approach required for flood risk The Strategic Flood Risk Assessment (SFRA) Level 1 provides inadequate consideration of Withycombe Brook, referencing it only as a footnote in Table 5-3. This is wholly insufficient given its known and significant flood risk history. Exmouth has experienced multiple fluvial flooding events, notably in 1960, 1983 and 2012, and is identified as having numerous and significant flood-risk pathways. Withycombe Brook already presents substantial flood risk under current conditions, without factoring in intensifying future pressures from climate change. 2. Exmo_20 would increase downstream flood risk to Exmouth's most populous wards Exmo_20 is a greenfield site elevated above the town, with runoff and tributaries feeding directly into Withycombe Brook. Development here—particularly at the scale proposed—would: increase surface water runoff, accelerate flows into an already sensitive watercourse, and exacerbate downstream flood risk to some of the most densely populated areas in East Devon. This risk requires robust and early assessment, yet no evidence has been provided showing that the development can avoid worsening flood conditions downstream. 3. The Local Planning Authority has not applied the required flood-risk tests NPPF paragraph 170(b) requires a sequential, risk-based approach to directing development away from areas at highest flood risk and away from areas where development would increase flood risk elsewhere. Policy AR01(b) of the Local Plan requires the same. The allocation of Exmo_20 demonstrates that the LPA has not: applied the sequential test to avoid locations that increase risk to people and property, assessed downstream cumulative impacts adequately, or

provided evidence that development can safely be accommodated without increasing flood risk to Exmouth's vulnerable wards. Failure to meet these requirements renders the allocation unsound. Conclusion Given the site's hydrological relationship with Withycombe Brook, the lack of a robust sequential assessment, the known history of flooding, and the risk of worsening flood impacts on Exmouth's most populated communities, the allocation of Exmo_20 is in clear conflict with national policy and the Local Plan. The allocation is therefore unsound and should be reverted to 20b as previously proposed I reserve the right to comment further should a supporting HRA and mitigation strategy be provided, and request to be notified when such documents become available.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound as it conflicts with NPPF (December 2023) paragraphs 16(c), 25, 180(d), 181, 185(a), 186(a), 186(c), 188 and 191. It is also contrary to Local Plan policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 and 13.24. 1. Allocation conflicts with strategic nature recovery objectives and designated site protection The Exmo_20 site forms part of Strategic Nature Area 368, a landscape specifically identified as: a critical ecological buffer between Exmouth and the internationally and nationally designated Pebblebed Heaths SAC/SPA/SSSI, foraging habitat for European Nightjar (a qualifying feature of the SPA and a Section 41 species of Principal Importance), and a wildlife corridor linking the Pebblebed Heaths to coastal habitats. Development within this area would directly undermine the conservation objectives of the SPA and sever key ecological linkages essential for species movement and habitat resilience. Devon County Council is also in the final stages of designating this land as a Local Nature Recovery Area within the forthcoming Local Nature Recovery Strategy (to be published March 2026). This strategy—required under the Environment Act 2021—aims to enhance existing wildlife sites, reconnect fragmented habitats, and support nature recovery. Allocating Exmo_20 for development is fundamentally incompatible with these statutory aims. The site contains numerous veteran trees, ancient woodland features, and traditional hedgerows, all of which are at serious risk of fragmentation or loss if development proceeds. 2. Expert ecological bodies strongly oppose allocation due to significant harm In its Regulation 19 response, Devon Wildlife Trust states: “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area... identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key

part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development." DWT further warns: "It is beyond the scope of this letter to detail the range and diversity of sensitive habitats and species supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development... We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan." This is an unequivocal expert assessment that the site cannot be developed without serious harm—including harm to the integrity of the SAC. Under the Habitats Regulations, this level of risk is unacceptable and directly engages NPPF paragraphs 180(d), 185(a), 186(a), 186(c) and 188. 3. Failure to follow the Mitigation Hierarchy and strategic planning principles Allocating a site located within a key nature recovery area, functioning as irreplaceable buffer land, and supporting habitats for SPA qualifying species fundamentally conflicts with: NPPF paragraph 25 (strategic, plan-led approach to environmental protection), NPPF paragraph 16(c) (plans must be shaped by early, proportionate environmental assessment), and NPPF paragraph 191 (priority must be given to enhancing the natural environment). Furthermore, Local Plan policies PB01–PB04 and paragraphs 13.10–13.24 explicitly recognise the need to strengthen ecological networks and protect sensitive habitats. The Exmo_20 allocation contradicts these policy requirements. No credible mitigation has been presented that could offset the scale of ecological harm. In an SNA forming part of Devon's Nature Recovery Strategy, avoidance—not mitigation—is the only lawful and policy-compliant option. Conclusion Exmo_20 lies wholly within a strategically important ecological landscape, provides essential supporting habitat for SPA-qualifying species, and forms a critical buffer to internationally protected sites. Expert ecological bodies, including Devon Wildlife Trust, state clearly that the site cannot be developed without significant adverse effects on the integrity of the SAC. The allocation therefore: breaches multiple NPPF requirements, conflicts with key Local Plan policies, undermines statutory nature recovery duties, and fails the tests of soundness and legal compliance. Accordingly, Exmo_20 should be removed from the Local Plan. I reserve the right to comment further should a supporting HRA and a robust mitigation strategy be provided, and request to be notified when such documentation becomes available.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Exmo_20 should be removed from the plan

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound as it conflicts with paragraph 206 of the NPPF (December 2023), and it also conflicts with Policies HE02 and OL01(d) of the Local Plan.

1. Significant harm to the setting of a Grade II* listed heritage asset A development of the scale proposed for Exmo_20, wrapping around St John in the Wilderness Church (Grade II*), would cause substantial and irreversible harm to its historic setting. The church and its churchyard sit within a Medieval Saxon settlement landscape, characterised by dark skies, tranquillity, and a strong sense of remoteness—a setting that is intrinsic to the significance of the asset. This “wilderness” character cannot be preserved by leaving a token buffer; the surrounding development would fundamentally—and permanently—alter the experience, setting, and cultural context of the church.

2. Expert heritage advice confirms severe and unresolved impacts Historic England, in their Regulation 19 consultation response, state: “Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b).” They further raise serious concerns regarding the proposed northern access route: “We are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm.” Historic England explicitly recommend that alternative access from the south should be explored, and that: “Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be

amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified.” This is a clear indication from the statutory heritage adviser that the allocation, as currently proposed, fails to protect an asset of the highest significance, in direct conflict with NPPF 206. Conclusion The allocation of Exmo_20 would cause substantial, unjustified, and irreversible harm to the setting of St John in the Wilderness Church and its historic landscape. This places the allocation in clear conflict with national policy, local heritage protections, and the legal requirement to give great weight to the conservation of designated heritage assets. Accordingly, Exmo_20 is unsound and should not be allocated. I reserve the right to comment further should a supporting HRA and mitigation strategy be produced, and request to be notified when these documents become available.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It conflicts with NPPF (December 2023) paragraphs 16(c), 92, 114(b), 114(d), 180(e) and 181, as well as Local Plan paragraph 3.6, policies TR01, OL09 and PB04, and paragraph 11.2. 1. The site has no viable or deliverable access solution The proposed primary access onto the B3179 is neither viable nor evidenced. Deliverability depends on major, uncertain and uncoded highway works, none of which have been confirmed as feasible by Devon County Council. Without clear, coded, and technically supported access proposals, the allocation cannot meet the NPPF requirements for soundness or infrastructure deliverability. Cumulative and in-combination impacts on the B3179 must also be assessed, including increased traffic congestion and air pollution along the boundary of the Pebblebed Heaths SAC/SPA, which heightens the ecological risks and conflicts directly with NPPF paragraphs 180(e) and 181. 2. HRA evidence confirms risk of adverse effects on site integrity The Habitats Regulations Assessment (18.11.25) explicitly states that there is: “currently not sufficient certainty to rule out adverse effects on integrity in relation to... air quality (East Devon Pebblebed Heaths SAC/SPA)”. This uncertainty arises because the primary access directs traffic along the edge of the protected site. Allocation of a site whose access alone risks integrity of a European designated site is incompatible with Habitats Regulations requirements and NPPF 181. 3. Allocation contradicts the precautionary approach and Mitigation Hierarchy The plan must demonstrate the precautionary approach, yet Exmo_20’s allocation does the opposite by assuming mitigation that has not been evidenced. The Mitigation Strategy itself states: “Mitigation cannot be assumed without evidence (People over Wind; Sweetman).” Under the Mitigation Hierarchy, avoidance must be prioritised over

mitigation—now a statutory duty under the Environment Act 2021. Allocating a site that inherently generates significant unmitigated air-quality and ecological impacts is incompatible with these legal requirements. There is no reasonable scientific certainty supporting the conclusion that the impacts can be mitigated. Without such certainty, the site's inclusion is unlawful under the Habitats Regulations. Conclusion Given the absence of a viable access solution, the confirmed risk of adverse effects on site integrity, the failure to apply the precautionary approach, and the contradiction of both national and local planning policy, Exmo_20 cannot be considered sound or legally compliant. I reserve the right to comment further should a supporting HRA and detailed mitigation strategy be produced. I request to be notified when these documents become available.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The unprofessional approach throughout the process by the chair of the SPC and chief officer have been completely dismissive of the public opinion against this particular allocation, at times being arrogant and misleading

Full name: Stephen Winn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is unsound and not legally compliant. It is in direct conflict with paragraphs 16(c), 32, 181, 185, 186(b), and 188 of the National Planning Policy Framework (December 2023). It also contradicts paragraph 3.6 and policies PB01, PB02, PB03, PB04, and OL02 of the Local Plan. 1. High risk of recreational pressure and inability to deliver effective SANG Given Exmo_20's immediate adjacency to the Pebblebed Heaths SAC/SPA/SSSI, it is highly unlikely that Suitable Alternative Natural Greenspace (SANG) of adequate scale, ecological quality, and geographic convenience could be provided to reliably divert new residents away from the designated heathlands. The proximity of the development makes substantial recreational activity—dog walking, walking, and cycling on the protected site—almost inevitable, causing disturbance to sensitive habitats and species. The ecological risk is significant. For ground-nesting species such as European Nightjar, research confirms that “just one event leading to predation is enough to end that nesting attempt” (Langston et al., 2007, Ibis 149: 27–36). The lack of detailed mitigation proposals, coupled with the sensitivity of the qualifying features of the SPA, means that the precautionary approach required of the Competent Authority must be applied. 2. Expert bodies identify serious and unresolved ecological risks The RSPB, in its response to the first Regulation 19 consultation, clearly stated that: “Mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John's (Exmo_20)) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development.” The RSPB further emphasises: risk of direct and indirect loss of potential foraging habitat, risk of increased cat predation on SPA qualifying species, risk of

damaging levels of recreational activity, especially dogs off leads, insufficient confidence that SANG or on-site open space could prevent increased recreational use of the designated heathlands. These concerns represent significant, credible, and unresolved risks that cannot be mitigated by the site allocation as drafted. 3. Ineffective spatial controls and absence of enforceable mitigation While policy SD01 refers to a 400-metre exclusion zone for built development: “new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths” this control cannot prevent residents or domestic cats from accessing the designated site. In fact, the risk increases the closer dwellings are built to the heathlands. As the RSPB notes, there is no mechanism to stop cats roaming or residents using the protected area for daily recreation. The site’s location makes this unavoidable. Without a credible, detailed, and deliverable mitigation strategy—one which has not yet been provided—Exmo_20 cannot be considered sound or legally compliant with the Habitats Regulations. Conclusion For these reasons, the allocation of Exmo_20: breaches key NPPF requirements (paras 16(c), 32, 181, 185, 186(b), and 188), conflicts with Local Plan paragraph 3.6 and policies PB01, PB02, PB03, PB04, and OL02, fails the precautionary principle, cannot demonstrate no adverse effect on site integrity, and is therefore unsound and not legally compliant. I reserve the right to comment further should a legally compliant HRA and a robust, evidence-based mitigation strategy be produced for the Local Plan. I request to be notified as soon as such documents become available.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is fundamentally unsound and not legally compliant. It directly conflicts with the National Planning Policy Framework (December 2023), specifically paragraphs 16(c), 32, 73(b) (including footnotes 38 and 7), 180(d), 180(e), 181, 185(a), 186(a), 186(b), 188, and 191(c). It also contradicts paragraph 3.6 and policies PB01, PB02, PB03, PB04, and OL02 of the Local Plan. 1. Minimum 400m exclusion zone is insufficient and not precautionary A minimum 400m zone adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 allocation. This buffer is proposed to mitigate cat predation and other urbanisation impacts. However, evidence shows that cats in rural and semi-rural settings can roam over 2km (Hall et al., 2016; Metsers, Seddon & van Heezik, 2010) [HRA 4.10]. With the ground-nesting Nightjar, a qualifying feature of the SPA, highly vulnerable to predation—where “just one event leading to predation is enough to end that nesting attempt” (Langston et al., 2007)—a 400m buffer cannot be considered precautionary. The pragmatic 400m distance (Underhill-Day, 2005) is not adequate in this specific context, given both the ecological sensitivity of the site and the high mobility of domestic cats. A significantly larger buffer is required to safeguard qualifying features. 2. The allocation is dependent on a non-existent mitigation strategy and HRA Exmo_20’s inclusion is predicated on a mitigation strategy and HRA that do not yet exist in a form capable of supporting the Plan. The current documentation cannot demonstrate that adverse effects on site integrity can be ruled out. In the absence of robust evidence, a precautionary approach is mandatory. At minimum, this would necessitate removing the 400m adjacent zone—though, as set out above, an even greater buffer is likely required. The site also provides functionally linked foraging habitat for European Nightjar (a SPA qualifying species and a Section 41

species of Principal Importance). Moreover, a substantially increased buffer will be required to mitigate recreational impacts (e.g., dogs off leads, cycling, increased walking pressure), which have not been assessed at site level. Again, a precautionary approach at the strategic level is the only legally defensible route. This position is shared by multiple ecological bodies, including DWT and RSPB. The East Devon National Landscape Partnership, in its first Regulation 19 response, stated: “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage... It also further fragments the surrounding habitat... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or... we support significant reassessment of the scale and boundary... including reduced housing numbers and concentration of development closer to the existing town settlement.” This is a clear and authoritative statement that the allocation, as drafted, is ecologically indefensible. 3. Site selection is unjustified given better alternatives and housing oversupply The Exmo_20 allocation is difficult to justify. Multiple less constrained and less mitigation-dependent sites were available for selection. Additionally, the Plan contains an over-supply of allocations due to the LPA’s failure to apply the latest mandatory ONS data. The choice of Exmo_20 therefore cannot be rationally defended within the Mitigation Hierarchy (NPPF para 32) or in terms of sound plan-making. 4. Natural England also identifies fundamental flaws Natural England’s Regulation 19 response reinforces these concerns: “The policy is not yet clear where employment uses would be located... the policy should require a natural buffer in the northeast... there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106... This would appear to be clear, sound planning which more effectively communicates the planning restrictions around the East Devon Heaths SAC/SPA.” Natural England is explicitly signalling that the current policy is inadequate, unclear, and inconsistent with sound ecological planning. This is a critical failing. Conclusion For the reasons set out above, Exmo_20 is unsound, not legally compliant, in breach of multiple provisions of the NPPF and Local Plan, contrary to the Mitigation Hierarchy, and dependent on unproven and currently unavailable mitigation measures. Its allocation cannot be justified in any lawful or precautionary plan-making process. I reserve the right to comment further if, and when, a sufficiently detailed and legally compliant HRA and mitigation strategy are produced. Please notify me when such evidence becomes available

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The unprofessional actions and tone of the chair of SPC and chief officer have been completely negligent to the importance of listening to the publics important wishes

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of site Exmo_20 is fundamentally unsound and not legally compliant. It is in clear conflict with numerous provisions of the National Planning Policy Framework (December 2023), specifically paragraphs 16(c), 32, 73(b) (including footnotes 38 and 7), 180(d), 180(e), 181, 185(a), 186(b), 188 and 191(c). It also contradicts paragraph 3.6 and policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Given its immediate proximity to the Pebblebed Heaths SAC/SPA/SSSI, the allocation is entirely dependent on extensive habitats and species mitigation. Critically, this mitigation has not been demonstrated to be either achievable or viable. The mitigation strategy itself states that “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA”, while the Plan’s HRA acknowledges that “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” The site was selected on 03.09.24, with no opportunity for reconsideration, and the Regulation 19 Draft Local Plan was approved on 11.12.24 on the assumption that a mitigation strategy would emerge. This was done prior to undertaking an Appropriate Assessment in the 30.01.25 HRA, in direct contradiction to the CJEU People over Wind ruling and the legally required precautionary approach—particularly relevant in light of the CJEU Dutch N judgment. Furthermore, under NPPF paragraph 32, site allocations subject to known and significant mitigation requirements must be clearly justified against the Mitigation Hierarchy. The LPA has not carried out this assessment. The selection of Exmo_20 is especially difficult to justify when several alternative, viable, and far less mitigation-dependent sites were available, and when the Plan already contains an over-supply of housing allocations due to the LPA’s failure to use the latest mandatory ONS data. The

Devon Wildlife Trust, in its first Regulation 19 response, highlighted that the site “currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries.” The LPA’s actions reflect a cavalier approach to its responsibilities as the Competent Authority under the Conservation of Habitats and Species Regulations and reveal systemic failings in meeting its statutory duties. I reserve the right to submit further comments when—and if—a legally compliant HRA and a robust, evidence-based mitigation strategy are made available. I request to be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: As there are many points being overruled by the chair and chief officer which need clear understanding and competent review

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. South West Water struggles with sewage disposal and this proposal will add considerably to run off given the way in which areas of housing change the natural drainage. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runs directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would radically alter the character of the East Devon landscape, changing an ecologically significant area into an increasingly urban environment. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of

sensitive habitats and species which are supported by NNRS/SAC/ SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I fully endorse their recommendation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

llocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6, 11.2 & 11.6 of the Local Plan. Exmo_20's limited access would significantly increase the need for car travel from the main access point proposed (B3179) to access facilities and services, being 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road, therefore an unsustainable location for development. This allocation would overwhelm Budleigh and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and local area's topography makes potential cycling and walking options less viable, which is not apparent on the policy maps

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This development is far too close to the Pebblebed Heaths and the boundary of the East Devon National Landscape. As a result wildlife and fragile habitats will be affected by domesticated animals - cats and dogs off lead, as well as the continued impact of more people using the area for immediate access to a range of outdoor relaxation, picnics and parking. Protection for many named species of birds i.e. ground nesting Nightjars will be decimated.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan Significantly reduce the density and size of the site Move the settlement boundary much further away from the Pebblebed Heaths at least 500 metres or more. Do not access this site from the B3179 as it actually forms part of the boundary of the East Devon National Landscape. This should be recognised and respected for what it is.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Full name: G. Woodcraft

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 site is part of the Strategic Nature Area 368 identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SSSI and is a wildlife corridor between the PB Heaths and the coast. This is deemed a recovery area and contains many vital ancient woodlands, trees and hedgerows which are now at risk of becoming damaged and fragmented habitats. Air pollution from the road, increased pollution and litter from residents and dogs and their owners will have a major impact on wildlife.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan and significantly move the settlement boundary away from the Pebblebed Heaths.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation conflicts with para 32 of the NPPF Dec 23 and as a consequence of retrospectively changing the SSM - site selection methodology (in direct conflict with the Nolan principles) to justify even selecting this site. The original version used in May 2022 for the reg 18 stage does not allow Exmo_20 to be selected.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Exmo20_should be removed from the plan. The B3179 is already an overly used, over congested, narrow B road providing an increasing amount of traffic, access to Budleigh Salterton and Exmouth. Adding further vehicles 2000+ will make it significantly worse, to the point that it will cause a greater number of accidents (a foreseeable offence) and ruin access between the two towns. It will be a nightmare!

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town

settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage

of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this

building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses

in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways,

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, - Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town

settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage

of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this

building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk

pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. 9.. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been

taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". POLICIES REFERRED TO IN SUGGESTED OBJECTIONS National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan- makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on

locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, and which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscapes and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset from development within its setting should require clear justification. Assets of the highest significance, notably....grade I and II * listed buildings should be wholly exceptional.2nd Regulation 19 Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where

avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017 Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. PolicyTR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be Made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5 miles). Factors such as topography also influence walking choices. Paragraph 13.10 aims to protect irreplaceable habitats and important features. Paragraph 13.11 states that some habitats, including ancient woodlands and veteran trees are irreplaceable due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 the town and local roads cannot cope with it, if a smaller version is agreed do not enter through Southern Wood

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Nicola Ward

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

THIS IS A RURAL AREA! IT IS WHY IT IS SPECIAL. WE NEED TO PROTECT SOME RURAL AREAS! WE DO NOT HAVE THE INFRASTRUCTURE TO SUPPORT THIS HUGE PROPOSED PROJECT - the roads, the sewerage/water system etc. It is a huge threat to the people already living in the area, the important wildlife and nature so important to this area - DO NOT JUST CONCRETE IT OVER! Here are specific objections: Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in

NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further

fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths". The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that "the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that "just one event leading to predation is enough to end that nesting attempt" [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that "In the RSPB's view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John's (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development". "The RSPB is very concerned that the St John's allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change

of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and

surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local

Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. Objection 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It

is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

Objection 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

Objection 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals".

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan - Devon needs its green spaces. The infrastructure is NOT THERE to support this proposal.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Nicola Ward

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration

of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of

recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heathlands" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Nicola Ward

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of

recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heathlands" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Nicola Ward

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the

SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via Southern Wood. -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Full name: Jennifer Rewcastle

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Full name: Jennifer Rewcastle

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Revert to 20b as previously proposed

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change

of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heath SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heath SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, - Move the settlement boundary away from the Pebblebed Heaths

Full name: Kirsty Rorke

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

llocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Second Regulation 19 Consultation – East Devon Local Plan – Responses by Chapter

- Do not access the site via B3179, -Move the settlement boundary away -Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, from the Pebblebed Heaths
- Revert to 20b as previously proposed

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this

proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, - Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, - Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

llocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

Full name: Joseph Rorke

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Full name: Joseph Rorke

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

Full name: Andrea Rorke

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Second Regulation 19 Consultation – East Devon Local Plan – Responses by Chapter

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Revert to 20b as previously proposed

Full name: Andrea Rorke

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Revert to 20b as previously proposed

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Full name: Andrea Rorke

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Full name: Andrea Rorke

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via Southern Wood. -Revert to 20b as previously proposed

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Andrea Rorke

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Revert to 20b as previously proposed

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands rising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Second Regulation 19 Consultation – East Devon Local Plan – Responses by Chapter

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Full name: Andrew Skudder

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via Southern Wood. -Revert to 20b as previously proposed

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated

heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heath SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heath SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan,

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This policy relies on the soundness of “the spatial strategy and the site allocations set out in this plan”. The amendment in SP07 with consideration for European wildlife sites, needs to be a key consideration within SP01 and therefore by association SP02, for these policies to be considered sound and legally compliant. This policy is unjustified until such time the correct numbers are used based on the latest 2024 ONS data. The numbers in Paragraph 3.11 are unjustified. The plan currently has a significant and unjustified over supply of housing. Furthermore a large headroom of housing allocations is not required as the affordability trend is due to continue to improve due to the latest years being significantly better than the 5 year old figures being removed from the calculation, which were prior to house prices stabilising and recent average wage growth. Secondly many sites in the site selection process which were ‘preferred’ by the planning policy team, were rejected in the draft Plan for allocation, but are now being granted planning permission outside of the plan. Due to the unique circumstances of these allocations, with their significant size, they should be added to the windfall (or permitted not yet built) figures, rather than absorbed with them, with the number within the Plan therefore reduced accordingly. Of significant note, Paragraph 3.8 now has a clause which provides an update mechanism within the plan to cover any future shortfall, so a large headroom is no longer unjustified. Paragraph 3.7 references the fabricated Site Selection Methodology created in December 2024 after the site selection process was completed. The correct version is the May 2022 version, which is not available in the evidence library.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179,

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Revert to 20b as previously proposed

Full name: Maureen White

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

llocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest

to the designated heathlands (particularly Land at St John's (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development". "The RSPB is very concerned that the St John's allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Full name: Maureen White

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

llocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Full name: Sue Williams

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: It seems not viable to upgrade the existing B3179 because: 1. Is it financially viable 2. Would impact on existing houses and other third party land 3. Increased traffic from Exmouth & Budleigh Salterton 4. If not adequately upgraded the frequency of accidents on the would significantly increase. Clear evidence is required to demonstrate viability before being allocated in the Local Plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To understand how the local highway if feasibly able to be upgraded as there is no evidence to date.

Organisation (where relevant): CPRE Devon

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Devon CPRE are aware of significant community concern regarding Policy SD01 – Land at St John’s (Exmo_20), including conflicts with national and local plan policies, environmental and biodiversity impacts, flood risk, heritage and landscape impacts, and procedural issues. In addition, we wish to raise the following objection: Land at St John’s (Exmo_20) constitutes major development in landscape terms. Land at St John’s (Exmo_20) constitutes major development in landscape impact terms. The proposal is a large-scale urban extension, including employment land, community facilities, and a new vehicular access from the B3179. The enhanced duty on Local Planning Authorities under the Levelling Up and Regeneration Act 2023, together with national planning policy in the National Planning Policy Framework (NPPF) (paragraphs 189–190), makes clear that whether development constitutes “major development” and whether it has the potential to impact a National Landscape (NL) are matters of fact and degree. Such assessments should be made having regard to the scale, character, and likely impacts of the proposal, consistent with the NPPF’s approach to conserving and enhancing valued landscapes. A development of this magnitude:

- Introduces substantial built form, infrastructure, movement, lighting, and activity.
- Represents a fundamental change from rural/undeveloped land to urban use.
- Has effects that extend well beyond the red line boundary. On this basis alone, the allocation meets the threshold of major development in landscape terms. Warranting careful assessment of its effects on the NL and its setting. Land at St John’s (Exmo_20) -

disconnects between evidence and policy response to NL. · Evidence base - Impacts on the setting of the NL are underestimated The ‘Topic Paper SAL – 049 (Rev) Major Development in National Landscapes Second Regulation 19 version’ (October 2025) assessment places disproportionate reliance on the absence of built housing immediately adjacent to the NL boundary. The higher ground adjacent to the NL: · Contributes to its landscape character, openness and visual containment. · Forms part of the wider landscape context that supports the purposes of designation. Development within this setting can: · Be visible from within the NL. · Alter key views, skylines and perceptual qualities such as tranquillity and remoteness. · Introduce an urbanising influence that erodes the transition between designated and non-designated land. These indirect but significant effects are not adequately assessed. · Evidence base - Indicative masterplan provides insufficient certainty ‘Topic Paper SAL – 049 (Rev) Major Development in National Landscapes Second Regulation 19 version’ (October 2025) relies heavily on an indicative masterplan showing no built development close to the NL. However: · Indicative masterplans carry limited weight and can change. · Infrastructure such as access roads, drainage, lighting, signage, earthworks and landscaping can themselves have significant landscape effects. · The allocation policy insufficiently responds to NL Strategic Policy SD01 Land at St John’s (Exmo_20) explicitly allocates: · Around 700 dwellings. · Employment land and community facilities. · A new primary vehicular access from the B3179. This establishes, in principle, a comprehensive and strategic development whose impacts on the setting of the NL are inevitable, regardless of later design detail. While the policy requires built development to be concentrated in the southern part of the site, the northern and north-eastern areas remain integral to the scheme, accommodating: · The primary access road. · SANGs and open space. · Buffers, landscaping, parking controls and habitat creation. These elements are not landscape-neutral and will introduce: · Engineered landform. · Movement, noise and visual activity. · An urbanising influence along the edge of the NL. The extensive safeguards required by the allocation including: · Avoidance of street lighting. · Structural planting and screening. · Retention of buffers. · Protection of tranquillity and visual amenity. demonstrate that the site lies within a highly sensitive landscape context. The need for such controls reinforces the potential for conflict with the purposes of the NL. The 400-metre exclusion zone from the Pebblebed Heaths is primarily an ecological safeguard. It does not prevent landscape or visual harm, nor does it address impacts on character, tranquillity or experiential qualities of the NL. While the allocation requires development to come forward based on an agreed masterplan, this does not provide sufficient certainty to conclude that there will be no significant adverse impact on the purposes of the NL The masterplan requirement is concerned with: · Phasing and coordination across land parcels. · Infrastructure delivery and cost apportionment. · Design responses to heritage, mineral, biodiversity and access constraints. In summary, the Policy embeds mitigation measures that insufficiently acknowledge landscape sensitivity and does not guarantee

protection of the setting, tranquillity or purposes of the NL. Land at St John's (Exmo_20) disconnects between evidence and policy response to the historic environment. · Evidence base – failure to identify combined impacts on heritage setting and setting of the NL The 'Site Selection report Addendum –Historic Environment Site Assessment Exmouth' (November 2025) assessment repeatedly describes the Grade II* Church of St John in the Wilderness's setting using language that directly overlaps with the purposes and special qualities of the NL including: · tranquillity, · remoteness, · openness, · undeveloped countryside, · dark skies, · rising landform and wooded horizons. Crucially: · The north and north-east of the church, identified as sensitive to heritage harm are also the areas that: o lie closest to the NL; and o contribute to its setting, However, the 'Site Selection report Addendum –Historic Environment Site Assessment Exmouth' (November 2025) assessment does not sufficiently recognise that the church's setting is functionally and perceptually linked to the setting of the NL. The absence of explicit reference to the NL in the heritage conclusions underplays the combined sensitivity of this location and weakens the evidence and policy response. · Policy requirements provide insufficient certainty Strategic Policy SD01 Land at St John's (Exmo_20) relies heavily on future master-planning to address impacts on the setting of the Grade II* Church of St John in the Wilderness. However, the 'Site Selection report Addendum –Historic Environment Site Assessment Exmouth' (November 2025) identifies location specific sensitivity, including land where development would harm the church's setting through loss of openness and tranquillity. Strategic Policy SD01 Land at St John's (Exmo_20) requires an agreed masterplan, but: · It does not define fixed no-development areas around the church. · It does not translate the sensitivity mapping into policy constraints. · It does not link housing numbers to heritage or landscape capacity. · It does not require an integrated heritage landscape assessment to inform the masterplan. In summary, the masterplan is in danger of being a substitute for policy clarity, rather than a mechanism for implementing it. Summary of Objection · Exmo_20 is a major development in landscape terms. · Landscape Impacts: Policy and evidence understate potential impacts on NL character, tranquillity, and visual quality. · Heritage Impacts: Policy fails to adequately protect the Grade II* church's setting or its interaction with the NL. Conclusion Policy SD01 fails to provide adequate protection to the landscape and heritage setting and does not demonstrate compliance with national planning policy regarding major development in landscape terms and the setting of the NL.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised

wording for the relevant policy or paragraph. Please be as precise as possible.:

Major Development in National Landscapes Second Regulation 19 version' (October 2025) relies heavily on an indicative masterplan showing no built development close to the NL. However:

- Indicative masterplans carry limited weight and can change.
- Infrastructure such as access roads, drainage, lighting, signage, earthworks and landscaping can themselves have significant landscape effects.
- The allocation policy insufficiently responds to NL Strategic Policy SD01 Land at St John's (Exmo_20) explicitly allocates:
- Around 700 dwellings.
- Employment land and community facilities.
- A new primary vehicular access from the B3179. This establishes, in principle, a comprehensive and strategic development whose impacts on the setting of the NL are inevitable, regardless of later design detail. While the policy requires built development to be concentrated in the southern part of the site, the northern and north-eastern areas remain integral to the scheme, accommodating:
- The primary access road.
- SANGs and open space.
- Buffers, landscaping, parking controls and habitat creation. These elements are not landscape-neutral and will introduce:
- Engineered landform.
- Movement, noise and visual activity.
- An urbanising influence along the edge of the NL. The extensive safeguards required by the allocation including:
- Avoidance of street lighting.
- Structural planting and screening.
- Retention of buffers.
- Protection of tranquillity and visual amenity. demonstrate that the site lies within a highly sensitive landscape context. The need for such controls reinforces the potential for conflict with the purposes of the NL. The 400-metre exclusion zone from the Pebblebed Heaths is primarily an ecological safeguard. It does not prevent landscape or visual harm, nor does it address impacts on character, tranquillity or experiential qualities of the NL. While the allocation requires development to come forward based on an agreed masterplan, this does not provide sufficient certainty to conclude that there will be no significant adverse impact on the purposes of the NL. The masterplan requirement is concerned with:
- Phasing and coordination across land parcels.
- Infrastructure delivery and cost apportionment.
- Design responses to heritage, mineral, biodiversity and access constraints. In summary, the Policy embeds mitigation measures that insufficiently acknowledge landscape sensitivity and does not guarantee protection of the setting, tranquillity or purposes of the NL. Land at St John's (Exmo_20) disconnects between evidence and policy response to the historic environment.
- Evidence base – failure to identify combined impacts on heritage setting and setting of the NL. The 'Site Selection report Addendum –Historic Environment Site Assessment Exmouth' (November 2025) assessment repeatedly describes the Grade II* Church of St John in the Wilderness's setting using language that directly overlaps with the purposes and special qualities of the NL including:
- tranquillity,
- remoteness,
- openness,
- undeveloped countryside,
- dark skies,
- rising landform and wooded horizons.

Crucially:

- The north and north-east of the church, identified as sensitive to heritage harm are also the areas that:
- o lie closest to the NL; and
- o contribute to its setting,

However, the 'Site Selection report Addendum –Historic Environment Site Assessment Exmouth' (November 2025) assessment does not sufficiently recognise that the

church's setting is functionally and perceptually linked to the setting of the NL. The absence of explicit reference to the NL in the heritage conclusions underplays the combined sensitivity of this location and weakens the evidence and policy response. · Policy requirements provide insufficient certainty Strategic Policy SD01 Land at St John's (Exmo_20) relies heavily on future master-planning to address impacts on the setting of the Grade II* Church of St John in the Wilderness. However, the 'Site Selection report Addendum –Historic Environment Site Assessment Exmouth' (November 2025) identifies location specific sensitivity, including land where development would harm the church's setting through loss of openness and tranquillity. Strategic Policy SD01 Land at St John's (Exmo_20) requires an agreed masterplan, but: · It does not define fixed no-development areas around the church. · It does not translate the sensitivity mapping into policy constraints. · It does not link housing numbers to heritage or landscape capacity. · It does not require an integrated heritage landscape assessment to inform the masterplan. In summary, the masterplan is in danger of being a substitute for policy clarity, rather than a mechanism for implementing it. Summary of Objection · Exmo_20 is a major development in landscape terms. · Landscape Impacts: Policy and evidence understate potential impacts on NL character, tranquillity, and visual quality. · Heritage Impacts: Policy fails to adequately protect the Grade II* church's setting or its interaction with the NL. Conclusion Policy SD01 fails to provide adequate protection to the landscape and heritage setting and does not demonstrate compliance with national planning policy regarding major development in landscape terms and the setting of the NL.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This allocation remains of particular concern given its scale and proximity to the Pebblebed Heaths SPA/SAC and the RSPB nature reserve at Withycombe Raleigh. See comments to first Regulation 19 consultation. These comments are additional. While work is underway on an air quality mitigation strategy, considerable uncertainty remains over the availability of viable, effective measures, as expressed in the HRA. This allocation and others close to the heaths cannot proceed unless adverse impacts on the integrity of the heaths SPA/SAC can be ruled out. See comments on policy PB04. We note the additional information provided in this policy in relation to the heaths, however, there are ambiguities in the wording of the policy in relation to land use within the 400m. The policy also currently refers to ‘unacceptable’ impacts on the Pebblebed Heaths, which is unclear, rather than ‘adverse’ which follows specific tests and is in line with the legal requirements for the protection of SPAs/SACs. We note the policy includes a buffer for Nightjar foraging. However the buffer is not defined and does not remove the need for an assessment of use of the allocation (and others within foraging distance of the heaths) by Nightjars and how any adverse impacts on the Nightjar population will be avoided. The master plan and access strategy will require full assessment to ensure adverse impacts on the SPA/SAC can be ruled out. SANG need be sited to ensure people are not encouraged towards the designated sites for recreation and be of sufficient scale (NE advice is for double the standard provision) to function as an attractive alternative destination to the heaths. The requirement for SANG to be fenced to ensure onward access to the SPA/SAC is prevented is essential, however, the proposed access road would still bring residents very close to the heaths, potentially undermining the

effectiveness of the SANG. The RSPB's view remains that there is still a significant risk of impacts on the designated heathlands arising from the increased population in close proximity to the heaths.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Clarity that this development will not proceed unless all adverse impacts on the Heaths SAC/SPA can be avoided, including an effective air quality mitigation strategy. Wording should state that a project level HRA will be required to assess impacts on nightjar foraging areas, urban impacts and SANG location and design. The wording of 400m policy should replace the word 'unacceptable' with 'adverse'. We recommend that EDDC works with Natural England over the wording of the policy to ensure clarity in relation to the SPA/SAC and designated species.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

While we welcome the additional text within this policy requiring that any overarching planning application is accompanied by a detailed HIA, and that through masterplanning an ‘extensive area’ must be established around the church in which built development will not be allowed, we are nevertheless concerned that a swathe of land north and east of the church is included in the proposed site allocation.

We note and wish to query the additional information contained in the evidence base. While the policy itself states that ‘Built development will need to be concentrated in the southern parts of the site’, the map and housing figures in the Site Selection report Addendum – Historic Environment Site Assessment Exmouth (p38 onwards) suggest that the proposed development would comprise of isolated parcels on all sides (north, east and south) of the church, off-set by a buffer area. The impact assessment primarily relies on ‘visual connectivity’ and does not represent a robust assessment of the potential impact on the significance the church derives from its setting, critically failing to consider impact on tranquillity. This is a major concern. We note that the proposal for vehicle access from the B3179 to the north across this land is retained. Please refer to our detailed comments on this matter in our letter dated 30 March 2025. We are concerned that the new policy text relating to the road commences with the words ‘The only exception to this constraint will be provision of an access road...’. While this may be intended to relate to the Minerals Safeguarding Area referred to in preceding paragraphs this is not clear. This should be clarified. As an aside, it is also unclear whether housing

could be delivered immediately adjacent to a Minerals Safeguarding Area without jeopardising potential future operations? While the indication that street lighting should be avoided on the access road is to be welcomed, as is potentially the requirement for ‘screening’, the effectiveness of this in mitigating heritage impacts would depend on the location and design of both the road and any associated planting. The noise that this road would generate within the tranquil setting of the grade II* listed Church of St John the Wilderness is also a concern that planting would not address.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To minimise harm to heritage assets, we suggest that development is restricted to the southern part of the site, and that the quantum of development and proposed range of uses is restricted to that which can be accommodated there.

If employment land, which is not justified by the needs of the district, would result in harm to the significance of heritage assets, then this should be removed from the allocation.

Access arrangements to the south or east of this area should also be sought. For example, could access be gained via a new road passing through Exmo_18 (Land east of Liverton Business Park) to the south, or from the housing estate to the west? Impact assessments should follow appropriate published guidance, which includes The Historic Environment and Site Allocations in Local Plans, and The Setting of Heritage Assets.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

1(c). If the comment is related to a site, please state the site reference here::
Axmi_22

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Strategic Policy SD02: Axminster and its development allocations

2.2 PHSW support Strategic Policy SD02: Axminster and its development allocations, with particular regard to the retention of land east of Lyme Road (Axmi_22) as an allocation for 100 homes.

2.3 It is noted that the following amendments to the Draft LP text for the allocation of the Site shown in red and underlined are proposed:

“Land east of Lyme Road (Axmi_22)

This site is allocated for 100 dwellings. The site layout should make provision for a suitable access road to facilitate the development of site GH/ED/80 to the north and also be designed and built to a standard suitable for use as part of a possible future relief road to link to the A358, Chard Road, south of the Weycroft Bridge.

Pedestrian/cycle access should be off Loup Court, with Public Rights of Way enhancements. In order to ensure no adverse effect on the integrity of the Beer Quarry

and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented.”

2.4 Whilst PHSW continue to support the continued allocation of land east of Lyme Road (Axmi_22), as detailed within previous written representations to ensure the policy is sound at examination, the requirement to safeguard land for the relief road should be removed. The suggested amendment to the draft wording for Axmi_22 is as follows:

“Land east of Lyme Road (Axmi_22)

This site is allocated for up to 100 dwellings. The site layout should make provision for a suitable access road to facilitate the development of site GH/ED/80 to the north and also be designed and built to (Delete wording - a standard suitable for use as part of a possible future relief road to) link to the A358, Chard Road, south of the Weycroft Bridge.

Pedestrian/cycle access should be off Loup Court, with Public Rights of Way enhancements. In order to ensure no adverse effect on the integrity of the Beer Quarry and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented.”

2.5 Paragraph 6.9 of the January 2025 Local Plan Viability Assessment Addendum (CSD-004) notes that:

“Some of the allocation policy requirements reference a possible future relief road although it is understood from the Council that this is unlikely to proceed in the foreseeable future and that the requirement will require a suitable layout instead”.
[Boyer emphasis]

2.6 The November 2025 Local Plan Viability Assessment Addendum (CSD-004a) provides no further commentary regarding the delivery of the relief road. As a result, the retention of the relief road within the Draft LP is unjustified as there continues to be a lack of feasibility and viability for the ‘possible future relief road’ and is acknowledged by EDDC to be unlikely to proceed.

2.7 The Local Plan Viability Assessment Addendum (CSD-004a) notes the following detailed regarding the allocation of Axmi_22:

Table 2.1 Extract of Table 3.4 Allocations, value area and typology (CSD-004a)

Proposed Allocation	Value Area	Greenfield / Brownfield	Dwellings	Typology
In planning Land east of Lyme Road (Axmi_22) – 100 dwellings including section of relief road	VA 5	GF	100	Res5a No

2.8 PHSW are dedicated to delivering the scheme at east Axminster and the planning submission for the Site is anticipated in early 2026. Further details regarding the deliverability of land east of Axminster is provided within Section 3 of this report.

2.9 In terms of the proposed development at the Site, a pedestrian access point will be provided at the northwestern site boundary where the existing Public Right of Way (PRoW) meets Sector Lane. The application proposal also encompasses community infrastructure such as publicly accessible amenity open space, enhanced linkages, cycleways and footpaths, thereby creating a sustainable and integrated new community. This requirement for a connection to Loup Court is therefore supported by PHSW.

2.10 PHSW acknowledge the importance of ensuring there are no adverse effects on the integrity of the Beer Quarry and Caves SAC and bat activities and understand that suitable avoidance or mitigation measures will need to be identified and implemented. The East Devon Habitats Regulations Assessment (HRA) of the East Devon Local Plan 2020 to 2042 (Second Regulation 19 Publication Draft Plan – Autumn 2025) (CSD-006(rev)b) provides the following extracted screening of the Plan for likely significant effects, which highlights that some allocations within the landscape connectivity zone for Lesser Horseshoe Bats have been screened in on a precautionary basis for bats and supporting habitat.

Table 2.2 Extract of Table 4 of the East Devon HRA (CSD-006(rev)b)

Plan Section / Policy Description	Initial LSE Screening	Potential Risks
Comments SD02: Axminster impacts Policy allocates a number of locations all in close proximity to the River Axe. Land at Chard Road and the and development alone (River Axe combination	Strategic policy, allocation of 12 locations sites for development in	LSE. Recreation Screened in. SAC), in

or around Axminster. (Sidmouth to West Bay SAC); Loss of supporting habitat alone (Beer Quarry & Caves SAC); water quality alone (River Axe SAC) Axminster Carpet site are both very close (well within 100m) of the SAC boundary, bringing particular risks. Some allocations just within landscape connectivity zone for Lesser Horseshoe Bat (a feature of the Beer Quarry & Caves SAC), see (Jennings & Youngman, 2022) and therefore screened in on a precautionary basis for bats and supporting habitat.

2.11 It should be noted that PHSW have undertaken Ecological Reports prepared by GE Consulting who have identified that impacts on bats on Site would be negligible, and that a Habitat Management and Maintenance Plan will be produced and followed to mitigate any long-term impacts.

Local Plan 2020 to 2042 Policies Map (Second Reg 19 Consultation)

2.12 With regards to the revised Local Plan Policies Map in relation to the Site and Axminster, it is noted that land at East Axminster (Axmi_22) is designated as follows:

- Housing (100 homes under Policy SD02);
- Within settlement boundaries (Policy SP05);

- Designated Neighbourhood Area of Axminster (Policy SP03);
- River Axe Catchment Area (Policy PB04); and
- Axminster CP Parish Council Area.

Figure 2.1 Extract of the Local Plan 2020 to 2042 Policies Map (Second Reg 19 Consultation)

2.13 Whilst the Local Plan Policies Map notes the Site is designated as a Flood Zone, PHSW can confirm that following updates to the Environment Agency (EA) Flood Maps for planning in March 2025, the site continues to be wholly located within Flood Zone 1 and is therefore at low risk. In addition, the EA flood maps indicate that there are some areas of potential surface water flood risk. However, all areas of development at land east of Axminster are located in Flood Zone 1 outside of areas at risk of surface water

flooding. PHSW therefore request that the Local Plan Policy Map be updated accordingly to ensure that ‘Flood Zones’ are not a designation for Axmi_22.

2.14 On further review of the updated evidence base, there has been no additional evidence provided to demonstrate that the Axminster relief road is essential to mitigate the impacts of development within Axminster. In addition to confirmation from EDDC that it is unlikely that the relief road will come forward within the next plan period, the necessity for a relief road at this stage should be removed from site specific allocation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Our attendance is necessary to effectively discuss the points raised in these representations.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::

Axmi_02, Axmi_08, Axmi_09

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Our client continues to fully support the allocation of the site for residential development and most of the proposed changes to the allocation policy but continues to dispute the proposed employment uses and community hall. In respect of the additions to the policy we comment as follows: Archaeology and Heritage We confirm a programme of phased archaeological field evaluation as required by the amended policy wording is underway as agreed with the Devon County Council Archaeologist. Masterplan requirements The 7 points listed in the policy with our comments are set out below: Requirement 1. Secure public transport improvements and provide active travel links to the town centre, railway station, the existing road network and public rights of way; Comment While consideration of public transport improvements and active travel links is reasonable there are concerns that the current wording is too prescriptive. Any measures should be informed by the transport assessment work in the context of what is reasonable and necessary from a highway perspective, and how such measures can best be delivered. Some measures for example may be for other to deliver with appropriate contributions. Requirement 4. Create a public open space in the northern part of allocation Axmi_02 provisioned with appropriate publicly accessible heritage information that enhances and better reveals the significance of the Roman and Romano-British settlement here; Comment The heritage sensitivity of the site is fully appreciated, and it is acknowledged that this will be an important consideration for the future layout and design. However, as with point 1 this is considered overly prescriptive in terms of how the scheme should address the asset through directing what type of development should be carried out within its setting. This should instead be informed by a proportionate Heritage Assessment which could identify a different but

nonetheless acceptable approach, but which would be precluded by the strict policy wording. Heritage impact is also addressed by point 6. Requirement 5. Across the wider development include high quality accessible green space that is well related and sympathetic to protection of archaeological interests and their setting within the development and attractive, legible links from the site to the wider footpath network

Comment This point is not considered necessary as heritage impacts are dealt with by point 6. As above this is overly prescriptive. The quantum of open space should comply with policy requirements and the location informed by the appropriate technical assessments.

Beer Quarry and Caves SAC The consultation zone for the Beer Quarry and Caves SAC only affects the very southern edge of the site Given the consultation zone affects such a small part of the site and impact on bats would be assessed as part of the normal level of ecological assessment, is it not considered this needs to be specifically referenced. Even if the reference were retained it should be reworded to note the need for assessment at application stage and if necessary, mitigation measures taken, not ‘will need to be identified’ as a blanket requirement.

Employment We reiterate our concerns with the proposed employment allocation on the site on the basis of the significant over provision of employment land proposed in the local plan in comparison to the identified need. It is noted that the supporting text to Policy SP04 at para 3.27 has been amended to refer to additional employment land being required to “...address past under provision. ... improve self-containment in existing settlements and offer flexibility and choice to the market”. While an element of flexibility in a policy to provide a buffer is reasonable it is not considered a provision of 175.16 ha against an identified need of 80 ha is justified. Even if a very generous 20% buffer were applied this would only equate to 96 ha of employment land. It is noted that the revised housing buffer is only 12.18% but this is noted as a “healthy headroom” at Section 3.12. The additional text does not provide sufficient justification for this markedly greater level of overprovision. All previous comments regarding the approach to interspersed employment allocation on this and other sites, irrespective of whether the site are suitable for such uses, and the proposed allocation of the Axminster Carpets (Axmi_07) which would be a loss of employment land, remain valid.

Community Hall All previous comments regarding the lack of justification for a community hall on the site and concerns regarding the viability of such a facility remain valid.

Highways Measures All previous comments regarding the reference to the provision of off-carriageway bus stops on Musbury Road remain valid.

Requested Changes The following further changes are requested to the site allocation policy to meet the NPPF tests of soundness - deletions in square [] brackets and deletions in normal () brackets. This land is proposed for [438] (430) dwellings, [1.6 hectares of employment land and a community hall or meeting place.] A programme of phased archaeological field evaluation will need to be undertaken prior to the submission of a planning application to be undertaken in accordance with an agreed Written Scheme of Investigation to understand the presence and significance of any archaeological remains that will be affected by the proposed

development. This allocation will need to come forward on the basis of an agreed masterplan for the whole site that clearly demonstrates how comprehensive development will be undertaken and implemented. The masterplan will be informed by the findings of the archaeological field evaluation and will demonstrate how development will:

1. [Secure] (Consideration of reasonable) public transport improvements and active travel links to the town centre, railway station, the existing road network and public rights of way as informed by an appropriate technical assessment
2. Address the site's built environment, heritage and landscape setting;
3. Address flooding; [4. Create a public open space in the northern part of allocation Axmi_02 provisioned with appropriate publicly accessible heritage information that enhances and better reveals the significance of the Roman and Romano-British settlement here;
5. Across the wider development include high quality accessible green space that is well related and sympathetic to protection of archaeological interests and their setting within the development and attractive, legible links from the site to the wider footpath network.]
6. Conserve the setting of the Scheduled Ancient Monument and associated archaeological remains and addresses how adverse effects can be minimised and made acceptable and heritage-related public benefits realised;
7. Establish a strong sense of place. Highways access shall be taken from the A358 Musbury Road. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes. In particular, it should explore opportunities to provide [offcarriageway] bus stops on Musbury Road to improve sustainable travel options. The site is located close to the statutory road network and development should avoid adverse impacts on road safety on the National Highway. There shall be no pedestrian access to the A35. In order to ensure no adverse effect on the integrity of the Beer Quarry and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Axmi_23

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Para 5.4 sets out the approach to development in Axminster. It is noted that proposed residential allocations are identified, totalling 1,086 homes. Some sites are also small, with the smallest looking to deliver just 6 dwellings.

4.17. In light of this, Co-op object to the wording of this policy. The proposed allocations provide for up to 1,086 dwellings which appears to fall short of the minimum housing requirement in Axminster (1,391 in Policy SP03). There is also insufficient detail within Appendix I of HOU-003 to support the decisions of the Council. Furthermore, this evidence and certainly the trajectory needs to be fully updated to support the upcoming Examination in Public to ensure that East Devon can demonstrate a 5 year housing land supply at the point of adoption and sufficient homes across the Plan Period.

4.18. Currently, it cannot be considered positively prepared, and it is not considered compliant with the NPPF in this regard.

4.19. In addition, it does not include the Co-op site for alternative uses, despite it being submitted as a residential opportunity in 2022 and it now includes the vacant former Co-op foodstore.

4.20. Included in those sites that are proposed to be allocated is Axmi_23 – Websters Garage which is allocated for 10 dwellings as part of an unspecified 'mixed use' development. No specific requirement is set out for the provision of retail or

commercial floorspace despite the fact that the site is located in the heart of the proposed TCA and PSA.

4.21. At the time it was assessed, there was an undetermined application for the redevelopment of part of the site to provide a convenience store with 9 no. dwellings above (ref. 22/2322/OUT), however this application was never determined and the site has since been occupied by the relocated Co-op store following the approval of planning permission ref. 24/0157/FUL for alterations and extensions to the existing building.

4.22. It is considered, therefore, that the potential for the site to come forward for residential development is therefore limited. The Axminster Site Selection Report (SAL-005) does not set out how it is intended to reconcile the conflict with the current proposed wording of Policy SE06 to deliver dwellings on this site, nor is it apparent why a different approach has been taken in the consideration of this site to the Co-op site. For Axmi_23, the reasons for allocating note the site's proximity to services and facilities as a positive consideration which is markedly different to the approach taken in the consideration of Axmi_16 (the Co-op site).

4.23. To ensure that this policy is positively worded and complies with para 36 of the NPPF, the full development needs should be addressed, the trajectory fully updated which will likely require the identification of more residential sites in Axminster.

4.24. As part of this, given the evidence of the Council confirms there are no technical issues it is just the draft plan's change to the town centre boundary, the Co-op site needs to be formally identified as a residential allocation, capable of accommodating at least 10 dwellings (but could contribute 20, if an apartment scheme is taken forward) towards the minimum housing requirements to be delivered in Axminster.

4.25. Given the immediate availability of the site, this could be brought forward at an early stage in the Plan Period, making an important contribution to help to address the identified shortfall of approximately 300 dwellings in Axminster.

4.26. However, if it is decided not to allocate the site, then it should be removed from the Primary Shopping Area to ensure that there is the maximum flexibility in policy to allow the site to come forward for housing as an unallocated site in the event that this is determined to be its best option for redevelopment in the future.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Full name: Susan Gallagher

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:

Axmi_02, Axmi_08, Axmi_09

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

I am not qualified to say one way or another but it does not feel as if enough consideration has been given to this for it to be legally compliant.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: It is essential that the “northern part” of AXMI_02 is clearly and unambiguously identified and labelled on the plan. The submission should include a robust impact analysis of the archaeological constraints affecting the whole site, access to the site and also to the number of houses that are proposed. It must demonstrate how these constraints have been assessed, what changes may be required, and whether they could affect the feasibility, timing, or design of a suitable access arrangement.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This was covered in my previous submission in the first consultation. None of those issues were addressed and all are still relevant.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: All are included in my comments above.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I feel it does not address anyl broader aspects and the full impact on Axminster as a whole.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am an Axminster resident and I feel very strongly that the town must move with the times and continually improve. However, I feel that this shouldn't be at the expense of its existing residents in all the ways stated in my previous submission.

Full name: Roger Gallagher

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD02

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:

Axmi_02, Axmi_08

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I

have previously mentioned the issues with transport, flooding, SWW infrastructure, Bat populations and archeology. Recently, field archeological investigation has confirmed the significance of the proposed allocations as sites of significant historical importance. The site selection report sets out the opposition to inclusion of Axmi_02 in particular for development and discusses the northern part being NOT developed but a public heritage site created. The limited archeology so far has already uncovered the significance of the site - and therefore all these sites should be removed from allocation plan so as to preserve the historic space for the community. Even if the northern section of Axmi_02 was preserved as a public heritage site - developing right next to this would create further issues of damage, flooding, access, noise. There is no outline of the area that should be not developed so it is not clear how much of Axmi_02 would not be developed?

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Following the Site Survey report after the initial archeological investigations - it is clear that Axmi_02 would not be suitable for development as it would be a high risk to the preservation of heritage

assets. Suggesting the northern area should not be developed would not remove the affect on the heritage significance - and no new area showing the new public heritage site has been put forward. Developing near such a historically important area should not be considered - rather preserving the heritage site for the community would be a positive improvement for Axminster. Even if full archeological investigation of the whole area was a requirement for any future developer - this would not mitigate against the impact construction would have on the heritage preserved area - not to mention the other issues such as flooding, access, bat activity. Axmi_02 & Axmi_08 should be removed as unsuitable from the allocation plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I dont believe that development and inclusion of Axmi_02 & Axmi_08 complies with co-operating with other agencies who have already demonstrated how these allocations are unsuitable based on heritage impact (HE & DCC) and the environment (Environment Agency).

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Axmi_02, Axmi_08, Axmi_09

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Please refer to our comments on the Regulation 19 Local Plan consultation, which outline the significance of Roman archaeology in this location and potential impacts on it. We wish to reiterate the potential for considerable harm, both to non-designated archaeology potentially of equivalent significance to Scheduled Monuments, and to the setting of the adjacent Scheduled Monument, which may render this site unsuitable for development.

The revised site allocation policy includes a number of commitments which we broadly welcome, including:

- for archaeological field evaluation prior to the submission of a planning application
- that a masterplan for the site should be informed by this
- that development should conserve the setting of the Scheduled [Ancient] Monument and associated archaeological remains and address how adverse effects can be minimised and made acceptable and heritage-related public benefits realised;

However, it has not yet been demonstrated that the aims of the policy are achievable. We are aware of ongoing field evaluation on land within the proposed site allocation. Until the conclusions of this work are published and used to inform a concept

masterplan, we do not consider it has been demonstrated that the site allocation policy, range of uses and quantum of development are justified or effective.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This site allocation should be prioritised for removal from the plan, unless it can be demonstrated that the policy is justified and effective, on the basis of proportionate evidence.

When adequate information is available, consider whether the site should be removed from the plan, or whether adjustments to the proposed use, mix, or quantum of development can be made to secure an appropriate form of development.

We strongly question whether any employment land can be justified in this location, given the potential harm to heritage in the context of over-allocation of employment land within the plan generally

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Amendments to Chapter 5 ('Development in the Towns and Villages') of the Publication Draft document ('tracked changes') are mostly outside of the interest of National Highways. As such we have few additional observations and would refer the Council to our original comments on this section in our March 2025 response. 34. Nevertheless, it was previously identified that Strategic Policy SD02 seeks to allocate sites in Axminster with selected allocations appearing to bound the A35 corridor either side of the Abbey Gate junction. It was previously identified that the concentration of development alongside the Abbey Gate junction and the single carriageway nature of the A35 at this location could give rise to road safety issues due to additional turning movements. We now note that the proposed allocation at Land west of Musbury Road (Axmi_01a) has been removed from the Publication Draft. We also welcome the additional reference to SRN interests under the Land east of Musbury Road (Axmi_02, Axmi_08 and Axmi_09) proposed allocations.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

National Landscapes (NL) and Policies SD01, SD03, SD04, SD06, SD08, SD15, SD16, SD22 and SD23 Policy OL02 provides strong protection for the NL areas. Quote: "The highest level of protection will be given to the landscape and scenic beauty of the National Landscapes (NLs) in East Devon: A. Development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities, character and natural beauty of the NL (including the coastline, where relevant); B. Major development in a NL will only be permitted in exceptional circumstances and where it can be demonstrated to be in the public interest; and East Devon Local Plan 2020 to 2042 – Second Regulation 19 Publication Draft 223 C. Any relevant National Landscape Management Plans will be a material consideration in decision making. This policy will also apply to the Heritage Coast. This policy applies across the whole plan area including the Cranbrook Plan area". However there are a significant number of proposed development sites which are within the NLs, or have an affect upon its setting or appearance. • Gitti_3, 4 and 5: 310 homes within or adjoining the NL • Honi_07 and Honi_13: 40 new homes inside the NL, so difficult to mitigate harm on smaller sites • Two other Honiton developments are close to NL boundary (Honi_18: 136 homes and GH/ED/39b: 195 homes) Most, if not all, of these sites cannot be justified as exceptional circumstances.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We have already made comments about the current dire sewage situation in the River Otter catchment. Building an additional 1,833 homes will only make the situation much worse.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Gitt_03, Gitti_04, Gitt_05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

The inclusion of Gitti_03, Gitti_04 and Gitti_05 for mixed use development is clearly supported as it represents a logical approach to development and growth to the west of Honiton, noting:

- the position of Honiton within the settlement hierarchy for East Devon;
- the sustainable transport options and overall level of services and facilities in the town;
- the proximity of the site to the A30 COMBE ESTATE REPRESENTATIONS ON THE EAST DEVON LOCAL PLAN (2020 – 2042) REGULATION 19 CONSULTATION DRAFT (MARCH 2025) BY BELL CORNWELL LLP 2
- The location of the site relative to existing jobs and food retail provision within the town of Honiton;
- The constraints that exist elsewhere in the settlement (for example this site can be delivered entirely outside of the AONB). Strategic Policy SD03 is considered to be sound, though we would recommend some modest tweaks/changes to wording. The specific policy allocating Gitti_03, Gitti_04 and Gitti_05 states; “Land west of Hayne Lane (Gitti_03, Gitti_04 and Gitti_05) Land to the west of Hayne Lane, on the western side of Honiton, is allocated for a mixed-use development to provide: A. 310 homes; and B. 14.6 hectares of land to accommodate employment and community uses. This

allocation will need to come forward on the basis of an agreed masterplan for the whole site that clearly demonstrates how comprehensive development will be undertaken and implemented. Southern parts of the site are in the East Devon National Landscape and this area will require very careful design to take account of its landscape setting. On the western edges the site is close to the historic village of Gittisham and particular sensitivity will need to be attached to preventing adverse heritage impacts. These southerly and westerly parts will be best suited for open space uses. Commercial and employment uses will need to be concentrated to the north of the railway line bisecting the site with residential uses to the south. Community facilities, to include a shop or shops and a hall, will need to be provided within or next to 84 residential parts of the development. There will be the need for attractive and safe pedestrian and cycle linkages between the southern and northern parts of the site (ideally utilising an existing passage under the railway that lies in a roughly mid-way point in the allocation). It is expected that vehicular access to the residential development will be via the existing estate to the north (i.e. via Meadow Acre Road). Vehicular access to the employment development will need to come via Hayne Lane. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes, including bus services.” In terms of the objectives of the policy we would draw attention to the masterplan submitted in support of the current representation. We would ask that it is noted that: COMBE ESTATE REPRESENTATIONS ON THE EAST DEVON LOCAL PLAN (2020 – 2042) REGULATION 19 CONSULTATION DRAFT (MARCH 2025) BY BELL CORNWELL LLP 3

- The Estate are committed to seeing the site delivered for a minimum of 310 homes.
- The Estate are committed to delivering the area of land to the north of the allocation which comprises part of the 14.6 hectares of employment and community uses (note part of this is land owned by EDDC) – however, additional flexibility should be built into the definition of uses permitted in this part of the policy to include wider commercial uses and leisure uses.
- The need for masterplanning of the sites is noted, and this can be controlled in-part, through an outline planning application.
- The development can be accommodated without being located within the East Devon National Landscape and account can be taken of landscape setting.
- Similarly, the evolving masterplan takes account of the topography and proximity of the historic village of Gittisham on the western edge the site which has taken account of topographical features and heritage assets.
- Both of the areas above can be utilised for BNG delivery and open space to ensure appropriate setting is retained for heritage assets and landscape designations.

- The Estate are happy to provide community facilities, to include a shop or shops and a hall as part of any wider masterplanned development.
- The importance of attractive and safe pedestrian and cycle linkages between the southern and northern parts of the site are also noted and deliverable.
- In terms of vehicular access to the residential development – this should not be solely from Meadow Acre Road – which is located within an adjacent development. Access will be available from Hayne Lane (as per transport / access notes submitted at the Reg.18 stage) and shown on the masterplan, with a secondary route potentially available from Higher Ash Close. As such, the allocation of the site for residential development is sound and supported by appropriate officer assessment in the submitted evidence base.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Honi_07

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Please see previous representations submitted to the reg19. consultation which still apply and are valid. The current version of the policy has reduced the size of the allocation to 30 dwellings - this land is in our client's ownership. You will see in our previous reps, that this is the basis on which our client's site was promoted, and a scheme of 30 dwellings is deliverable, with the benefits of Honi_07, being:

- delivering development in an incredibly sustainable location in terms of proximity to public transport and the service and facilities in the town.
- It is a small site that can be built out quickly, as a single phase which can assist with housing land supply
- The site can take its own access safely from the site frontage of Waterleat Avenue with no impact on the highway network
- It delivers 30 houses, as per the indicative layout previously provided.

- Provides attractive ecology, landscape, open space buffers on the south and east boundary, which mitigates impacts on heritage assets and the National Landscape
- Opportunities for planting reinforcement along the boundary with Waterleat Avenue
- High quality public open space and drainage features will be secured which provide setting for the adjacent listed buildings

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: See original submissions no further comment.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To explain the merits of allocating this site, should this be necessary.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: [To be read with other representations by same re. SD03 / sites GH/ED/39a and GH/ED/39b entered into Commonplace which include the majority of the wording and images in the attachment with this entry]:

STRATEGIC POLICY SD03: LAND SOUTH OF NORTHCOTE HILL – SOUTH OF THE RAILWAY LINE:

These representations and accompanying Technical Notes demonstrate that the current draft allocation at Land South of Northcote Hill – south of the railway line (GH/ED/39a), which restricts the capacity of the site to 195 homes, does not constitute effective use of land or optimises the use of land to accommodate an appropriate amount and mix of development (in accordance with NPPF 2023; Paragraph 135e).

The Draft LP policy for land south of the railway line (GH/ED/39b) must be increased to at least 299 homes for the following reasons:

- It would make efficient use of the site in accordance with national policy;

- It would enable the site to support additional uses in the form of a community park and additional facilities such as a neighbourhood hub, as well as making a more meaningful contribution towards EDDC's housing land supply and meeting the housing needs of East Devon in a sustainable location;
- The site is being promoted by a national housebuilder that is committed to delivering homes in the short-medium term – a planning application has already been submitted to East Devon District Council for a development of up to 299 homes. Increasing the quantum of development on this allocation would ensure the draft LP delivers sufficient homes throughout the first part of the Plan period to meet its needs, noting the concerns raised regarding the delivery assumptions of the new settlement east of Exeter.

To ensure the draft LP makes the most efficient use of land, it is reiterated that the draft allocation should be revised as follows [see 3(c)].

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Land south of Northcote Hill – south of the railway (GH/ED/39b): This site is allocated for at least 299 homes and will form a medium-scale residential extension on the eastern side of Honiton. Parts of the site are on more elevated ground and development will need to be sensitively planned to avoid adverse impacts on the nearby Blackdown Hills National Landscape area. Vehicular and pedestrian access improvements would be required, incorporating Northcote Hill into development. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes.

GH/ED/39a, GH/ED/39b

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

*** Personal details have been removed *** fully supports the Draft LP's recognition and identification of Honiton as a Tier 2 settlement and a sustainable location for future growth and development.

It is welcomed that land at Northcote Hill (north and south of the railway line) is identified as two draft allocations within the Draft LP (GH/ED/39a and GH/ED/39b). *** Personal details have been removed *** supports the principle of these allocations and can confirm that both sites are suitable and available for development. *** Personal details have been removed *** has submitted a planning application for each of these sites and are committed to their delivery. Both sites can contribute to the Council's immediate housing land supply.

We discuss each of these allocations in turn below [see 3a below and 3b]. While *** Personal details have been removed *** continues to support the allocations of both GH/ED/39a and GH/ED/39b, it is reiterated that the quantum of development allocated for GH/ED/39b must be increased.

Land south of Northcote Hill (north of the railway line) (site reference - GH/ED/39a): The policy has been amended to increase the allocation from 100 dwellings to 115 dwellings. This increase is welcomed by *** Personal details have been removed *** .

This site is allocated for a total of 115 homes and will form a medium-scale residential extension on the eastern side of Honiton. Vehicular and pedestrian/cycle access improvements would be required. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes. This allocation is wholly supported by Taylor Wimpey. An outline planning permission was resolved to be approved by EDDC's Planning Committee in 2023 for the development of up to 115 homes, public open space, sustainable drainage systems, landscaping, vehicular access via Tunnel Lane and associated highways improvements and infrastructure. The proposed development was for up to 115 homes. A decision notice is due imminently.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Land south of Northcote Hill (south of the railway line) (around 195) (site reference – GH/ED/39b):

This site is allocated for a total of around 195 homes and will form a medium-scale residential extension on the eastern side of Honiton. Parts of the site are on more elevated ground and development will need to be sensitively planned to avoid adverse impacts on the nearby Blackdown Hills National Landscape area. Development should be informed by detailed assessment and design work to maximise opportunities to conserve and enhance the natural beauty of the site and its wider national landscape setting. The scale (particularly height), design, lighting and materials of new development should be appropriate to the Blackdown Hills National Landscape. There should be no development on land above the 160m contour.

Provision should be made for suitably landscaped areas of open space with circular walks throughout the site, giving particular attention to the relationship with the national landscape. Vehicular and pedestrian access improvements would be required, with Northcote Hill integrated into the development layout to ensure safe and effective connectivity. The development will need to maximise opportunities for localised improvements and contributions to enhance sustainable travel modes.

The Draft LP has uplifted draft allocation GH/ED/39b from 100 dwellings to around 195 dwellings. Whilst *** Personal details have been removed *** supports the allocation of the site for residential development and the increase in allocation capacity, it must be reiterated that the site has capacity for at least 299 homes, and the draft allocation capacity must be increased accordingly [to at least 299 homes]. *** Personal details

have been removed *** has recently submitted an Outline Application for residential development up to 299 homes which is accompanied by a full suite of technical work (summarised in Section 4 of these representations [see attachment - and also inputted here in 3b and 3c]) that confirms the site can comfortably accommodate a significantly higher quantum of development. A comprehensive suite of technical assessments has recently been undertaken, which confirms that the site can accommodate a significantly higher quantum of development, while delivering an extensive community park and other public benefits, including a neighbourhood hub. The submitted planning application illustrates how a landscape-led development approach, incorporating residential provision alongside extensive areas of public open space, including a new community park, can accommodate up to 299 homes on part of the site.

In preparation of the Outline planning application, *** Personal details have been removed *** undertook a pre-application enquiry in relation to the proposed development of up to 299 homes. This engagement included meetings with Devon County Council (DCC), as Highways Authority, East Devon Planning Team and Landscape Officer. The capacity of the site was discussed and DCC confirmed the access proposals and off-site works were acceptable. The illustrative masterplan was also discussed with the Landscape Officer who provided minor comments on the provision of additional tree planting, which was incorporated within the scheme prior to application submission.

Increasing the draft allocation to at least 299 homes would represent a more efficient use of land, with a development that could deliver significant areas of public open space, and other public benefits including a neighbourhood mobility hub. The enclosed concept masterplan demonstrates how a landscape-led development, with homes provided alongside extensive areas of public open space, including a new community park, can deliver at least 299 homes.

There are no technical constraints that could impede the delivery of up to 299 homes on this site (GH/ED/39b).

This increase is essential for ensuring that the allocation (and future scheme) makes effective use of the land and optimises its potential to accommodate an appropriate amount and mix of development as well as making a meaningful contribution towards meeting housing needs in East Devon (in accordance with NPPF 2023; Paragraph 135e). Increasing the number of homes on land south of the railway line will enable the

proposed development to provide much needed homes, the potential for a mobility hub and significant public open space. Together, GH/ED/39a and GH/ED/39b can deliver a sustainable new neighbourhood to the east of Honiton, providing at least 400 homes. In doing so, the proposed allocations would significantly contribute towards the Council's housing land supply, in accordance with the Council's spatial strategy.

In December 2025, *** Personal details have been removed *** submitted an outline planning application for up to 299 dwellings, open space and infrastructure on land south of the railway line. The application is awaiting validation. This application was supported by a full suite of technical information, demonstrating that the site can accommodate up to 299 dwellings, whilst remaining sensitive to its landscape context.

The proposed development was subject to pre-application engagement with Devon County Council as highways authority and East Devon Planning Team and Landscape Officer. An illustrative masterplan depicting the proposed development is shown below [see attachments].

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Increasing the draft allocation to at least 299 homes [see 3b].

These representations should be read alongside the concept masterplans, which have been informed by the site's technical surveys and assessments and support an increased quantum of development. These representations should also be read in conjunction with the full suite of technical information submitted in support of both planning applications on sites GH/ED/39a and GH/ED/39b.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Our attendance is necessary to effectively discuss the points raised in these representations.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Honi_18

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Our client continues to fully support the allocation of the site for residential development but does have some concerns with the additions to the policy as follows: National Landscape Impacts The relationship of the site to the National Landscape (NL) is fully appreciated and it is acknowledged that this relationship will be an important consideration for the future layout and design. However, the additional paragraph that has been added to the policy by requiring development to “conserve and enhance” the natural beauty of the site and its wider national landscape setting does not fully align with the NPPF1 and NPPG2. The NPPF Para 189 is clear, requiring that "development within their setting should be sensitively located and designed to avoid or minimise adverse impacts on the designated areas." (The current draft NPPF repeats this distinction). The NPPG builds on the above. Paragraph: 041 (Reference ID: 8-041-20190721) identifies the need for development within a NL (previously referred to as ‘Areas of Outstanding Natural Beauty’ within the NPPG) to be limited, in view of the importance of conserving and enhancing their landscapes and scenic beauty. However, the bar is set lower for developments that are not within, but within the setting of a NL, as in the case of this site NPPG Paragraph: 042 (Reference ID: 8-042-20190721) instead states that developments within the setting "need sensitive handling" to take potential impacts into account. It also noted that there is an element of inconsistency with how this matter is addressed in the other proposed Honiton allocations:

- Land west of Hayne Lane (Gitti_03, Gitti_04 and Gitti_05) – falls partly within the NL but has the same wording that has been added to Honi_18.

- Land adjacent to St Michaels Church and south east of Cuckoo Down Lane (Honi_07) – falls wholly within the NL but only references the “the scale, design, lighting and materials of new development being appropriate to the Blackdown Hills NL”.
- Land at Middle Hill, Church Hill (Honi_13) – falls wholly within the NL but has the same wording as Honi_07.
- Land south of Northcote Hill – south of the railway (GH/ED/39b) – is outside of but within the setting the NL but has combines the wording used in both Honi-18 and Honi-07. While the importance of the NL is fully recognised how these policies are worded in terms of the approach to development within the NL as compared to development within the setting of NL should be distinguished and consistent. Heritage Impacts The relationship of the site to the Grade II listed Copper Castle toll house and associated gates is fully appreciated and it is acknowledged that this relationship will be an important consideration for the future layout and design. However, the additional paragraph that has been added is considered overly prescriptive in terms of the significance of the asset and how the scheme should address the asset through directing what type of development should be carried out within its setting. This should instead be informed by a proportionate Heritage Assessment which could identify a different but nonetheless acceptable approach, but which would be precluded by the strict policy wording.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The following further changes are therefore requested to the site allocation -deleted text in square [] brackets and additional text in normal () brackets.

The site is adjacent to the Blackdown Hills National Landscape. [and development should be informed by detailed assessment and design work to maximise opportunities to conserve and enhance the natural beauty of the site and its wider national landscape setting. The scale (particularly height), design, lighting and materials of new development should be appropriate to the Blackdown Hills National Landscape.] (Development proposals should therefore be sensitively handled, informed by detailed assessment and design work to avoid or minimise adverse impacts on the designated area. The site is also adjacent to the grade II listed Copper Castle former toll house and associated grade II listed gates. [These heritage assets form a legible entry point to Honiton and development should seek to conserve and enhance the significance of

these assets. The higher ground to the south of the site should be kept open. and the proposed junction carefully located and designed to protect landscape and heritage interests.] (The development should seek to conserve and, where possible, enhance the significance of these assets. The design of the proposed development, including the design and location of the proposed access junction, should respond to the topography of the site and the significance of the heritage assets.)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Honi_01, Honi_15

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
[This representation also relates to Development in the Towns and Villages chapter paragraphs 5.5 to 5.6 inclusive]

We are disappointed that the Part 2 Regulation 19 Consultation continues to overlook additional opportunities for housing provision at Honiton (including sites previously identified at earlier stages of the Plan). There remains additional capacity at Honiton for further sites to come forward that can benefit from existing infrastructure and accessibility. This would provide greater resilience to the Plan as a whole, particularly in light of the uncertainties around Marcombe and other larger allocated sites. It would also support housing delivery earlier in the Plan period.

Land at Heathfield Manor (previously Honi_01 and Honi_15): [see attached sketch plan]
We set out in previous representations made on the initial Regulation 19 Plan the inconsistencies, errors and failures of the site selection process that led to the Heathfield Manor site not being appropriately considered or assessed in respect of its suitability for supporting housing growth at Honiton. This meant that a site, previously identified partly as a draft allocation (Honi_01) in the Plan and initially supported by officers as an extended site (Honi_15) within the published recommended sites for the

Regulation 19 Plan (before the report was withdrawn and replaced just prior to the meeting), was left out of the Plan without any justification.

Please refer to our initial Regulation 19 representations for the timeline and further evidence to support our concerns regarding how the site has been treated and the inconsistencies of the site selection process overall. In summary, the key points are:

- The site (Honi_01) was included in the Regulation 18 Plan as a draft allocation;
- The HELAA did not identify any inherent constraint, whilst acknowledging it's location within the National Landscape;
- The site was considered achievable and deliverable within the first 5 years of the Plan;
- Wider scheme (Honi_15) promoted at further Regulation 18 stage with masterplan submitted;
- Supported by officers and recommended for inclusion at Regulation 19 Site Selection process and included in Site Selection Report to be reported to Strategic Planning Committee (SPC);
- This report was withdrawn after publication a few days before the SPC meeting and advised that it would be given further consideration;
- Information presented to the SPC meeting was inaccurate and Members did not appear to understand what they were considering (Honi_01 or Honi_15); and
- Members did not take forward Honi_01 or Honi_15 in the Regulation 19 Plan, despite Honi_01 being previously a draft allocation.

The only reason given for the site's exclusion has been its location within the National Landscape. This ignores the fact that the site was previously identified as a draft allocation despite its location within the National Landscape and that other sites in Honiton are allocated within the extent of the National Landscape boundaries. Indeed other sites across the District have also been allocated, including Exmouth and Sidmouth, and also lower order settlements such as Newton Poppleford and Sidbury etc. We maintain our view that if this is not a principle reason to exclude sites in those lower tier places then it would be unreasonable to rule sites out at Honiton given the town's greater role for accommodating growth. The boundary of the National Landscape does not follow the settlement boundary and there are already significant parts of Honiton that falls within the boundary of the National Landscape designation.

Furthermore, it is noted that the Council has published a topic paper alongside the Part 2 Regulation 19 Plan consultation which considers major development in National Landscapes and seeks to justify the sites to be included within the Plan where these are within or adjacent to the National Landscape. Honi_15 is referred to as a rejected site and dismissed as an alternative on the basis that there would be significant landscape impacts. This is contrary to the evidence previously provided in support of the site and the Council's previous position in respect of its part draft allocation and the initial support from officers.

The topic paper provides no further evidence of a comparative assessment between those sites included in the Plan within the National Landscape and our clients' site. The paper then further justifies the inclusion of the other sites on the basis that the purposes of the National Landscape to conserve and enhance its natural beauty could be advanced through careful design, landscape retention and reinforcement, materials and scale. All matters relevant to Honi_015 and demonstrated through the submission of masterplanning work.

This identified clear opportunities for landscape and habitat enhancement through a wide network of green space and green corridors, public open space, extensive landscape features and blue infrastructure that would provide substantial benefit in enhancing the transition from the National Landscape and the urban form of Honiton. This would significantly improve the current relationship and landscape setting and is a clear benefit of the Heathfield Manor scheme.

No reference is made to this masterplanning work that has been submitted to the Council for Honi_15, despite similar framework design work being used to justify inclusion for other sites in the National Landscape. This again flags the inconsistency of approach to site selection and the absence of clear and robust evidence that underpins it.

We have continued to progress the masterplan for the site alongside the technical evidence base. The latest masterplan is attached as Appendix 5 to the representation covering letter and continues to demonstrate the strong landscape led approach, providing significant green buffer zones to provide strong transition areas between the proposed development and the existing built form to the north and National Landscape to the south. It also shows how suitable access can be achieved from Sidmouth Road and Honeysuckle Drive supported by a clear street hierarchy and pedestrian and cycle

linkages connecting to existing development and the wider network. Drainage work has identified the opportunity for a range of SuDs features, including a network of swales and attenuation basins with outfall at greenfield rates to the central stream.

No heritage constraints have been identified, with the site providing overall a wider agricultural hinterland with very limited archaeological activity, with any remains being of low interest and nothing of greater than local significance. Whilst there are listed buildings within 1km from the site the site has no visual connection, spatial relationship or historic connection with any heritage asset and does not form any setting function.

Ecology surveys have been undertaken and an ecological constraints and opportunities report has informed the masterplanning work and the provision of significant habitat enhancement and creation on the site and the provision of a specific area for BNG. This has been supported by tree surveys and an arboricultural constraints and opportunities plan. The masterplan has responded by seeking to retain all trees and hedgerows wherever possible and to strengthen boundaries and enhance the key green corridor crossing the site.

The overall accessibility of the site is undisputed, being within walking distance of key facilities and well located to benefit from bus and rail services.

The technical work has therefore identified that the site is well placed to deliver housing in a sustainable location to support the role of Honiton and is a site that is unconstrained nor overburdened by infrastructure requirements. The site can therefore come forward quickly to support delivery in the earlier stages of the Plan period and provide much needed resilience to the Plan's strategy.

Our position remains that the omission of the Heathfield Manor site from the Plan is a significant lost opportunity and there were and are no good reasons for it not to have been allocated. It provides a more logical southern extension of Honiton than other more constrained sites that have been included in the Plan to the east and west which are far less well related to the existing urban area to the site at Heathfield Manor.

We set out below our continued concerns regarding the sites that are included in the Plan which we would strongly contend offer no clear benefit over the Heathfield Manor site and in several cases have further challenges (i.e. heritage, accessibility etc).

Land west of Hayne Lane (Gitti_03,04 and 05): Our clients remain concerned that the allocation of this site was based primarily on quantum and an assumed capacity rather than a consideration of relevant matters in respect of deliverability. It also a site that is distant from the core facilities of the town and accessibility during the site selection process was described as challenging. Part of the site also falls within the National Landscape, demonstrating that this does not appear to be principle for ruling out sites as suggested in the context of Heathfield Manor. The additional wording added to the policy, relating to the need to maximise opportunities to conserve and enhance the natural beauty of the site and wider national landscape setting, could equally apply to Heathfield Manor (which has already been demonstrated through the masterplanning and technical work undertaken).

The revised wording of the allocation doesn't address the previous deliverability concerns we have expressed in terms of access challenges and landscape and heritage sensitivities alongside the need for the site to come forward in a masterplan dealing with the site comprehensively and the provision of significant infrastructure. This points to a site that will take some time to come forward. It is therefore unlikely to make a significant contribution to housing delivery in the early parts of the Plan period. On that basis it is clearly a more sustainable strategy to deliver a range of sites (including Heathfield Manor) which provide good access and connectivity options to existing services and facilities whilst offering opportunities for enhancement of existing infrastructure and landscape setting to support the growth of the town. This will also be more beneficial in ensuring the Plan is resilient in meeting housing needs at an early stage of the Plan period.

Land adjacent to St Michaels Church and south east Cuckoo Down Lane (Honi_07 & 12): We previously made the point that, as with Heathfield Manor, these site lie within the National Landscape but are closer to heritage assets and represent a less logical extension to the urban area in respect of form. Therefore, the allocation is inconsistent with the decision to not allocate Heathfield Manor. We also raised the point that Honi_12 was not recommended to be allocated by officers. We note the Part 2 Regulation 19 consultation version of the Plan now excludes Honi_12 and reduces the capacity of housing provision from 101 to 30 homes which appears to emphasise that the clear constraints of the site were not fully realised or considered at the site

selection process. It again suggests that the opportunity to maximise quantum on a few larger sites without full consideration of delivery factors was placed above identifying a range of more deliverable sites.

Land south of Northcote Hill (GH/ED/39a and b) This concern is further advanced by the revised capacity now included in the Plan for Northcote Hill, rising from 200 homes to now 310 homes. This is despite the revised policy text clearly indicating that impacts of scale and other matters on the National Landscape will require further consideration at a later stage. It further sets requirements for which there is no evidence put forward to demonstrate that the increased housing numbers could meet. The updated site selection report does not address the rationale regarding the increased quantum of housing now to be delivered on the sites, and it is therefore unclear what further assessment has been undertaken to justify this increase. The report also does not address the previous concerns raised by my clients and others regarding the challenges of these sites. In particular the access and accessibility challenges with access constrained by narrow roads under railway bridges which will require significant improvements. Whilst the revised policy wording now refers to these challenges, the need to “maximise opportunities for localised improvements and contributions to enhance sustainable travel modes” rather underplays the extent of the issue. Our concern is that any increase in capacity of these sites is not only unevidenced but may be simply a case of trying to redress the loss of numbers in Honiton as a result of the removal of Honi_12. This would be inappropriate and does not take into account the delivery challenges of the site or the likely impact delays in bringing sites forward will have on the Plan strategy as a whole. A more sustainable approach would have been to re-consider sites previously omitted (such as Heathfield Manor). We continue to consider that there are no good reasons for the Plan not to allocate the Heathfield Manor site. It is a site that is relatively unconstrained nor overburdened by infrastructure requirements. The site can come forward quickly to support delivery in the earlier stages of the Plan period and provide much needed resilience to the Plan’s strategy. Without having a range of sites within Honiton the Plan will over rely on more constrained sites which are more difficult to bring forward, particularly given the significant uncertainties around deliverability.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We believe further growth at Honiton should be provided for through the allocation of further sites. This will

underpin the Plan's strategy to ensure sufficient housing growth in the town throughout the Plan period, including at an early stage. The site at Heathfield Manor is unconstrained and has previously been identified as a preferred choice site based on its suitability. There are no impediments to its delivery and as such it can make an important contribution to the Plan.

Policy SD03 should therefore be modified to include land at Heathfield Manor (Honi_15) as an allocation. [see attached sketch plan]

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To elaborate further on these and previous representations made on the Plan, including providing evidence to support the necessary Modification of the Plan.

Full name: RF Collins

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Thank you for setting out our concerns for development in Honiton. Please note, we wish to participate in examination hearing sessions, when they deal with Honiton?

Full name: Stephen Craddock

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::

Honi_07 ,Honi 13, Honi 14, Honi 18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: here is not sufficient infrastructure in place to allow for more housing development. S W Water cannot cope as it is with Honitons waste water plant already 40% over capacity. All developments will increase traffic on already busy roads and will increase poor air quality and noise due to this increase. All developments are on green field sites therefore impacting on wildlife and the environment.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: S W Water to completely build a new waste water treatment plant. Each development should have rainwater attenuation. Infrastructure such as increased capacity to GP surgeries, schools etc should be funded.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The basic infrastructure around Honiton cannot cope with increased traffic, increased patients to the surgery or increased children to the schools.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: S W Water to completely build a new waste water treatment plant. Each development should have rainwater attenuation. Infrastructure such as increased capacity to GP surgeries, schools etc should be funded.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I do not believe that EDDC have adequately engaged in Constructive Engagement, Strategic Planning: The duty emphasizes the importance of strategic planning, which involves addressing larger issues that cannot be resolved by a single authority alone. This includes policies related to sustainable development and environmental management. I do not agree that they have also Demonstrated Compliance

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Ceri lees

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Gitti_03, Gitti_04, Gitti_05

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This is a submission made on behalf of Gittisham Parish Council. The Gittisham Parish Council has consistently challenged the allocation of land for residential and industrial development on land to the west of Hayne Lane. The GPC have submitted as part of the 1st Reg19 consultation a wide range of objections to the allocations Gitti-03/04 and 05. The lack of detailed and robust infrastructure and viability assessments to support the delivery of proposed allocations has been an area of concern which has been previously raised by Gittisham Parish Council directly with EDDC. It is clear that sustainability has been sacrificed in order to meet housing and employment targets. The additional evidence now provided as part of the 2nd Reg 19 Consultation raises additional concerns regarding the allocation of residential and industrial land in unsustainable locations. It is also noted that an updated East Devon Local Plan Infrastructure Delivery Plan (IDP) has been submitted as additional evidence as part of 2nd Reg 19 consultation. The opening comments within that document state: Infrastructure delivery is fundamental to supporting sustainable development. Strategic and well-planned infrastructure ensures that new developments contribute positively to community needs and objectives. Developments lacking appropriate infrastructure risk being suboptimal or unacceptable and may result in environmental harm. Comprehensively understanding infrastructure requirements and establishing robust delivery mechanisms is crucial for substantiating the Local Plan, informing planning

documents, guiding Community Infrastructure Levy allocations, and supporting broader council initiatives. It is against the background of this statement together with the additional evidence to be found in the Waste Cycle Study Nov 2025 (additional evidence to support 2nd Reg 19 Consultation) that Gittisham Parish Council wish to reaffirm in this 2nd Reg 19 Consultation the objections previously made to the proposed allocations Gitti-03/04/05, and to submit that Honiton is not a sustainable location for the level of residential and industrial development being promoted. Prior to the publication of the Water Cycle Study (WCS) the Environment Agency (EA) in response to the EDDC Sustainability Appraisal (Feb 2025 page 77) expressed concerns about the Sustainability Appraisals “limited focus” on “...sewage capacity”. They also advised policies (in the new Local Plan) should “require proof of sewage infrastructure adequacy prior to any development approval” and also that “policies must explicitly tie development phasing to infrastructure delivery”. These concerns have now been confirmed. It is submitted that the findings contained within the Water Cycle Study together with the concerns of the EA, seriously undermine the likelihood of the Honiton allocations coming forward within the plan period. Looking in detail at the Water Cycle Study the current waste discharges into the River Otter at Honiton are significantly exceeding capacity and, that to meet the requirements resulting from the housing allocations alone at Honiton (including Gitti-05) would require an increase in capacity at the Honiton STW of 73%. That capacity would also have to be increased further as a result of the 15 ha industrial allocation at Gitti-03/04. It is notable that there is an absence of any SWW investment programme to provide any improvements at the Honiton STW. The level of investment required to address existing and future demands cannot be financed from developer contributions alone. Given the current and projected capacity issues at this STW together with the absence of any investment strategy by SWW, and in parallel with other known existing infrastructure deficiencies, it is submitted that Honiton cannot be regarded as a sustainable location for the scale of development that the Local Plan is promoting. Although the IDP and WCS are not part of the emerging Local Plan the IDP is “crucial for substantiating the Local Plan” (IDP para 1.2). Given its shortcomings the IDP clearly fails to perform this “crucial” task and, consequently challenges the soundness of the Local Plan. In the absence of there being a clear and robust viability assessment for each of the major Honiton allocations and particularly those allocations Gitti-03/04/05, and in the light of the new evidence, in particular the IDP and WCS, forming part of the 2nd Reg 19 Consultation, the Gittisham Parish Council continues to raise its objections to the continuing allocations of Gitti-03/04/05 for employment and housing purposes and to object in general to Strategic Policy SD03 : Honiton and its development allocations, as the evidence supports the opinion that Honiton is not a sustainable location for the scale of development proposed .

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The deletion of development allocations Gitti_03, Gitti_04, Gitti_05. These deletions would acknowledge the unsustainable characteristics of these allocations and furthermore would assist in the recognition of Honiton as an unsustainable location for significant residential and employment development.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: EDDC have failed to acknowledge the issues regarding viability, infrastructure deficiencies and sustainability in respect of the allocations Gitti_03/04/05 and in respect of Honiton in general.

Full name: Honiton Town Council

Organisation (where relevant): Honiton Town Council

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.: Honi_12 and Honi_18

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: Honiton Town Council supports the removal of Honi_12 from the site allocations in the draft Local Plan. Honi_12 provides amenity value to Honiton residents and is located within a National Landscape. A very well used public footpath goes through the site, which could not be replaced if the site was developed.

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Honiton Town Council reiterates its opposition to the inclusion of Honi_18. Honi_18 was referenced in the minutes of the Strategic Planning Committee meeting held on 11 December 2024 as being one of the “changes that had been made to some local plan chapters to ensure greater consistency of approach throughout the document and to address matters on potential development allocation sites that had been agreed by Committee as previous meetings.” A search of the previous agendas and minutes for the Strategic Planning Committee has found no reference to Honi_18 at all. It is clear that EDDC failed to properly consult on the allocation of Honi_18 and therefore its inclusion in Strategic Policy SD03: Honiton and its development allocations is not legally compliant. Concerns were also raised about the proposed access to the site.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally

compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Honi_18 should be removed as development sites from the Local Plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Honi_18 was referenced in the minutes of the Strategic Planning Committee meeting held on 11 December 2024 as being one of the “changes that had been made to some local plan chapters to ensure greater consistency of approach throughout the document and to address matters on potential development allocation sites that had been agreed by Committee as previous meetings.” A search of the previous agendas and minutes for the Strategic Planning Committee has found no reference to Honi_18 at all. EDDC failed to properly consult on the allocation of this site and its inclusion in Strategic Policy SD03: Honiton and its development allocations is not legally sound. Members of the Planning Committee also raised concerns regarding the proposed access to the site.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Honi_18 should be removed as development sites from the Local Plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Honi_18 was referenced in the minutes of the Strategic Planning Committee meeting held on 11 December 2024 as being one of the “changes that had been made to some local plan chapters to ensure greater consistency of approach throughout the document and to address matters on potential development allocation sites that had been agreed by Committee as previous meetings.” A search of the previous agendas and minutes for the Strategic Planning Committee has found no reference to Honi_18 at all. EDDC failed to properly consult on the allocation of this site and its inclusion in Strategic Policy SD03: Honiton and its development allocations fails to comply with the duty to co-operate.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Honiton Town Council wishes to ensure that its objections are put to the Planning Inspector by a representative of the Council.

Fisher German LLP on behalf of National Grid Electricity Transmission (NGET)

Following a review of the above Development Plan Document, we have identified that one or more proposed development sites are crossed by or in close proximity to NGET assets. Details of the site affecting NGET assets are provided below:

Policy SD03: Land north of Northcote Hill, Honiton (GH/ED/39a)- Asset Description: 4YA ROUTE TWR (002-112): 400Kv Overhead Transmission Line route: AXMINSTER-EXETER and CHICKEREL – EXETER

Policy SD03: Land south of Northcote Hill, Honiton (south of the railway) (GH/ED/39b) - Asset Description: 4YA ROUTE TWR (002-112): 400Kv Overhead Transmission Line route: AXMINSTER-EXETER and CHICKEREL – EXETER

A plan showing details of NGET assets is attached to this letter. Please note that this plan is illustrative only. NGET also provides information in relation to its assets at the

website below. <https://www.nationalgrid.com/electricity-transmission/network-and-infrastructure/network-routemaps>

NGET advocates the high standards of design and sustainable development forms promoted through national planning policy and understands that contemporary planning and urban design agenda require a creative approach to new development around high voltage overhead lines and other NGET assets.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Sites GH/ED/39a and GH/ED/39b The above proposed allocations interact with NGET assets as listed above. For the associated policies to be effective the following wording, or wording to the same effect, is required to be included within the relevant policy to ensure conflict between the assets and proposals is avoided. We propose the following wording be provided within Policy SD03:

“Development will include a strategy for responding to the NGET Overhead Cable Route present within the sites which demonstrates how the NGET Design Guide and Principles have been applied at the masterplanning stage and how the impact of the assets has been reduced through good design.”

Without appropriate acknowledgement of the NGET assets present within the sites, the related policy (SD03) should not be considered effective as it cannot be delivered as proposed; unencumbered by the constraints posed by the presence of NGET infrastructure. Without the wording above or equivalent being added, we must object to Policy SD03 as currently drafted.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Honi_13

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We note the additional policy text stating that “Areas of open space should be located to reduce the impact of development on the setting of adjacent listed building and the scale, design, lighting and materials of new development should be appropriate to the Blackdown Hills National Landscape”.

However, we continue to have significant concerns given the location and scale of development proposed on a site immediately adjacent to the grade II* Church of St Michael and All Angels and its graveyard, with potential for very significant setting impacts.

At the time of our site visit, it appeared that a single storey dwelling was being constructed on the site of a former outbuilding.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We continue to recommend that Honi_13 is removed from the plan.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD03

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Honi_07

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We note that Honi_12 has been removed from the site allocation. However, our principal concerns were with Honi_07 close to the grade II* church and lychgate, and grade II Former Sextons House. While adjustments to the policy in relation to the location of open space within the site, and to manage scale, design, lighting and materials are welcome, we suggest that these are adjusted to ensure that all aspects of design respond to both the designated heritage assets and National Landscape. It is unclear whether the stated capacity of 30 homes is achievable on this site with the recommended mitigation and we therefore request that a concept plan is provided to justify the site allocation and that, if necessary, the site capacity is reduced accordingly. It is also important that the Local Plan recognises the 'at risk' status of the Church of St Michael and All Angels (a church in the process of closure) and takes steps to address this. This is consistent with the 'positive strategy for the conservation and enjoyment of the historic environment' required by the NPPF.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We request a concept plan to justify the proposed capacity for the site allocation and that, if

necessary, the capacity is reduced accordingly. We suggest the following adjustments to the policy, taking the amended text as a starting point:

Text in brackets () should be deleted. “... Therefore a high-quality development scheme is required for the site, which is appropriate to the Blackdown Hills NL and conserves the setting of nearby listed buildings with carefully located with areas of open space and landscaping, (being located to reduce the impact of development on the setting of adjacent listed buildings) and the appropriate scale, design, lighting and materials of new development (being appropriate to the Blackdown Hills NL).”

Text to be added is in square brackets [] “The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes. To secure public benefits that offset harm to heritage assets, contributions will be sought [to secure the beneficial use and public access to the Church of St Michael and All Angels].”

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: NR consider the following changes are required to make the draft Policy sound in respect of Honi_18 and 39a/b. The allocation of these sites is welcome as they will stimulate rail demand as part of the Devon Metro vision. For this to take place however we would like to see a clearer requirement for good quality active travel routes linking the sites to the rail station. The current assumption for 39 a and b seems to be to use Northcote Hill / Monkton Road for active travel routes towards the station. Monkton Road is especially busy, as is the junction with High Street / Kings Road. It is challenging to see how this could be made an attractive and safe walking and cycling route. Consideration should be given to requiring the provision of a high-quality walking and cycling route between sites 39a/b and Honi_18. The route could potentially follow the railway and the tree line / stream up to Honi_18. As noted in the policy for Honi_18 there would need to be an effective crossing of Kings Road giving access to Pine Park Road and the connecting pedestrian path to the station. A further pedestrian crossing should be considered on New Street near the railway bridge. This link would have the benefit of providing an improved route to the town centre and college.

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Otry_01b

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Whilst the Landowner is supportive of draft allocation of Otry_01b, and agrees with the Council's conclusion that this is a suitable and deliverable site, and a sustainable location for development, amendments are considered necessary to the draft Plan prior to submission for examination, to ensure it appropriately meets East Devon's housing needs. The purpose of these representations is therefore to: 1 Outline the ongoing need for additional housing numbers in the Reg 19 2 Draft Plan 2 Support Otry_01b for allocation for at least an additional 20 dwellings, to provide 90 homes net and up to 1.25ha of employment land based on the Draft Plan's allocation area, and confirm the opportunity to extend the allocation to reflect Otry_09 to the north (with a shared access) and deliver a total of 190 dwellings (120 net to the draft allocation) and up to 1.25ha of employment land; and, 3 Comment on other changes to policies in the plan insofar as they relate to the promotion of housing development on the Landowner's site.

Policy SD04: Ottery St Mary and its development allocations Land at Barrack Farm – Otry_01b The Landowners position remains as at Reg 19 1; they support the allocation of Barrack Farm (Policy D04, Otry_01b) for housing and employment use, noting the Council clearly recognises that the Site is suitable and available. However, in accordance with NPPF para. 130(a), developments must make optimal use of the

potential of each site to meet as much of the identified housing need as possible. This also aligns with draft policy DS02 (efficient use of land). We note that this has been given even greater emphasis in the draft NPPF (Dec 2025) currently out for consultation, which states at Policy L2 Point 3 (‘making effective use of land’) that “...proposals for land which is not previously developed should use development footprints which optimise a site’s development potential” and at Policy L3 (which seeks efficient use of land) that “...development proposals that do not make efficient use of land in accordance with this policy should be refused”. It remains our position that, based on the technical assessment and initial design concept work, as set out in our Annex 1 Reg 19 1 representations, the site area subject to draft allocation Otry_01b has capacity to deliver circa 90 homes and 1.25ha of employment land. Further, based on subsequent review of draft allocation Otry_09 – including its physical extent/landscape characteristics and the requirement for a joint access with roundabout (which requires land from the Landowners/Otry_01b to deliver) – along with site specific constraints and opportunities, there is a clear opportunity to expand the Otry_01b allocation as set out at Figure 1.1. This expanded site would have capacity to deliver circa 190 homes and up to 1.25ha of employment land. Further technical work can be prepared for EDDC if helpful, to support this position. In addition to amendments to the allocation boundary as detailed above, Policy SD04 (Otry_01b) should therefore be redrafted to reflect this as follows (proposed new policy wording shown): “Barrack Farm (Otry_01b) This land at Barrack Farm, is allocated for around 190 new homes and up to 1.25 hectare of employment land provision, to be provided in accordance with Strategic Policy SP04. Archaeological assessment will be required prior to development commencing and will need to inform development proposals. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes. Development at this site should not fetter the potential for access to Otry_09, illustrating how both site entrances would work in harmony once both sites are delivered.”

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Otry_21

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

The Landowner is fully in support of the approach to allocate development in and around Ottery St Mary, a sustainable location. In response to the housing need assessment provided in Section 2.0 of this Statement and the settlement hierarchy established in policy SP01 of the draft Plan, Ottery St Mary can accommodate further growth in line with its Main Centre Status, assisting with delivery of the additional housing needed by EDDC. Land at Gerway Farm – Draft Allocation Otry_21

3.3?? Part of the land under the Landowner’s control is allocated (Otry_21, see Plan 1 above) “for 70 homes” under draft Policy SD04. Our Landowner supports this policy subject to: 1?? Capacity for all allocations should be consistently referred to as ‘around’ or ‘about’ (aligned with some of the other draft allocations) rather than fixing this at a set number, to build in the necessary flexibility and reflective of the fact that detailed design has not yet been undertaken; and 2?? The allocation should be expanded to include the land immediately to the west (see Plan 1 for expanded allocation area) to deliver a total of ‘around 150 units’. This is covered under Section 4.0 to follow.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Land at Gerway Farm – The Expanded Allocation

3.4?? The Ottery St Mary SSR considered the Landowner’s interests under two separate site references – see GH/ED/29a and GH/ED/29b at Plan 2 below. The Council’s assessment of GH/ED/29a (then draft allocated) and GH/ED/29b is the same for “infrastructure”, “landscape”, “historic environment”, “ecology”, “accessibility” and

“contribution to spatial strategy”. On this basis, and given that GH/ED/29a was found to be suitable for allocation, it would be consistent and logical to also allocate the expanded area proposed at Plan 1.

3.6?? The Council has concluded in the SSR that GH/ED/29b should not be allocated because: 1?? It forms an unacceptable extension into open countryside: Given the excessively large extent of GH/ED/29b assessed in the SSR, this appears to be a reasonable conclusion. 2?? It has inadequate access arrangements: Given the single point of access, and assuming the development of 200 units, this appears to be a reasonable conclusion. 3?? It is an unacceptable large scale: If this point is linked to the extent of the red line and the ability to access 200 units off a single access, this would appear to be a reasonable assumption. However, there is no evidence that the scale of development would be unacceptable against other indicators, including ‘infrastructure’ and ‘accessibility’. Critically, if a smaller area had been assessed – such as the land subject to this representation – a different conclusion would arise. 4?? The Council also identifies further reasons for not allocating GH/ED/29b but these fall away for the smaller area subject to these representations. For example, parts of the site are constrained but these are not insurmountable issues for the site extent now proposed for allocation. The SSR constraints can be addressed as: a?? The site is irregularly shaped and comprises grade 2 and 3 agricultural land: Whilst this is applicable to wider GH/ED/29b (i.e. the land to the south is largely Grade 2), the proposed expanded allocation area shown at Plan 1 is largely grade 3 agricultural land with some small areas of grade 2 agricultural land in the southern area of the land parcel. It is also important to confirm that the allocation extent in the Draft Plan (GH/ED/29a) contains a similar proportion of Grade 2 vs Grade 3 land, demonstrating this was accepted by EDDC. b?? Part of the site is within floodzones 2 and 3: None of our Landowner’s site is in flood Zone 3. A small part is within flood zone 2 (associated with low lying land) and we explain in Section 4.0 that any risks can be mitigated through reprofiling and a suitable drainage system. c?? Potential access to Claremont Field would need to cross a band of floodplain: This does not apply to the promotion site because development can be accessed without requiring a new vehicular access to Claremont Fields; access can be taken from Sidmouth Road. The existing Public Right of Way will be retained and as per above any flood risk can be managed. d?? A small area of surface water flood risk crosses the site: A small area of surface water flood risk is within GH/ED/29a. Remaining surface water flood risk broadly follows the fluvial Flood Zones 2 and 3 that runs north-east to north-west across the northernmost part of the site, which can be managed as per above. e?? The HSE major hazard pipeline runs through the southern edge of the site and the consultation zone extends to cover approximately 4.2ha of the site (approx. 0.35ha of which is also floodplain). We have received confirmation from HSE that there are no implications for the expanded allocation site (Appendix 5). f?? Electricity wires cross the site and would need to be undergrounded: Electricity lines

cross our Landowner's ownership and can be re-routed or undergrounded at the application stage. This 'constraint' would not preclude residential development. g?? It is very sensitive in heritage terms: We assume this is a reference to historic field enclosure pattern to the south of our Landowner's ownership. As per draft allocation Otry_21, further evaluation will be needed but we explain below that geophysical surveys currently suggest no archaeological interests that would require preservation in situ. h?? It is visible in long range views: We understand that the Council might be concerned about the impact of development across the whole of GH/ED/29b. However, Otry_21 was found to be acceptable in landscape terms and the principles would apply to the expanded allocation area. We comment further on landscape and visual impacts at Section 4.0 below. In assessing GH/ED/29b, the Council misdirected itself by not looking at this area at a finer grain. The constraints – and apparent weaknesses - are not equally applicable across the whole site. Notably, the constraints do not affect the expanded allocation area to the same degree and the site promoted in these representations is more akin to the assessment of Otry_21 and can therefore be allocated. The Landowner is proposing that Otry_21 is extended as shown on the framework plan below to form 'Amended Allocation Otry_21', delivering a total of about 150 houses. This is hereafter referred to as 'the site'. The site is suitable for housing. The Vision Document (Appendix 1) explains that a wellconceived scheme can be delivered which responds positively to the site's context, achieves ecological enhancement and creates an appropriate landscape setting. Overall, housing can be delivered on the current draft allocation (eastern parcel) and the western parcel. It would be possible to provide extensive landscaping. Beyond this, further to the west, a significant area of land could be utilised to achieve a well-connected network of publicly accessible green and blue infrastructure. Landscape and Visual Impact

4.3?? The Vision Document explains that: 1?? Only limited parts of the site will be visible in views from the footpath network to the south. From most views, the site will be seen on the context of existing built development. 2?? View from Sidmouth Road to the south would be occasional glimpses. The site is well screened by high hedgerow and roadside banks. 3?? Views from publicly accessible locations in the wider landscape are well contained, screened by hedgerows/woodland block or viewed against the backdrop of existing development. Extensive landscaping could be accommodated on site. Existing trees and hedges can be retained, managing the impact of development in the local context.

4.5?? The site is located approximately 1.5km from the East Devon National Landscape. From its boundary, the town is seen in distant views. The changes at the site, viewed from the edge of the Natural Landscape would 'read' in the context of existing development. As a result, we would expect the special qualities that contribute to the landscape and scenic beauty of this part of the Natural Landscape to be conserved and

that its setting would not be materially altered by this development. Transport and Access

4.6?? Connect Consultants has prepared a Highways and Transport Technical Note (Appendix 2). It explains that the site: 1?? Is suitable for development because a range of facilities and services are readily accessible by walking, cycling, and public transport, meeting the requirements of draft Local Plan Strategic Policy TR01 (walking, wheeling, cycling, and public transport). 2?? There is capacity in the highway network to accommodate about 150 houses with no unacceptable impact on the local road network. 3?? Vehicular access can be achieved from Sidmouth Road. An initial design of a simple Tjunction is achievable and suitable for about 150 homes. A safe segregated pedestrian route can be created from the site along the western side of Sidmouth Road to connect to the existing pedestrian footway at Gerway Close, from where there is a continuous pedestrian route into Ottery St Mary. 5?? Pedestrian routes within the site can accommodate the existing Public Rights of Way and link through to Claremont Field.

4.7?? Detailed requirements for a travel plan/transport statements/transport assessments (draft Strategic Policy TR03) and regarding car/cycle parking and charging points can be addressed at the detailed design stage (draft Strategic Policy TR04: Parking standards - Residential).

4.8?? The site is within the Aerodrome Safeguarding outline area, but residential development will not exceed three storeys, nor will it have high structures, and it will therefore not likely interfere with radio signals or create bird strike hazards.

4.9?? In assessing Otry_21 and GH/ED/29b, the Council notes in the SSR that: “Sidmouth Road at this point is a reasonably wide C-class road, potentially capable of accommodating additional development and associated movements in itself. However, the road narrows significantly towards Sidmouth to the south and access into and through Ottery is constrained by narrow roads and a single route through the town centre. Further investigation may be required to determine if more significant highways improvements (bypass/distributor road) might be necessary. Development of the site has the potential to impact on Junction 29 of the M5, which suffers from congestion at peak periods.” The Transport Technical Note explains that analysis has been undertaken (using DataShine Commute) to establish the likely trip distribution for about 150 houses. It confirms that traffic effects during the weekday AM and PM peak hours are likely to be in the region of: 1?? An additional 64 vehicles in the AM peak and 59 in the PM peak are likely to travel on Sidmouth Road north of the Site, which will disperse within the road network in Ottery St Mary. This equates to an average of approximately one additional vehicle per minute, which is not likely to result in an unacceptable impact. 2?? Only 10-13 additional vehicles are shown to travel on Sidmouth Road south

of the Site during the AM and PM peak hours. Again, this is not likely to result in an unacceptable impact.

4.11?? The Transport Technical Note concludes that satisfactory access can be achieved. The promotion site is deliverable from a transport and movement perspective.

Heritage and Archaeology

4.12?? There are no heritage issues above or below ground that would preclude the site being allocated. Of note; 1?? A desk-based heritage assessment and geophysical survey of site GH/ED/29 (including the promotion site) were undertaken by the Council in 2023. They provide evidence of archaeological potential and suggest that the promotion site may have been part of the open field system associated with the town in the later medieval period. The field pattern survives in part to the south of the promotion site, but otherwise has been eroded through the removal of hedgerows to create larger fields for modern farming. 2?? The geophysical survey recorded sub-surface remains of the former field boundaries within the promotion site. There is potential to restore some of the lost boundaries as part of the proposed green infrastructure, presenting a heritage benefit. 3?? There are no indications that any of archaeological features would be of the higher level of significance that would warrant preservation in situ.

4.13?? In summary, as per the existing Otry_21, no heritage constraints have been identified that would prevent development on the promotion site.

Ecology

4.14?? The SSR explains that Otry_21 and GH/ED/29 would result in a predicted “minor adverse effect...(not significant)” on Ecology. The same conclusion applies to the expanded allocation i.e. the site.

4.15?? The Ecology Appraisal (EA) (Appendix 3) confirms that the site is not affected by; i?? any habitat designations; and ii?? has limited ecological value.

4.16?? It does provide suitable habitat for a range of species including protected species such as badgers and dormouse. Habitats of higher ecological value are trees, hedges, and the riparian corridor associated with the River Otter. The initial Framework Plan shows that mitigation can be designed into the development, including the retention of trees and hedgerows, additional planting and the management of a significant area of green space to the west of the site for biodiversity gain. The need for further mitigation can be addressed at the planning application stage.

4.18?? A protected belt of trees is identified along the western boundary of the wider site to be used for green space, and further protected trees in the northwestern point of the wider site, and many mature and veteran trees are noted within the SSR.

4.19?? The site is located within the East Devon Pebblebed Heaths SAC HRA mitigation zone. There is an adopted strategic mitigation solution, The South-East Devon European

Sites Mitigation Strategy, involving financial contributions, with which the Otry_21 and the promotion land can also comply (EA para 3.6).

4.20?? There are no issues that would preclude housing development on the site. At least 10% Biodiversity Net Gain (BNG) in accordance with statutory requirements can be achieved given scale and control of the site. Emerging policies can be satisfied; 1?? Strategic Policy PB01, protecting internationally and nationally important wildlife sites. 2?? Policy PB03 of the Draft Plan, irreplaceable habitat and habitat features, such as hedgerows, will be maintained. 3?? Strategic Policy PB04, which sets out mitigation measures with respect to the Pebblebed Heaths Habitats Site would be adhered to in line with the South-East Devon European Sites Mitigation Strategy. Policy PB07, which outlines design expectations for ecological enhancement and biodiversity in addition to BNG. 5?? Policy PB08, which relates to the accommodation of trees, hedges and woodland in built development. 6?? Policy PB09, which outlines the approach to monitoring new planting schemes. Flooding and drainage

4.21?? The Technical Note on Flooding, Water Efficiency, Green & Blue Infrastructure (Appendix 4) explains that: 1?? A small area of land to the north of the site is within flood zone 2 and 3. The Vision Document shows that about 150 houses can be developed on the site without any incursion into the flood zone. 2?? There are pockets of land around the site boundary that are at risk from surface water flooding, but this is reflective of low-lying land and can be addressed through reprofiling and the introduction of suitable drainage systems. 3?? Additional mitigation if needed, can be addressed by ensuring appropriate finished floor levels which can be fixed at the planning application stage. 4?? Sustainable Drainage Systems will be utilised to control surface water runoff and ensure ecological benefits. The Vision Document shows scope for provision to the west of the site. 5?? Water efficiency can be addressed at the detailed design stage and can be achieved through the installation of reduced water fittings and water butts as needed.

4.22?? There are no flood risk or drainage matters that would preclude development of the site for about 150 houses and any proposal would accord with the requirements of draft Strategic Policy AR01 regarding Flooding. Summary and suggested policy wording

4.23?? The site is a deliverable and sustainable opportunity to help meet East Devon's housing in the early-mid Plan period.

4.24?? The evidence above identifies; 1?? The site is necessary to provide the additional housing numbers required for East Devon and could deliver about 150 new homes in total; 2?? There will be no detrimental impact on the highways infrastructure; 3?? The National Landscape is unaffected; 4?? The site is well connected the town centre for pedestrians and cyclists; and, 5?? Other technical policy issues relating to heritage, ecology and flood risk can be addressed at the planning application stage.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We propose that the boundary of allocation Otry_21 is as per the plan at Appendix 6 and that the wording of Strategic Policy SD04: Gerway Farm is amended as below - additions in square [] brackets and deletions in normal () brackets. (This) Land at Gerway Farm, off Sidmouth Road, is proposed for [about 150 houses and associated infrastructure] (70 houses). Archaeological assessment is required prior to development. (Further f) [F]lood risk assessment and measures to ensure that safe cycle and pedestrian access to nearby facilities can be achieved will be required.”

Update on the Site

1.3 The Council should note the following as an update in respect of site promotion and matters that are relevant to any consideration of deliverability: 1 Land to the east (brown in Figure 1.1), which is allocated for housing development (70 homes) in the Draft Plan (Policy SD04 Otry_21) and referred to as the “eastern parcel” is unchanged. 2 Land to the west (yellow in Figure 1.1), which is unallocated but represents a viable and logical opportunity to deliver more houses, referred to as the “western parcel” [the eastern and western parcels combined are now subject to a live planning application for up to 140 homes – see para. 1.4 for further detail]. 3 Additional land (outlined in blue at Figure 1.1) under the same ownership which is available for Biodiversity Net Gain and green/blue infrastructure to support the delivery of the housing allocation, referred to as the “additional land” [the extent of the ‘additional land’ has been reduced from that promoted as part of the Reg 19 1 consultation, to reflect the requirements of detailed technical work prepared in support of a planning application; it therefore accurately reflects the land required to support delivery of 140 homes]. Following the progression of the application, this area has been reduced relative to the site promoted at Reg 19 1. On 2 December 2025 (post Reg 19 1), Landra submitted a planning application for the site (ref. 25/2468/MOUT) to EDDC for the following development: “Outline application (with all matters reserved except for access from Sidmouth Road) for the demolition of a farm building and the erection of up to 140 residential dwellings (Class C3) with associated infrastructure and engineering works including landscaping, open space, surface water drainage and internal roads/footpaths/cycleways.” [see Figure 1.2 below

for the Illustrative Landscape Masterplan]. This application has been prepared in the context of a significant shortfall in EDDC's 5-year housing land supply, an out-of-date plan, and the engagement of the presumption in favour of sustainable development and associated tilted balance i.e. NPPF para. 11. However, its submission, with associated comprehensive and robust technical evidence, clearly demonstrates the suitability, availability and deliverability of the expanded allocation Otry_21 to comprise both the eastern and western parcels, delivering up to 140 homes. It is essential that sites such as this, in locations concluded to be sustainable for housing development, are allocated in the emerging Local Plan to increase housing numbers and address current flaws. We explain below that, subject to the grant of planning permission, up to 140 homes could be delivered in early-mid plan period.

1(b). Does your comment relate to one of the changes listed above?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

This policy outlines the settlement hierarchy and overall approach for focussing development. Development will be directed towards the most sustainable locations, and Ottery St Mary is included Local Plan Regulation 19 Representations “ Ottery St Mary Sites as a Tier 2 settlement on the hierarchy and is designated as a Main Centre. It is stated that the Council will promote significant development in Main Centres to serve their own needs and that of the wider surrounding area.

4.2.2 The policy where it directs development to sustainable locations is considered sound. And the approach of focussing development to Ottery is sound. However, there are concerns with the lack of growth directed to Ottery as additional growth beyond that identified can be sustainably and appropriately accommodated on sites already known to the council.

Additional comments on strategic matters

4.2.8 KCS welcomes Ottery St Mary being identified as a Main Centre. However, compared to other settlements at this level in the hierarchy, there is a lack of growth in Ottery.

4.2.9 Ottery St Mary is as sustainable as other Main Centres (such as Axminster) and it has the capacity to provide for similar levels of allocations. Currently under Strategic Policy SP03, Axminster provides for nearly three times as many allocated dwellings as Ottery St Mary. Therefore, there is an opportunity for the delivery of further residential allocations to fully utilise the sustainable location of Ottery St Mary and to provide for ‘headroom’ allocations to ensure that the housing requirement is met. Bolstering housing supply in the plan to secure the requirement ‘headroom’ would ensure that the plan was positively prepared.

4.2.10 In reference to the proposed settlement boundary, we concur with the inclusion of allocation GH/ED/27 within the boundary. However, the inclusion of the eastern fields of site GH/ED/26 within the settlement boundary would effectively round-off the settlement and provide a stronger defensible boundary. It would also ensure that those areas close to facilities are allocated for development.

4.2.11 Regarding the policy relating to development outside of settlement boundaries, this is unsound due to its lack of flexibility. It does not consider the scenario if a five year housing land supply cannot be demonstrated. The plan does not consider windfall market housing schemes adjacent to settlement boundaries. Another policy deems

that rural exception affordable schemes coming forward on the edge of settlements are acceptable. However, these are only small scale and generally consist of just affordable housing and would not be able to meet general housing requirements if a five year housing land supply cannot be demonstrated.

GH/ED/26

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

These representations are submitted by Stantec on behalf of KCS Development who have land interests in Ottery St Mary. The representations respond to the second East Devon Local Plan Regulation 19 Publication Draft consultation that is running from November 2025 to January 2026.

1.1.2 KCS is actively promoting two sites in Ottery St Mary through the emerging local plan, these sites being: ? Land at Strawberry Lane, which benefits from a draft allocation for housing in the emerging local plan (draft allocation site GH/ED/27), and this allocation continues to be supported. ? Land West of Cadhay Lane (site assessment reference GH/ED/26), which is a sustainable and well located site but is not currently proposed for allocation. Allocation or part allocation of the site would be entirely logical. The representations are made in the context that the Council does not have a five year housing land supply, and indeed has an acute shortfall with the current supply position being at best 3.5 years. The emerging Local Plan sets out a five year supply based on a stepped trajectory. However, this stepped trajectory is based on early delivery of existing sites with planning permission and smaller allocations, with higher delivery in later years being reliant on a number of larger allocations including a new settlement. Therefore, there is a risk that the plan will not deliver against needs. As such, additional logical sites are required and Ottery St Mary is a sustainable settlement, well placed to accommodate further allocations.

1.1.6 In summary, there is a clear need for additional housing in East Devon to respond to issues of overall supply of both market and affordable housing and the above sites can directly respond to this immediate need whilst also contributing to longer term plan-led supply. KCS is promoting two sites, both located in Ottery St Mary which is a

suitable and sustainable settlement for growth as accepted in both the adopted and emerging local plans.

2.1.2 The adopted Local Plan sets Ottery St Mary as an ‘Area Centre’ where ‘the viability of the town centre will be enhanced through additional housing development’ and that the settlement has a major supermarket, bus links, primary school as well as other services and amenities. The emerging Local Plan sets Ottery St Mary as a Main Centre where significant development levels can be promoted and so it is a sustainable location for growth.

2.1.3 The sites are sustainably located being close to a range of facilities within walking distance and within Ottery St Mary are schools, medical services, shops, cafes, pubs and other local amenities. Bus stops are within walking distance and benefit from regular services to Exeter and surrounding settlements. The nearest train station is Whimble approximately 4 miles to the north-west which has regular services to Exeter, London, Salisbury and Woking. The sites are also close to the A30 as a strategic highway which links to the M5 and other key locations.

2.1.4 Exeter is approximately 12 miles to the east, and is accessible by a range of means of transport options, where there is a significant and comprehensive range of services and facilities commensurate to Exeter being a key major settlement in the region. These include Exeter Airport, mainline rail stations, larger hospitals, main retail, leisure and cultural uses, universities, and a wide range of shops, cafes, pubs, restaurants, museums, theatres and bars.

2.1.5 The site specific background on each of the sites, land at Strawberry Lane and land at Cadhay Lane, is outlined below. Land West of Cadhay Lane

2.3.1 The overall land under control extends to approximately 23ha. Of this site, the two eastern most fields adjoin the settlement and extend to approximately 6.8ha. The overall site could deliver up to 400 dwellings, with the smaller area (6.8ha) being promoted for development of approximately 150 homes.

2.3.2 The site is identified in the emerging local plan evidence as site GH/ED/26 but is not allocated for development in the emerging plan. The site adjoins the settlement boundary and is in a sustainable location with access to local services and facilities within walking distance, as accepted in the council’s assessment of the site through the emerging local plan site selection process.

2.3.4 In terms of neighbouring uses, Strawberry Lane is to the south, and there are further agricultural fields to the west. There is a playing field to the east of the site. The King’s Reach housing development is located to the east of the playing fields and adjacent the south east corner of the site. There is a draft housing allocation immediately to the north (LP_Otry_01b) and a further allocation beyond that

(LP_Otry_09), and the Strawberry Lane draft allocation to the south east (site GH/ED/27).

2.3.5 The site is wholly located in Flood Zone 1 and there are no heritage, environmental or landscape designations covering or in close proximity. There is limited tree coverage.

2.3.6 There are no Public Rights of Way Crossing the site. Access into the site could be via a new junction to the south-east and further improvements to Cadhay Lane / Strawberry Lane would facilitate housing on site and provide wider benefits. Cadhay Lane - the proposed allocation

2.3.7 In terms of detailed design and technical matters, the layout can: ? Work with the existing site constraints. ? Include strategic and structural planting, such as the western and southern boundary to minimise potential landscape impact. ? Incorporate areas of publicly accessible green space. ? Provide sustainable drainage features. ? Provide walking and cycling routes both to/from Ottery St Mary and around the western edge of the settlement (linking to adjacent allocations).

2.3.8 Additionally, the following matters can be accommodated in the layout and development: ? Landscaping and planting which offers additional biodiversity benefits. ? Ecological features can also be provided within the site and/or on adjoining land. ? The site is within the least constrained area around the town in landscape terms. ? Vehicular access can be provided, without severe effects on the local highway network. Indeed, highway improvements associated with development of this site would benefit the wider area, providing an improved link between Barrack Road and Strawberry Lane.

2.3.9 Therefore, the site layout can respond to the site characteristics and there are no significant constraints that would prevent the development from being delivered.
Cadhay Lane - Previous plan representations

2.3.10 The site has been consistently promoted through previous Local Plan consultations, including most recently the first Regulation 19 consultation (early 2025) stage, and the site is identified as site GH/ED/26 in the emerging plan. In the emerging plan Site Assessment, it is stated that the site has not been allocated as the: Site is a significant greenfield site which would extend into open countryside. It has high ecological and heritage sensitivities and development would be visible from a considerable distance.

2.3.11 These representations will consider the site allocation and explain that a smaller allocation would be proportionate to the site and the settlement and would neatly round off this area of the town when considering other proposed allocations. Land west of Cadhay Lane (site GH/ED/26)

6.1 Site Summary and allocation benefits

6.1.1 The site is a suitable, appropriate, and sustainable location for residential development. It is concluded a smaller site than that considered by the council could be reasonably allocated.

6.1.2 The local plan evidence is predicated on the entire site being allocated for development. However, the evidence fails to recognise that a smaller area of the site is being promoted that being the eastern part of the site where it adjoins Cadhay Lane and the playing field such that the site boundary mirrors the proposed allocation to the north. It should also be noted that the draft allocation site to the north is further from local services and arguably less sustainable location than site GH/ED/26.

6.1.3 All potential technical matters can be addressed through typical scheme design. Furthermore, Ottery St Mary is a wholly suitable and sustainable location for further housing growth. Its sustainability is evidenced by its designation as an Area Centre in the adopted and emerging Local Plan.

6.1.4 It is noted the site is within a revised proposed draft 'Green Wedge', as proposed elsewhere in the current Regulation 19 consultation. Further analysis of this is provided in section 4 of this document, however, in summary, the revised Green Wedge is unsound and is neither logical nor supported by sufficient evidence. A partial allocation of the site for residential development would be supported, which would include the two fields in the eastern part of the site (as identified in previous representations and summarised below). This would deliver a number of significant benefits, including: ? Development would provide a strong defensible boundary to the edge of Ottery St Mary, ? It would include high quality landscaping and public realm works in-keeping with the edge of settlement location, ? The landscaping and planting offer additional benefits in terms of biodiversity net gain. ? Ecological features can be provided within the site and/or on adjoining land. ? The site is within the least constrained area around the town in landscape terms as shown in the submitted comparison document. ? Vehicular access can be provided, without severe effects on the local highway network. The provision of highway improvements through a north / south link road through the allocation site would be a benefit for the local area. ? Further residential allocation in Ottery St Mary will aid the vitalisation of the town centre and be in line with the settlement hierarchy, ? The opportunity exists to connect into good bus, bicycle, and pedestrian links to key local services, facilities and employment sites, and ? This site can help meet housing requirement in the first five years of the plan period, ? It would deliver notable affordable housing in an area of need. The site is an entirely sustainable, logical, and deliverable site which can meet local housing needs in the short to medium term.

6.1.7 Ottery St Mary has the capacity to deliver a similar amount of growth as Axminster due to its sustainability as a Main/Area Centre. Delivery of further allocations would bolster housing supply and create more certainty around the delivery of the 'headroom'

supply. Further, the site is also comparatively equal or better, sustainable, deliverable, and suitable in comparison with other sites put forward for allocation in Ottery St Mary. In line with the NPPF, the site is deliverable as set out in the below table Council assessment of the site

6.2.1 The western edge of Ottery St Mary is accepted (in the draft plan and Sustainability Appraisal) as the least constrained and therefore most suitable area for growth in the town. In reality, GH/ED/26 is a logical extension to the settlement in a location where other sites have been identified as being acceptable in planning terms.

6.2.2 The council's site assessment for GH/ED/26 concludes that the site 'is rejected as it does not abut the town and wholly extends into open countryside. There are heritage, ecology and visual impact concerns. The site is part of an area identified in the adopted neighbourhood plan where development should be restricted to prevent settlement coalescence

6.2.3 Previous representations promoted both a larger and smaller allocation of GH/ED/26 as being appropriate in the additional sites consultation of 2024, alongside the restating of this in our submission to the first Regulation 19 consultation.

6.2.4 It is relevant to note that site Otry_01 (to the north of the Cadhay Lane site) was promoted as a single large site and yet the Council assessed and allocated only part of that site (Otry_01b) due to concerns with allocating the site as a whole. By comparison, the entirety of GH/ED/26 was assessed and there was no consideration of the benefits of partial allocation (namely the two fields to the east).

6.2.5 As full extent of the Cadhay Lane site continues to be assessed and considered by the council the conclusions reached in the SA and site specific assessment are not accurate and the site should score significantly better in the assessment. This is outlined below: The above updated scoring matrix, taking the smaller site area into account, shows the site scores well against the key assessment criteria. The only outright negative score relates to landscape, and the same score is given to all sites in the SA and site assessment. By comparison to the council's assessment, the smaller site improves on at least three previously negative themes. Firstly on biodiversity, as there are only boundary trees and no adjacent woodland. Secondly in relation to the historic environment, given that the smaller site is now not in close proximity to heritage assets. Third, in relation to climate change adaption the smaller site is not within Flood Zones 2 or 3.

6.2.7 The council's latest site assessment also states that the remoteness of the western part of the site was a reason for the rejection of a site allocation. Given that the smaller part allocation of the site only covers the eastern fields, this reason for not allocating the site should be removed.

6.2.8 An updated site assessment for the smaller parcel addresses the previous negative scores and would not adversely effect the gap between Ottery St Mary and West Hill. A smaller site would not lead to coalescence and it would not overly encroach into the countryside given the proposed boundaries of draft allocations to the north. Ottery St Mary has the capacity to accommodate more dwellings to make provision more in line with other settlements on the same level of the hierarchy. The western area of Ottery is the least constrained and so the site is a logical allocation.

6.2.10 Despite the clear benefits of part allocating GH/ED/26 and the significant further detail provided in the previous Draft Plan representations the site has not been considered for allocation. The Council should have properly reassessed the site with this information and part allocation in mind.

6.3 Assessment Against Other Sites

6.3.1 It should be noted that two other sites have been allocated on the western side of Ottery St Mary, beyond the current built development line. These are allocations Otry_09 and Otry_01b.

6.3.2 The Cadhay Lane site either performs as well as or better than other draft sites (excluding the employment score for Otry_01b as this proposes a mix of uses including employment). The allocation of land to the west of Cadhay Lane would better round off the settlement limits of Ottery. The below table shows the smaller site score performance of GH/ED/26 against Otry_09 and Otry_01b. It is relevant to note that site Otry_01 was promoted as a single large site and yet the Council assessed and allocated only part of that site (Otry_01b). By comparison, the entirety of GH/ED/26 was assessed and there was no consideration of the benefits of partial allocation (namely the two fields to the east). Therefore, some of the approaches to analysis in the evidence base are unsound in line with Paragraph 36 of the NPPF.

6.3.4 Part allocation of site GH/ED/26 is entirely logical and in line with current adjacent allocations. Residential development here would bolster the housing land supply and provide certainty for the delivery of the ‘headroom’ dwellings required. In line with previous Draft Plan representations land west of Cadhay Lane (site GH/ED/26) is deliverable, is located adjacent a sustainable settlement, and has no insurmountable technical constraints. However, despite the council recognising that further housing sites are required, the site is not proposed for allocation. An updated site assessment, for a smaller part allocation of GH/ED/26, concludes that the site generally performs better than or the same as other allocations on the western side of Ottery St Mary. In fact, the western side of the town is the least unconstrained and residential development of GH/ED/26 would effectively round-off the settlement boundary. A part allocation of GH/ED/26 is both logical and sound.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
GH/ED/27

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

These representations are submitted by Stantec on behalf of KCS Development who have land interests in Ottery St Mary. The representations respond to the second East Devon Local Plan Regulation 19 Publication Draft consultation that is running from November 2025 to January 2026.

1.1.2 KCS is actively promoting two sites in Ottery St Mary through the emerging local plan, these sites being: ? Land at Strawberry Lane, which benefits from a draft allocation for housing in the emerging local plan (draft allocation site GH/ED/27), and this allocation continues to be supported. ? Land West of Cadhay Lane (site assessment reference GH/ED/26), which is a sustainable and well located site but is not currently proposed for allocation. Allocation or part allocation of the site would be entirely logical.

1.1.3 Land at Strawberry Lane is subject of a current planning application for 65 high quality homes (application 24/1716/MOUT). Technical matters are or have been addressed and the application is likely to be determined in the coming weeks. The representations are made in the context that the Council does not have a five year housing land supply, and indeed has an acute shortfall with the current supply position being at best 3.5 years. The emerging Local Plan sets out a five year supply based on a stepped trajectory. However, this stepped trajectory is based on early delivery of existing sites with planning permission and smaller allocations, with higher delivery in later years being reliant on a number of larger allocations including a new settlement. Therefore, there is a risk that the plan will not deliver against needs. As such, additional

logical sites are required and Ottery St Mary is a sustainable settlement, well placed to accommodate further allocations.

1.1.6 In summary, there is a clear need for additional housing in East Devon to respond to issues of overall supply of both market and affordable housing and the above sites can directly respond to this immediate need whilst also contributing to longer term plan-led supply. Sustainable context of the sites and Ottery St Mary

2.1.1 KCS is promoting two sites, both located in Ottery St Mary which is a suitable and sustainable settlement for growth as accepted in both the adopted and emerging local plans.

2.1.2 The adopted Local Plan sets Ottery St Mary as an ‘Area Centre’ where ‘the viability of the town centre will be enhanced through additional housing development’ and that the settlement has a major supermarket, bus links, primary school as well as other services and amenities. The emerging Local Plan sets Ottery St Mary as a Main Centre where significant development levels can be promoted and so it is a sustainable location for growth.

2.1.3 The sites are sustainably located being close to a range of facilities within walking distance and within Ottery St Mary are schools, medical services, shops, cafes, pubs and other local amenities. Bus stops are within walking distance and benefit from regular services to Exeter and surrounding settlements. The nearest train station is Whimple approximately 4 miles to the north-west which has regular services to Exeter, London, Salisbury and Woking. The sites are also close to the A30 as a strategic highway which links to the M5 and other key locations.

2.1.4 Exeter is approximately 12 miles to the east, and is accessible by a range of means of transport options, where there is a significant and comprehensive range of services and facilities commensurate to Exeter being a key major settlement in the region. These include Exeter Airport, mainline rail stations, larger hospitals, main retail, leisure and cultural uses, universities, and a wide range of shops, cafes, pubs, restaurants, museums, theatres and bars.

2.1.5 The site specific background on each of the sites, land at Strawberry Lane and land at Cadhay Lane, is outlined below. Land at Strawberry Lane

2.2.1 The site extends to approximately 3.9ha and is agricultural land south-west of the town which adjoins the settlement boundary. There is existing field access to the west of the site which can be utilised for future access, and a public right of way crosses the site approximately in the location of this access

2.2.2 Development at the site is a logical location for growth in the town and is proposed as an allocation for up to 60 homes in the draft local plan (site GH/ED/27).

2.2.3 The site also benefits from a well advanced outline planning application (reference 24/1716/MOT) for up to 65 homes which demonstrates the site is entirely suitable and deliverable. It is expected that the application will be determined favourably in the coming weeks as a comprehensive response to all consultee comments on the scheme was provided in November 2025. Landscape, ecology, tree, highways, and affordable housing viability comments have been incorporated into the scheme where viable. Notably, this has included an enhanced landscape plan, as well as additional footpath linkages and traffic calming measures.

2.2.4 There is existing residential development to the north, south and the south-east of the site, a draft housing allocation site to the east, with agricultural land to the west. Strawberry Lane runs along the north and western boundary of the site. Agricultural fields and a dwelling are to the west of the site. Hedgerows border most of the site with some trees on the northern boundary and to the south. A portion of the site to the south lies within Flood Zones 2 and 3 due to the beck along the southern boundary. There is an area of Priority Habitat Deciduous Woodland adjacent to the south-west of the site. The site lies within the SSSI Impact Zone for the East Devon Pebblebed Heaths SSSI.

2.2.6 There are no Listed Buildings or Scheduled Monuments on the site and the site is not in a Conservation Area, with the nearest heritage assets being the Grade II Listed Salston Lodge to the south. Land at Strawberry Lane (site GH/ED/27)

5.1.1 This site has been promoted to the emerging Local Plan for East Devon since the initial Issues and Options Consultation in early 2021. Since then, a number of further consultations have taken place and the Council's evidence base has been progressed.

5.1.2 Policy SD04 outlines housing allocations in Ottery St Mary and Land south of Strawberry Lane is included under reference GH/ED/27. The site allocation policy states: This land lies south of Strawberry Lane and is proposed for 60 houses. Archaeological assessment will be required prior to development commencing. This allocation will need to be supported by further FRA work, details of special measures to be taken to protect ancient trees and measures to ensure that safe cycle and pedestrian access to nearby facilities and Ottery St Mary town centre can be achieved. Part of the site is at risk of flooding and a Level 2 SFRA has been undertaken, the results of which should be incorporated into the development. A sequential test has been undertaken as part of the local plan. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes.

5.1.3 As stated previously, KCS supports the sound allocation of this land. The emerging plan is entirely sound in allocating the site. All technical matters have been investigated and found that appropriate mitigation to any possible adverse effects can be addressed through the planning process. There is a current planning application (24/1716/MOUT) for outline consent for up to 65 dwellings, and almost all technical matters related to

the development have been resolved and/or are close to resolution. There are significant benefits associated with the proposals including affordable dwelling provision and the incorporation of pedestrian recreational routes.

5.1.5 The planning application also considers the criteria set out in the allocation policy. Therefore, the application has been supported by Flood Risk Assessment work and measures to mitigate against this such as only locating built development in Flood Zone 1. There has also been archaeology trial trenching carried out at the site and a geophysical survey submitted in support. Further, connectivity for pedestrians and cyclists has been a consideration in the design of the scheme with the existing PROW being retained but slightly diverted and an extra connection to the north of the site added. Further, it should be noted that no trees are to be removed for development.

5.1.6 Significant off-site highways improvement works are not required to bring this site forward. Highways modelling undertaken as part of the planning application demonstrated that the number of vehicle movements forecast to be generated by development at the site is low and can be accommodated.

5.1.7 There are sustainable access options for pedestrians/ wheelers both along Strawberry Lane and through existing developments, which link the site to the town centre and other nearby services. Furthermore, traffic calming measures can also be incorporated adjacent to the scheme alongside a new footpath link added from Strawberry Lane to the Kings Reach development. The site can therefore make a meaningful contribution of the council's five year housing land supply position both immediately and within the local plan five year supply. Therefore delivery of this site is critical to the overall deliver of housing in East Devon and is fundamental to the soundness of the plan.

5.1.9 The site is deliverable as set out in the below table, and should continue to be supported. These representations, in line with previous Draft Plan representations, support allocation of Land South of Strawberry Lane under reference GH/ED/27 for residential development. The continued allocation of the site is sound and is supported.

Full name: Lewis Carr

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:
NO

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Request removal of Otry_21 from Local Plan entirely: - This site doesn't meet National Policy requirements sustainable transport or environmental protections. - This site conflicts with the rest of the Local Plan policies, including SP06, AR02, OL01, OL04, OL09 and OL10. - This site conflicts the the existing Ottery Neighbourhood Plan. - There are severe transport and highway constraints. - Wastewater from further development would have nowhere to be processed with the Fluxton treatment works already at or over capacity. - There is no properly demonstrated housing need, particularly with the Marlecombe development being much closer to the jobs in Exeter. - How has this development gone from 40 to 70 dwellings on the same piece of very sloping agricultural land with terrible access? -

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Site Otry_21 from the Local Plan entirely.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: NO

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: It certainly hasn't co-operated with the Ottery Neighbourhood Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I don't trust the council and planning staff to act in the best interests of the constituents.

Full name: Dan Clarke

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council’s own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to:

a) Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane.

b) Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle.

c) Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure.

The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19)

Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including:

a) SP06 – which restricts development outside settlement boundaries.

b) AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity.

c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists.

The Council's own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan's objectives for protecting East Devon's rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan

The Neighbourhood Plan places strong emphasis on preserving:

a) The distinctive countryside setting, b) The historic settlement pattern, and c) the rural landscape between communities. It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints

The Ottery St Mary Transport & Public Realm Study (2022) identifies:

- a) Chronic congestion in the historic town centre,
- b) High car dependency.
- c) Narrow approach roads, and
- d) Limited junction capacity.

Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks

Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that:

- a) Ottery St Mary has no capacity for additional residential development.
- b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity.
- c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit.
- d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents.

Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development.

7. No Demonstrable Housing Need

There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate.

8). Unexplained Increase in Proposed Density

The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process.

Conclusion

For the reasons outlined above, the allocation of Otry_21 is:

- Unsustainable
- In conflict with national, local, and neighbourhood policies
- Environmentally harmful
- Infrastructure-constrained
- Unjustified and unsupported by evidence

Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary.

I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: See attached letter

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Removal of Otry_21 as a development site

Full name: Keith Bell

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Otry_21

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I have just moved into the East Devon area and accordingly have just become aware of the content of the local plan with regard to development in the Ottery St. Mary region. I would like to indicate that the site identified by 'Otry_21' is unsuitable for the proposed housing development. I have made comment on the 'Commonplace' site under Section 5 of the Second Regulation 19 Consultation, but I found it difficult due to the specific questions posed by the site. Accordingly, I am sending this email as a formal request. Due to its length, I am additionally including its content in the attached document.

I formally request the removal of Otry_21 From EDDC Emerging Local Plan 2020–2042

Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council's own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to: a) Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane. b) Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle. c) Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure. The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19) Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including: a) SP06 – which restricts development outside settlement boundaries. b) AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity. c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists. The Council's own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan's objectives for protecting East Devon's rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan The Neighbourhood Plan places strong emphasis on preserving: a) The distinctive countryside setting, b) The historic settlement pattern, and c) the rural landscape between communities. It also states that no significant new housing allocations were required. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints The Ottery St Mary Transport & Public Realm Study (2022) identifies: a) Chronic congestion in the historic town centre b) High car dependency due to necessity c) Narrow approach roads, and d) Limited junction capacity Any expansion to the east, north, or south of the town is expected to

substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging (due to all traffic from this region destined for places of employment, medical facilities, and highways having to travel through the town). Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that: a) Ottery St Mary has no capacity for additional residential development. b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity. c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit. d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents. Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high risk location for development.

7. No Demonstrable Local Housing Need There is no evidence of local need for additional housing allocations in Ottery St Mary since available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is therefore neither justified nor proportionate.

8. Unexplained Increase in Proposed Density The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process.

Conclusion For the reasons outlined above, the allocation of Otry_21 is:

- Unsustainable
- In conflict with national, local, and neighbourhood policies
- Environmentally harmful
- Infrastructure-constrained
- Unjustified and unsupported by evidence

Accordingly, its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Otry_21

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council's own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to:

- a) Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane
- b) Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle.
- c) Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure.

The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19) Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including:

- a) SP06 – which restricts development outside settlement boundaries.
- b) AR02, OL01, OL04,

OL09 – which require protection of water quality, landscape character, views, and biodiversity. c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists. The Council’s own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan’s objectives for protecting East Devon’s rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan The Neighbourhood Plan places strong emphasis on preserving: a) The distinctive countryside setting, b) The historic settlement pattern, and c) the rural landscape between communities. It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints The Ottery St Mary Transport & Public Realm Study (2022) identifies: a) Chronic congestion in the historic town centre, b) High car dependency. c) Narrow approach roads, and d) Limited junction capacity. Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks Both the East Devon Water Cycle Study (2025) and South West Water’s Strategic Drainage Plan (2023) make clear that: a) Ottery St Mary has no capacity for additional residential development. b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity. c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit. d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents. Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high risk location for development.

7 Unexplained Increase in Proposed Density The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process.

8 Archeological sensitivity of the proposed site According to the Devon County Council Archeologist: "The proposed

development lies in a landscape where prehistoric settlement and funerary activity is documented in the Historic Environment Record and there is the potential that the proposed development site contains archaeological and artefactual deposits associated with this activity." There is possibly a Romano-British farmstead within a ditched enclosure as well as remains of associated contemporary field boundaries. Also possible prehistoric settlement or funerary activity. Conclusion For the reasons outlined above, the allocation of Otry_21 is: ? Unsustainable ? In conflict with national, local, and neighbourhood policies ? Environmentally harmful ? Infrastructure-constrained ? Unjustified and unsupported by evidence Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary. I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

Removal of site

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: RE: Request The Removal of Otry_21 From EDDC Emerging Reg.19 Local Plan We are writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council’s own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection. 1. Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for

growth. The site fails to meet core NPPF tests relating to:

- Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane.
- Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle.
- Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure. The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19) Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including:

- SP06 – which restricts development outside settlement boundaries.
- AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity.
- OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists. The Council’s own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan’s objectives for protecting East Devon’s rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan The Neighbourhood Plan places strong emphasis on preserving:

- The distinctive countryside setting,
- The historic settlement pattern, and
- the rural landscape between communities.

It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints The Ottery St Mary Transport & Public Realm Study (2022) identifies: Chronic congestion in the historic town centre, High car dependency. Narrow approach roads, and Limited junction capacity. Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage and Environmental risks

- Both the East Devon Water Cycle Study (2025) and South West Water’s Strategic Drainage Plan (2023) make clear that:
- Ottery St Mary has no capacity for additional residential development.
- The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity.
- The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit.
- Multiple treatment works within the catchment are in high-risk categories for pollution incidents. Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River

Otter and its protected habitats. 6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high risk location for development. 7. No Demonstrable Housing Need There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate. 8. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear Sir or Madam, I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020-2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council's own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1 a) b) c) 2 a) b) c) Failure to Meet National Policy Requirements

Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to: Sustainable transport - Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane. Environmental and landscape protection - The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle. Flood risk and water quality - Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure. The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria. Conflicts With the Draft Local Plan (Regulation 19) Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including: . : . AR02, OL01, OL04, OL09 - which require protection of water quality, landscape character, views, and biodiversity. OL10 - which protects the best and most versatile agricultural land unless exceptional

justification exists. 1 The Council's own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan's objectives for protecting East Devon's rural character. 3. Conflicts With the Ottery St Mary Neighbourhood Plan The Neighbourhood Plan places strong emphasis on preserving a) The distinctive countryside setting, b) The historic settlement pattern, and c) the rural landscape between communities It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning. 4. Severe Transport and Highway Constraints The Ottery St Mary Transport & Public Realm Study (2022) identifies: a) Chronic congestion in the historic town centre, b) High car dependency. c) Narrow approach roads, and d) Limited junction capacity. Any expansion to the east, north, or south of the town is expected to worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging Access through residential roads raises significant safety concerns for children and parents travelling to nearby schools. 5. Wastewater, Drainage, and Environmental Risks . Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that: a) Ottery St Mary has no capacity for additional residential development. b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit. d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents. 2 Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats. 6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Sparrowhawk, Merlin, Badgers, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development. 7. No Demonstrable Housing Need There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate. 8) Unexplained Increase in Proposed Density The site originally appeared as a "second-best option" for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process. Conclusion For the reasons outlined above, the allocation of Otry_21 is: . with national, local, and neighbourhood policies Environmentally harmful I nfrastructu re-co nstra i ned Unjustified and unsupported by evidence Its inclusion would represent a failure of

the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary I therefore respectfully request that Site Otry-2l be removed from the Emerging East Devon Local Plan

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

REQUEST FOR REMOVAL OF Otry_21 I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, I believe the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council's own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to: Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure leading to significant road safety risks for pedestrians, cyclists and car users. Development located to the south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane and exacerbate existing congestion in the town centre. Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the East Devon National Landscape and the Scheduled Monument at Belbury Castle. Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already demonstrated to be under significant pressure from pollution and needing urgent attention to improve

water quality. The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2.Conflicts With the Draft Local Plan (Regulation 19) Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including: a. SP06 – which restricts development outside settlement boundaries. b. AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity. c. OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists. The Council’s own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan’s objectives for protecting East Devon’s rural character.

3.Conflicts With the Ottery St Mary Neighbourhood Plan The Neighbourhood Plan places strong emphasis on preserving: a. The distinctive countryside setting, b. The historic settlement pattern, and c. the rural landscape between communities. It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints The Ottery St Mary Transport & Public Realm Study (2022) identifies: a. Chronic congestion in the historic town centre, b. High car dependency. c. Narrow approach roads, and d. Limited junction capacity. Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads and along Tip Hill where pavements are narrow and require the road to be crossed by pedestrians would significantly raise existing safety concerns, including those for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or to the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the town’s traffic flow increasing road safety concerns and risks to all users, especially the most vulnerable.

5. Wastewater, Drainage, and Environmental Risks Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that:

- Ottery St Mary has no capacity for additional residential development.
- The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity.
- The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit.
- Multiple treatment works within the catchment are in high-risk categories for pollution incidents. Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats. The proposed inclusion of Otry_21 runs completely contrary to the Water Cycle Study and the Strategic Drainage Plan and the urgent requirement to improve water quality.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development.

7. No Demonstrable Housing Need There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate.

8. Unexplained Increase in Proposed Density The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process. The increase in density is unexplained and

entirely inappropriate in a location where any development should reflect, and take full account of, the transition from the existing built environment of the neighbouring land to its rural surroundings.

Conclusion For the reasons outlined above, the allocation of Otry_21 is:

- Unsustainable
- In conflict with national, local, and neighbourhood policies, plans and recent studies
- Environmentally harmful
- Infrastructure-constrained
- Unjustified and unsupported by evidence.

Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary.

I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, I believe the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision.

The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council's own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements

Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to:

a. Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure leading to

significant road safety risks for pedestrians, cyclists and car users. Development located to the south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane and exacerbate existing congestion in the town centre.

b. Environmental and landscape protection – The site comprises high- quality agricultural land, forms part of a valued rural landscape and lies within direct view of the East Devon National Landscape and the Scheduled Monument at Belbury Castle. c. Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already demonstrated to be under significant pressure from pollution and needing urgent attention to improve water quality.

The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria .

2. Conflicts With the Draft Local Plan (Regulation 19)

Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including:

a. SP06 – which restricts development outside settlement boundaries. b. AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity. c. OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists.

The Council's own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan's objectives for protecting East Devon's rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan

The Neighbourhood Plan places strong emphasis on preserving:

a. The distinctive countryside setting, b. The historic settlement pattern, and c. the rural landscape between communities.

It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints

The Ottery St Mary Transport & Public Realm Study (2022) identifies:

a. Chronic congestion in the historic town centre, b. High car dependency. c. Narrow approach roads, and d. Limited junction capacity.

Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads and along Tip Hill where pavements are narrow and require the road to be crossed by pedestrians would significantly raise existing safety concerns, including those for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or to the north and east of the town for employment, therefore, Otry_21 sits in a position that

would be the most damaging to the town's traffic flow increasing road safety concerns and risks to all users, especially the most vulnerable.

5. Wastewater, Drainage, and Environmental Risks

Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that:

a. Ottery St Mary has no capacity for additional residential development. b. The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity. c. The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit. d. Multiple treatment works within the catchment are in high-risk categories for pollution incidents.

Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats. The proposed inclusion of Otry_21 runs completely contrary to the Water Cycle Study and the Strategic Drainage Plan and the urgent requirement to improve water quality.

6. Harm to Biodiversity and Protected Habitats

The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations.

The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development.

7. No Demonstrable Housing Need

There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate.

8. Unexplained Increase in Proposed Density

The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re- emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process. The increase in density is unexplained and entirely inappropriate in a location where any development should reflect, and take full account of, the transition from the existing built environment of the neighbouring land to its rural surroundings.

Conclusion

For the reasons outlined above, the allocation of Otry_21 is:

- Unsustainable
- In conflict with national, local, and neighbourhood policies, plans and recent studies
- Environmentally harmful
- Infrastructure-constrained
- Unjustified and unsupported by evidence.

Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary.

I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan. Other Consultations I note that there is currently an application for outline planning permission for Otry_21 and a significant area of neighbouring land under reference 25/2468/MOUT for the construction of 140 houses. There are many hundreds of objections to this application, and I believe that these should be taken into account when considering the inclusion of this site in the Emerging Local Plan. Many people have commented that they have found the “Commonplace” site very technical and difficult to engage with and it presents a significant challenge to the layperson who wishes to participate in the debate around the inclusion of Otry_21. They have instead made their contribution by responding to the planning application directly and we trust that the Planning Inspector will wish to take account of their views.

The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19)

Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including:

a) SP06 – which restricts development outside settlement boundaries.

b) AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity.

c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists.

The Council’s own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan’s objectives for protecting East Devon’s rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan

The Neighbourhood Plan places strong emphasis on preserving:

a) The distinctive countryside setting, b) The historic settlement pattern, and c) the rural landscape between communities. It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints

The Ottery St Mary Transport & Public Realm Study (2022) identifies:

- a) Chronic congestion in the historic town centre,
- b) High car dependency.
- c) Narrow approach roads, and
- d) Limited junction capacity.

Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks

Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that:

- a) Ottery St Mary has no capacity for additional residential development.

- b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity.
- c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit.
- d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents.

Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development.

7. No Demonstrable Housing Need

There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate.

8). Unexplained Increase in Proposed Density

The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process.

Conclusion

For the reasons outlined above, the allocation of Otry_21 is: “Unsustainable
“In conflict with national, local, and neighbourhood policies “Environmentally
harmful “Infrastructure-constrained “Unjustified and unsupported by
evidence

Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary.

I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council’s own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to:

a) Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane.

b) Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle.

c) Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure.

The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19)

Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including:

a) SP06 – which restricts development outside settlement boundaries.

b) AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity.

c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists.

The Council's own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan's objectives for protecting East Devon's rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan

The Neighbourhood Plan places strong emphasis on preserving:

a) The distinctive countryside setting, b) The historic settlement pattern, and c) the rural landscape between communities. It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints

The Ottery St Mary Transport & Public Realm Study (2022) identifies:

- a) Chronic congestion in the historic town centre,
- b) High car dependency.
- c) Narrow approach roads, and
- d) Limited junction capacity.

Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks

Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that:

- a) Ottery St Mary has no capacity for additional residential development.
- b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity.
- c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit.
- d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents.

Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development.

7. No Demonstrable Housing Need

There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate.

8). Unexplained Increase in Proposed Density

The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process.

Conclusion

For the reasons outlined above, the allocation of Otry_21 is:

- Unsustainable
- In conflict with national, local, and neighbourhood policies
- Environmentally harmful
- Infrastructure-constrained
- Unjustified and unsupported by evidence

Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary.

I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

Full name: Julia Padbury

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council’s own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to:

a) Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane.

b) Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle.

c) Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure.

The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19)

Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including:

a) SP06 – which restricts development outside settlement boundaries.

b) AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity.

c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists.

The Council's own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan's objectives for protecting East Devon's rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan

The Neighbourhood Plan places strong emphasis on preserving:

a) The distinctive countryside setting, b) The historic settlement pattern, and c) the rural landscape between communities. It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints

The Ottery St Mary Transport & Public Realm Study (2022) identifies:

- a) Chronic congestion in the historic town centre,
- b) High car dependency.
- c) Narrow approach roads, and
- d) Limited junction capacity.

Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks

Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that:

- a) Ottery St Mary has no capacity for additional residential development.
- b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity.
- c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit.
- d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents.

Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development.

7. No Demonstrable Housing Need

There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate.

8). Unexplained Increase in Proposed Density

The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process.

Conclusion

For the reasons outlined above, the allocation of Otry_21 is:

- Unsustainable
- In conflict with national, local, and neighbourhood policies
- Environmentally harmful
- Infrastructure-constrained
- Unjustified and unsupported by evidence

Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary.

I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

Evidence Document Ref: EDDC Local Plan 2020 – 2042 Regulation 19 Second Consultation Request for the removal of Site Selection for Otry_21 from the plan.

I hereby request your assistance in correcting a suspect decision contained within the emerging local plan. The area in question is the inclusion of the site known as Otry_21 within land included for potential development. It is quite clear that as demonstrated by the vast body of evidence and adverse public opinion that the inclusion of this site within a new local plan would be an extremely poor planning decision. The inclusion of Otry_21 is in direct conflict with the requirements of the National Planning Policy Framework, Emerging Local Plan, Ottery St Mary Neighbourhood Plan, and conservation requirements for the River Otter as further highlighted: - Conflicts with NPPF: Para.11

‘Plans and decisions should apply a presumption in favour of sustainable development. a) all plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change. d) where there are no relevant development plan policies, or the policies which are most important for determining the application are out-of-date, granting permission unless: ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole, having particular regard to key policies for directing development to sustainable locations, making effective use of land.’

Para. 15 ‘The planning system should be genuinely plan-led. Succinct and up-to-date plans should provide a positive vision for the future of each area; a framework for meeting housing needs and addressing other economic, social, and environmental priorities; and a platform for local people to shape their surroundings.’

Para. 77 ‘The supply of large numbers of new homes can often be best achieved through planning for larger scale development, such as new settlements or significant extensions to existing villages and towns, provided they are well located and designed, and supported by the necessary infrastructure and facilities (including a genuine choice of transport modes). Working with the support of their communities, and with other authorities if appropriate, strategic policy-making authorities should identify suitable locations for such development where this can help to meet identified needs in a sustainable way. In doing so, they should:

a) consider the opportunities presented by existing or planned investment in infrastructure, the area’s economic potential, and the scope for net environmental gains. b) ensure that their size and location will support a sustainable community, with sufficient access to services and employment opportunities within the development itself without expecting an unrealistic level of self-containment), or in larger towns to which there is good access.’

Para.109 Transport issues should be considered from the earliest stages of plan-making and development proposals, using a vision-led approach to identify transport solutions that deliver well-designed, sustainable, and popular places. This should involve:

a) making transport considerations an important part of early engagement with local communities. b) ensuring patterns of movement, streets, parking, and other transport considerations are integral to the design of schemes, and contribute to making high quality places. c) understanding and addressing the potential impacts of development on transport networks. d) realising opportunities from existing or proposed transport infrastructure and changing transport technology and usage – for example in relation to the scale, location or density of development that can be accommodated. e) identifying and pursuing opportunities to promote walking, cycling and public transport use; and f) identifying, assessing, and taking into account the environmental impacts of traffic and transport infrastructure – including appropriate

opportunities for avoiding and mitigating any adverse effects, and for net environmental gains.

Para. 110 The planning system should actively manage patterns of growth in support of these objectives. Significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions and improve air quality and public health. However, opportunities to maximise sustainable transport solutions will vary between urban and rural areas, and this should be taken into account in both plan-making and decision-making.

Para. 115 'In assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that: a) sustainable transport modes are prioritised taking account of the vision for the site, the type of development and its location. b) safe and suitable access to the site can be achieved for all users. d) any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be cost effectively mitigated to an acceptable degree through a vision-led approach. Para. 116

Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios.

Para. 124 Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously developed or 'brownfield' land.'

Para. 125 'b) recognise that some undeveloped land can perform many functions, such as for wildlife, recreation, flood risk mitigation, cooling/shading, carbon storage, or food production. c) give substantial weight to the value of using suitable brownfield land within opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land.

Para. 170 Inappropriate developments in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere.

Para 171. Strategic policies should be informed by a strategic flood risk assessment, and should manage flood risk from all sources. They should consider cumulative impacts in, or affecting, local areas susceptible to flooding, and take account of advice from the Environment Agency and other relevant flood risk management authorities, such as lead local flood authorities and internal drainage boards.

Para. 172 . All plans should apply a sequential, risk-based approach to the location of development – taking into account all sources of flood risk and the current and future impacts of climate change – so as to avoid, where possible, flood risk to people and property.

Para. 187 Planning policies and decisions should contribute to and enhance the natural and local environment by: a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan). b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland. c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate. d) minimising impacts on and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures and incorporating features which support priority or threatened species such as swifts, bats, and hedgehogs. e) preventing new and existing development from contributing to, being put at unacceptable risk from, or being adversely affected by, unacceptable levels of soil, air, water or noise pollution or land instability. Development should, wherever possible, help to improve local environmental conditions such as air and water quality, taking into account relevant information such as river basin management plans.

Para. 198 Planning policies and decisions should also ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on health, living conditions and the natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should: a) mitigate and reduce to a minimum potential adverse impact resulting from noise from new development – and avoid noise giving rise to significant adverse impacts on health and the quality of life. b) identify and protect tranquil areas which have remained relatively undisturbed by noise and are prized for their recreational and amenity value for this reason; and c) limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes, and nature conservation.

Conflicts with East Devon District Council Regulation 19 Draft Plan:

Para. 2.6. Rural East Devon will retain its outstanding charm and character with modest and sensitively planned development to meet the needs of local communities. Farming and rural activities will still dominate the use of land. Where possible we will retain high quality land in agricultural production as we move towards more environmentally sustainable farming practices into the middle decades of the 21st century.

SP05 Within the settlement boundaries defined on the Policies Map development will be supported in principle. This does not mean that all development will be acceptable within settlement boundaries: proposals will be considered on their own merits having regard to other policies in this plan and any made neighbourhood plan.

SP06: In locations outside of the defined settlement boundaries development will not be permitted unless it is in accordance with a specific Local or Neighbourhood Plan policy that explicitly permits such development. AR02 To minimise impact on protect, manage and improve water quality in all water bodies affected by development in East Devon: A. Planning permission will not be granted for any proposal which, because of inadequate provision of water services or inadequate or untimely provision of foul water and surface water drainage and disposal, would

1. cause pollution to the water environment, including coastal waters
2. result in the deterioration of the ecological status of a water body
3. overload the sewer network, or
4. result in an increase in flood risk at the site or elsewhere.

DS01 Proposals will only be permitted where they:

A. Respect the key characteristics and special qualities of the area in which the development is proposed. B. Ensure the appearance of buildings, including scale, massing, density, height, fenestration, and materials, relate well to their context. C. Do not adversely affect:

1. The distinctive rural, historic or architectural character of the area.
2. The urban form, in terms of significant street patterns, groups of buildings and open spaces.
3. The amenity of occupiers of adjoining residential properties.
4. The operation of existing uses outside of the proposed development.

OL01 East Devon's landscape, countryside and rural areas (including rivers, watercourses and waterbodies) will be protected against harmful development. Development will only be permitted where the applicant is able to demonstrate through a proportionate Landscape Appraisal that it will protect and enhance valued landscape attributes and special features and qualities that contribute to the character of East Devon's landscapes, in particular where it would not harm the distinctive landscape, amenity and environmental qualities within which it is located, including: A. Landform and water forms and patterns of settlement. B. Important natural and manmade features which contribute to the local landscape character, including topography, traditional field boundaries, trees and woodlands, areas of importance for nature

conservation and rural buildings. C. The adverse disruption of a view from a public place which forms part of the distinctive character of the area or otherwise causes significant visual intrusions; and

D. Aesthetic and perceptual factors such as tranquillity, wildness and dark skies.

All development in the countryside should have regard to the most up to date Landscape Characterisation Assessments as a basis for understanding, maintaining and enhancing local distinctiveness and landscape character as well as up to date strategy and guidance for trees and woodlands. OL04 Development proposals will only be permitted where they preserve the visual integrity, identity and scenic quality of the district, in particular by conserving and enhancing key views and views of local landmarks, including those identified in Neighbourhood Plans.

The following view types are considered to be particularly important: A. Landmark views to and from viewpoints and tourism and recreational destinations, including the coast, woodland and open countryside. B. Views from publicly accessible areas which are within, to or from settlements which contribute to the viewers' enjoyment of the local area. C. Views from public rights of way and other publicly accessible areas. D. Night-time views of dark skies, particularly where lighting is to be introduced in areas of low existing light pollution; and E. Views which include or otherwise relate to specific features relevant to East Devon and its special qualities, such as key landmarks, heritage assets (either in view or the view from) and biodiversity features. Development proposals should conserve and enhance sequential views and not result in adverse cumulative impacts within views.

OL09 Permission will not be granted for development which would result in pollution that cannot be adequately mitigated. This will include: A. Pollution of the environment by gas or particulates, including smell, fumes, dust, grit, smoke and soot.

B. Pollution of surface or underground waters, for example by untreated sewage, including discharges to:

1. Rivers, other watercourses, water bodies and wetlands.
2. Water gathering grounds including water catchment areas, aquifers and groundwater protection areas.

3. Harbours, estuaries or the sea

OL10 Unless allocated for development under another plan policy, planning permission for development affecting the best and most versatile agricultural land (Grades 1, 2 and 3a) will only be granted exceptionally if:

- A. Sufficient land of a lower grade (Grades 3b, 4 and 5) is unavailable, or available lower grade land has an environmental value recognised by a statutory wildlife, historic, landscape or archaeological designation outweighing the agricultural considerations; or
- B. The benefit of the development justifies and clearly outweighs the loss of high-quality agricultural land.

If there is a choice between sites in different grades, land of the lowest grade available must be used except where other sustainability considerations, including intrinsic nature conservation value of a site, outweigh land quality issues.

Conflicts with Ottery St Mary Neighbourhood Plan 2017 – 2031

Para. 6.3 The countryside of the Neighbourhood Plan Area is a highly valued asset with special character provided by the rolling farmland, wooded hillsides, winding lanes and the open river valley. The countryside is important for its aesthetic and leisure value, its essential farming role and its wildlife habitat value. The balance of the historic town, villages and smaller settlements surrounded by nature and countryside views is considered by the community to be a vital part of the character of the area. It makes the Parishes a special place to live and visit. It is of utmost importance that these characteristics are protected for current and future generations.

Para. 6.4 National and local planning policy restricts development in the countryside. The adopted East Devon Local Plan does not identify the need for the Neighbourhood Plan to make any strategic or other housing development allocations due to the large number of new homes consented in recent years and the desirability of preserving the settlement pattern and character. As a result, no significant new

developments whether within or outside of the existing settlements are needed during the Local Plan period.

Para. 6.14 The unique pattern of settlements within the Neighbourhood Plan Area, each with their own distinctive character, is a valued part of its nature. This, coupled with developer pressure, particularly for new housing sites in and around the main settlements raises concerns about creeping development undermining and degrading the special character of the area over time. This must not be allowed to occur, and a major role of the planning system is to prevent and control this.

Para. 6.15 In most cases, new development on land outside of the defined built up area boundaries of Ottery St Mary and West Hill will not be allowed in line with Local Plan and Neighbourhood Plan policies protecting the countryside.

Inconsistency within Site Selection reports for Otry_21 The whole area surrounding Gerway Farm has been subject to repeated attempts by the landowner to promote development on this area of pristine agricultural land. It has been rejected in its entirety in the past and should continue to be rejected.

Otry_21 first appeared in the emerging plan as a Potential 2nd best option with an allocation for 40 homes, Stating:

‘Allocation would need to be subject to satisfactory highways and archaeological/heritage assessment as the smaller section would need to be accessed through an existing estate and it is very sensitive in heritage terms, being a historic field enclosure with pre-historic and medieval finds nearby.’ The site made a re-appearance in September 2024, however had increased in density to now allocate 70 houses, with confusing statements, including: ‘Ottery St Mary has limited jobs, lacks a train station and accessibility is constrained by narrow roads, lack of pavements and a historic town centre,’

‘Site is a significant greenfield site.’

It should be questioned, that why in the total absence of any change in the landscape, highway access or local housing need this area has risen from unacceptable to a density of 70 houses.

Ottery St Mary – Transport and Public Realm Study 2022

2.3.13 The nature of the road network, as well as the land uses in the area, means that Ottery St Mary suffers from traffic travelling through the town centre, especially for the east/west movement. This can have a detrimental social and environmental impact on the streets especially in the narrow streets of the historic town centre.

2.3.14 The town also has a high demand from car traffic. This is apparent from the parking pressures and limitations on space for pedestrians and cyclists. Although the quality of the built heritage is very good, the public realm and streetscape is now dominated by vehicular traffic and suffers from blind bends, pinch points, narrow footways, poor cycling infrastructure and a lack of public space for social interaction.

2.3.21 Land use and transport are inextricably linked. It is the land uses that act as trip attractors or trip producers that give rise to the trip generation across the road network. Collectively the residential areas generate high levels of trip movements.

3.3.13 The East Devon local Plan is the emerging planning policy document for the district. It sets planning policies and proposals for new development in the district for the period 2020-2040. The emerging local plan strategy establishes Ottery St Mary as a Tier 2 settlement and as such an appropriate location for future growth and development.

3.3.14 However, the plan also acknowledges constraints on development including the extensive Conservation Area and setting of Grade 1 and 2* listed buildings, narrow

approach roads to the historic centre which create traffic issues and significant congestion to the north, east and south, and the flood

plain of the River Otter. Expansion of the town to the north, east and south would exacerbate existing traffic issues. Hence, the plan favours development options to the west of the town, recognising that a green wedge has been designated to prevent coalescence between Ottery St Mary and West Hill village.

The East Devon Water Cycle Study – November 2025 Key findings of the WCS are:

Commissioned by East Devon District Council, this report was required to enable a clear understanding of the problems within the Otter catchment area resulting from wastewater treatment. The report also informs the areas where future development should not occur without prior improvements to the wastewater treatment process, failure to prevent development (in particular residential development) will result in further unacceptable pollution in the River Otter.

Three critical areas are identified as being at high risk from nutrient loading due to the increases in wastewater production from proposed housing developments: the River Exe Estuary, the River Axe, and the Otter Estuary. These areas are vulnerable due to direct effluent discharges or cumulative effects from multiple sources, exacerbating existing problems like phosphate pollution. Infrastructure enhancements and continued rigorous planning are recommended to handle the increased wastewater and sewage loads expected from new developments. Policy recommendations: To ensure sustainable growth and compliance with environmental standards, EDDC must embed water efficiency and water quality safeguards into the emerging Local Plan. The East Devon WCS outlines the essential considerations for managing water resources, wastewater, and environmental conservation considering projected development across the district. Its evidence-based observations and recommendations aim to steer East Devon towards a future where growth and sustainability coexists equally, ensuring that water management practices enhance rather than compromise the natural and built environment.

The current existing flows, without proposed growth, are shown in Table 5.5. Using the 3-year average Q80 flow as the Actual DWF provided by SWW, four of the 15 WwTW that

are expected to have development growth are currently exceeding, including Feniton, Fluxton, Honiton and Woodbury

Summary

New development in East Devon will increase demand on the sewerage network & WwTWs, resulting in higher treated discharge flows. This growth may exacerbate flood risk and reduce network capacity, requiring mitigation measures and infrastructure upgrades.

Where WwTWs operate at or above 90% of their permitted capacity, further investigation is needed to assess environmental impacts and compliance with

pollutant limits. Using RQP modelling for riverine discharges and load standstill calculations for tidal systems, capacity analysis shows that seven WwTWs, including Colyton, Countess Wear, Honiton, Fluxton, Feniton, Seaton South and Woodbury will exceed permitted flow headroom post-growth.

Policy recommendations Based on the analysis presented in Sections 4 to 6 of this WCS, the following high level policy recommendations should be considered by EDDC in the development of the Local Plan: Potential developments that may adversely affect green infrastructure assets and water quality should not be permitted.

South West Water - Strategic Drainage and Wastewater Management Plan – Otter May 2023 This plan as published by SWW is their strategy to cover the period up to 2030 for Level 2 Catchments. Included within this strategy is a plan area for the Level 2 Catchment area of Ottery St Mary and shows that NO RESIDENTIAL DEVELOPMENT is allowed for within Ottery St Mary.

It also states that Fluxton WwTW is overwhelmingly in either the Immediate moderate risk or Immediate high-risk category for many pollution incidents. A recent, 2018, upgrade to Fluxton WwTW costing £5m was completed and it is stated that this will meet all requirements to 2031. It is not anticipated that any further investment will come forward,

Storm Overflow's

The Pumping Station and Storm Overflow below and serving the Gerway Farm area is currently greatly exceeding its permitted spill rate. The latest figures confirm that in 2024 it spilled a total of 13 times, which is compared to a permitted rate of 3 per year. SWW state their plan aims to reduce the number of spills to 3 by 2030/50.

Surrounding Area Ottery St Mary is within Zone 2 influence for the East Devon Pebblebed Heaths. The town takes its name from the River Otter, which flows through the area, linking the surrounding landscape and having the East Devon Pebblebed Heaths running along an escarpment towards it. As a significant local settlement, Ottery St Mary faces ongoing pressure for new housing development. These developments are a concern due to their potential to increase recreational use and thus disturb the sensitive ecology of the heaths, which are a Special Area of Conservation (SAC) and Special Protection Area (SPA). Local planning decisions, such as those by the East Devon District Council and the Ottery St Mary Town Council, must consider the "Habitats Regulations" to ensure no adverse effects occur on the heaths' protected habitats and species.

The proposed site Otry_21 is in direct line of site from the Historic England site of Belbury Castle Heritage List No: 1017774, this should be considered a protected view.

Due to its physical characteristics Otry_21, has a direct link to The River Otter through the stream flowing at the base of the site. It will prove impossible due to the nature of the ground to prevent the runoff of contaminated surface water and wastewater overflows from entering the river. Development should be precluded from this area. There is no demonstrable evidence of the need for additional housing within Ottery St Mary, in fact, there is currently a large surplus of housing for sale. The site in question is home to a large number of species both with and without protected status, including, Bats, Dormice, Buzzard and Merlin and is in extremely close proximity to Badgers and the newly introduced Beaver groups.

I trust in consideration of all the preceding objections in particular the major traffic congestion and additional danger to parents and children that would be caused at the Winters Lane and Longdogs area of the town and your responsibility to safeguard the water quality within the River Otter you are able to request the removal of Otry_21 from the emerging local plan.

Otry_21's inclusion in this plan has already provoked an attempt to increase the proposed development area and will no doubt encourage this speculative nature in pursuit of further undesirable development destroying rural landscapes and pristine agricultural land.

The inclusion of this site would be an exceptionally poor and unjustified planning decision.

Full name: Richard Parkyn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(c). If the comment is related to a site, please state the site reference here::
Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To whom it may concern,

I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associate technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council's own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to: a) Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane.

b) Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle.

c) Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure. The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19) Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including: a) SP06 – which restricts development outside settlement boundaries.

b) AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity.

c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists. The Council’s own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan’s objectives for protecting East Devon’s rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan The Neighbourhood Plan places strong emphasis on preserving: a) The distinctive countryside setting, b) The historic settlement pattern, and c) the rural landscape between communities. It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints The Ottery St Mary Transport & Public Realm Study (2022) identifies: a) Chronic congestion in the historic town centre, b) High car dependency. c) Narrow approach roads, and d) Limited junction capacity. Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks Both the East Devon Water Cycle Study (2025) and South West Water’s Strategic Drainage Plan (2023) make clear that: a) Ottery St Mary has no capacity for additional residential development. b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity. c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the

permitted limit. d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents. Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heath SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development.

7. No Demonstrable Housing Need There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate. 8).

Unexplained Increase in Proposed Density The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process. Conclusion For the reasons outlined above, the allocation of Otry_21 is:

- Unsustainable
- In conflict with national, local, and neighbourhood policies
- Environmentally harmful
- Infrastructure-constrained
- Unjustified and unsupported by evidence Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary. I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear Sir/Madam

Request the removal of Otry_21 from the EDDC Emerging Reg. 19 Local Plan

We want to formally object to the inclusion of site Otry_21 in the Reg. 19 Local Plan. It is an unjustified and unsustainable planning decision. It is out of line with the Council's own evidence regarding environmental constraints, infrastructure capacity, highway safety and landscape protection.

The NPPF states that development must be directed to the most sustainable and least environmentally harmful locations. OL10 protects the best and most versatile agricultural land unless exceptional justification exists. Other sections protect water quality, landscape character and biodiversity.

Otry_21 conflicts with the Ottery St Mary Neighbourhood Plan. No significant new housing allocations were required due to high recent growth. Available market housing already exceeds demand.

There are severe transport and highway constraints in Ottery St Mary. A study carried out in 2022 identified:

- Chronic congestion in the historic town centre
- High car dependency as many people commute to work outside of Ottery St Mary, particularly to the Exeter area
- Approach roads are narrow, especially Sidmouth Road
- Junction capacities are limited Living locally, we know that the junction of Sidmouth Road, Longdogs Lane and Winter Lane at the top of Tip Hill is particularly dangerous for drivers and pedestrians. The town's primary school is on Longdogs Lane. There are no pavements leading onto Tip Hill from Longdogs Lane. This is particularly dangerous for adults and children at the beginning and end of the school day. The mandatory crossing of Sidmouth Road at the top of Tip Hill adds to the risk at any time of day.

There are also environmental risks from waste water drainage. The East Devon Water Cycle Study (2025) and the South West Water's strategic drainage plan (2023) made it clear that Ottery St Mary has no capacity for additional residential development. Storm overflow at Gerway Farm spilled 13 times in 2024, more than 4 times the permitted limit. Further housing would increase nutrient loading, risk non-compliance of environmental standards and directly threaten the ecological health of protected habitats. Ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development.

We request that Site Otry_21 be removed from the Emerging East Devon Local Plan.
Yours faithfully

Full name: Yvonne Salmon

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council’s own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to:

a) Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane.

b) Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle.

c) Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure.

The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19)

Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including:

a) SP06 – which restricts development outside settlement boundaries.

b) AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity.

c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists.

The Council's own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan's objectives for protecting East Devon's rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan

The Neighbourhood Plan places strong emphasis on preserving:

a) The distinctive countryside setting, b) The historic settlement pattern, and c) the rural landscape between communities. It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints

The Ottery St Mary Transport & Public Realm Study (2022) identifies:

- a) Chronic congestion in the historic town centre,
- b) High car dependency.
- c) Narrow approach roads, and
- d) Limited junction capacity.

Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks

Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that:

- a) Ottery St Mary has no capacity for additional residential development.
- b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity.
- c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit.
- d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents.

Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development.

7. No Demonstrable Housing Need

There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate.

8). Unexplained Increase in Proposed Density

The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process.

Conclusion

For the reasons outlined above, the allocation of Otry_21 is:

- Unsustainable
- In conflict with national, local, and neighbourhood policies
- Environmentally harmful
- Infrastructure-constrained
- Unjustified and unsupported by evidence

Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary.

I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

Full name: Hugh Salmon

Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council’s own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to:

a) Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane.

b) Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle.

c) Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure.

The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19)

Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including:

a) SP06 – which restricts development outside settlement boundaries.

b) AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity.

c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists.

The Council's own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan's objectives for protecting East Devon's rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan

The Neighbourhood Plan places strong emphasis on preserving:

a) The distinctive countryside setting, b) The historic settlement pattern, and c) the rural landscape between communities. It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints

The Ottery St Mary Transport & Public Realm Study (2022) identifies:

- a) Chronic congestion in the historic town centre,
- b) High car dependency.
- c) Narrow approach roads, and
- d) Limited junction capacity.

Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks

Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that:

- a) Ottery St Mary has no capacity for additional residential development.
- b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity.
- c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit.
- d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents.

Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development.

7. No Demonstrable Housing Need

There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate.

8). Unexplained Increase in Proposed Density

The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process.

Conclusion

For the reasons outlined above, the allocation of Otry_21 is:

- Unsustainable
- In conflict with national, local, and neighbourhood policies
- Environmentally harmful
- Infrastructure-constrained
- Unjustified and unsupported by evidence

Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary.

I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

Full name: Cheryl Shayler

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Otry_21

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of Otry_21 site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council's own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to:

- a) Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane.
- b) Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle.
- c) Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure. The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19) Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including:

- a) SP06 – which restricts development outside settlement boundaries.
- b) AR02, OL01, OL04,

OL09 – which require protection of water quality, landscape character, views, and biodiversity. c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists. The Council’s own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan’s objectives for protecting East Devon’s rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan The Neighbourhood Plan places strong emphasis on preserving: a) The distinctive countryside setting, b) The historic settlement pattern, and c) the rural landscape between communities. It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints The Ottery St Mary Transport & Public Realm Study (2022) identifies: a) Chronic congestion in the historic town centre, b) High car dependency. c) Narrow approach roads, and d) Limited junction capacity. Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks Both the East Devon Water Cycle Study (2025) and South West Water’s Strategic Drainage Plan (2023) make clear that: a) Ottery St Mary has no capacity for additional residential development. b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity. c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit. d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents. Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver and Otter populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high risk location for development.

7. No Demonstrable Housing Need There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate.

8. Unexplained Increase in Proposed Density The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway

concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process. Conclusion For the reasons outlined above, the allocation of Otry_21 is: ? Unsustainable ? In conflict with national, local, and neighbourhood policies ? Environmentally harmful ? Infrastructure-constrained ? Unjustified and unsupported by evidence Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Otry_21 from the emerging Local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am not convinced that democracy is being served.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council’s own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection. 1 Failure to Meet National Policy Requirements Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to: a) Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane. Ottery St Mary is poorly served by public transport, especially when compared to other towns in East Devon. The bus service is rudimentary and there is no rail service. Residents are very much car dependent and the town is frequently at a standstill due to poor traffic flow. The roads in Ottery St Mary are not fit for the current volume of traffic, let alone adding more vehicles because of further housing.

b) Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle.

c) Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure. The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19) Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including: a) SP06 – which restricts development outside settlement boundaries.

b) AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity.

c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists. The Council's own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan's objectives for protecting East Devon's rural character. Ottery St Mary should not be viewed as a Tier 2 settlement – it is considerably smaller than both Honiton and Sidmouth and should be respected as a much smaller town when considering planning applications.

3. Conflicts With the Ottery St Mary Neighbourhood Plan The Neighbourhood Plan places strong emphasis on preserving: a) The distinctive countryside setting,

b) The historic settlement pattern, and

c) the rural landscape between communities.

It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints The Ottery St Mary Transport & Public Realm Study (2022) identifies: a) Chronic congestion in the historic town centre,

b) High car dependency.

c) Narrow approach roads, and

d) Limited junction capacity.

Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that: a) Ottery St Mary has no capacity for additional residential development.

b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity.

c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit.

d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents. Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations. The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high risk location for development.

7. No Demonstrable Housing Need There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate. 8).

Unexplained Increase in Proposed Density The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process. Conclusion For the reasons outlined above, the allocation of Otry_21 is:

- Unsustainable
- In conflict with national, local, and neighbourhood policies
- Environmentally harmful
- Infrastructure-constrained
- Unjustified and unsupported by evidence

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary. I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Nobody could sensibly support further development either side of the Sidmouth Road as it leaves Ottery St Mary. The addition of significant numbers of vehicular and pedestrian traffic to this end of town is simply irresponsible, with its diminution in the quality of life for a very large number of residents (Longdogs Lane, Claremont Field, Gerway Close, Gerway Lane, Sidmouth Road, Tip Hill, Winters Lane, Clapps Lane, Oak Close etc) and the sheer safety of pedestrians on Tip Hill, where the pavement reduces to about 2' 6" wide.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Otry21 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Evidence Document Ref: EDDC Local Plan 2020 – 2042 Regulation 19 Second Consultation Request for the removal of Site Selection for Otry_21 from the plan. I hereby request your assistance in correcting a suspect decision contained within the emerging local plan. The area in question is the inclusion of the site known as Otry_21 within land included for potential development. It is quite clear that as demonstrated by the vast body of evidence and adverse public opinion that the inclusion of this site within a new local plan would be an extremely poor planning decision. The inclusion of Otry_21 is in direct conflict with the requirements of the National Planning Policy Framework, Emerging Local Plan, Ottery St Mary Neighbourhood Plan, and conservation requirements for the River Otter as further highlighted: - Conflicts with NPPF: Para.11 'Plans and decisions should apply a presumption in favour of sustainable development. a) all plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change. d) where there are no relevant development plan policies, or the policies which are most important for determining the application are out-of-date, granting permission unless: ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole, having particular regard to key policies for directing development to sustainable locations, making effective use of land.' Para. 15 'The planning system should be genuinely plan-led. Succinct and up-to-date plans should provide a positive vision for the future of each area; a framework for meeting housing needs and addressing other economic, social, and environmental priorities; and a platform for local people to shape their surroundings.' 2 Para. 77 'The supply of

large numbers of new homes can often be best achieved through planning for larger scale development, such as new settlements or significant extensions to existing villages and towns, provided they are well located and designed, and supported by the necessary infrastructure and facilities (including a genuine choice of transport modes). Working with the support of their communities, and with other authorities if appropriate, strategic policy-making authorities should identify suitable locations for such development where this can help to meet identified needs in a sustainable way. In doing so, they should: a) consider the opportunities presented by existing or planned investment in infrastructure, the area's economic potential, and the scope for net environmental gains. b) ensure that their size and location will support a sustainable community, with sufficient access to services and employment opportunities within the development itself without expecting an unrealistic level of self-containment), or in larger towns to which there is good access.' Para.109 Transport issues should be considered from the earliest stages of plan-making and development proposals, using a vision-led approach to identify transport solutions that deliver well-designed, sustainable, and popular places. This should involve: a) making transport considerations an important part of early engagement with local communities. b) ensuring patterns of movement, streets, parking, and other transport considerations are integral to the design of schemes, and contribute to making high quality places. c) understanding and addressing the potential impacts of development on transport networks. d) realising opportunities from existing or proposed transport infrastructure and changing transport technology and usage – for example in relation to the scale, location or density of development that can be accommodated. e) identifying and pursuing opportunities to promote walking, cycling and public transport use; and f) identifying, assessing, and taking into account the environmental impacts of traffic and transport infrastructure – including appropriate opportunities for avoiding and mitigating any adverse effects, and for net environmental gains. Para. 110 The planning system should actively manage patterns of growth in support of these objectives. Significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions and improve air quality and public health. However, opportunities to maximise sustainable transport solutions will vary between urban and rural areas, and this should be taken into account in both planmaking and decision-making. 3 Para. 115 'In assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that: a) sustainable transport modes are prioritised taking account of the vision for the site, the type of development and its location. b) safe and suitable access to the site can be achieved for all users. d) any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be cost effectively mitigated to an acceptable degree through a vision-led approach. Para. 116 Development should only be prevented or refused on highways grounds if

there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios. Para. 124 Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously developed or 'brownfield' land.' Para. 125 'b) recognise that some undeveloped land can perform many functions, such as for wildlife, recreation, flood risk mitigation, cooling/shading, carbon storage, or food production. c) give substantial weight to the value of using suitable brownfield land within opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land. Para. 170 Inappropriate developments in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere. Para 171. Strategic policies should be informed by a strategic flood risk assessment, and should manage flood risk from all sources. They should consider cumulative impacts in, or affecting, local areas susceptible to flooding, and take account of advice from the Environment Agency and other relevant flood risk management authorities, such as lead local flood authorities and internal drainage boards. Para. 172 . All plans should apply a sequential, risk-based approach to the location of development – taking into account all sources of flood risk and the current and future impacts of climate change – so as to avoid, where possible, flood risk to people and property. 4 Para. 187 Planning policies and decisions should contribute to and enhance the natural and local environment by: a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan). b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland. c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate. d) minimising impacts on and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures and incorporating features which support priority or threatened species such as swifts, bats, and hedgehogs. e) preventing new and existing development from contributing to, being put at unacceptable risk from, or being adversely affected by, unacceptable levels of soil, air, water or noise pollution or land instability. Development should, wherever possible, help to improve local environmental conditions such as air and water quality, taking into account relevant information such as river basin management plans. Para. 198 Planning policies and decisions should also ensure that new development is appropriate for its location

taking into account the likely effects (including cumulative effects) of pollution on health, living conditions and the natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should: a) mitigate and reduce to a minimum potential adverse impact resulting from noise from new development – and avoid noise giving rise to significant adverse impacts on health and the quality of life. b) identify and protect tranquil areas which have remained relatively undisturbed by noise and are prized for their recreational and amenity value for this reason; and c) limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes, and nature conservation. Conflicts with East Devon District Council Regulation 19 Draft Plan: Para. 2.6. Rural East Devon will retain its outstanding charm and character with modest and sensitively planned development to meet the needs of local communities. Farming and rural activities will still dominate the use of land. Where possible we will retain high quality land in agricultural production as we move towards more environmentally sustainable farming practices into the middle decades of the 21st century. 5 SP05 Within the settlement boundaries defined on the Policies Map development will be supported in principle. This does not mean that all development will be acceptable within settlement boundaries: proposals will be considered on their own merits having regard to other policies in this plan and any made neighbourhood plan. SP06: In locations outside of the defined settlement boundaries development will not be permitted unless it is in accordance with a specific Local or Neighbourhood Plan policy that explicitly permits such development. AR02 To minimise impact on protect, manage and improve water quality in all water bodies affected by development in East Devon: A. Planning permission will not be granted for any proposal which, because of inadequate provision of water services or inadequate or untimely provision of foul water and surface water drainage and disposal, would

1. cause pollution to the water environment, including coastal waters
2. result in the deterioration of the ecological status of a water body
3. overload the sewer network, or
4. result in an increase in flood risk at the site or elsewhere. DS01 Proposals will only be permitted where they: A. Respect the key characteristics and special qualities of the area in which the development is proposed. B. Ensure the appearance of buildings, including scale, massing, density, height, fenestration, and materials, relate well to their context. C. Do not adversely affect:
 1. The distinctive rural, historic or architectural character of the area.
 2. The urban form, in terms of significant street patterns, groups of buildings and open spaces.

3. The amenity of occupiers of adjoining residential properties.

4. The operation of existing uses outside of the proposed development. OL01 East Devon's landscape, countryside and rural areas (including rivers, watercourses and waterbodies) will be protected against harmful development. Development will only be permitted where the applicant is able to demonstrate through a proportionate Landscape Appraisal that it will protect and enhance valued landscape attributes and special features and qualities that contribute to the character of East Devon's landscapes, in particular where it would not harm the distinctive landscape, amenity and environmental qualities within which it is located, including: A. Landform and water forms and patterns of settlement. B. Important natural and manmade features which contribute to the local landscape character, including topography, traditional field boundaries, trees and woodlands, areas of importance for nature conservation and rural buildings. C. The adverse disruption of a view from a public place which forms part of the distinctive character of the area or otherwise causes significant visual intrusions; and 6 D. Aesthetic and perceptual factors such as tranquillity, wildness and dark skies. All development in the countryside should have regard to the most up to date Landscape Characterisation Assessments as a basis for understanding, maintaining and enhancing local distinctiveness and landscape character as well as up to date strategy and guidance for trees and woodlands. OL04 Development proposals will only be permitted where they preserve the visual integrity, identity and scenic quality of the district, in particular by conserving and enhancing key views and views of local landmarks, including those identified in Neighbourhood Plans. The following view types are considered to be particularly important: A. Landmark views to and from viewpoints and tourism and recreational destinations, including the coast, woodland and open countryside. B. Views from publicly accessible areas which are within, to or from settlements which contribute to the viewers' enjoyment of the local area. C. Views from public rights of way and other publicly accessible areas. D. Night-time views of dark skies, particularly where lighting is to be introduced in areas of low existing light pollution; and E. Views which include or otherwise relate to specific features relevant to East Devon and its special qualities, such as key landmarks, heritage assets (either in view or the view from) and biodiversity features. Development proposals should conserve and enhance sequential views and not result in adverse cumulative impacts within views. OL09 Permission will not be granted for development which would result in pollution that cannot be adequately mitigated. This will include: A. Pollution of the environment by gas or particulates, including smell, fumes, dust, grit, smoke and soot. B. Pollution of surface or underground waters, for example by untreated sewage, including discharges to:

1. Rivers, other watercourses, water bodies and wetlands.

2. Water gathering grounds including water catchment areas, aquifers and groundwater protection areas.

3. Harbours, estuaries or the sea OL10 Unless allocated for development under another plan policy, planning permission for development affecting the best and most versatile agricultural land (Grades 1, 2 and 3a) will only be granted exceptionally if: A. Sufficient land of a lower grade (Grades 3b, 4 and 5) is unavailable, or available lower grade land has an environmental value recognised by a statutory wildlife, historic, landscape or archaeological designation outweighing the agricultural considerations; or B. The benefit of the development justifies and clearly outweighs the loss of high-quality agricultural land. 7 If there is a choice between sites in different grades, land of the lowest grade available must be used except where other sustainability considerations, including intrinsic nature conservation value of a site, outweigh land quality issues.

Conflicts with Ottery St Mary Neighbourhood Plan 2017 – 2031 Para. 6.3 The countryside of the Neighbourhood Plan Area is a highly valued asset with special character provided by the rolling farmland, wooded hillsides, winding lanes and the open river valley. The countryside is important for its aesthetic and leisure value, its essential farming role and its wildlife habitat value. The balance of the historic town, villages and smaller settlements surrounded by nature and countryside views is considered by the community to be a vital part of the character of the area. It makes the Parishes a special place to live and visit. It is of utmost importance that these characteristics are protected for current and future generations. Para. 6.4 National and local planning policy restricts development in the countryside. The adopted East Devon Local Plan does not identify the need for the Neighbourhood Plan to make any strategic or other housing development allocations due to the large number of new homes consented in recent years and the desirability of preserving the settlement pattern and character. As a result, no significant new developments whether within or outside of the existing settlements are needed during the Local Plan period. Para. 6.14 The unique pattern of settlements within the Neighbourhood Plan Area, each with their own distinctive character, is a valued part of its nature. This, coupled with developer pressure, particularly for new housing sites in and around the main settlements raises concerns about creeping development undermining and degrading the special character of the area over time. This must not be allowed to occur, and a major role of the planning system is to prevent and control this. Para. 6.15 In most cases, new development on land outside of the defined built up area boundaries of Ottery St Mary and West Hill will not be allowed in line with Local Plan and Neighbourhood Plan policies protecting the countryside. Inconsistency within Site Selection reports for Otry_21 The whole area surrounding Gerway Farm has been subject to repeated attempts by the landowner to promote development on this area of pristine agricultural land. It has been rejected in its entirety in the past and should continue to be rejected. 8 Otry_21 first appeared in the emerging plan as a Potential 2nd best option with an

allocation for 40 homes, Stating: ‘Allocation would need to be subject to satisfactory highways and archaeological/heritage assessment as the smaller section would need to be accessed through an existing estate and it is very sensitive in heritage terms, being a historic field enclosure with pre-historic and medieval finds nearby.’ The site made a re-appearance in September 2024, however had increased in density to now allocate 70 houses, with confusing statements, including: ‘Ottery St Mary has limited jobs, lacks a train station and accessibility is constrained by narrow roads, lack of pavements and a historic town centre,’ ‘Site is a significant greenfield site.’ It should be questioned, that why in the total absence of any change in the landscape, highway access or local housing need this area has risen from unacceptable to a density of 70 houses. Ottery St Mary – Transport and Public Realm Study 2022

2.3.13 The nature of the road network, as well as the land uses in the area, means that Ottery St Mary suffers from traffic travelling through the town centre, especially for the east/west movement. This can have a detrimental social and environmental impact on the streets especially in the narrow streets of the historic town centre.

2.3.14 The town also has a high demand from car traffic. This is apparent from the parking pressures and limitations on space for pedestrians and cyclists. Although the quality of the built heritage is very good, the public realm and streetscape is now dominated by vehicular traffic and suffers from blind bends, pinch points, narrow footways, poor cycling infrastructure and a lack of public space for social interaction.

2.3.21 Land use and transport are inextricably linked. It is the land uses that act as trip attractors or trip producers that give rise to the trip generation across the road network. Collectively the residential areas generate high levels of trip movements.

3.3.13 The East Devon local Plan is the emerging planning policy document for the district. It sets planning policies and proposals for new development in the district for the period 2020-2040. The emerging local plan strategy establishes Ottery St Mary as a Tier 2 settlement and as such an appropriate location for future growth and development.

3.3.14 However, the plan also acknowledges constraints on development including the extensive Conservation Area and setting of Grade 1 and 2* listed buildings, narrow approach roads to the historic centre which create traffic issues and significant congestion to the north, east and south, and the flood 9 plain of the River Otter. Expansion of the town to the north, east and south would exacerbate existing traffic issues. Hence, the plan favours development options to the west of the town, recognising that a green wedge has been designated to prevent coalescence between Ottery St Mary and West Hill village. The East Devon Water Cycle Study – November 2025 Key findings of the WCS are: Commissioned by East Devon District Council, this report was required to enable a clear understanding of the problems within the Otter

catchment area resulting from wastewater treatment. The report also informs the areas where future development should not occur without prior improvements to the wastewater treatment process, failure to prevent development (in particular residential development) will result in further unacceptable pollution in the River Otter. Three critical areas are identified as being at high risk from nutrient loading due to the increases in wastewater production from proposed housing developments: the River Exe Estuary, the River Axe, and the Otter Estuary. These areas are vulnerable due to direct effluent discharges or cumulative effects from multiple sources, exacerbating existing problems like phosphate pollution. Infrastructure enhancements and continued rigorous planning are recommended to handle the increased wastewater and sewage loads expected from new developments. Policy recommendations: To ensure sustainable growth and compliance with environmental standards, EDDC must embed water efficiency and water quality safeguards into the emerging Local Plan. The East Devon WCS outlines the essential considerations for managing water resources, wastewater, and environmental conservation considering projected development across the district. Its evidence-based observations and recommendations aim to steer East Devon towards a future where growth and sustainability coexists equally, ensuring that water management practices enhance rather than compromise the natural and built environment. The current existing flows, without proposed growth, are shown in Table 5.5. Using the 3-year average Q80 flow as the Actual DWF provided by SWW, four of the 15 WwTW that are expected to have development growth are currently exceeding, including Feniton, Fluxton, Honiton and Woodbury Summary New development in East Devon will increase demand on the sewerage network & WwTWs, resulting in higher treated discharge flows. This growth may exacerbate flood risk and reduce network capacity, requiring mitigation measures and infrastructure upgrades. Where WwTWs operate at or above 90% of their permitted capacity, further investigation is needed to assess environmental impacts and compliance with 10 pollutant limits. Using RQP modelling for riverine discharges and load standstill calculations for tidal systems, capacity analysis shows that seven WwTWs, including Colyton, Countess Wear, Honiton, Fluxton, Feniton, Seaton South and Woodbury will exceed permitted flow headroom post-growth. Policy recommendations Based on the analysis presented in Sections 4 to 6 of this WCS, the following high level policy recommendations should be considered by EDDC in the development of the Local Plan: Potential developments that may adversely affect green infrastructure assets and water quality should not be permitted. South West Water - Strategic Drainage and Wastewater Management Plan – Otter May 2023 This plan as published by SWW is their strategy to cover the period up to 2030 for Level 2 Catchments. Included within this strategy is a plan area for the Level 2 Catchment area of Ottery St Mary and shows that NO RESIDENTIAL DEVELOPMENT is allowed for within Ottery St Mary. It also states that Fluxton WwTW is overwhelmingly in either the Immediate moderate risk or Immediate high-risk category for many pollution incidents. A recent, 2018, upgrade to Fluxton WwTW costing £5m was completed and it

is stated that this will meet all requirements to 2031. It is not anticipated that any further investment will come forward, Storm Overflow's The Pumping Station and Storm Overflow below and serving the Gerway Farm area is currently greatly exceeding its permitted spill rate. The latest figures confirm that in 2024 it spilled a total of 13 times, which is compared to a permitted rate of 3 per year. SWW state their plan aims to reduce the number of spills to 3 by 2030/50. Surrounding Area Ottery St Mary is within Zone 2 influence for the East Devon Pebblebed Heaths. The town takes its name from the River Otter, which flows through the area, linking the surrounding landscape and having the East Devon Pebblebed Heaths running along an escarpment towards it. As a significant local settlement, Ottery St Mary faces ongoing pressure for new housing development. These developments are a concern due to their potential to increase recreational use and thus disturb the sensitive ecology of the heaths, which are a Special Area of Conservation (SAC) and Special Protection Area (SPA). Local planning decisions, such as those by the East Devon District Council and the Ottery St Mary Town Council, must consider the "Habitats Regulations" to ensure no adverse effects occur on the heaths' protected habitats and species. 11 The proposed site Otry_21 is in direct line of site from the Historic England site of Belbury Castle Heritage List No: 1017774, this should be considered a protected view. Due to its physical characteristics Otry_21, has a direct link to The River Otter through the stream flowing at the base of the site. It will prove impossible due to the nature of the ground to prevent the runoff of contaminated surface water and wastewater overflows from entering the river. Development should be precluded from this area. There is no demonstrable evidence of the need for additional housing within Ottery St Mary, in fact, there is currently a large surplus of housing for sale. The site in question is home to a large number of species both with and without protected status, including, Bats, Dormice, Buzzard and Merlin and is in extremely close proximity to Badgers and the newly introduced Beaver groups. I trust in consideration of all the preceding objections in particular the major traffic congestion and additional danger to parents and children that would be caused at the Winters Lane and Longdogs area of the town and your responsibility to safeguard the water quality within the River Otter you are able to request the removal of Otry_21 from the emerging local plan. Otry_21's inclusion in this plan has already provoked an attempt to increase the proposed development area and will no doubt encourage this speculative nature in pursuit of further undesirable development destroying rural landscapes and pristine agricultural land. The inclusion of this site would be an exceptionally poor and unjustified planning decision.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council's own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection. Ottery St Mary does not have a need for additional housing developments, I request that you question the accuracy of the Reg.19 figures and indeed the very term Housing Need, this is not an actual need it is a notional figure derived by calculation to achieve a Government Target. East Devon is using the standard method calculation; however this method provides a starting point for local authorities, but it is not a mandatory unchangeable target. Local authorities can use evidence constraints, such as the presence of a National landscape in their Local Plan. The Government has clarified that meeting housing need is never a reason to cause unacceptable harm to protected places. The fact that East Devon is 66% National Landscape should be embraced by the Planners to help reduce the target figure and avoid building on excellent quality agricultural land. East Devon is not taking this approach and in fact are criticising nearby Torbay for doing so. WHY? The Neighbourhood Plan is clear that Ottery St Mary does not need nor can cope with further large-scale development at the expense of its countryside and character. Keeping Otry_21 in the plan ignores that locally agreed vision. Many objections to the inclusion of Otry_21 have been raised and the site has previously been discounted for

reasons that have not changed. Over 560 objections have been raised for a development encompassing this area with the following Consultees having objected: · DCC Flood Risk Management · Otter Valley Association · Devon County Archaeologist · DCC Councilor for the area · Ottery St Mary Mayor · Ottery St Mary Town Council · EDDC Planning Policy Team question its suitability For all these reasons the allocation of Otry_21 is: · Unsustainable · In conflict with national, local, and neighbourhood policies · Environmentally harmful · Infrastructure-constrained · Unjustified and unsupported by evidence Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary, it would also seriously constrain the ability of EDDC planners to prevent further requests to expand Ottery St Mary in this highly unsuitable South Easterly direction. Pressure for such development is already evidenced by the controversial application 25/2468/MOUT.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD04

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Otry_21

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to lodge a formal objection to the proposed allocation of Site Otry_21 within the emerging East Devon Local Plan 2020–2042. Having reviewed the evidence base, associated technical studies, and relevant planning policies, the inclusion of this site would represent a fundamentally unsound, unjustified, and unsustainable planning decision. The allocation conflicts with the National Planning Policy Framework, the Emerging East Devon Local Plan, and the Ottery St Mary Neighbourhood Plan. It is also at odds with the Council’s own evidence regarding environmental constraints, infrastructure capacity, highway safety, and landscape protection.

1. Failure to Meet National Policy Requirements

Otry_21 cannot be considered a sustainable location for growth. The site fails to meet core NPPF tests relating to:

a) Sustainable transport – Ottery St Mary already suffers severe congestion, narrow approach roads, limited pavements, and poor cycling infrastructure. Development

south and east of the town would intensify existing pinch points, particularly at Winters Lane and Longdogs Lane.

b) Environmental and landscape protection – The site comprises high-quality agricultural land, forms part of a valued rural landscape and lies within direct view of the Scheduled Monument at Belbury Castle.

c) Flood risk and water quality – Runoff and groundwater flows from the site drain directly into the River Otter, an ecologically sensitive system already under pressure.

The NPPF is clear: development must be directed to the most sustainable and least environmentally harmful locations. Otry_21 does not meet these criteria.

2. Conflicts With the Draft Local Plan (Regulation 19)

Numerous policies within the emerging Local Plan directly contradict the allocation of Otry_21, including:

a) SP06 – which restricts development outside settlement boundaries.

b) AR02, OL01, OL04, OL09 – which require protection of water quality, landscape character, views, and biodiversity.

c) OL10 – which protects the best and most versatile agricultural land unless exceptional justification exists.

The Council's own landscape assessment identifies this as a significant greenfield site, sensitive to both visual impact and heritage settings. Its allocation is incompatible with the Local Plan's objectives for protecting East Devon's rural character.

3. Conflicts With the Ottery St Mary Neighbourhood Plan

The Neighbourhood Plan places strong emphasis on preserving:

- a) The distinctive countryside setting,
- b) The historic settlement pattern, and
- c) the rural landscape between communities.

It also states that no significant new housing allocations were required due to high recent growth. Allocating Otry_21 would contradict these locally endorsed policies, undermining community-led planning.

4. Severe Transport and Highway Constraints

The Ottery St Mary Transport & Public Realm Study (2022) identifies:

- a) Chronic congestion in the historic town centre,
- b) High car dependency.
- c) Narrow approach roads, and
- d) Limited junction capacity.

Any expansion to the east, north, or south of the town is expected to substantially worsen traffic conditions. Otry_21 sits in precisely the area where growth would be most damaging. Access through residential roads would significantly raise existing safety concerns for children and parents travelling to nearby schools. A very high percentage of people drive from Ottery St Mary to Exeter or the north and east of the town for employment, therefore, Otry_21 sits in a position that would be the most damaging to the towns traffic flow.

5. Wastewater, Drainage, and Environmental Risks

Both the East Devon Water Cycle Study (2025) and South West Water's Strategic Drainage Plan (2023) make clear that:

- a) Ottery St Mary has no capacity for additional residential development.
- b) The Fluxton Wastewater Treatment Works is already at, or over, permitted capacity.
- c) The storm overflow below Gerway Farm spilled 13 times in 2024, more than four times the permitted limit.
- d) Multiple treatment works within the catchment are in high-risk categories for pollution incidents.

Further housing in this location would increase nutrient loading, risk non-compliance with environmental standards, and directly threaten the ecological health of the River Otter and its protected habitats.

6. Harm to Biodiversity and Protected Habitats

The site supports a diverse range of wildlife, including Bats, Dormice, Buzzards, Merlin, Sparrowhawk, Badger, and nearby Beaver populations. It also lies within Zone 2 of influence for the East Devon Pebblebed Heaths SAC/SPA, where increased recreational pressure must be strictly controlled under the Habitats Regulations.

The ecological sensitivity of the surrounding area makes Otry_21 an inappropriate and high-risk location for development.

7. No Demonstrable Housing Need

There is no evidence of local need for additional housing allocations in Ottery St Mary. Available market housing already exceeds demand, and recent development has delivered significant housing growth. Allocating further greenfield land in this context is neither justified nor proportionate.

8). Unexplained Increase in Proposed Density

The site originally appeared as a “second-best option” for approximately 40 dwellings, subject to significant heritage and highway concerns. Its sudden re-emergence at 70 dwellings, with no change in local infrastructure, landscape conditions, or housing need, raises earnest questions about the soundness of the assessment process.

Conclusion

For the reasons outlined above, the allocation of Otry_21 is: · Unsustainable · In conflict with national, local, and neighbourhood policies · Environmentally harmful · Infrastructure-constrained · Unjustified and unsupported by evidence

Its inclusion would represent a failure of the plan-led system and risk irreversible harm to the landscape, environment, and character of Ottery St Mary.

I therefore respectfully request that Site Otry_21 be removed from the Emerging East Devon Local Plan.

Removal From Local Plan

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Evidence Document Ref: EDDC Local Plan 2020 – 2042 Regulation 19 Second Consultation Request for the removal of Site Selection for Otry_21 from the plan. I hereby request your assistance in correcting a suspect decision contained within the emerging local plan. The area in question is the inclusion of the site known as Otry_21 within land included for potential development. It is quite clear that as demonstrated by the vast body of evidence and adverse public opinion that the inclusion of this site within a new local plan would be an extremely poor planning decision. The inclusion of Otry_21 is in direct conflict with the requirements of the National Planning Policy Framework, Emerging Local Plan, Ottery St Mary Neighbourhood Plan, and conservation requirements for the River Otter as further highlighted: - Conflicts with NPPF: Para.11 'Plans and decisions should apply a presumption in favour of sustainable development. a) all plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change. d) where there are no relevant development plan policies, or the policies which are most important for determining the application are out-of-date, granting permission unless: ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole, having particular regard to key policies for

directing development to sustainable locations, making effective use of land.’ Para. 15 ‘The planning system should be genuinely plan-led. Succinct and up-to-date plans should provide a positive vision for the future of each area; a framework for meeting housing needs and addressing other economic, social, and environmental priorities; and a platform for local people to shape their surroundings.’ Para. 77 ‘The supply of large numbers of new homes can often be best achieved through planning for larger scale development, such as new settlements or significant extensions to existing villages and towns, provided they are well located and designed, and supported by the necessary infrastructure and facilities (including a genuine choice of transport modes). Working with the support of their communities, and with other authorities if appropriate, strategic policy-making authorities should identify suitable locations for such development where this can help to meet identified needs in a sustainable way. In doing so, they should: a) consider the opportunities presented by existing or planned investment in infrastructure, the area’s economic potential, and the scope for net environmental gains. b) ensure that their size and location will support a sustainable community, with sufficient access to services and employment opportunities within the development itself without expecting an unrealistic level of self-containment), or in larger towns to which there is good access.’ Para.109 Transport issues should be considered from the earliest stages of plan-making and development proposals, using a vision-led approach to identify transport solutions that deliver well-designed, sustainable, and popular places. This should involve: a) making transport considerations an important part of early engagement with local communities. b) ensuring patterns of movement, streets, parking, and other transport considerations are integral to the design of schemes, and contribute to making high quality places. c) understanding and addressing the potential impacts of development on transport networks. d) realising opportunities from existing or proposed transport infrastructure and changing transport technology and usage – for example in relation to the scale, location or density of development that can be accommodated. e) identifying and pursuing opportunities to promote walking, cycling and public transport use; and f) identifying, assessing, and taking into account the environmental impacts of traffic and transport infrastructure – including appropriate opportunities for avoiding and mitigating any adverse effects, and for net environmental gains. Para. 110 The planning system should actively manage patterns of growth in support of these objectives. Significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions and improve air quality and public health. However, opportunities to maximise sustainable transport solutions will vary between urban and rural areas, and this should be taken into account in both plan-making and decision-making. Para. 115 ‘In assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that: a) sustainable transport modes are prioritised taking account of the vision for the

site, the type of development and its location. b) safe and suitable access to the site can be achieved for all users. d) any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be cost effectively mitigated to an acceptable degree through a vision-led approach. Para. 116 Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios. Para. 124 Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously developed or 'brownfield' land.' Para. 125 'b) recognise that some undeveloped land can perform many functions, such as for wildlife, recreation, flood risk mitigation, cooling/shading, carbon storage, or food production. c) give substantial weight to the value of using suitable brownfield land within opportunities to remediate despoiled, degraded, derelict, contaminated or unstable land. Para. 170 Inappropriate developments in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere. Para 171. Strategic policies should be informed by a strategic flood risk assessment, and should manage flood risk from all sources. They should consider cumulative impacts in, or affecting, local areas susceptible to flooding, and take account of advice from the Environment Agency and other relevant flood risk management authorities, such as lead local flood authorities and internal drainage boards. Para. 172 . All plans should apply a sequential, risk-based approach to the location of development – taking into account all sources of flood risk and the current and future impacts of climate change – so as to avoid, where possible, flood risk to people and property. Para. 187 Planning policies and decisions should contribute to and enhance the natural and local environment by: a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils (in a manner commensurate with their statutory status or identified quality in the development plan). b) recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland. c) maintaining the character of the undeveloped coast, while improving public access to it where appropriate. d) minimising impacts on and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures and incorporating features which support priority or threatened species such as swifts, bats, and hedgehogs. e) preventing new and existing development from contributing to, being put at unacceptable risk from, or

being adversely affected by, unacceptable levels of soil, air, water or noise pollution or land instability. Development should, wherever possible, help to improve local environmental conditions such as air and water quality, taking into account relevant information such as river basin management plans. Para. 198 Planning policies and decisions should also ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on health, living conditions and the natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should: a) mitigate and reduce to a minimum potential adverse impact resulting from noise from new development – and avoid noise giving rise to significant adverse impacts on health and the quality of life. b) identify and protect tranquil areas which have remained relatively undisturbed by noise and are prized for their recreational and amenity value for this reason; and c) limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes, and nature conservation. Conflicts with East Devon District Council Regulation 19 Draft Plan: Para. 2.6. Rural East Devon will retain its outstanding charm and character with modest and sensitively planned development to meet the needs of local communities. Farming and rural activities will still dominate the use of land. Where possible we will retain high quality land in agricultural production as we move towards more environmentally sustainable farming practices into the middle decades of the 21st century. SP05 Within the settlement boundaries defined on the Policies Map development will be supported in principle. This does not mean that all development will be acceptable within settlement boundaries: proposals will be considered on their own merits having regard to other policies in this plan and any made neighbourhood plan. SP06: In locations outside of the defined settlement boundaries development will not be permitted unless it is in accordance with a specific Local or Neighbourhood Plan policy that explicitly permits such development. AR02 To minimise impact on protect, manage and improve water quality in all water bodies affected by development in East Devon: A. Planning permission will not be granted for any proposal which, because of inadequate provision of water services or inadequate or untimely provision of foul water and surface water drainage and disposal, would 1. cause pollution to the water environment, including coastal waters 2. result in the deterioration of the ecological status of a water body 3. overload the sewer network, or 4. result in an increase in flood risk at the site or elsewhere. DS01 Proposals will only be permitted where they: A. Respect the key characteristics and special qualities of the area in which the development is proposed. B. Ensure the appearance of buildings, including scale, massing, density, height, fenestration, and materials, relate well to their context. C. Do not adversely affect: 1. The distinctive rural, historic or architectural character of the area. 2. The urban form, in terms of significant street patterns, groups of buildings and open spaces. 3. The amenity of occupiers of adjoining residential properties. 4. The operation of existing uses outside of the proposed development. OL01 East Devon's landscape, countryside

and rural areas (including rivers, watercourses and waterbodies) will be protected against harmful development. Development will only be permitted where the applicant is able to demonstrate through a proportionate Landscape Appraisal that it will protect and enhance valued landscape attributes and special features and qualities that contribute to the character of East Devon's landscapes, in particular where it would not harm the distinctive landscape, amenity and environmental qualities within which it is located, including: A. Landform and water forms and patterns of settlement. B. Important natural and manmade features which contribute to the local landscape character, including topography, traditional field boundaries, trees and woodlands, areas of importance for nature conservation and rural buildings. C. The adverse disruption of a view from a public place which forms part of the distinctive character of the area or otherwise causes significant visual intrusions; and D. Aesthetic and perceptual factors such as tranquillity, wildness and dark skies. All development in the countryside should have regard to the most up to date Landscape Characterisation Assessments as a basis for understanding, maintaining and enhancing local distinctiveness and landscape character as well as up to date strategy and guidance for trees and woodlands. OL04 Development proposals will only be permitted where they preserve the visual integrity, identity and scenic quality of the district, in particular by conserving and enhancing key views and views of local landmarks, including those identified in Neighbourhood Plans. The following view types are considered to be particularly important: A. Landmark views to and from viewpoints and tourism and recreational destinations, including the coast, woodland and open countryside. B. Views from publicly accessible areas which are within, to or from settlements which contribute to the viewers' enjoyment of the local area. C. Views from public rights of way and other publicly accessible areas. D. Night-time views of dark skies, particularly where lighting is to be introduced in areas of low existing light pollution; and E. Views which include or otherwise relate to specific features relevant to East Devon and its special qualities, such as key landmarks, heritage assets (either in view or the view from) and biodiversity features. Development proposals should conserve and enhance sequential views and not result in adverse cumulative impacts within views. OL09 Permission will not be granted for development which would result in pollution that cannot be adequately mitigated. This will include: A. Pollution of the environment by gas or particulates, including smell, fumes, dust, grit, smoke and soot. B. Pollution of surface or underground waters, for example by untreated sewage, including discharges to: 1. Rivers, other watercourses, water bodies and wetlands. 2. Water gathering grounds including water catchment areas, aquifers and groundwater protection areas. 3. Harbours, estuaries or the sea OL10 Unless allocated for development under another plan policy, planning permission for development affecting the best and most versatile agricultural land (Grades 1, 2 and 3a) will only be granted exceptionally if: A. Sufficient land of a lower grade (Grades 3b, 4 and 5) is unavailable, or available lower grade land has an environmental value recognised by a statutory wildlife, historic, landscape or

archaeological designation outweighing the agricultural considerations; or B. The benefit of the development justifies and clearly outweighs the loss of high-quality agricultural land. If there is a choice between sites in different grades, land of the lowest grade available must be used except where other sustainability considerations, including intrinsic nature conservation value of a site, outweigh land quality issues.

Conflicts with Ottery St Mary Neighbourhood Plan 2017 – 2031 Para. 6.3 The countryside of the Neighbourhood Plan Area is a highly valued asset with special character provided by the rolling farmland, wooded hillsides, winding lanes and the open river valley. The countryside is important for its aesthetic and leisure value, its essential farming role and its wildlife habitat value. The balance of the historic town, villages and smaller settlements surrounded by nature and countryside views is considered by the community to be a vital part of the character of the area. It makes the Parishes a special place to live and visit. It is of utmost importance that these characteristics are protected for current and future generations. Para. 6.4 National and local planning policy restricts development in the countryside. The adopted East Devon Local Plan does not identify the need for the Neighbourhood Plan to make any strategic or other housing development allocations due to the large number of new homes consented in recent years and the desirability of preserving the settlement pattern and character. As a result, no significant new developments whether within or outside of the existing settlements are needed during the Local Plan period. Para. 6.14 The unique pattern of settlements within the Neighbourhood Plan Area, each with their own distinctive character, is a valued part of its nature. This, coupled with developer pressure, particularly for new housing sites in and around the main settlements raises concerns about creeping development undermining and degrading the special character of the area over time. This must not be allowed to occur, and a major role of the planning system is to prevent and control this. Para. 6.15 In most cases, new development on land outside of the defined built up area boundaries of Ottery St Mary and West Hill will not be allowed in line with Local Plan and Neighbourhood Plan policies protecting the countryside. Inconsistency within Site Selection reports for Otry_21 The whole area surrounding Gerway Farm has been subject to repeated attempts by the landowner to promote development on this area of pristine agricultural land. It has been rejected in its entirety in the past and should continue to be rejected. Otry_21 first appeared in the emerging plan as a Potential 2nd best option with an allocation for 40 homes, Stating: ‘Allocation would need to be subject to satisfactory highways and archaeological/heritage assessment as the smaller section would need to be accessed through an existing estate and it is very sensitive in heritage terms, being a historic field enclosure with pre-historic and medieval finds nearby.’ The site made a re-appearance in September 2024, however had increased in density to now allocate 70 houses, with confusing statements, including: ‘Ottery St Mary has limited jobs, lacks a train station and accessibility is constrained by narrow roads, lack of pavements and a historic town centre,’ ‘Site is a significant greenfield site.’ It should be questioned, that

why in the total absence of any change in the landscape, highway access or local housing need this area has risen from unacceptable to a density of 70 houses. Ottery St Mary – Transport and Public Realm Study 2022 2.3.13 The nature of the road network, as well as the land uses in the area, means that Ottery St Mary suffers from traffic travelling through the town centre, especially for the east/west movement. This can have a detrimental social and environmental impact on the streets especially in the narrow streets of the historic town centre. 2.3.14 The town also has a high demand from car traffic. This is apparent from the parking pressures and limitations on space for pedestrians and cyclists. Although the quality of the built heritage is very good, the public realm and streetscape is now dominated by vehicular traffic and suffers from blind bends, pinch points, narrow footways, poor cycling infrastructure and a lack of public space for social interaction. 2.3.21 Land use and transport are inextricably linked. It is the land uses that act as trip attractors or trip producers that give rise to the trip generation across the road network. Collectively the residential areas generate high levels of trip movements. 3.3.13 The East Devon local Plan is the emerging planning policy document for the district. It sets planning policies and proposals for new development in the district for the period 2020-2040. The emerging local plan strategy establishes Ottery St Mary as a Tier 2 settlement and as such an appropriate location for future growth and development. 3.3.14 However, the plan also acknowledges constraints on development including the extensive Conservation Area and setting of Grade 1 and 2* listed buildings, narrow approach roads to the historic centre which create traffic issues and significant congestion to the north, east and south, and the flood plain of the River Otter. Expansion of the town to the north, east and south would exacerbate existing traffic issues. Hence, the plan favours development options to the west of the town, recognising that a green wedge has been designated to prevent coalescence between Ottery St Mary and West Hill village. The East Devon Water Cycle Study – November 2025 Key findings of the WCS are: Commissioned by East Devon District Council, this report was required to enable a clear understanding of the problems within the Otter catchment area resulting from wastewater treatment. The report also informs the areas where future development should not occur without prior improvements to the wastewater treatment process, failure to prevent development (in particular residential development) will result in further unacceptable pollution in the River Otter. Three critical areas are identified as being at high risk from nutrient loading due to the increases in wastewater production from proposed housing developments: the River Exe Estuary, the River Axe, and the Otter Estuary. These areas are vulnerable due to direct effluent discharges or cumulative effects from multiple sources, exacerbating existing problems like phosphate pollution. Infrastructure enhancements and continued rigorous planning are recommended to handle the increased wastewater and sewage loads expected from new developments. Policy recommendations: To ensure sustainable growth and compliance with environmental standards, EDDC must embed water efficiency and water quality safeguards into the emerging Local Plan. The

East Devon WCS outlines the essential considerations for managing water resources, wastewater, and environmental conservation considering projected development across the district. Its evidence-based observations and recommendations aim to steer East Devon towards a future where growth and sustainability coexists equally, ensuring that water management practices enhance rather than compromise the natural and built environment. The current existing flows, without proposed growth, are shown in Table 5.5. Using the 3-year average Q80 flow as the Actual DWF provided by SWW, four of the 15 WwTW that are expected to have development growth are currently exceeding, including Feniton, Fluxton, Honiton and Woodbury Summary New development in East Devon will increase demand on the sewerage network & WwTWs, resulting in higher treated discharge flows. This growth may exacerbate flood risk and reduce network capacity, requiring mitigation measures and infrastructure upgrades. Where WwTWs operate at or above 90% of their permitted capacity, further investigation is needed to assess environmental impacts and compliance with pollutant limits. Using RQP modelling for riverine discharges and load standstill calculations for tidal systems, capacity analysis shows that seven WwTWs, including Colyton, Countess Wear, Honiton, Fluxton, Feniton, Seaton South and Woodbury will exceed permitted flow headroom post-growth. Policy recommendations Based on the analysis presented in Sections 4 to 6 of this WCS, the following high level policy recommendations should be considered by EDDC in the development of the Local Plan: Potential developments that may adversely affect green infrastructure assets and water quality should not be permitted. South West Water - Strategic Drainage and Wastewater Management Plan – Otter May 2023 This plan as published by SWW is their strategy to cover the period up to 2030 for Level 2 Catchments. Included within this strategy is a plan area for the Level 2 Catchment area of Ottery St Mary and shows that NO RESIDENTIAL DEVELOPMENT is allowed for within Ottery St Mary. It also states that Fluxton WwTW is overwhelmingly in either the Immediate moderate risk or Immediate high-risk category for many pollution incidents. A recent, 2018, upgrade to Fluxton WwTW costing £5m was completed and it is stated that this will meet all requirements to 2031. It is not anticipated that any further investment will come forward, Storm Overflow's The Pumping Station and Storm Overflow below and serving the Gerway Farm area is currently greatly exceeding its permitted spill rate. The latest figures confirm that in 2024 it spilled a total of 13 times, which is compared to a permitted rate of 3 per year. SWW state their plan aims to reduce the number of spills to 3 by 2030/50. Surrounding Area Ottery St Mary is within Zone 2 influence for the East Devon Pebblebed Heaths. The town takes its name from the River Otter, which flows through the area, linking the surrounding landscape and having the East Devon Pebblebed Heaths running along an escarpment towards it. As a significant local settlement, Ottery St Mary faces ongoing pressure for new housing development. These developments are a concern due to their potential to increase recreational use and thus disturb the sensitive ecology of the heaths, which are a Special Area of Conservation (SAC) and Special Protection Area (SPA). Local planning

decisions, such as those by the East Devon District Council and the Ottery St Mary Town Council, must consider the "Habitats Regulations" to ensure no adverse effects occur on the heaths' protected habitats and species. The proposed site Otry_21 is in direct line of sight from the Historic England site of Belbury Castle Heritage List No: 1017774, this should be considered a protected view. Due to its physical characteristics Otry_21, has a direct link to The River Otter through the stream flowing at the base of the site. It will prove impossible due to the nature of the ground to prevent the runoff of contaminated surface water and wastewater overflows from entering the river. Development should be precluded from this area. There is no demonstrable evidence of the need for additional housing within Ottery St Mary, in fact, there is currently a large surplus of housing for sale. The site in question is home to a large number of species both with and without protected status, including, Bats, Dormice, Buzzard and Merlin and is in extremely close proximity to Badgers and the newly introduced Beaver groups. I trust in consideration of all the preceding objections in particular the major traffic congestion and additional danger to parents and children that would be caused at the Winters Lane and Longdogs area of the town and your responsibility to safeguard the water quality within the River Otter you are able to request the removal of Otry_21 from the emerging local plan. Otry_21's inclusion in this plan has already provoked an attempt to increase the proposed development area and will no doubt encourage this speculative nature in pursuit of further undesirable development destroying rural landscapes and pristine agricultural land. The inclusion of this site would be an exceptionally poor and unjustified planning decision.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Removal of sdite from local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: See attached statements

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Representing Gerway Farm Development Action Group, we oppose all development on this land.

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:
Strategic Policy SD05: Seaton and its development allocations:

(Page 101). Quote: ‘Land west of Axeview Road (Seat_13a)’: “This site is allocated for around 39 dwellings. Archaeological assessment through geophysical survey and field evaluation should be undertaken prior to the site being developed. Development must be sensitively located and designed to ensure that it avoids damage to archaeological remains and conserves the setting of Roman and Earlier Settlement remains at Honeyditches Scheduled Monument. The development will need to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes. In order to ensure no adverse effect on the integrity of the Beer Quarry and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented.”

I support the inclusion of this final sentence in relation to the importance of Beer Quarry and Caves SAC and bat activities being a vital consideration and the need for them to be conserved when considered against any potential future development of this site. I would hope the inclusion of this sentence will ensure that it is given robust and defended consideration by the Local Planning Authority against the economic benefits of future development.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:
Strategic Policy SD05: Seaton and its development allocations. (Page 101).

Quote: 'Land off Harepath Road (Seat_05)': "This site is allocated for around 130 dwellings and 2.2 hectares of employment land. The employment land should be located in the field immediately north of the existing Harepath Road Industrial Estate. The small areas of adjoining woodland to the north should be enhanced through additional planting. Tree planting/landscaping on the northern edge is required and will help soften boundary edges with the countryside. In order to ensure no adverse effect on the integrity of the Beer Quarry and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented. Development proposals should explore opportunities to improve bus stop infrastructure on Harepath Road, to promote sustainable travel. Proposals should also consider pedestrian/cycle access onto Colyford Road and the Seaton – Colyford multi-use trail. Seat_03 and Seat_05 will need to come forward as a co-ordinated and comprehensive development that delivers the proposed large-scale mixed-use development on the northern edge of Seaton and seeks to deliver the long-standing need for a football pitch as part of a viable package of planning obligations. A harmonised vehicular access will need to be provided off Harepath Road."

I support the inclusion of this last sentence in relation to the need for a harmonised vehicular access needing to be provided off Harepath Road. Harepath Road is the safest main route that would serve this site given its long, straight design and nearby access to the A3052. The alternative option of using Colyford Road with its more winding character heading both towards Seaton and the neighbouring village of Colyford, and without pavements, would create a higher level of safety compromise from increased traffic volume. Therefore, Harepath Road presents a better engineered solution to serve the needs of any new development that might take place on this site. It provides any developers looking to submit an application for this site with a clearly defined, evidence-based and legally sound requirement.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Seat_03

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Land to the south of Harepath Hill (Seat_03):

(Page 100-101), Quote: "This site is allocated for around 75 dwellings. Built development should be concentrated in the less prominent eastern edge near Harepath Road, and/or to the south adjoining existing dwellings up to around the 55m contour line. Development should also respect the setting of the Grade II listed Harepath Farm."

I do not support the inclusion of the word "around" in relation to 55m for the contour line in relation to the adjoining the existing dwellings. The inclusion of the words "around the" in relation to the 55 m contour line is an approximation term rather than being specific in relation to a minimum distance away from adjoining existing dwellings. As such, it makes the 55 m distance of the contour line open for re-interpretation or manipulation by an applicant. The consequences of this could have an adverse impact on occupiers of the existing dwellings to the south of the boundary/contour line in terms of loss of privacy and visual intrusion of the new dwellings', particularly if they were taller chalet bungalows or two-storey houses. Likewise, the impact of the existing dwellings to the south of the contour line could have an adverse impact on the occupiers of any new dwellings built on this identified site to the south of Harepath Hill. The use of "around the" is open to interpretation and could in relation to the desired 55

m contour line being reduced, be successfully reduced if an applicant was to challenge this with the Planning Inspectorate in the event a planning application was refused by the Local Planning Authority.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

The previously quoted and fixed figure of 55m for the contour line must be retained in the Local Plan to provide transparent, rigid guidance to any new development on this site of what would be the required minimum figure they need to adhere to, rather than making it open for interpretation. This would also link in with good design practises and policies in terms of respecting existing design and boundary characteristics. Therefore the wording of this sentence in the Local Plan needs to read as: "This site is allocated for around 75 dwellings. Built development should be concentrated in the less prominent eastern edge near Harepath Road, and/or to the south adjoining existing dwellings up to the 55m contour line."

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I believe the Local Plan must set robust, concrete guidelines, especially in relation to distances from a contour line in order to reduce ambiguity and potentially manipulation by applicants, which might otherwise have an adverse effect on occupiers of existing dwellings.

Full name: MR D. MORGAN

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD05

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Seat_02

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Quote: 'Land at Barnards Hill Lane (Seat_02)': "This site is allocated for around 40 dwellings. A wide buffer should be provided to the northern boundary with tree planting/landscaping in the northern and western edges to soften the boundary with the countryside and create a well considered and designed northern edge to Seaton. In order to ensure no adverse effect on the integrity of the Beer Quarry and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented. [Development would need to provide a safe access onto Polar Tree Drive and also consider impacts on and proximity to the Poplar Tree Drive/Barnards Hill Lane junction, with mitigation to improve road safety and/or calm traffic potentially required]."

I do not support the removal of the quoted last sentence on Page 100 of the Local Plan: "Development would need to provide a safe access onto Poplar Tree Drive and also consider impacts on and proximity to the Poplar Tree Drive/Barnards Hill Lane junction, with mitigation to improve road safety and/or calm traffic potentially required." To date there has been no formal application and no feedback from Devon Highways in relation to this site.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: As a greenfield site in a built up area, safety for road users and pedestrians must promote the highest levels of safe access into and out of any new development. Poplar Tree Drive and Barnards Hill Lane lead into junctions for a number of existing large housing estates, with the majority of occupiers being car users. Therefore, the proposed deletion of the sentence for “providing a safety access onto Poplar Tree Drive and/or Barnards Hill Lane” is unsound and must therefore be retained in the final Local Plan. Retaining this sentence on page 100 of the Local Plan provides an additional layer of engineered safety design that an applicant would need to be able to demonstrate they can successfully deliver, beyond the potentially lesser standard of “improved road safety and/or calm traffic” measures.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Seat_13a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The site is north of, and immediately adjacent to, a sizeable Scheduled Monument: Roman and earlier settlement at Honeyditches – a heritage asset of the highest significance according to the NPPF. Please refer to our comments on the Regulation 19 Local Plan.

Proposed amendments to the wording of the policy relate to habitats and do not address any of the issues we have previously raised. We are aware that geophysical assessment and an HIA have been carried out. However, our view remains that that this site is unsuitable for development due to its impact on the significance of the Scheduled Monument as a result of development physically and visually separating the monument from its agricultural setting. Impacts on non-designated archaeology are also likely.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We recommend that this site allocation is removed from the Plan.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_01 , Sidm_31, Sidm_06a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

National Landscapes (NL) and Policies SD01, SD03, SD04, SD06, SD08, SD15, SD16, SD22 and SD23 Policy OL02 provides strong protection for the NL areas. Quote: "The highest level of protection will be given to the landscape and scenic beauty of the National Landscapes (NLs) in East Devon: A. Development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities, character and natural beauty of the NL (including the coastline, where relevant); B. Major development in a NL will only be permitted in exceptional circumstances and where it can be demonstrated to be in the public interest; and East Devon Local Plan 2020 to 2042 – Second Regulation 19 Publication Draft 223 C. Any relevant National Landscape Management Plans will be a material consideration in decision making. This policy will also apply to the Heritage Coast. This policy applies across the whole plan area including the Cranbrook Plan area". However there are a significant number of proposed development sites which are within the NLs, or have an affect upon its setting or appearance. • Sidm_01 : 160 new homes - again, inside the NL • Two other smaller Sidm_31 and Sidm_06a - also within the NL Most, if not all, of these sites cannot be justified as exceptional circumstances.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We have already made comments about the current dire sewage situation in the River Otter catchment. Building an additional 1,833 homes will only make the situation much worse.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: We wish to explain why we consider it is wrong to have so many housing sites within the National Landscapes.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(c). If the comment is related to a site, please state the site reference here.:
Sidm_31

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Land east of Burscombe Lane/ west of Windsor Mead, Sidford (Sidm_31) -'around' 15 'single storey' new homes with 'expected access from Windsor Mead'.

We object as new addition to Housing sites as - (i) This site encroaches in to the National Landscape (former AONB). This proposal contradicts Policy OL02 of this new version of the Local Plan that gives sites like this the 'highest level of protection of land in the landscape and scenic beauty of the National Landscapes in East Devon' like this property. (ii) This proposal contradicts Policy SP06 of this new version of the Local Plan that requires new development to be within the settlement boundary/ urban boundary unless expressly permitted by the Neighbourhood Plan. This development is also outside the originally approved 'settlement boundary' in the previous version of the draft Local Plan, which has been recently extended without consultation. (iii) Public Consultation. Originally this site, proposed for development in the draft local plan consulted on in 2022/ 2023 was Rejected as being unsuitable. But then without explanation included it has been slipped in as a late addition without formal consultation on its inclusion. (iv) Key Views. The proposed site is elevated on a slope and will be visible from across the valley. Designs for any proposed development within the National Landscape should respect the visual and visible impact on the area including the visual effect on the protection of the "Green Wedge". The Sid Valley Neighbourhood Plan in Policy 2 demands 'The protection of Key Views' which this development will fail to do. (v) Access from Windsor Mead to this Burscombe Lane site - this is not practical as the access route into Burscombe Lane is privately owned land

and the property owner does not want to sell his interest in the land. So access from Windsor Mead to Burscombe Lane can only be achieved by the Council using its CPO powers which seems unlikely. Also the junction of Windsor Mead and Sidford High Street is not suitable for handling the expected increased vehicular traffic from this proposed Burscombe Lane development.

We are concerned that this development contains no Affordable Housing as required in this draft Local Plan. We are also concerned that this development (a) should comply with this Local Plans' own Strategic Policy PB05 (Page 257) to achieve 20% Biodiversity Net Gain (BNG), (b) by the implied loss of existing agricultural land (c) should avoid the existing flooding problems down Burscombe Lane onto Sidford High Street.

In this respect, we note that Devon County Council has already objected to the outstanding planning application on this site due to the lack of a surface drainage management plan. Currently the site is naturally draining into the ground surface. Any development on this sloping site would require much improved drainage to avoid the impact of flash flooding and surface water run off affecting this site and other neighbouring land.

Also we note that the Environment Agency identifies the site may contain evidence of Romano-British settlement and recommends a Written Scheme of Investigation (WSI) prior to any development taking place.

Accordingly, we object to this proposed Burscombe Lane/ west of Windsor Mead, Sidford (Sidm_31) proposal for the reasons outlined above.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Sidm_06a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Allocation of 'around 15 new homes'.

We object to this proposal as - (i) This site encroaches into the National Landscape (former AONB). This proposal contradicts Policy OL02 of this new version of the Local Plan that gives sites like this the 'highest level of protection of land in the landscape and scenic beauty of the National Landscapes in East Devon' like this property. (ii) This proposal contradicts Policy SP06 of this new version of the Local Plan that requires new development to be within the previously published settlement boundary / urban boundary. (iii) This proposal contradicts Policy OL05: Green Wedges of this new version of the Local Plan 2020 - 2042 which will lead to 'Settlement Coalescence'.

We are also concerned that this development contains no Affordable Housing as required in this draft Local Plan.

We are also concerned that this development - (a)provides no details on how this sensitive site will achieve this Local Plans'own Strategic Policy PB05 (Page 257) to achieve 20% Biodiversity Net Gain (BNG), (b)implies the loss of existing agricultural land and, (c)has a history of flooding on to the busy Two Bridges Road below obstructing vehicular traffic which then has to take long diversions

To conclude we strongly object to the development of this site

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This representation is submitted on behalf of Persimmon Homes South West (PHSW) in respect of the proposed allocation for circa 160 dwellings within the emerging plan on Land South West of Woolbrook Road. As such, this representation is relevant to the consideration of the site allocation under reference â€˜Strategic Policy SD06â€™ and allocation â€˜Land south-west of Woolbrook Road (Sidm_01)â€™.

2. PHSW are owners of the entire allocation site as indicated in the site location plan (A069155drgA01v1) at Annex A accompanying this representation. Persimmon has instructed a project team in order to bring the site forward for development as envisaged by the emerging Local Plan. This includes the following specialisms:

- Design/Master Planning
- Highways/Accessibility
- Drainage/Flood Risk Assessment
- Ecology

- Landscape and Visual Impact.

3. The preliminary work undertaken by PHSW has further confirmed that the site is appropriate and achievable for development and will deliver much needed new homes, including affordable homes. In addition, the site will also assist in delivering significant benefits and localised improvements for the wider area including in respect of enhancing sustainable travel modes and surface water flooding. The site is suitable and available for development and PHSW will be pursuing an application on the site later this year.

4. Accordingly, this representation is also relevant in the consideration of the emerging Local Plan's evidence base. Blue Fox Planning (BFP), on behalf of PHSW, submitted previous representations to the local plan process, specifically to the first Regulation 19 consultation in Spring 2025, which will be referred to as appropriate and should be read alongside this submission.

5. This representation addresses the following matters: i. The LPA's consultation response to the first Regulation 19 consultation, fails to establish the position of the authority on the matters raised, and does not provide clear reasoning or justification as to the changes made to the plan as a result of the comments. ii. PHSW continue to fully support the continued allocation of this site for residential development and welcomes the adjustment of the policy to refer to 'around 160 homes' to reflect the updated capacity of the site and afford flexibility.

6. This representation is submitted without prejudice both to any other submissions made on behalf of Persimmon Homes, and to any submissions made by Blue Fox Planning on behalf of other clients.

7. The LPAs response to the first Regulation 19 Consultation is contained in the separate 'First Regulation 19 Local Plan Consultation Responses and Feedback Report'; on the LPAs website. This is arranged in a chapter-by-chapter basis with the responses summarised within the 'Draft Feedback Report'.

8. The response from the LPA fails to establish the position of the authority on the matters raised and does not provide clear reasoning or opinion as to the changes made to the plan as a result of the comments. No clear justification is evidenced as to the reasoning for the changes proposed, or the omission of any updates. This will

be referenced as appropriate in the subsequent sections of this representation with regards to specific policies.

9. The soundness of the approach taken by the LPA is therefore questioned, as there is no clear reasoning or accountability for the response and matters taken forward to this second Regulation 19 consultation which should be clearly evidenced.

Strategic Policy SD06: Sidmouth and its development allocations Land south-west of Woolbrook Road (Sidm_01) 10. Previous representations to the Regulation 19 consultation, considered that the former allocation figure of 127 homes was too rigid to support sustainable development and support sustainable development. The figure also underestimated the site potential and capacity following the removal of employment uses on the site. 11. We support the change in policy wording to allocate the site at Woolbrook Road for ‘around 160 homes’. This change is supported to reflect the flexibility and updated capacity of the site so that the policy is not unnecessarily restrictive which would result in any resultant allocation and the broader plan not making the best use of the land. 12. We also note that additional text has been added referencing the Beer Quarry and Caves SAC, biodiversity and the need for the development to maximise opportunities for localised improvements/contributions to enhance sustainable travel modes. These references are, again, supported by PHSW. 13. However, additional text is also proposed relating to the site’s location within the East Devon National Landscape. Whilst this is a statement of fact, the text states that the ‘development should be informed by detailed design work to conserve and enhance the natural beauty of the site and its wider landscape setting.’ 14. Whilst PHSW is fully committed to delivering a high-quality development which will conserve and enhance the natural beauty of its wider setting including in terms of the National Landscape, it must nevertheless be accepted that the site will be subject to built development. In that context, there is concern that the requirement to enhance the natural beauty of the site itself (as opposed to its wider setting) could be considered to be an unachievable and/or unrealistic bar to set.

Conclusion 35. Persimmon Homes South West (PHSW) continues to fully support the proposed allocation of allocation Sidm_01 ‘Land south-west of Woolbrook Road’ under Strategic Policy SD06. Specifically, PHSW welcomes and supports the adjustment of the policy to refer to ‘around 160 homes’ to reflect the updated capacity of the site as requested at the previous Regulation 19 consultation stage. 36. Notwithstanding the above, PHSW requests that the Council

give further consideration to the reference to the site within the National Landscape consistent with paragraphs 14 and 15 of these representations.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: 15. PHSW therefore

request that the Authority clarifies its intentions for this wording and consider amending the text to read: 'development should be informed by detailed design work to conserve and enhance the natural beauty of (the site and) its wider landscape setting.'

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Persimmon is a national house builder and has vast experience in delivering new homes across the country. Persimmon also owns the Land south west of Woolbrook (Sidm_01) allocation which is intended to deliver the majority of new homes identified for the Town and it is therefore considered that Persimmon's participation at the Hearing Sessions would be useful for the appointed Inspector(s).

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_06a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The National Planning Policy Framework ("NPPF") provides guidance in relation to planning in National Landscapes ("NL"): Para 189 - "great weight should be given to conserving and enhancing landscape and scenic beauty in ... National Landscapes" Para 190 - "when considering applications for development within ... National Landscapes, permission should be refused for major development other than exceptional circumstances and where it can be demonstrated that the development is in the public interest." Sidm_06 was acknowledged as high landscape sensitivity to development. the site was split into two with 6b being rejected. However by including any part of Sidm_06 para 189 of NPPF is not engaged as 'great weight' clearly is not being given to enhancing the natural landscape. The Sid Valley Neighbourhood Plan was 'made' by the District Council on 30/10/2019. It thereafter formed part of the East Devon Development Plan. Policy 3 within the Neighbourhood Plan establishes a non-coalescence zone between Sidford and Sidmouth. The intention is to prevent development which impacts on the separation between Sidford and Sidmouth. Sidm_06a is within that zone and represents increased coalescence between Sidford and Sidmouth.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised

wording for the relevant policy or paragraph. Please be as precise as possible.:

Sidm_06a should be removed from the proposed plan. It plainly does not comply with statutory restriction on development in NL and the Neighbourhood Plan non-coalescence area.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The District Council site selection report makes it clear that site Sidm_06 (6a and 6b) is unsuitable for development due to significant impact on the landscape. No real justification has been advanced for the inclusion of part of a site considered so problematic. there is a high heritage impact particularly in relation to 6a which is adjacent to the Sidford Conservation Area. Overall insufficient consideration and justification is evidenced in relation to the inclusion of this site. The revised wording suggests that development should be informed by detailed assessment and design work to enhance the natural beauty of the site. With respect no development would achieve this and this appears to be lip-service at best.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Simply remove Sidm_06a from the allocation

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(a). If yes, and you wish to support this part of the Development in the Towns and Villages chapter's compliance with the duty to co-operate, please use this box to set out your comments.: n/a - duty to co-operate no longer relevant

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_34

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: See enclosed representations

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: See enclosed representations

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: See enclosed representations We note that the proposed spatial strategy is predominantly unchanged from that set out in the first Regulation 19 consultation draft, with the exception of the inclusion of the specific name for the proposed new community of Marcombe. We therefore continue to be supportive of the proposed spatial strategy in broad terms, and agree that there is a need to focus the spatial strategy on development at the most sustainable settlements in the district. However, as set out in our comments to draft policy SP02, we continue to consider that the most sustainable

villages are capable of playing a significant role within the spatial strategy, and indeed may need to play a more significant role given the likely need for the authority to revisit the proposed housing requirement and with it the need for an increase in the number of allocations. Linked to this, we continue to maintain that reference within the Draft Plan to an allowance for only “limited development to meet local needs at the Service Villages” should be carefully considered to ensure that the growth directed to those villages is proportionate. No changes have been made in this respect since our representations to the first Regulation 19 consultation draft. It remains the case that for a number of villages more than simply “limited” development is already proposed to be directed to those settlements. This is a matter we support. Development at the sustainable towns and villages is important to ensure the delivery of affordable housing for those locally who really need it, as well as supporting local shops and services. We continue to maintain therefore that the authority review the proposed use of the word “limited” for the service villages, in order to ensure that the important role the villages can play is strengthened within the draft plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: See enclosed representations

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: See enclosed representations

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: In order to represent the interests of Sidbury LVA LLP in relation to their interests in the Land south of Furzehill, Sidbury (SIDM_34), and other draft policies in the plan. In order to represent the interests of Sidbury LVA LLP in relation to their interests in the Land south of Furzehill, Sidbury (SIDM_34), and other draft policies in the plan.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_06a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This Representation is made in response to the second Regulation 19 Publication Draft of the East Devon Local Plan Review, predominantly to support the emerging allocation for the Land west of Two Bridges Road, Sidford (Sidm_06a). We fully support the inclusion of SIDM_06a in the plan, and consider Sidford to be a suitable location for future growth and to accommodate a proportion of the required growth within the spatial strategy. The development of the site would provide much needed market and affordable housing to help meet local housing needs, as well as helping to sustain the vitality and viability of the existing services and facilities in both Sidford and Sidmouth more widely. We have however raised objections to the proposed reduction in the scale of development within Policy SIDM_06a from 30 dwellings to 15 dwellings with no supporting justification. As part of this we have requested changes to the allocation text and also an amendment to the allocation boundary to reflect the extent outlined in the plan at Appendix 1. Outside of this draft allocation however, we continue to have significant concerns over the proposed housing requirement and whether the plan can even proceed under the transitional arrangements set out in the NPPF. Our concerns relate to both the proposed stepped trajectory, which we consider is not supported by any evidence or justification, and the proposed housing requirement which in our view should be increased in order to reflect the updated Standard Method. We hope that these comments will be helpful

to inform the submission version of the Local Plan, but would be very happy to assist further with any queries relating to SIDM_06a, particularly any discussions relating to the proposed allocation text and boundary.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: In order to represent the interests of The Sidbury Manor Estate in relation to their interests in the Land west of Two Bridges Road, Sidford (Sidm_06a), and other draft policies in the plan.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_06a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We full support the principle of the allocation of the Land west of Two Bridges Road, Sidford (Sidm_06a). The is well related to the existing settlement edge, lying adjacent to existing residential dwellings on Lower Brook Meadow and Brook Close. The land is generally flat, with trees located along the site boundaries along with hedgerow. Vehicular access can be achieved into the site via Two Bridges Road, although more direct pedestrian and cycle connections could be achieved via Lower Brook Meadow to the south. The site falls within the National Landscape, albeit the National Landscape washes over the whole of Sidmouth and the wider area. The site falls within flood zone 1 so is not at risk of flooding. It is considered to be entirely suitable for future development and is well located on the edge of the town. Development could also easily be delivered in a sensitive manner given the National Landscape designation. Sidford is also an entirely appropriate location to allocate additional land and direct a proportion of growth within the Council's wider spatial strategy, with good connectivity to local services and facilities in Sidford as well as more widely within Sidmouth. We consider that the development of this site will provide much needed market and affordable housing to help meet local housing needs, as well as helping to sustain the vitality and viability of the existing services and facilities in the Sidford, and Sidmouth more generally.

However, in terms of the draft allocation itself, we note that changes have been made to the allocation text from the first Regulation 19 consultation.

We note the new draft wording reads: Land west of Two Bridges Road, Sidford (Sidm_06a) This land is allocated for development to the north of Sidford to accommodate around 3015 new homes. In order to ensure no adverse effect on the integrity of the Beer Quarry and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented. Development will need to play its part in supporting delivery of DCC's Sidbury - Sidmouth cycle route. The site is in the East Devon National Landscape and development should be informed by detailed assessment and design work to conserve and enhance the natural beauty of the site and its wider landscape setting. A new boundary hedge to the north-west of the site should be planted and maintained; The existing hedgerows should be retained where possible and a suitable scheme agreed and implemented to incorporate the existing spring into the development. It is not clear from reviewing the draft plan and supporting evidence base why the proposed scale of development has been reduced from 30 dwellings as part of the first Regulation 19 consultation to 15 dwellings as part of this second consultation. We can see that the 'Schedule of Changes made to the 2nd Reg. 19 Local Plan – CSD-0001b – November 2025' document confirms the reason for the change is "In response to additional landscape work undertaken". This is mentioned once within the supporting document and does not include any further explanation or context. Then looking at the supporting landscape evidence it is clear that the Council has published a Topic Paper titled 'Our outstanding landscape' (February 2025). This presents nothing in terms of supporting evidence to justify a reduction in the capacity of Site SIDM_06a. Additionally, whilst the Council published a 'East Devon and Blackdown Hills Landscape Character Assessment' which sits within the evidence base this is dated March 2019 and is therefore not up to date. Indeed, from a review of the supporting evidence base there is nothing new which justifies the Council's proposed reduction in the scale of development on the site from 30 dwellings to 15 dwellings. All of the relevant available evidence was available prior to the publication of the first regulation 19 consultation upon which the 30 homes proposed within SIDM_06a was based. In light of the fundamental issues with the soundness of the draft plan given the proposed housing requirement, as outlined in our response to Policy SP02, we are surprised that the Council is not proactively exploring the opportunity to maximise the use of this particular draft allocation. Rather than seeking to reduce the scale of development we consider opportunities to increase the scale of development on the site should be explored. As an absolute minimum, and in the absence of any evidence to support the proposed reduction in scale of development to only 15 homes, the draft policy should be amended to reinsert the previously proposed 30 homes. However, we consider there to be good reasons, given the significant pressure to boost housing

delivery, to explore an increase in both the scale of development and extent of the allocation boundary for this site. Our view is that the allocation boundary could be extended from the boundary as drawn for SIDM_06a into part of the area falling within SIDM_06b which had previously been assessed by the Council and rejected. The plan attached at Appendix 1, outlines what we consider to be a sensible and logical allocation boundary for SIDM_06a. This would follow the existing hedgerows from north to south and would avoid the need for the planting of new hedgerows as included in the amended policy text. Such development within this extended allocation boundary could still easily be sensitively designed given the National Landscape designation. But the opportunity exists to deliver a small increase in the scale of development on the site which would still be read in context against the backdrop of the existing settlement edge. The increase would also help to deliver an important increase in the number of affordable homes on the site given the ongoing substantial local need. In addition, the importance of the delivery of the first phase of the Sidford to Sidbury cycle route could be better supported by the development of this site if increasing the allocation boundary. As drawn, SIDM_06a excludes the first section of the cycle route, but extending the allocation boundary as suggested in Appendix 1 would help to ensure the first section of the cycle route is designed and delivered in connection with this site, which would be a much better placemaking solution. Overall, whilst we fully support the principle of allocation SIDM_06a and consider it to be ideally located to deliver both market and affordable housing as required by the draft plan, we object to the proposed reduction in the number of homes within the allocation. Instead, we consider the scale and extent of the allocation should be amended, and therefore request the draft text is amended as follows: Land west of Two Bridges Road, Sidford (Sidm_06a) This land is allocated for development to the north of Sidford to accommodate around [30](15) new homes. In order to ensure no adverse effect on the integrity of the Beer Quarry and Caves SAC and bat activities, suitable avoidance or mitigation measures will need to be identified and implemented. Development will need to play its part in supporting delivery of DCC's Sidbury - Sidmouth cycle route. The site is in the East Devon National Landscape and development should be informed by detailed assessment and design work to conserve and enhance the natural beauty of the site and its wider landscape setting. (A new boundary hedge to the north-west of the site should be planted and maintained;) The existing hedgerows should be retained where possible and a suitable scheme agreed and implemented to incorporate the existing spring into the development. The above amended text should sit alongside an amendment to the allocation boundary as suggested in Appendix 1.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_02, Sidm_35

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As set out in representations made at the 1st Regulation 19 stage (and notwithstanding changes made in the 2nd consultation version), it is not clear that the status and potential for development at Sidmouth (confirmed by its status as a Main Centre in the Spatial Strategy at Policy SP01) has been reflected in the policies and allocations in the plan, especially where other lower tier settlements continue to be proposed for higher levels of development. The proposed delivery of housing at Sidmouth over the plan period will unlikely be sufficient to meet local needs, and is not a proportionate response to the role and function of Sidmouth as a key main centre. This issue is compounded by the reduced level of housing provision which is being made by the plan overall, which is below the local housing needs set by national government policy. Land to the North of the Town at Sidford High Street (comprising LP_Sidm_02 and LP_Sidm_35) remains available for development, and the basis for the exclusion of this site, is not clear, on the basis that it is an otherwise suitable and deliverable site, and offers the opportunity for significant new strategic open space (as a public park), which would be an asset to the town and which would help to mitigate impacts that might otherwise occur in respect of the landscape in this area. In respect of the proposed allocation at Woolbrook Road (Sidm_01) it is not clear what evidence supports the increase in capacity at this site from 127 to 160 homes, when it is necessary for the site to provide an appropriate contextual design response and meet policy requirements for (amongst other things) biodiversity net gain.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To elaborate on issues raised and respond as appropriate during hearings.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Sidm_06a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: > My comments here refer to land in Sidford ie. land 6A which is included in the second regulation 19 for house > allocation and I include my concerns for the possibility of future allocation of 6B. This site is unsound and not legally compliant with national protection for National Landscapes.

I outline my reasons below and formally request that the Planning Inspectorate remove sites 6A (allocated) and 6B (not currently allocated) from the final Local Plan.

> East Devon deem this land to be a 'green wedge' so building here would not adhere to the council's own policy or the National Landscape policy.

> You state in your site selection report that the 'overall landscape susceptibility is high', that 'landscape harm is likely', 'that ecologically significant moderate adverse effect is predicted' and 'steep slopes are likely to require significant earthworks'. These are very negative reviews and illustrate that any development on this land is going to impact biodiversity, wildlife corridors, hedgerows, the 'dark sky' (observatory close by) and increase the risk of flooding. > The local infrastructure is not suitable to support such a proposal; services would be compromised, the increase in traffic will create congestion and reduce safety. > There is already a large area of land north/east of this site across Two Bridges road, only a road width separates them; that land is also proposed for

housing. Sidford and Sidbury are two small villages which should retain the ‘green wedge’ between them. > The historic environment site assessment concludes that ‘significant effect is predicted; the cultural heritage would be compromised and unable to be resolved through mitigation’.

I understand that the Council have not yet exhausted all urban regeneration opportunities or lower quality ‘grey belt’ sites. Development on the site proposed would conflict with the Council’s commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy. I ask that you adhere to your own policies. I strongly object to these sites going into the 2020-2042 Local Plan.

I have been assured by staff in the planning dept. at Blackdown House that my comments within this email, if sent prior to the closing deadline at 12midday on 26.1.26, will be included in the final draft of the Local Plan and duly submitted to the Planning Inspector for independent examination.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I formally request that the Planning Inspectorate remove sites 6A (allocated) and 6B (not currently allocated) from the final Local Plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear sirs,

Please find my objection below in relation to the consultation meeting Monday 26th January.

Please can this be added to commonplace in readiness.

I object to the proposed development at Site 6a, Sidford, on the grounds that the site lies within a sensitive Green Belt area and is wholly unsuitable for further development. The location is already at risk of flooding, and the road between Sidford and Sidbury regularly floods and becomes impassable. The introduction of additional hard surfacing would significantly increase surface water run-off, thereby exacerbating flood risk to neighbouring properties, local infrastructure, and the surrounding highway network. The proposal would also result in increased traffic movements along local roads that are narrow, heavily used, and poorly suited to accommodate additional vehicular access. In particular, the traffic lights at Sidford Cross are already heavily congested, with regular queuing at peak times, and additional traffic generated by the development would worsen congestion, increase delays, and heighten risks to highway safety and pedestrians. Furthermore, the application site is adjacent to Sidbury Castle, an ancient and historically significant landmark. The site lies within a protected view of Sidbury

Castle, and the proposed development would harm this important view, as well as the setting, character, and heritage value of the monument. The cumulative impacts of increased flood risk, additional traffic generation, loss of Green Belt land, harm to a protected landscape view, and damage to the historic environment are contrary to both local and national planning policies. The application should therefore be refused.

Kind regards

Sidm_06a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear *** Personal details have been removed ***, I am a resident of Lower Brook Meadow and am writing to express my strong objection to the allocation of Sidmouth site 6a for allocation of the development of 15 houses in the local plan, for the following reasons: 1: Ignoring the green wedge policy. This site is protected as a green wedge site to prevent the coalescence of Sidbury and Sidford and to protect the individual identity of both villages. The fact that this site is being considered, despite its green wedge protection, will set a precedent. Once development is allowed on this green wedge site, it will be impossible to prevent other green wedge sites such as site 6b from being developed. The physical gap between Sidford and Sidbury would be eroded.

2: The destruction of the National Landscape (AONB). Again, the precedent of allocating this site leading to future site developments, would negatively impact the National Landscape and would cause irreversible harm.

3: Failure to Prioritize Sustainable Alternatives The emerging Local Plan already identifies the proposed new town of Marcombe as the primary vehicle for meeting the district's housing targets. EDDC's own strategy is to concentrate growth in sustainable, purpose-built communities rather than "bolting on" unsustainable developments to existing villages in sensitive locations. 4: Previous ruling that the site was unsuitable The fact that site 6 was considered previously unsuitable and has now been divided into 2 separate sites in order to allow for some development is very concerning. Will this site

be sold as two separate sites? If it is sold as one site, it would not be in the interest of any developer to build only 15 houses. I therefore feel that this is simply a back door entry to the development of site 6b of 238 further houses, again violating green wedge policy and causing significant irreversible harm.

5: Local heritage impact. This site lies within close proximity to Sidbury Castle which is a scheduled monument protected by Heritage England and would impact the views from the castle.

Thank you very much for agreeing to put forward my objection to the commonplace platform by close of consultation Monday 26th January, as per your email to ***
Personal details have been removed ***, Sid Vale Association.

Kind regards,

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Sidm_06a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I have just been made aware that a green area 6a (and potentially later 6b) is proposed as part of the East Devon local plan for a housing development under Section 19. I live in Higher Brook Meadow, Sidford and am concerned at how this is being slipped in under the radar. Had neighbours in Lower Brook Meadow not mentioned it, I would have missed it, even if I'd tried to read the local plan. Local neighbours have struggled to use the online platform Commonplace to put forward objections as it is extremely difficult to navigate and identify the areas they wish to discuss. This feels undemocratic and should be addressed properly in future.

My objections to the plan are

1. This area has insufficient infrastructure for a large increase in village population. There is already another housing site (previously approved as an industrial site) on the opposite side of the main road at the edge of the village. Marlcombe was planned to absorb most of the housing need.

2. The impact on our local community would be significant:

-Our local doctors surgery already struggles to provide appointments for the current population.

-We only have one local secondary school.

-Extra traffic will caused considerable increase in danger for pedestrians as well as drivers in the village. This is always worst during tourist season.

3. EDDC would be failing to adhere to obligations towards environment. Their Marlcombe strategy is of not bolting on development to smaller communities particularly in sensitive locations. This is not a brownfield site and it should be considered only after all other brown/grey options have been ruled out.

The Green Wedge policy is to prevent the loss of individual community identity, such as between Sidford and Sidbury and avoid urban sprawl.

The proposed allocation falls within the East Devon National Landscape. Under the National Planning Framework (NPPF) paragraph 189, "great weight" must be given to conserving and enhancing the landscape and scenic beauty of these areas.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: For these reasons we both object to the inclusion of 6a and 6b as part of regulation 19.

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Sidm_31

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: With reference to Land Sidm_31 East of Burscombe Lane/West of Windsor Mead Sidmouth. Herewith my objections to the proposed site.

1) Dangerous inappropriate access from Windsor Mead or Burscombe Lane. Burscombe lane too narrow for Highways pavement access. Potential higher risk to predominately elderly residents on foot from higher vehicle volume. Blindspot at junction to main road. Windsor Mead, Steep access junction to main road. Route from junction to Land Sidm_31, Ridiculous ! Where is the access without purchasing a residents garden ?

2)Untold stress and worry for predominately retired elderly residents of Corefields, Windsor Mead and Burscombe Lane.

3) Loss of privacy/ Being overlooked for existing properties in Burscombe Lane and Corefields.

4) Harming tourism in the area. Burscombe Lane is the starting or finishing point for many walks. Potentially putting a proposed development at site 31 is not something that nature enthusiasts, Hikers, Visitors will want to see. The whole point of this lane is

to provide access to the Farm etc and to provide a doorway to the unspoilt beautiful peaceful countryside.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Sidm_06a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Dear *** Personal details have been removed ***. I would like our opposition to the proposed house building in Sidford to be noted in commonplace We have only just become aware, through lack of transparency, yet again, that the land 6A is up for the regulation 19 (second stage) and as a collective that will now be working together to oppose this site housing allocation 6A and any possible future allocation of 6B, we would like to state that we are very seriously concerned about the Green Wedge Policy and the National Landscape Policy being over ridden in order for the development for this site to be allocated. Please find some of our concerns outlined below that were raised at a recent meeting:

1. Impact on National Landscape (formerly AONB) The proposed allocation falls within the East Devon National Landscape. Under the National Planning Framework (NPPF) paragraph 189, "great weight" must be given to conserving and enhancing the landscape and scenic beauty of these areas. We are extremely concerned that once this site is approved, this sets precedent for others such as 6B to follow with a further development of 238 houses.

? Major Development: Building a housing estate here constitutes "major development" in a protected landscape. National policy dictates such applications should be refused except in exceptional circumstances and where it can be demonstrated they are in the

public interest. ? Irreversible Harm: The introduction of high-density housing, street lighting, and associated infrastructure will permanently degrade the character of this statutory protected area, which provides significant value to the local economy through tourism and wellbeing.

2. Violation of Green Wedge Policy This site is currently designated as a GREEN WEDGE. The primary purpose of East Devon's Green Wedge policy is to prevent the coalescence of settlements and protect the individual identity of our towns and villages. ? Settlement Identity: Development here would erode the physical and visual gap between SIDFORD and Sidbury, leading to urban sprawl. ? Precedent: Allowing development on this site undermines the integrity of the Green Wedge designation across the entire district, making it impossible for the Council to defend other sensitive gaps in the future such as site 6b.

3. Failure to Prioritize Sustainable Alternatives The emerging Local Plan already identifies the proposed new town of Marcombe as the primary vehicle for meeting the district's housing targets. ? Marcombe Strategy: EDDC's own strategy is to concentrate growth in sustainable, purpose-built communities rather than "bolting on" unsustainable developments to existing villages in sensitive locations. ? Brownfield First: National policy in 2026 mandates a "brownfield-first" approach. The Council has not yet exhausted all urban regeneration opportunities or lower-quality "Grey Belt" sites before resorting to the destruction of high-value National Landscapes.

4. Environmental and Infrastructure Constraints ? Biodiversity Loss: The site provides vital "green lungs" and wildlife corridors. Development would conflict with the Council's commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy. ? Infrastructure Deficit: Local services, including the Sid Valley medical Practice, narrow lanes and schools, are already at capacity. This allocation offers no credible mitigation for the increased pressure on local infrastructure. ? Detrimental to local heritage: The site is in very close proximity to Sidbury Castle an iron age fort, a Scheduled Monument, protected by Historic England and would impact the "commanding views over the river Sid and village." Conclusion For the reasons stated above, this site is unsound and not legally compliant with national protection for National Landscapes. We formally request that the Planning Inspectorate remove sites 6a (allocated) and 6b (not currently allocated) from the final Local Plan to protect the unique character of East Devon for future generations. Also would like to add that the flood risk to this area from hard landscaping would in crease an already bad area that floods at the point where the 'estate' would come onto the main road. As well as the increased stress on the local services and road use . Yours *** Personal details have been removed ***. Sent from my iPhone

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear *** Personal details have been removed ***. I would like our opposition to the proposed house building in Sidford to be noted in commonplace We have only just become aware, through lack of transparency, yet again, that the land 6A is up for the regulation 19 (second stage) and as a collective that will now be working together to oppose this site housing allocation 6A and any possible future allocation of 6B, we would like to state that we are very seriously concerned about the Green Wedge Policy and the National Landscape Policy being over ridden in order for the development for this site to be allocated. Please find some of our concerns outlined below that were raised at a recent meeting:

1. Impact on National Landscape (formerly AONB) The proposed allocation falls within the East Devon National Landscape. Under the National Planning Framework (NPPF) paragraph 189, "great weight" must be given to conserving and enhancing the landscape and scenic beauty of these areas. We are extremely concerned that once this site is approved, this sets precedent for others such as 6B to follow with a further development of 238 houses.

? Major Development: Building a housing estate here constitutes "major development" in a protected landscape. National policy dictates such applications should be refused except in exceptional circumstances and where it can be demonstrated they are in the public interest. ? Irreversible Harm: The introduction of high-density housing, street lighting, and associated infrastructure will permanently degrade the character of this statutory protected area, which provides significant value to the local economy through tourism and wellbeing.

2. Violation of Green Wedge Policy This site is currently designated as a GREEN WEDGE. The primary purpose of East Devon's Green Wedge policy is to prevent the coalescence of settlements and protect the individual identity of our towns and villages. ? Settlement Identity: Development here would erode the physical and visual gap between SIDFORD and Sidbury, leading to urban sprawl. ? Precedent: Allowing development on this site undermines the integrity of the Green Wedge designation across the entire district, making it impossible for the Council to defend other sensitive gaps in the future such as site 6b.

3. Failure to Prioritize Sustainable Alternatives The emerging Local Plan already identifies the proposed new town of Marlbcombe as the primary vehicle for meeting the

district's housing targets. ? Marlcombe Strategy: EDDC's own strategy is to concentrate growth in sustainable, purpose-built communities rather than "bolting on" unsustainable developments to existing villages in sensitive locations. ? Brownfield First: National policy in 2026 mandates a "brownfield-first" approach. The Council has not yet exhausted all urban regeneration opportunities or lower-quality "Grey Belt" sites before resorting to the destruction of high-value National Landscapes.

4. Environmental and Infrastructure Constraints ? Biodiversity Loss: The site provides vital "green lungs" and wildlife corridors. Development would conflict with the Council's commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy. ? Infrastructure Deficit: Local services, including the Sid Valley medical Practice, narrow lanes and schools, are already at capacity. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_31

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We would like to object to the above planning proposal on the grounds of accessibility.

1) Windsor Mead was never designed as a through road.

2) The properties in Windsor Mead were bought on a cul de sac. There is no facility for a through road to the proposed development East of Burscombe Lane.

3) Burscombe Lane is not suitable for access to the proposed development. Coming from Sidford High Street and after the Corefields turning, Burscombe Lane becomes a single lane without pavement. This lane is not suitable for the increase in traffic that a new development would produce.

4) Also the access from Burscombe Lane onto Sidford Hig Street has poor visibility from both directions. This would only be exacerbated by the inevitable increase in traffic flow.

Full name: Mr Richard J Goodier

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Sidm_31

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: In respect of Sidm_31, the Second Draft states: "It is expected that access for all road users would be off Windsor Mead." I own the land between Windsor Mead and the proposed development site. I have had no contact with either the council nor the developer as to how they intend to access the development through my land. Any request for access or purchase would be refused.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
Delete the sentence detailed above. Access would have to be via Burscombe Lane which is also problematic for reasons clearly stated in the existing planning application.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: See answer to 2(b) above.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: See answer to 2(c) above.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: See answer to 2(b) above.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The current proposal necessitates a road going through my land.

Full name: Mr & Mrs Guck

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Sidm_31

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the planning application for the field which is described as “Land East of Burscombe lane / West of Windsor Mead Sidmouth_31.” For the following reasons:

Aside from the decidedly problematical access and water runoff issues which I am sure others have mentioned in detail (water runoff does affect my garden at present - sometimes free running along the path at the side of the bungalow in winter), the site is within an area of National Landscape. Beacon Hill local nature reserve with its dartford warblers and nightjars is less than a mile away - ground nesting birds like the nightjar are particularly sensitive to disturbance by cats and dogs.

Another thought is that this location is not particularly suitable for the social housing mandated in the Neighbourhood plan - it is some distance from most of the employment opportunities in Sidmouth.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Sidm_06a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to lodge my objections to the two proposed housing developments East Devon Local Plan Sidm 06a and Sidm 06b. I consider that these plans would irreversibly destroy an area of outstanding national beauty (National Landscape) and have devastating impact on the wildlife and nature therein. A poor legacy to leave the next generation and also destroying the very thing which attracts people to the area either as visitors or to re-settle. I also believe that the development would erode the Green Wedge Policy and that the distinctive districts of Sidford and Sidbury would be lost within a larger urban sprawl of housing. The picturesque nature of East Devon and it's rural villages would be lost. I do not consider that the local infrastructure within the northern Sid Valley could cope with the dramatic increase in housing and population that the development would create. I feel that all local brown field sites should be prioritised before any reversion to building development in open countryside. Also I cannot accept that the Sid Valley needs large housing developments when there are numerous large new town projects in planning for East Devon (Farringdon and Budleigh Salterton) not to mention on-going development at Cranbrook. Please make note of my objection as a matter of urgency.

Yours

*** Personal details have been removed ***

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: My concerns and objections:-

1 I have found out about this development I believe it is known as Sidm 06a and Sidb 06b today from a neighbour.

- I can find no reference on the ED planning website

- I can find no search facility of the ED planning website

- you have not used your APP to inform residents

- you have used no other discernible method to inform residents

- your website under 'second regulation 19' and 'commonplace' offers an option to comment or object but only if you can correctly identify the particular planning decision, which I couldn't.

- I have found no reference to this in the local newspaper (which I don't take)

2 Putting all the points together in 1 it is clear that there has been a deliberate attempt to 'under publicise' or hide this proposal. This is at best deceiving. I am a computer literate and able communicator. If I can't find it - it ISN'T well enough publicised.

3 My other objections are obvious to all but the blind or those with an entirely different agenda. a It is a major development in a protected landscape (especially when allied to the other 238 houses proposed) These should be mandatorily refused except in exceptional circumstances. b The development will degrade the character of a protected area c It violates the GREEN WEDGE policy d it erodes the gap between Sidford and Sidbury e It sets precedent making other defences impossible f It directly contradicts the Marlcombe strategy g It ignores 'Brownfield First' h It is environmentally ridiculous I It is detrimental to local heritage j J must stand for JOKE - there is NO INFRASTRUCTURE to cope. Doctors, Dentists, Roads etc etc. You cannot as an authority meet your obligations now.

In conclusion it is UNSOUND and NOT LEGALLY COMPLIANT.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: My concerns and objections:-

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_06a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: To whom it may concern I have just been made aware re developments in sidford that the land 6a is up for the regulation 19 (second stage) and this email is in relation to opposing this. As residents we are very concerned about the green wedge policy and the national landscape policy being over ridden for the development of this site to be allocated.

Please find some of our concerns outlined below that were raised at a recent meeting:

1. Impact on National Landscape (formerly AONB) The proposed allocation falls within the East Devon National Landscape. Under the National Planning Framework (NPPF) paragraph 189, "great weight" must be given to conserving and enhancing the landscape and scenic beauty of these areas. We are extremely concerned that once this site is approved, this sets precedent for others such as 6B to follow with a further development of 238 houses.

? Major Development: Building a housing estate here constitutes "major development" in a protected landscape. National policy dictates such applications should be refused except in exceptional circumstances and where it can be demonstrated they are in the public interest. ? Irreversible Harm: The introduction of high-density housing, street

lighting, and associated infrastructure will permanently degrade the character of this statutory protected area, which provides significant value to the local economy through tourism and wellbeing.

2. Violation of Green Wedge Policy This site is currently designated as a GREEN WEDGE. The primary purpose of East Devon's Green Wedge policy is to prevent the coalescence of settlements and protect the individual identity of our towns and villages. ? Settlement Identity: Development here would erode the physical and visual gap between SIDFORD and Sidbury, leading to urban sprawl. ? Precedent: Allowing development on this site undermines the integrity of the Green Wedge designation across the entire district, making it impossible for the Council to defend other sensitive gaps in the future such as site 6b.

3. Failure to Prioritize Sustainable Alternatives The emerging Local Plan already identifies the proposed new town of Marcombe as the primary vehicle for meeting the district's housing targets. ? Marcombe Strategy: EDDC's own strategy is to concentrate growth in sustainable, purpose-built communities rather than "bolting on" unsustainable developments to existing villages in sensitive locations. ? Brownfield First: National policy in 2026 mandates a "brownfield-first" approach. The Council has not yet exhausted all urban regeneration opportunities or lower-quality "Grey Belt" sites before resorting to the destruction of high-value National Landscapes.

4. Environmental and Infrastructure Constraints ? Biodiversity Loss: The site provides vital "green lungs" and wildlife corridors. Development would conflict with the Council's commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy. ? Infrastructure Deficit: Local services, including the Sid Valley medical Practice, narrow lanes and schools, are already at capacity. This allocation offers no credible mitigation for the increased pressure on local infrastructure. ? Detrimental to local heritage: The site is in very close proximity to Sidbury Castle an iron age fort, a Scheduled Monument, protected by Historic England and would impact the "commanding views over the river Sid and village." Conclusion For the reasons stated above, this site is unsound and not legally compliant with national protection for National Landscapes. We formally request that the Planning Inspectorate remove sites 6a (allocated) and 6b (not currently allocated) from the final Local Plan to protect the unique character of East Devon for future generations.

I would like my objection to be added to commonplace.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

To whom it may concern I have just been made aware re developments in Sidford that the land 6a is up for the regulation 19 (second stage) and this email is in relation to opposing this. As residents we are very concerned about the green wedge policy and the national landscape policy being over ridden for the development of this site to be allocated.

Please find some of our concerns outlined below that were raised at a recent meeting:

1. Impact on National Landscape (formerly AONB) The proposed allocation falls within the East Devon National Landscape. Under the National Planning Framework (NPPF) paragraph 189, "great weight" must be given to conserving and enhancing the landscape and scenic beauty of these areas. We are extremely concerned that once this site is approved, this sets precedent for others such as 6B to follow with a further development of 238 houses.

? Major Development: Building a housing estate here constitutes "major development" in a protected landscape. National policy dictates such applications should be refused except in exceptional circumstances and where it can be demonstrated they are in the public interest. ? Irreversible Harm: The introduction of high-density housing, street lighting, and associated infrastructure will permanently degrade the character of this statutory protected area, which provides significant value to the local economy through tourism and wellbeing.

2. Violation of Green Wedge Policy This site is currently designated as a GREEN WEDGE. The primary purpose of East Devon's Green Wedge policy is to prevent the coalescence of settlements and protect the individual identity of our towns and villages. ? Settlement Identity: Development here would erode the physical and visual gap between SIDFORD and Sidbury, leading to urban sprawl. ? Precedent: Allowing development on this site undermines the integrity of the Green Wedge designation across the entire district, making it impossible for the Council to defend other sensitive gaps in the future such as site 6b.

3. Failure to Prioritize Sustainable Alternatives The emerging Local Plan already identifies the proposed new town of Marlcumbe as the primary vehicle for meeting the district's housing targets. ? Marlcumbe Strategy: EDDC's own strategy is to concentrate growth in sustainable, purpose-built communities rather than "bolting on"

unsustainable developments to existing villages in sensitive locations. ? Brownfield First: National policy in 2026 mandates a "brownfield-first" approach. The Council has not yet exhausted all urban regeneration opportunities or lower-quality "Grey Belt" sites before resorting to the destruction of high-value National Landscapes.

4. Environmental and Infrastructure Constraints ? Biodiversity Loss: The site provides vital "green lungs" and wildlife corridors. Development would conflict with the Council's commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy. ? Infrastructure Deficit: Local services, including the Sid Valley medical Practice, narrow lanes and schools, are already at capacity. This allocation offers no credible mitigation for the increased pressure on local infrastructure. ? Detrimental to local heritage: The site is in very close proximity to Sidbury Castle an iron age fort, a Scheduled Monument, protected by Historic England and would impact the "commanding views over the river Sid and village." Conclusion For the reasons stated above, this site is unsound and not legally compliant with national protection for National Landscapes. We formally request that the Planning Inspectorate remove sites 6a (allocated) and 6b (not currently allocated) from the final Local Plan to protect the unique character of East Devon for future generations.

I would like my objection to be added to commonplace.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Sid_06a, Sid_06b

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I have selected No re q. 2 above (there is no option to select Dont Know thus a 50:50).

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This is a general comment re the proposed development re Sid_06a and Sid_06b (apologies if this is input into the wrong place - made aware of this plan very late on and cannot see a general comment section): First and foremost, the existing land protections must be fully respected and adhered to; otherwise one has to ask why those protections were introduced in the first place if they can simply be set aside when it becomes inconvenient. If, despite those protections, housing is eventually allowed – which many with a cynical slant, might perceive to be the case in the planning process – then any such permission should at least be used to help those least able to get new homes, such as first-time buyers, younger generations, and lower-income households/people. In that situation, there should be clear clauses requiring a definite percentage of the new housing to be targeted at these groups, with the clear expectation that the majority of new homes are directed towards helping them onto the housing ladder, and with mechanisms to ensure that these commitments cannot easily be watered down later. If

arguments nevertheless override existing protections and ultimately “win” in the end, then the very least that should be done, as an act of decency and genuine multi-lateral decision-making, is to dramatically reduce the volume of housing permitted on any such land, so that impacts on already-stretched local roads, public transport, schools, health services and other infrastructure are kept to an absolute minimum and not treated as an afterthought. Finally, where land is subject to specific landscape, environmental or planning designations, and where additional strain would be placed on local transport and community infrastructure, any move to set these aside should be tested carefully against the relevant legal and policy framework and fully explained. Local people are entitled to know on what legal basis existing protections are being overridden, how impacts on infrastructure will be addressed in practice, and how their associated rights and the council’s statutory duties have been taken into account.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Sidm_31

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: It is extremely disappointing that the second draft of the Local Plan still includes a proposal that the site Sidmouth_31 be used for housing development when it is clearly unsuitable.

As previously indicated there are significant reasons why this site should be removed from the plan relating to access issues, its position within the National Landscape (AONB), environmental impacts and increased risks of flooding in the area.

Access: In the plan it is proposed that access be via Windsor Mead - a small cul-de-sac adjacent to the site but where property, privately owned by a number of third parties prohibits access. Compulsory purchase orders would be necessary to secure access in this easterly direction which encroaches on local residents existing property rights and disturbs the road layout of the cul de sac. Furthermore exit from Windsor Mead onto the High Street (A3052) has poor visibility which increases risk of traffic collisions. The proposal for access in the Plan therefore is incoherent and unjustified. Any suggestion that the site might be accessed from the westerly edge also presents significant problems that have been raised previously - as Burscombe Lane is a single track lane with a very reduced width, poor pedestrian facilities and very limited visibility with the junction to the A3052.

National Landscape: The site sits in the National Landscape and is prominent from many directions especially the National Trust area of Salcombe Hill and Trow Hill. Any development here significantly extends the built area, potentially creates a more urban edge and built environment in a rural setting that is known for its attractions within the Sid Valley. On rising land towards Core Hill the site is within a green landscape that is a popular amenity for local residents for walking and other recreation. Since 2023 local authorities are expected to actively conserve and enhance the National Landscape.

Environmental degradation: Building on this site would without doubt cause environmental degradation - the removal of ancient hedges, extensive and significant excavation and removal of established habitats and flora. While mitigation measures may be proposed by any developer they cannot by definition replace like for like. New plantings or soil replacement will simply not be equivalent. A wide range of species have been documented in the area including bats and great crested newts that will without question be disrupted or destroyed by development.

Flood risk: There is a real danger that development on this site and increasing the housing density, hard surfacing and excavation could impact surface water drainage and cause flooding. Existing management of the water flows is weak as flooding occurs in Burscombe Lane (west), along the public footpath (north). Storm drains the east and south are old and unsuited for further development.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We urge you to withdraw this site from the Local Plan.

From:

*** Personal details have been removed ***

To: East Devon Planning

21st January 2026

Dear Sirs,

I write to object to the above Planning Application and its inclusion in the Local Plan (2013-2031)

The application applies to a piece of land just above the house line at the top of Sidmouth. The field is categorized as AONB (now National Landscape) and previous applications for development on this field have been refused on at least two occasions

for that reason. The most recent application was also refused because of inadequate access through Burscombe Lane.

Up until 2023, EDDC had a duty to “have regard to” to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty. This wording has been now been changed from “have regard to” to “seek to further” the purpose....

I fail to see any evidence that EDDC are taking any proactive steps to seek to further and positively conserve or enhance the special qualities of the National Landscape in proposing that this field be included in the Local Plan, having been rejected previously.

The site selection did not follow any logical process. It had already been refused previously and was not included in the local plan of 2024. There is no paper trail as to why it has been included in this version of the Local Plan, although it is clear that the pressure on EDDC to increase house-building capacity may have led to some hasty inclusions that cannot be justified.

The development site can be clearly seen from the main road into Sidmouth from the East.

Access to the site is clearly problematic and although the developer plans include access through Burscombe Lane, the Local Plan indicates a preferred access through Windsor Mead, which would require compulsory Purchase Orders on at least two private properties. There is therefore no clear access proposal.

Yours sincerely,

*** Personal details have been removed ***

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Sidm_06a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

1. Impact on National Landscape (formerly AONB) ?The proposed allocation falls within the East Devon National Landscape. Under the National Planning Framework (NPPF) paragraph 189, "great weight" must be given to conserving and enhancing the landscape and scenic beauty of these areas. I am extremely concerned that once this site is approved, this sets precedent for others such as 6B to follow with a further development of 238 houses. ?Major Development: Building a housing estate here constitutes "major development" in a protected landscape. National policy dictates such applications should be refused except in exceptional circumstances and where it can be demonstrated they are in the public interest. ?Irreversible Harm: The introduction of high-density housing, street lighting, and associated infrastructure will permanently degrade the character of this statutory protected area, which provides significant value to the local economy through tourism and wellbeing. 2. Violation of Green Wedge Policy ?This site is currently designated as a GREEN WEDGE. The primary purpose of East Devon's Green Wedge policy is to prevent the coalescence of settlements and protect the individual identity of our towns and villages. ?Settlement Identity: Development here would erode the physical and visual gap between SIDFORD and Sidbury, leading to urban sprawl. ?Precedent: Allowing development on this site undermines the integrity of the Green Wedge designation across the entire district, making it impossible for the Council to defend other sensitive gaps in the future such as site 6b. 3. No evidence of this planning or area offered up for planning was disclosed by either the council or seller of Brook Farm during the purchasing process (purchased in July 2022). Solicitors are now aware. Brook Farm is a Grade 2 listed building and an

important historical asset as referenced on page 137 of the site selection report. 4. Lastly I am concerned that the extension of the settlement boundary of Sidmouth was extended to include site 6.a without sufficient consultation to meet EDDC policy compliance requirements.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To remove 6.a and 6.b permanently as part of the Development in the Towns and Villages chapter.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Failure to Prioritize Sustainable Alternatives ?The emerging Local Plan already identifies the proposed new town of Marcombe as the primary vehicle for meeting the district's housing targets. ?Marcombe Strategy: EDDC's own strategy is to concentrate growth in sustainable, purpose-built communities rather than "bolting on" unsustainable developments to existing villages in sensitive locations. ?Brownfield First: National policy in 2026 mandates a "brownfield-first" approach. The Council has not yet exhausted all urban regeneration opportunities or lower-quality "Grey Belt" sites before resorting to the destruction of high-value National Landscapes. ? 2. Environmental and Infrastructure Constraints ?Biodiversity Loss: The site provides vital "green lungs" and wildlife corridors. Development would conflict with the Council's commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy. ?Infrastructure Deficit: Local services, including the Sid Valley medical Practice, narrow lanes and schools, are already at capacity. This allocation offers no credible mitigation for the increased pressure on local infrastructure. Detrimental to local heritage: The site is in very close proximity to Sidbury Castle an iron age fort, a Scheduled Monument, protected by Historic England and would impact the "commanding views over the river Sid and village." Living next to the field in question as custodians of part of this countryside and being an observer to the amount of Bio Diversity that this area has; bats, a large variety of Birds of Prey (sparrowhawks, buzzards, kestrels), many species of bird (some less common like the Willow Tit, butterflies (some rare), voles, field mice, to merely name a few. Any building on this land would be detrimental to this beautiful green space that is enjoyed by many who use the public footpath and use this space as an area of well-being and leisure. This is also an area that is used by local residents who

do not have the luxury of having gardens. A change to this environment would have a negative impact on a space that is widely used by the community. There are significant flooding issues in this area in addition to all the points raised above that already affect the areas around Brook Lane, Lower Brook Meadow, Brook Farm and Two Bridges. Video files of biodiversity are too large to attach.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To remove 6.a and 6.b permanently as part of the Development in the Towns and Villages chapter.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: For the reasons stated above, this site is unsound and not legally compliant with national protection for National Landscapes. I formally request that the Planning Inspectorate remove sites 6a (allocated) and 6b (not currently allocated) from the final Local Plan to protect the unique character of East Devon for future generations. There has been a complete lack of transparency around the possible development of this land.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I consider that the voice of Sidford residents needs appropriate representation in this decision making process.

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Sidm_06a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Good Evening

As a resident and homeowner (4 Higher Brook Meadow) I would like to formally lodge my objection to the proposal for development land 6a and the future 6b under the Second Regulation 19.

The reasons for objection are extensive and summarized well below. Additionally the lack of transparency with local residents on these proposals is also a concern.

1. Impact on National Landscape (formerly AONB) The proposed allocation falls within the East Devon National Landscape. Under the National Planning Framework (NPPF) paragraph 189, "great weight" must be given to conserving and enhancing the landscape and scenic beauty of these areas. I am concerned that once this site is approved, this sets precedent for others such as 6B to follow with a further development potential of 238 houses. o Major Development: Building a housing estate here constitutes "major development" in a protected landscape. National policy dictates such applications should be refused except in exceptional circumstances and where it can be demonstrated they are in the public interest. o Irreversible Harm: The introduction of high-density housing, street lighting, and associated infrastructure will

permanently degrade the character of this statutory protected area, which provides significant value to the local economy through tourism and wellbeing.

2. Violation of Green Wedge Policy

This site is currently designated as a GREEN WEDGE. The primary purpose of East Devon's Green Wedge policy is to prevent the coalescence of settlements and protect the individual identity of our towns and villages. Settlement Identity: Development here would erode the physical and visual gap between Sidford and Sidbury, leading to urban sprawl. Precedent: Allowing development on this site undermines the integrity of the Green Wedge designation across the entire district, making it impossible for the Council to defend other sensitive gaps in the future such as site 6b.

Full name: Amanda Peters

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

Sidm_06a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: My comments here refer to land in Sidford ie. land 6A which is included in the second regulation 19 for house allocation and I include my concerns for the possibility of future allocation of 6B. This site is unsound and not legally compliant with national protection for National Landscapes.

I outline my reasons below and formally request that the Planning Inspectorate remove sites 6A (allocated) and 6B (not currently allocated) from the final Local Plan.

East Devon deem this land to be a 'green wedge' so building here would not adhere to the council's own policy or the National Landscape policy.

You state in your site selection report that the ‘overall landscape susceptibility is high’, that ‘landscape harm is likely’, ‘that ecologically significant moderate adverse effect is predicted’ and ‘steep slopes are likely to require significant earthworks’. These are very negative reviews and illustrate that any development on this land is going to impact biodiversity, wildlife corridors, hedgerows, the ‘dark sky’ (observatory close by) and increase the risk of flooding. The local infrastructure is not suitable to support such a proposal; services would be compromised, the increase in traffic will create congestion and reduce safety. There is already a large area of land north/east of this site across Two Bridges road, only a road width separates them; that land is also proposed for housing. Sidford and Sidbury are two small villages which should retain the ‘green wedge’ between them. The historic environment site assessment concludes that ‘significant effect is predicted; the cultural heritage would be compromised and unable to be resolved through mitigation’.

I understand that the Council have not yet exhausted all urban regeneration opportunities or lower quality ‘grey belt’ sites. Development on the site proposed would conflict with the Council’s commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy. I ask that you adhere to your own policies. I strongly object to these sites going into the 2020-2042 Local Plan.

I have been assured by staff in the planning dept. at Blackdown House that my comments within this email, if sent prior to the closing deadline at 12midday on 26.1.26, will be included in the final draft of the Local Plan and duly submitted to the Planning Inspector for independent examination.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I formally request that the Planning Inspectorate remove sites 6A (allocated) and 6B (not currently allocated) from the final Local Plan

Full name: Liz Lees

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Sidm_06a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

1. Impact on National Landscape (formerly AONB) The proposed allocation falls within the East Devon National Landscape. Under the National Planning Framework (NPPF) paragraph 189, "great weight" must be given to conserving and enhancing the landscape and scenic beauty of these areas. We are extremely concerned that once this site is approved, this sets precedent for others such as 6B to follow with a further development of 238 houses. Major Development: Building a housing estate here constitutes "major development" in a protected landscape. National policy dictates such applications should be refused except in exceptional circumstances and where it can be demonstrated they are in the public interest. Irreversible Harm: The introduction of high-density housing, street lighting, and associated infrastructure will permanently degrade the character of this statutory protected area, which provides significant value to the local economy through tourism and wellbeing. 2. Violation of Green Wedge Policy This site is currently designated as a GREEN WEDGE. The primary purpose of East Devon's Green Wedge policy is to prevent the coalescence of settlements and protect the individual identity of our towns and villages. Settlement Identity: Development here would erode the physical and visual gap between SIDFORD and Sidbury, leading to urban sprawl. Precedent: Allowing development on this site undermines the integrity of the Green Wedge designation across the entire district, making it impossible for the Council to defend other sensitive gaps in the future such as site 6b.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of

any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Site 6 was previously rejected. Part of this site, now called 6a, has been reinstated without public consultation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

3. Failure to Prioritize Sustainable Alternatives The emerging Local Plan already identifies the proposed new town of Marlcumbe as the primary vehicle for meeting the district's housing targets. Marlcumbe Strategy: EDDC's own strategy is to concentrate growth in sustainable, purpose-built communities rather than "bolting on" unsustainable developments to existing villages in sensitive locations.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Brownfield First:

National policy in 2026 mandates a "brownfield-first" approach. The Council has not yet exhausted all urban regeneration opportunities or lower-quality "Grey Belt" sites before resorting to the destruction of high-value National Landscapes. 4. Environmental and Infrastructure Constraints Biodiversity Loss: The site provides vital "green lungs" and wildlife corridors. Development would conflict with the Council's commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy. Infrastructure Deficit: Local services, including the Sid Valley medical Practice, narrow lanes and schools, are already at capacity. This allocation offers no credible mitigation for the increased pressure on local infrastructure. Detrimental to local heritage: The site is in very close proximity to Sidbury Castle an iron age fort, a Scheduled Monument, protected by Historic England, Brook Farm Grade II listed farmhouse, Sidford Conservation Area and would impact the "commanding views over the river Sid and village." Conclusion For the reasons stated above, this site is unsound and not legally compliant with national protection for National Landscapes. We formally request that the Planning Inspectorate remove sites 6a (allocated) and 6b (not currently allocated) from the final Local Plan to protect the unique character of East Devon for future generations.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Site 6 was previously rejected. Part of this site, now called 6a, has been reinstated without public consultation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: As a member of SVA Planning Team and also a member of a local Sidford residents group.

Full name: Sheila Christina Maycock

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Sidm_31

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

1. Any reference to direct access to the site via Burscombe Lane, which currently has a field gate immediately from the road to the site, has been removed in this version of the plan, following challenge from Burscombe Lane residents to the Highway access. Windsor Mead would experience similar Highways issues in relation to access & egress to the A 3052. 2. The plan now states that 'it is expected that access for all road users would be off Windsor Mead'. I do not see how this is possible, given that there is currently no way through from Windsor Mead to the site. The intervening land between the end of Windsor Mead and the site is in private ownership.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Remove site Sidm_31 from the plan

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: see 2b above

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to express my serious concern regarding the proposed development on the green wedge between Sidbury and Sidford. This area is a vital part of the local environment and character of these villages. Building here would cause irreversible damage to the natural landscape and detract from the green tourism for which East Devon is rightly renowned. The preservation of such green spaces is essential not only for wildlife but also for the wellbeing of our communities and visitors. Furthermore, the current infrastructure is inadequate to support a large influx of new homes. There are already significant challenges, including insufficient school places, increased flood risk, and heavily congested roads. These issues make the proposal untenable without substantial and costly improvements. I understand that East Devon Council has targets to meet for new housing, but I believe that every option should be looked at to avoid compromising precious green spaces that contribute so much to the character and economy of our district. Thank you for considering my concerns. I urge the Council to carefully weigh the environmental and infrastructural impacts before proceeding with this proposal.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Please could this objection be placed on common place. I only have a phone and therefore finding it difficult to use the website. This objection is to housing development on Sidmouth 6a and any future plans to development on 6b - Land west of Two Bridges road - Sidford.

I strongly object to the above being included in the local plan and should note that to include the area is contradictory to the Green Wedge policy and NPPE.

This a beautiful natural landscape that attracts numerous rambles from far and wide to the area. I am a local resident and witness directly its popularity and the advantages such visitors bring to our local tourism trade. Residential development would undoubtedly impact, destroying the villages infrastructure and rural charm.

This is a green wedge site and it is the duty and care of our local council to ensure it is protected. Not only is the landscape of this site beautiful it provides a diverse habitat for wildlife. The proposed sites are arable land. It is essential we collectively protect local farming communities and rural craftsmanship. Sustainability depends on food and plant production.

Bringing high density housing to the local area with result in increased traffic, air - noise and light pollution: all detrimental to the health and wellbeing of local residents and a drain on public services - health and education.

The impact on local wildlife would be catastrophic. By developing 6a a gateway would open for site 6b. It is essential that BOTH sites be removed from the local plan. The Council should hold true to its commitment to Biodiversity Net Gain and ensure that this green wedge designated area be preserved for future generations. The village of Sidbury must keep its identity as a rural community and our arable and wildlife lands remain PROTECTED.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Please find below my reasons for objection to the proposed building.

We have only just become aware, through lack of transparency, yet again, that the land 6A is up for the regulation 19 (second stage) and as a collective that will now be working together to oppose this site housing allocation 6A and any possible future allocation of 6B, we would like to state that we are very seriously concerned about the Green Wedge Policy and the National Landscape Policy being over ridden in order for the development for this site to be allocated. Please find some of our concerns outlined below that were raised at a recent meeting:

1. Impact on National Landscape (formerly AONB) The proposed allocation falls within the East Devon National Landscape. Under the National Planning Framework (NPPF) paragraph 189, "great weight" must be given to conserving and enhancing the landscape and scenic beauty of these areas. We are extremely concerned that once this site is approved, this sets precedent for others such as 6B to follow with a further development of 238 houses.

- Major Development: Building a housing estate here constitutes "major development" in a protected landscape. National policy dictates such applications should be refused except in exceptional circumstances and where it can be demonstrated they are in the public interest.

- Irreversible Harm: The introduction of high-density housing, street lighting, and associated infrastructure will permanently degrade the character of this statutory

protected area, which provides significant value to the local economy through tourism and wellbeing.

2. Violation of Green Wedge Policy This site is currently designated as a GREEN WEDGE. The primary purpose of East Devon's Green Wedge policy is to prevent the coalescence of settlements and protect the individual identity of our towns and villages.

- Settlement Identity: Development here would erode the physical and visual gap between SIDFORD and Sidbury, leading to urban sprawl.
- Precedent: Allowing development on this site undermines the integrity of the Green Wedge designation across the entire district, making it impossible for the Council to defend other sensitive gaps in the future such as site 6b.

3. Failure to Prioritize Sustainable Alternatives The emerging Local Plan already identifies the proposed new town of Marcombe as the primary vehicle for meeting the district's housing targets.

- Marcombe Strategy: EDDC's own strategy is to concentrate growth in sustainable, purpose-built communities rather than "bolting on" unsustainable developments to existing villages in sensitive locations.
- Brownfield First: National policy in 2026 mandates a "brownfield-first" approach. The Council has not yet exhausted all urban regeneration opportunities or lower-quality "Grey Belt" sites before resorting to the destruction of high-value National Landscapes.

4. Environmental and Infrastructure Constraints

- Biodiversity Loss: The site provides vital "green lungs" and wildlife corridors. Development would conflict with the Council's commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site:
Land East of Burscombe Lane / West of Windsor Mead.

I strongly object to the above second version of local planning.

ACCESS - This has always been an issue when pulling out on to the B3052 (Sidford High Street) towards Waitrose, with traffic coming down from a blind corner - and traffic not always at 30 mph. This is also dangerous at times when pulling in to Windsor Mead (from either direction) when there is a car waiting to pull out - just not enough space and often means having to mount the pavement to pass, or even worse having to stop, to let the other person out, when on the B3052 with traffic coming down the hill.

DISRUPTION AND SAFETY - This is a quiet, calm, secluded cul de sac and is not a wide road. A number of properties here already have more than 1/2 cars and have to park on the road which does cause issues with e.g. recycling vehicles, delivery vehicles (of which there are many), and even other residents. And now with most properties owning an average of 2 cars, that will mean potentially another 60 vehicles using this quiet road. Plus would be a real safety issue with noise and pollution. We already have an issue when driving down from the top end of Windsor Mead where we have poor visibility on the corner heading down to the junction on to Sidford High Street.

And then we will have the enormous disruption of heavy vehicles, noise and serious debris on the road. And where are the builders going to park?

FLOODING - We already have issues with flooding - when there's heavy rain we have a river that runs down from the top end of Windsor Mead and with the camber of the road at the corner then runs down on to Sidford High Street and onwards!

This is not a suitable site!!

- Marcombe Strategy: EDDC’s own strategy is to concentrate growth in sustainable, purpose-built communities rather than “bolting on” unsustainable developments to existing villages in sensitive locations.

- **Brownfield First:** National policy in 2026 mandates a ‘brownfield-first’ approach. The Council has not yet exhausted all urban regeneration opportunities or lower- quality ‘Grey Belt’ sites before resorting to the destruction of high-value National Landscapes.

4. Environmental and Infrastructure Constraints

- **Biodiversity Loss:** The site provides vital ‘green lungs’ and wildlife corridors. Development would conflict with the Council’s commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy.
- **Infrastructure Deficit:** Local services, including the Sid Valley medical Practice, narrow lanes and schools, are already at capacity. This allocation offers no credible mitigation for the increased pressure on local infrastructure.
- **Detrimental to local heritage:** The site is in very close proximity to Sidbury Castle an iron age fort, a Scheduled Monument, protected by Historic England and would impact the ‘commanding views over the river Sid and village.’

Conclusion For the reasons stated above, this site is unsound and not legally compliant with national protection for National Landscapes. We formally request that the Planning Inspectorate remove sites 6a (allocated) and 6b (not currently allocated) from the final Local Plan to protect the unique character of East Devon for future generations.

I appreciate your assistance with this matter.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(c). If the comment is related to a site, please state the site reference here.:
Sidm_06a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Good evening,

I wish to register my objection to the proposed plan for the area/site known as 6a/6b for the reasons below. We have only just become aware, through lack of transparency, yet again, that the land 6A is up for the regulation 19 (second stage) and as a collective that will now be working together to oppose this site housing allocation 6A and any possible future allocation of 6B, we would like to state that we are very seriously concerned about the Green Wedge Policy and the National Landscape Policy being over ridden in order for the development for this site to be allocated. Please find some of our concerns outlined below that were raised at a recent meeting:

1. Impact on National Landscape (formerly AONB) The proposed allocation falls within the East Devon National Landscape. Under the National Planning Framework (NPPF) paragraph 189, "great weight" must be given to conserving and enhancing the landscape and scenic beauty of these areas. We are extremely concerned that once this site is approved, this sets precedent for others such as 6B to follow with a further development of 238 houses.

- **Major Development:** Building a housing estate here constitutes “major development” in a protected landscape. National policy dictates such applications should be refused except in exceptional circumstances and where it can be demonstrated they are in the public interest.

- **Irreversible Harm:** The introduction of high-density housing, street lighting, and associated infrastructure will permanently degrade the character of this statutory protected area, which provides significant value to the local economy through tourism and wellbeing.

2. Violation of Green Wedge Policy This site is currently designated as a GREEN WEDGE. The primary purpose of East Devon’s Green Wedge policy is to prevent the coalescence of settlements and protect the individual identity of our towns and villages.

- **Settlement Identity:** Development here would erode the physical and visual gap between SIDFORD and Sidbury, leading to urban sprawl.

- **Precedent:** Allowing development on this site undermines the integrity of the Green Wedge designation across the entire district, making it impossible for the Council to defend other sensitive gaps in the future such as site 6b.

3. Failure to Prioritize Sustainable Alternatives The emerging Local Plan already identifies the proposed new town of Marcombe as the primary vehicle for meeting the district’s housing targets.

- **Marcombe Strategy:** EDDC’s own strategy is to concentrate growth in sustainable, purpose-built communities rather than “bolting on” unsustainable developments to existing villages in sensitive locations.

- **Brownfield First:** National policy in 2026 mandates a “brownfield-first” approach. The Council has not yet exhausted all urban regeneration opportunities or lower- quality “Grey Belt” sites before resorting to the destruction of high-value National Landscapes.

4. Environmental and Infrastructure Constraints

- Biodiversity Loss: The site provides vital “green lungs” and wildlife corridors. Development would conflict with the Council’s commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy.
- Infrastructure Deficit: Local services, including the Sid Valley medical Practice, narrow lanes and schools, are already at capacity. This allocation offers no credible mitigation for the increased pressure on local infrastructure.
- Detrimental to local heritage: The site is in very close proximity to Sidbury Castle an iron age fort, a Scheduled Monument, protected by Historic England and would impact the “commanding views over the river Sid and village.”

Conclusion For the reasons stated above, this site is unsound and not legally compliant with national protection for National Landscapes. We formally request that the Planning Inspectorate remove sites 6a (allocated) and 6b (not currently allocated) from the final Local Plan to protect the unique character of East Devon for future generations.

I appreciate your assistance with this matter.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Good evening,

I wish to register my objection to the proposed plan for the area/site known as 6a/6b for the reasons below. We have only just become aware, through lack of transparency, yet again, that the land 6A is up for the regulation 19 (second stage) and as a collective that will now be working together to oppose this site housing allocation 6A and any possible future allocation of 6B, we would like to state that we are very seriously concerned about the Green Wedge Policy and the National Landscape Policy being over ridden in order for the development for this site to be allocated. Please find some of our concerns outlined below that were raised at a recent meeting:

1. Impact on National Landscape (formerly AONB) The proposed allocation falls within the East Devon National Landscape. Under the National Planning Framework (NPPF) paragraph 189, “great weight” must be given to conserving and enhancing the landscape and scenic beauty of these areas. We are extremely concerned that once this site is approved, this sets precedent for others such as 6B to follow with a further development of 238 houses.

- Major Development: Building a housing estate here constitutes “major development” in a protected landscape. National policy dictates such applications should be refused except in exceptional circumstances and where it can be demonstrated they are in the public interest.
- Irreversible Harm: The introduction of high-density housing, street lighting, and associated infrastructure will permanently degrade the character of this statutory protected area, which provides significant value to the local economy through tourism and wellbeing.

2. Violation of Green Wedge Policy This site is currently designated as a GREEN WEDGE. The primary purpose of East Devon’s Green Wedge policy is to prevent the coalescence of settlements and protect the individual identity of our towns and villages.

- Settlement Identity: Development here would erode the physical and visual gap between SIDFORD and Sidbury, leading to urban sprawl.
- Precedent: Allowing development on this site undermines the integrity of the Green Wedge designation across the entire district, making it impossible for the Council to defend other sensitive gaps in the future such as site 6b.

3. Failure to Prioritize Sustainable Alternatives The emerging Local Plan already identifies the proposed new town of Marlbcombe as the primary vehicle for meeting the district’s housing targets.

- Marlcombe Strategy: EDDC's own strategy is to concentrate growth in sustainable, purpose-built communities rather than 'bolting on' unsustainable developments to existing villages in sensitive locations.
- Brownfield First: National policy in 2026 mandates a 'brownfield-first' approach. The Council has not yet exhausted all urban regeneration opportunities or lower- quality 'Grey Belt' sites before resorting to the destruction of high-value National Landscapes.

4. Environmental and Infrastructure Constraints

- Biodiversity Loss: The site provides vital 'green lungs' and wildlife corridors. Development would conflict with the Council's commitment to Biodiversity Net Gain and the Local Nature Recovery Strategy.
- Infrastructure Deficit: Local services, including the Sid Valley medical Practice, narrow lanes and schools, are already at capacity. This allocation offers no credible mitigation for the increased pressure on local infrastructure.
- Detrimental to local heritage: The site is in very close proximity to Sidbury Castle an iron age fort, a Scheduled Monument, protected by Historic England and would impact the 'commanding views over the river Sid and village.'

Conclusion For the reasons stated above, this site is unsound and not legally compliant with national protection for National Landscapes. We formally request that the Planning Inspectorate remove sites 6a (allocated) and 6b (not currently allocated) from the final Local Plan to protect the unique character of East Devon for future generations.

I appreciate your assistance with this matter.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Sidm_31

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: am a resident of Windsor Mead, being a freeholder of Number 26. My postcode is EX10 9SJ.

I am writing to object to the granting of planning permission for properties to be built on the above site.

I have read the letter of objection posted by Wollens Solicitors and agree with the points made.

My particular objections are 1) to the use of National Landscape (previously AONB) for greenfield development; 2) to the use of Burscombe Lane as access particularly as there is no pavement on that side of Sidford High Street; 3) to the use of Windsor Mead as an access route. I purchased my property in the expectation that Windsor Mead would remain a small cul-de-sac with little vehicular traffic. From my daily vehicular use I can say the exit onto Sidford High Street is very difficult if not dangerous as the visibility to the left down the hill is restricted even when the vegetation is cut back which is not always the case. In addition Windsor Mead itself is so narrow at the High Street junction that if a vehicle is waiting to turn out, only the smallest vehicles can turn in. The larger ones have to stop on the High Street to await the exit manoeuvre, causing traffic delays. Here also there is no pavement on the Windsor Mead side of the High Street. 4)

to the suggestion that a compulsory purchase order might be used for a matter not of national importance. That would cause immense and long lasting bad feeling, and any councillor who supported such a move would make himself of herself permanently unelectable.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am a resident of Corefields, Sidford. My main objection is based on the inadequacy of the proposed access from Burscombe Lane to the proposed site for development.

NB. The dictionary definition for a 'Lane' is 'A NARROW' road especially in a rural area; a relatively NARROW' street or road.'

Currently we experience large tractors and trailers which go up and down Burscombe lane - often at speed. This creates a safety hazard, especially for the residents of both Burscombe lane and Corefields.

To allow access for large lorries carrying heavy loads of building materials, will further compromise the safety of both motorists and pedestrians who are either resident or visiting Corefields/Burscombe lane.

In the 15 years that I have lived here, the main road traffic (A3052) has increased enormously and it is apparent that some drivers do not adhere to the 30 mph speed limit. (This has been referenced elsewhere by *** Personal details have been removed ***)

At present, vehicles leaving Burscombe lane and especially those turning right, have limited vision which necessitates pulling out beyond the junction. Large vehicles would create even more of a hazard and give rise to the potential for serious accidents.

I urge you to take these concerns into consideration when assessing the above mentioned access plans.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Sirs,

I reside at [redacted] and hereby advise that I strongly object to the plan for Sidmouth_31. My objection is on the grounds that the use of Burscombe Lane, as access for the proposed development, is not only fraught with danger but is totally inadequate. I mention Burscombe Lane specifically because, as any observer would note upon traversing Windsor Mead, there is no natural access from Windsor Mead to the proposed development site. Clearly, any developer would seek alternative access which obviously would bring Burscombe Lane into focus as the only alternative route.

I have lived on Corefields for the past 15 years and in that time exiting from Burscombe Lane onto the A3052 has, in terms of difficulty and danger, increased beyond belief. This is due in the main to the increase in volume of traffic and to the seemingly increasing speed of traffic using the A3052. In turn this is compounded by the lack of visibility, particularly when turning to the right. In this respect it is totally impossible for any vehicle, irrespective of size, not to have to advance onto the A3052 in order to sight traffic approaching from the right. This is dangerous in the extreme, not only for the driver turning right to exit Burscombe Lane, but also similarly dangerous for the unwary driver approaching from the right on the A3052. The thought of adding huge construction traffic to this already dangerous situation is truly horrifying.

In terms of access in my view Burscombe Lane is totally inadequate for the use of construction traffic as, at a point a short distance above Corefields, as I understand it, the lane is marginally below 3 metres in width. This is a) simply not wide enough for large construction traffic and b), inherently dangerous for pedestrians. One only has to observe a large farm tractor transiting this bottleneck/pinch point to envisage the mayhem that will follow should said farm tractor meet an oncoming construction vehicle!

Sincerely your, *** Personal details have been removed ***

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD06

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_31

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Based on the representation provided, the following legal compliance concerns arise:

1. Inadequate consideration of statutory AONB (National Landscape) duties

- Sidm_31 lies entirely within the East Devon AONB, meaning “great weight” must be given to conserving and enhancing its landscape and scenic beauty.
- The representation states that the Plan fails to demonstrate the required degree of justification for encroachment into a nationally protected landscape.

2. Inaccurate or misleading evidence base (highway safety)

- The Plan’s supporting text is said to incorrectly describe the Burscombe Lane / A3052 junction as “safe.”
- The representation describes this as factually wrong and contrary to local evidence, undermining the robustness of the evidence base.

3. Lack of certainty over deliverable access

- Access via Windsor Mead would likely require a Compulsory Purchase Order (CPO).

- The representation argues that this legal mechanism must be confirmed before allocation; otherwise, no lawful access strategy exists.

4. Failure to properly consider flood risk and drainage evidence

- Recently obtained video evidence shows significant runoff, blocked drainage pipes, and overtopping infrastructure on Burscombe Lane.
- The Plan does not appear to consider this new evidence, raising concerns about compliance with national flood risk requirements.

5. Conflict with adopted development plan components

- Sidm_31 is outside the current Built-up Area Boundary (BUAB), conflicting with Strategy 7 (countryside protection).
- Strategy 46 (AONB protection) is also said to be breached, with no overriding justification provided.
- The allocation conflicts with the Sid Valley Neighbourhood Plan (Policy 10), which does not support market housing development on this site. Together, these matters indicate flawed, incomplete or inaccurate evidence and insufficient regard to statutory duties, rendering the allocation not legally compliant.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Primary Modification (as requested in the representation): Remove Site Sidm_31 from Strategic Policy SD06 and from the Local Plan's set of housing allocations. This removes the legal compliance risks relating to AONB policy, highway safety inaccuracies, CPO uncertainty, flood risk considerations, and conflicts with the adopted plan framework.

If the Council insists on retaining Sidm_31, the following modifications are needed to achieve legal compliance:

1. Correct the inaccurate statement describing the Sidford High Street / Burscombe Lane junction as "safe".
 - o Replace with wording that accurately reflects visibility constraints, geometry, traffic conditions, and collision records.
2. Demonstrate and secure lawful, deliverable access before allocation.
 - o Confirm whether the use of Windsor Mead requires a CPO.
 - o If yes,

demonstrate that such a CPO is realistically achievable and in the public interest. o If no, identify the alternative access strategy with supporting evidence.

3. Update the evidence base to incorporate local drainage/flooding data. o Include the provided video evidence. o Demonstrate that SUDS/attenuation systems can avoid off site flood risk increases, particularly down-slope into Windsor Mead.
4. Provide justification for development in the AONB in line with national policy tests. o Including whether exceptional circumstances exist, and whether development is demonstrably in the public interest. Without these, the allocation remains legally deficient.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Not Justified

- The representation argues that Sidm_31 is one of the least suitable sites around Sidmouth/Sidford: it lies in the AONB, has severe access constraints, and generates only 12–15 dwellings, a negligible contribution to district housing needs.
- Reasonable alternatives exist outside sensitive landscapes with fewer constraints.

2. Not Effective (undeliverable)

- Access via Windsor Mead is inappropriate for a cul de sac and may depend on a CPO.
- Burscombe Lane is too narrow, lacks footways, and has a constrained junction with the A3052.
- Flooding and drainage failures are already occurring in heavy rainfall.
- These constraints may prevent the site from ever securing planning permission.

3. Not Consistent with National Policy

- The site is inside a nationally designated AONB—development here contradicts NPPF paragraphs 176–177 unless exceptional circumstances exist.
- Access / highway issues conflict with the NPPF policies on safe and suitable access (para 110).
- Flood risk concerns contradict NPPF para 167.

4. Not Consistent with the Development Plan (Neighbourhood Plan & Adopted Local Plan)

- Sid Valley Neighbourhood Plan does not allocate or support this site.
- Adopted Strategy 7 and Strategy 46 weigh strongly against allocating this part of the countryside/AONB.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Primary modification (recommended): Delete Site Sidm_31 from Strategic Policy SD06. Alternative modifications if retention is attempted: To achieve soundness, all of the following would be required:

1. A fully evidenced, deliverable and safe access solution that does not rely on altering Windsor Mead's character or using Burscombe Lane in its current form.
2. Correction of the Plan's highway evidence to eliminate the inaccurate description of the A3052/Burscombe Lane junction as "safe".
3. A comprehensive drainage solution, including enlargement/upgrade of local infrastructure and credible long term maintenance guarantees.
4. A robust AONB justification demonstrating genuinely exceptional circumstances and public interest (unlikely for 12–15 dwellings).
5. Reconciliation with the Sid Valley Neighbourhood Plan, or evidence explaining why its strategy should be overridden.

You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: See uploaded letter. We support the emerging Spatial Strategy and welcome the site's (ref. Brcl_12) inclusion as an allocation to help meet the identified housing and employment needs. Overall, many of our previous comments on the first version of the Regulation 19 Local Plan still apply - we are only aware of one comment having been incorporated into the updated plan, relating to the timescale for the completion of self-build plots. We therefore continue to suggest that the Council carefully considers the constructive comments provided in relation to endeavouring to meet the full housing need for the district at this stage, particularly given the proposed changes to the NPPF for consultation, as well as other more specific policy requirements. In particular we have continued to suggest that the site should be allocated for 145 homes, as opposed to 100, in order for an effective use of land to be delivered as part of the development. It has also been demonstrated and is recognised by East Devon District Council that Land west of Whimble Road, Broadclyst (ref. Brcl_12) is a suitable, sustainable, accessible and deliverable site for residential and employment development, which is

demonstrated in outline planning application 25/1133/MOUT. Based on the details provided within these and previous representations, we, therefore, hope to see the allocation for the site maintained – once the Local Plan Examination begins, the planning application that is currently being determined by the Council will demonstrate the site’s deliverability to the Planning Inspectorate to underpin the allocation of this land. Development in the Towns and Villages Strategic Policy SD07 sets out the development allocations at Broadclyst. This now states the following: “The sites/areas listed below, as identified on the Policies Map, are allocated for development. Land west of Whimble Road, Broadclyst (Brcl_12) combined with Land to east of Town End, Broadclyst (Brcl_29) Development of these two sites, on the eastern side of the village, will need to come forward to an agreed Masterplan that provides for a comprehensive development scheme for both land areas. Vehicle access to the combined sites will need to be from Whimble Road with vehicle and pedestrian access from Brcl_12 linking through and into Brcl_29. Through its layout, design and landscaping, development should respond sympathetically to the rural and historic character of the settlement, and should conserve and enhance the settings of designated heritage assets.” While we generally support this approach to development across the two land parcels given the relationship between the two sites and the facilities within the wider settlement, LVA currently only has control over Land west of Whimble Road (ref. Brcl_12).

Notwithstanding, the proposed masterplan for the Brcl_12 site has carefully considered the link between both sites and how they could complement each other. It also includes an indicative suggestion of how Land to east of Town End (re. Brcl_29) could come forward alongside the wider Brcl_12 site, to ensure they dovetail together and the development of Land west of Whimble Road (ref. Brcl_12) does not fetter proposals coming forward on the adjacent Brcl_29 land. LVA is happy to work with the adjacent landowner to allow for vehicular access for Brcl_29 to be delivered via the LVA site. LVA has a positive track record of working collaboratively with other stakeholders and always seeks to enable the best possible spatial planning solution. The final sentence in the policy extract above (see underlined section) has been added as part of the second regulation 19 consultation plan, and specifically seeks that development should conserve and enhance the setting of designated heritage assets. We agree that this matter should be considered as part of any development at the site, and the applicant commissioned Pegasus Group to prepare a Heritage Statement assessing the likely heritage impacts arising from the proposed development. The assessment identified there to be ‘less than substantial harm’, to the lower end of the scale, on the setting of the Grade I Listed Church of St John the Baptist. A similar conclusion was drawn for the Grade II Listed Lake House given the glimpsed views of this asset from certain points within the site. Accordingly, in our planning statement for the application we set out that paragraph 215 of the NPPF needs to be considered, which requires the ‘less than substantial harm’ identified to be weighed against the public benefits of the scheme. In our view, the public benefits of the scheme are significant – most notably, the provision

of market, affordable and self/custom-build housing, the provision of employment land, and the provision of significant public open space in the form of a new community parkland, play area and allotments. In addition, significant Biodiversity Net Gain is provided in excess of the Government's 10% target. Strategic Policy SD07 goes on to state that: Area Brcl_12 – is to accommodate around 100 new homes and 0.6 hectares of employment land. Built form shall be focused on the land to the north-west of Winter Gardens and south of Lake Farm with lower density development forming a frontage onto the road from Burrows Cross within the field to the north-east of Winter Gardens. To the north of Brcl_12 there is scope to provide open space and habitat and other open space areas. We support the general provisions of this policy for Land west of Whimble Road, Broadclyst (ref. Brcl_12), including built form being focused on the land to the north west of Winter Gardens and south of Lake Farm, with lower density development forming a frontage onto the road from Burrows Cross within the field to the north-east of Winter Gardens, and the provision of open space, habitat and other open space areas to the north of Brcl_12. These are elements that are featured and met through our proposed masterplan for the site. Notwithstanding, as set out and demonstrated in previous representations to the Local Plan, we consider that the site can deliver up to 145 dwellings (including affordable housing and custom-self build plots), while still accommodating the other required and important aspects of the scheme. These include 0.6 hectares of employment land, access from Whimble Road, as well as a community play area. Significant areas of public open space are also included that are well in excess of what would be required by policy and will in effect deliver a large area of publicly accessible parkland for the whole village to enjoy. This has been informed by technical work including highways, ecology, landscape, heritage and drainage work, all of which underpin the submitted masterplan design. Furthermore, Highways Officers have confirmed that the access design is sufficient to accommodate this number of homes and the employment provision, and no objections have been raised by the Council's placemaking team or urban designer in respect of density or overdevelopment of the site. We, therefore, consider that this is the optimal solution for the delivery of housing at Broadclyst that would see a multitude of benefits being realised without harm being caused. We therefore respectfully continue to ask for the number of homes to be accommodated on the Brcl_12 site to be increased to 145 dwellings, particularly given the Council is only planning for 80% of the district's overall housing requirement, and this would assist the Council in getting closer to delivering the full requirement now rather than in the future and would assist in providing a degree of contingency should other allocations not come forward or achieve a lower quantum of development. ...It is considered that the policy wording needs further clarity as it is currently not clear whether the 5% requirement relates to the overall housing numbers on site or just the market housing element of the scheme. We suggest that the policy is worded to make clear that this reflects 5% of market housing only ...BNG requirement- We, therefore, continue to suggest that this is investigated further by the Council, and

appropriate evidence and justification for the 20% requirement is provided because at present this has not been provided and we strongly oppose this policy requirement as it is contrary to national policy.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: See uploaded letter. We support the emerging Spatial Strategy and welcome the site's (ref. Brcl_12) inclusion as an allocation to help meet the identified housing and employment needs. Overall, many of our previous comments on the first version of the Regulation 19 Local Plan still apply - we are only aware of one comment having been incorporated into the updated plan, relating to the timescale for the completion of self-build plots. We therefore continue to suggest that the Council carefully considers the constructive comments provided in relation to endeavouring to meet the full housing need for the district at this stage, particularly given the proposed changes to the NPPF for consultation, as well as other more specific policy requirements. In particular we have continued to suggest that the site should be allocated for 145 homes, as opposed to 100, in order for an effective use of land to be delivered as part of the development. It has also been demonstrated and is recognised by East Devon District Council that Land west of Whimble Road, Broadclyst (ref. Brcl_12) is a suitable, sustainable, accessible and deliverable site for residential and employment development, which is demonstrated in outline planning application 25/1133/MOUT. Based on the details provided within these and previous representations, we, therefore, hope to see the allocation for the site maintained – once the Local Plan Examination begins, the planning application that is currently being determined by the Council will demonstrate the site's deliverability to the Planning Inspectorate to underpin the allocation of this land. Development in the Towns and Villages Strategic Policy SD07 sets out the development allocations at Broadclyst. This now states the following: "The sites/areas listed below, as identified on the Policies Map, are allocated for development. Land west of Whimble Road, Broadclyst (Brcl_12) combined with Land to east of Town End, Broadclyst (Brcl_29) Development of these two sites, on the eastern side of the village, will need to come forward to an agreed Masterplan that provides for a comprehensive development scheme for both land areas. Vehicle access to the combined sites will need to be from Whimble Road with vehicle and pedestrian access from Brcl_12 linking through and into Brcl_29. Through its layout, design and landscaping, development should respond sympathetically to the rural and historic character of the settlement, and should conserve and enhance the settings of designated heritage assets." While we generally support this approach to development across the two land parcels given the relationship between the two sites and the facilities within the wider settlement, LVA currently only has control over Land west of Whimble Road (ref. Brcl_12).

Notwithstanding, the proposed masterplan for the Brcl_12 site has carefully considered the link between both sites and how they could complement each other. It also includes an indicative suggestion of how Land to east of Town End (re. Brcl_29) could come forward alongside the wider Brcl_12 site, to ensure they dovetail together and the development of Land west of Whimble Road (ref. Brcl_12) does not fetter proposals coming forward on the adjacent Brcl_29 land. LVA is happy to work with the adjacent landowner to allow for vehicular access for Brcl_29 to be delivered via the LVA site. LVA has a positive track record of working collaboratively with other stakeholders and always seeks to enable the best possible spatial planning solution. The final sentence in the policy extract above (see underlined section) has been added as part of the second regulation 19 consultation plan, and specifically seeks that development should conserve and enhance the setting of designated heritage assets. We agree that this matter should be considered as part of any development at the site, and the applicant commissioned Pegasus Group to prepare a Heritage Statement assessing the likely heritage impacts arising from the proposed development. The assessment identified there to be ‘less than substantial harm’, to the lower end of the scale, on the setting of the Grade I Listed Church of St John the Baptist. A similar conclusion was drawn for the Grade II Listed Lake House given the glimpsed views of this asset from certain points within the site. Accordingly, in our planning statement for the application we set out that paragraph 215 of the NPPF needs to be considered, which requires the ‘less than substantial harm’ identified to be weighed against the public benefits of the scheme. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::

Brcl_12, Brcl_29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Direct impact to local property Footpath not adequate – Several homes lie along the public footpath shown in the proposal as the main footpath from the development site to the village centre. The footpath has been used for very light footfall for many years. It is totally maintained by the home owners along the path. If this path becomes the main walkway, the properties will be directly negatively affected by noise, lack of privacy, litter, added security threats and wear and tear due to a substantial increase in footfall. Also, the footpath exits onto the very busy and dangerous Town End, with no pavements, fast and at school times, constant traffic and a danger to children walking to school. This has always been a hazzard and will become more so with increased usage. If this proposal is to go ahead, Developers must reconsider the relocation of such a vital pathway to the village amenities and to the schools. A new footpath must be created in a more appropriate location, given the massive increase in usage and the danger to pedestrians exiting to Town End. I hope the council and planning officers will seriously consider the negative impact on this small quiet footpath, its residents and its users and direct the walkway elsewhere within the proposal. Flooding - LVA's flood risk assessment does show that Lake Barn has a flood risk, but a low one, which is incorrect. In reality, the private gardens adjacent to the Winter Gardens site are saturated from October through to April and there have been many times that a torrent of water has flowed off the fields, down the footpath and into residents gardens. This tends to happen when there has been a period of dry sunny weather and the ground has become caked and solid. With the additional concrete and pavements this development brings, we feel the threat of flooding will be exacerbated. Upslope development has proven throughout the UK to cause a huge increase in flooding, to the

point that homes that have stood for centuries with minimal flooding have now been reclassified by the Environment Agency as being within flood plains. We are extremely concerned that the drainage system being put forward will not address the low lying properties along the footpath, Town End and Burrow Road, all of which flood regularly already. Noise and Security - As mentioned, the considerable increase in footfall along the proposed footpath and its use morning and afternoon as the main walkway to and from the schools, will undoubtedly impact on the noise level for all residents. Homes will be open to potential security issues and antisocial behaviour and we are concerned about the impact this will have on village lives. Parking and vehicular access – With reference to the footpath off Town End, to date, the only cars parked in that lane belong to the residents. We note that LVA has proposed a large playing field on site, but this has no nearby parking provided at all. Where will users of the playing field park? There is a strong belief that the footpath will be used regularly for parking cars that wish to use the playing fields and for additional cars belonging to the estate homeowners. This is another reason another footpath should be created in a more appropriate location.

Direct impact to Broadclyst Village – Lack of proposed infrastructure Sewage - The sewage pumping station and treatment plants are hardly coping right now, but yet LVA have not addressed the sewage situation in any way. Sewage is at capacity and that's before the 15 new homes are developed along the Whimble Rd. The developers say there are no records of overflows yet everyone in the village is aware of the raw sewage overflows into the fields and onto the lanes. The current pipes are not able to cope and the system is not fit for purpose. Flooding - having lived in the village for 28 years, we know how badly the area floods. The Wintergarden fields flood constantly over the winter. The lanes from Station Road through to Town End and Burrow Road and the back country lane to Cranbrook, are under water a great deal of time. Our own garden off Town End has an incredibly high water table. It would be vital that both planning and developers take this into account and we would question where all the water will go if such a massive site is laid with concrete Traffic and access - with the village served by narrow, winding lanes, many single track, serving many homes and two schools with few pavements and little parking, the village traffic as it is, is both dangerous and increasingly overwhelming. Lack of pavements are already causing issues for pedestrians and school children. There are no cycle lanes and few footpaths. The village suffers from a huge increase in traffic coming cross country from Cranbrook, speeding along the back village lanes to the schools morning and afternoon and generally through the day. Town End has become another dangerous school rat run. There is no parking for parents so the whole of Town End is double parked with cars morning and afternoon. Any new development will have the potential to add to the chaos and danger...there would need to be safe, plentiful access out of the site, providing safe pavements and new cycle paths to and from the village. There would need to be adequate footpaths

throughout the new area and adequate lighting. In order to sustain safety, the village would need pavements and cycle paths, all the way to the schools from the proposed site. As Town End cannot sustain any further traffic, somehow a solution would have to be proposed to deal with the extra cars and pedestrians onto the narrow single track lanes around the proposed site. We would greatly appreciate members of the Planning Department to visit the village around Cyst Vale Community College both morning and afternoon school times to see for themselves the absolute gridlock that occurs every single weekday during school term time.

Healthcare - The plans put forward by LVA do not show any Doctors surgery. Broadclyst and Pinhoe surgery have found it difficult enough to accommodate the massive intake of new patients from Cranbrook, which should have adequately provided healthcare for its own people but did not. The surgery has made it clear that they are full to capacity and cannot take on the burden of more families. This would need to be seriously addressed before any further homes were considered.

Schools - The local schools are completely overwhelmed and full to capacity with waiting lists. There is no provision in the plan to develop a new school, yet the local schools cannot cope with more intake.

Transport in and out of the village - this too is already a worrying problem for villagers...the Whimple Road, Station Road and the Main Road to Exeter are already jam packed both morning and evening...the traffic is absolutely horrendous and increasingly getting worse. The proposed site would add to the congestion and chaos considerably. With the development of Cranbrook, the Science Park and the huge number of large lorries and Amazon vans using Station Road, plus the fact it has no pavements, the road is chaotic, dangerous and often flooded.

Wildlife - it is well known that the proposed site support birds, bats and a diverse amount of wildlife and plant species and the land is productive farmland. It seems shortsighted to not take this into account and plan so many more houses in such a wildlife rich area.

To conclude, the Wintergardens proposal should not be accepted given the many negative factors as shown above. The size and scale of the proposed development would engulf the village and its historic character and cause a vast increase in the

struggles the area already faces. If any building was to go ahead on this site, there are a large number of very practical concerns that must be addressed and fixed by both Planning and developers at a very early stage. This undoubtedly would incur much cost, but it is imperative that these issues be taken into account and seriously understood and put right.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Brcl_12, Brcl_29

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Development on this scale is too large for a village of the size of Broadclyst. The community and facilities will not be able to cope with this number of houses suddenly arriving at one time. For example, the primary and secondary schools are already full and oversubscribed – there will be no school places available for new residents immediately. The Doctors surgery is also at capacity. The number of homes in these areas has increased from an initial figure of 70 in the plan. It is also not included in the parish Neighbourhood Plan which allowed for the required number of houses that needed to be built within the parish. There is currently significant numbers of houses being built in nearby Cranbrook, West Clyst and Tithebarn without the need for even more houses in a small village. 2. The land on which is proposed building on, regularly floods and is constantly waterlogged in winter. The local plan needs to state that there needs to be mitigation within any developments against flooding and where the displaced water which falls on built land will go – it will end up increasing flooding in the surrounding roads and dwellings which already flood. 3. The sewage network will not cope with additional houses feeding into it – particularly on this scale. There are already multiple events every year where the sewage discharges and floods onto the surrounding roads – this will only increase if there is further inflow to the sewage system. 4. There are no suitable footpaths for access into the village. Access to the primary school is along Town End, which does not have a footpath along its full length to the development – young children would therefore need to walk along the road to

access the school. This road is narrow and gets very busy at school times so would be a significant hazard. Likewise, access to the secondary school is along Whimple Road. This is an extremely dangerous road with fast, busy traffic and no footpath. It has a blind summit part way along where any pedestrians would not be seen by oncoming traffic. Children have been known to have been clipped by cars walking along this road. The local plan should acknowledge this and require speed limit reductions. 5. Roads surrounding this development are narrow and unable to take additional traffic. At school drop off / pick up times, the roads become entirely congested already without adding additional cars and subsequent pollution from standing traffic. Town End, the route to the primary school and northbound B3181 is very narrow single road with few passing places. Crannaford Lane has become increasingly busy since Cranbrook was built and is now a key link out to the A30 eastbound. This road will inevitably become much busier with this development as it is immediately next to it. However this lane is a small single carriageway road, which is prone to both potholes and flooding. The route into Exeter from this development, the B3181 passes through both West Clyst and Pinhoe, both of which are already subject to considerable traffic delays – this development will further increase the gridlock in these areas.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: * A reduction in the number of houses * Speed limits and pedestrian access requirements for access roads to this site should be acknowledged and required. * Requirements for coping with sewage and flooding should be included in the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Not listening to local residents

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD07

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:

Brcl_12, Brcl_29

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To

whom it may concern, Please accept this e mail as my written objection to both amendments submitted under regulation 19 for the above planning application. Firstly may I tell you how difficult I found the online consultation to read and understand and I feel you should be concerned that not everybody can navigate/complete complicated digital forms even though they would like to contribute to the demographic decision making. I being one of these people will not be filling the form.

Objection to amendment 1. Some people did not object to the initial consultation for this development on the grounds that it was to provide light industry units. If the units were taken out of the equation the developers would have more land space to build more houses. As it is the development proposed area is too overbearing for the size of the village, the consequences of even more residential building will worsen the issues of overstretched public services and put a unreasonable burden on a community that is already struggling to cope.

Objection to amendment 2. Most of the hedges and narrow lanes are historical in this area they should be preserved rather than destroyed to make room for the increased and heavier traffic.

Please register my strong objection to these two amendments and the direction of this application.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to object to the two amendments submitted under Regulation 19 in relation to planning application 25/1133/MOUT.

The proposed removal of the employment land raises serious concerns about the soundness of the scheme. It indicates that the site was never of sufficient size to realistically support both the scale of housing proposed and the employment provision originally claimed, calling into question whether the development has ever been properly justified.

No alternative employment provision has been identified, and the amendment appears simply to create scope for additional housing, further undermining the sustainability of the proposal.

The surrounding infrastructure is already under significant strain, including local roads, drainage, and access to services. These constraints exist regardless of whether employment land is included, and in my view the area is not capable of supporting development of this scale.

In addition, the scale of the development would cause lasting harm to the historic landscape and rural character of the village, which cannot be preserved in the context of such extensive building.

For these reasons, I strongly object to the Regulation 19 amendments and to the application as a whole.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to formally object to the two amendments submitted under Regulation 19 in relation to planning application 25/1133/MOUT.

The proposed removal of the employment land is of serious concern. It appears to confirm that the site was never of sufficient size to realistically accommodate both the scale of housing proposed and the employment provision originally put forward. If the site cannot support employment use now, then it raises fundamental questions about whether the original scheme was ever sound or properly justified.

This amendment exposes an internal inconsistency at the heart of the proposal. The employment land appears to have been included initially to support the scale of residential development, yet is now being removed because it is no longer deliverable. This suggests that the housing quantum itself may be excessive for the site and that the scheme was not based on a robust or realistic assessment of capacity.

Furthermore, the removal of employment land does nothing to address and in fact exacerbates the wider sustainability concerns. No alternative employment provision has been identified, increasing the likelihood of out-commuting and reinforcing the creation of a dormitory development, contrary to the principles of sustainable development.

In addition, the scale of the development would cause lasting harm to the historic landscape and rural character of the village, which cannot be preserved .

Crucially, the infrastructure surrounding the site is already demonstrably overstretched. Local roads, drainage, flood resilience, and access to services are under pressure, and this is well known to local residents. The site is therefore not suitable for development at this scale in the first place, regardless of whether employment land is included or removed. The amendments fail to resolve this core issue and instead appear to prioritise development convenience over infrastructure reality.

Taken together, these amendments do not improve the scheme. Rather, they underline its lack of soundness, poor justification, and failure to respond to the genuine constraints of the site and its surroundings.

For these reasons, I strongly object to the Regulation 19 amendments and to the application as a whole.

National Landscapes (NL) and Policies SD01, SD03, SD04, SD06, SD08, SD15, SD16, SD22 and SD23 Policy OL02 provides strong protection for the NL areas. Quote: "The highest level of protection will be given to the landscape and scenic beauty of the National Landscapes (NLs) in East Devon: A. Development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities, character and natural beauty of the NL (including the coastline, where relevant); B. Major development in a NL will only be permitted in exceptional circumstances and where it can be demonstrated to be in the public interest; and East Devon Local Plan 2020 to 2042 – Second Regulation 19 Publication Draft 223 C. Any relevant National Landscape Management Plans will be a material consideration in decision making. This policy will also apply to the Heritage Coast. This policy applies across the whole plan area including the Cranbrook Plan area". However there are a significant number of proposed development sites which are within the NLs, or have an affect upon its setting or appearance. • BudL_02: 35 new homes at Barn Lane, again inside the NL boundary. Most, if not all, of these sites cannot be justified as exceptional circumstances.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We have already made comments about the current dire sewage situation in the River Otter catchment. Building an additional 1,833 homes will only make the situation much worse.

Budl_02

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

WainHomes strongly supports the allocation of Land at Barn Close, Budleigh Salterton (Budl_02) but request that the allocation policy should be worded more positively to enable much needed houses to come forward. Our client continues to fully support the allocation of the site for residential development but does have some concerns with the additions to the policy as follows:

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

National Landscape Impacts The relationship of the site to the National Landscape (NL) is fully appreciated and this relationship has been an important consideration for the layout and design in the current application. While conserving and enhancing the scenic beauty of NL is consistent with national policy there is a concern that the additional text, which requires the natural beauty of the site to also be conserved and enhanced, would run counter to the site being developed. This is the only site proposed to be allocated in Budleigh – and noting all previous points made about the need for development to be accommodated within the NL to meet local and district wide housing needs – policies should not be drafted in such a way to conflict with the allocation. It also noted that there is an element of inconsistency with how this matter is addressed in other site allocations proposed within or in the setting of the NL in other parts of the district. While some site policies have been amended to include reference to the need to ‘conserve and enhance’, other policies only refer to the ‘scale, design, lighting and materials of new development being appropriate for the NL’. While the importance of the NL is fully recognised how these policies are wording in terms of the

approach to development within the NL should be consistent and should not be overly prohibitive on the basis of the overriding need for such sites to come forward being accepted. The policy is also overly prescriptive regarding certain elements references specific planting requirements, site buffers, lighting limitations etc. However, the detailed scheme should be informed by the supporting technical assessments and identified mitigation. It must also be recognised that there may be specific standards required by other agencies for example street lighting by highways adoptions team.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Requested Changes

The following further changes are requested to the site allocation policy deletions in square [] brackets and additions in regular () brackets: This land on the northern side of Budleigh Salterton is allocated for 35 new dwellings. The site is located inside the East Devon National Landscape. [area and particular sensitivity will need to be attached to development proposals in respect of potential adverse landscape impacts. and particular sensitivity will need to be attached to development proposals to conserve and enhance the natural beauty of the site and its wider landscape setting.] (Development proposals should therefore be landscape-led, informed by detailed assessment and design work to avoid impacts on the designated area, including scale, design, lighting and materials appropriate for the National Landscape.) [Additional native tree and hedge planting should be provided and maintained to screen the road frontage with the B3178. Existing hedges should be retained and enhanced and adequate buffers provided between them and private curtilages. A high standard of design and use of appropriate materials reflecting local distinctiveness is required commensurate with the location within the National Landscape. This should include avoiding the introduction of street lighting along the B3178.) Site development will need to come forward with provision of safe footpath access to the Budleigh primary school. Site proximity to the Grade II* listed Tidwell House is such that significant care must be taken to avoid potential for adverse impacts on the property and its setting.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

*** Personal details have been removed *** fully endorses the allocation of site Wood_16 but considers that the policy should be amended to reflect that the site has outline consent granted 29 August 2025 under application 22/2838/MOUT. This application was accompanied by an illustrative site layout and DAS identifying an acceptable approach to the site layout, development areas and design which the subsequent reserved matters must have regard to. As such is it not considered reasonable for the allocation policy to be amended to add additional requirements after an outline application has been approved. Prescribing that the layout and design should reflect the Conservation Area – which is quite extensive with a mixed character and appearance – or prescribing a buffer zone to the watercourse could limit the ability of the subsequent reserved matters to adhere to the outline principles.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Finally, while not proposed as an amendment in the current version the reference to need for the footpath

to be protected and enhanced should also be amended to reflect that the definitive route of the footpath (although not the actual worn route on the site) will need to be diverted to accommodate the consented development. Requested Changes The following further changes are requested to the site allocation policy (deleted text struck through and new text underlined in red): This site is allocated for around 70 dwellings and benefits from an existing outline consent which demonstrates that 70 homes can be delivered on the site. Suitable provision will need to be made for pedestrians to safely cross the B3179 to access the pavement route to the village centre. Woodbury footpath 3, as it travels through the site, must be protected and enhanced will need to be diverted as part the development but a PROW through the site must be provided. The design and layout of development should reflect the key characteristics of Woodbury Conservation Area to the north. Buffer zones of no built development at least 8m from the watercourse must be provided.

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We continue to object to draft Policy SD12 in its current form on the basis that insufficient allocations are included. As outlined in our response to draft Policy SP02, the housing requirement should be increased and further allocations included within the plan, including at sustainable settlements such as Broadhembury. We outlined in our representations to the first Regulation 19 consultation why we consider Broadhembury to be a suitable location for future growth, and support for the Council's commitment to direct a proportion of the required growth to the village. However, one a single allocation is included for the village for only 10 dwellings. We refer to our first regulation 19 representations on why we consider Broadhembury is an appropriate location to direct a higher proportion of growth, over and above this current level. Again, in the context of the need to increase the overall housing requirement and with it the need for the Council to identify additional site allocations, we continue to promote the Land south of The Vicarage, Broadhembury (Brhe_07) as one such site which the Council could look to as an easy way to identify an additional small site at one of the sustainable villages. The site has been assessed previously by the Council as part of the emerging local plan, and specifically through the HELAA process but was rejected in earlier stages of the draft

local plan and not included as a preferred allocation in the Regulation 19 draft. The latest site assessment evidence is contained within the Site Selection Report Broadhembury (February 2025). Within the Site Selection Report, the site is assessed under reference (Brhe_07) 'Land south of The Vicarage, Broadhembury'. The site is assessed on the basis of a potential capacity for around 10 dwellings, consistent with the site already included as a draft allocation (Brhe_09). We strongly disagree with the broad and sweeping conclusions for the site presented in the Site Selection Report.

Firstly, in terms of landscape impact, the Report states: "National Landscape site. Very high landscape value and the site slopes so the upper parts are visible, increasing its development sensitivity to high". Secondly, in terms of heritage impact, the Report states: "Significant heritage implications- adjacent, and higher than, adjoining listed buildings and the site would (to a lesser degree) impact upon the setting and appearance of the Grade 1 listed Church"

We are amazed by how vague and generalised the landscape assessment of this site is within this Report. Whilst the site is within the National Landscape, there is no recognition of any other relevant factors, such as site containment, and reference to how the visibility of the site in the context of the National Landscape is completely misleading. In fact, whilst there is a gentle slope across the site, the site is in fact well contained and is not a site with high visibility from other parts of the village or wider National Landscape. Our view is that a very broad and generalised conclusion has been included in the Report without a proper assessment being undertaken. Simply being located within a National Landscape does not support a quick conclusion that a site is simply unsuitable. The council's weak position on this is demonstrated by the fact that they have already identified a site for allocation in the village (brhe_09) which adjoins the National Landscape. The site assessment for that particular site in that instance does go into further detail on how the development of that site could manage the identified impacts, by stating: "Adjoins National Landscape, high landscape value and intervisibility and forms part of the setting, but largely screened from it by mature trees and hedgerow to northern boundary". The same can be said of potential heritage impacts. Whilst the Report correctly makes reference to the local village church, it is completely misleading on the potential impacts on the church which the Report contends would result from the development of the site. There is a complete lack of reference to the fact there are already existing dwellings situated between the site and church to the west, nor any recognition that a site can be planned with careful consideration to heritage constraints. We do not consider the church there would be any material impacts on the church in any case given the immediate context and existing built form of the village. Overall, the Council's assessment of the site in terms of

potential landscape and heritage impacts is poor, and entirely misleading given it does not represent a proper assessment of the site and context on the ground. It completely exaggerates potential impacts, and is too quick to conclude that such impacts would be too great to overcome. This is demonstrated by the inclusion of the following statement in the Report: “The site performs well in terms of accessibility and ecology but landscape and heritage impacts cannot be satisfactorily overcome”. It is completely unreasonable to make such a broad conclusion on the basis of a) a lack of proper assessment of the site in the first place, and b) without the benefit of a draft scheme for officers to reach a conclusion that there are apparently no design and layout solutions which might help to manage any identified risk (of which for the avoidance of doubt we consider to be limited in any case). The site assessment should be prepared again so that it represents a proper and fair assessment of the site. We consider that once the site assessment is undertaken properly that will demonstrate the suitability of the site. The site has very few other constraints given it is located within flood zone 1, and there are no environmental designations or constraints to development. The site benefits from access from Dukes Square, providing onward links into the village. Our view is that Broadhembury is a sustainable location capable of accommodating a slightly higher level of growth than that already proposed through Brhe_09. Indeed, a second allocation in the village would provide more certainty in terms of delivery and market choice. Site Brhe_07 should be reconsidered and included as an additional allocation to provide that extra delivery and choice.

This Representation is made in response to the second Regulation 19 Publication Draft of the East Devon Local Plan Review, predominantly to promote the land south of The Vicarage (Brhe_07) as an additional allocation for residential development.

We have outlined why we consider Broadhembury a suitable location for a slightly higher level of growth than that already proposed in the plan, and why the site itself is suitable to be included as a second allocation at the village.

Outside of this, we continue to have significant concerns over the proposed housing requirement and whether the plan can even proceed under the transitional arrangements set out in the NPPF. Our concerns relate to both the proposed stepped trajectory, which we consider is not supported by any evidence or justification, and the proposed housing requirement which in our view should be increased in order to reflect the updated Standard Method.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To assist, we have included below our suggested wording for a site allocation for Brhe_07:

Land south of The Vicarage, Broadhembury (Brhe_07) The site is allocated for around 10 homes. This site is sensitive in heritage and landscape terms and careful detailed assessment and design work will be needed to ensure that the design respects the special character of the area. This should incorporate an assessment of appropriate dwelling heights for this historic village and the wider character of the Blackdown Hills. The site should be landscaped to provide boundary screening appropriate to the National Landscape location to conserve and enhance the natural beauty of the site and its wider landscape setting. This should include the provision and appropriate maintenance of additional planting of native species where required. There is an absence of a defined pedestrian access to bus stops/local amenities, so opportunities to enhance this should be addressed through development.

Any application to develop the site must include a study of the impact of development on the setting of the Church, which is a Grade I listed building, and the Conservation Area. Proposals must show how adverse impacts will be avoided and where appropriate impact on these heritage assets will be mitigated.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: In order to represent the interests of The Exeter Diocesan Board of Finance Ltd in relation to their interests in the Land south of The Vicarage, Broadhembury (Brhe_07) (omission site), and other draft policies in the plan.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD12

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Brhe_09

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Still more could be done though in relation to sites and seeking to further the purpose; For example in Broadhembury, Site Brhe_09, an independent report for the parish council considered there had been inconsistent application of judgements of various potential allocation sites and issues around unresolved heritage and landscape impacts. Meanwhile one of the rejected potential allocation sites has secured planning permission for 6 dwellings. Although rejected, and within the National Landscape, there may be less impact overall if there were to be a small additional allocation at same site, instead of Brhe_09 (as it is further away from the historic core of village and limiting the loss of green field sites around the settlement) or a corresponding reduction in number at Brhe 09 on a less impactful site area.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

Response to Consultation by email (localplan@eastdevon.gov.uk) from: Blackdown Hills Parish Network Green Pastures Bishopswood Somerset TA203RS

Submitted on 26th January 2026 by: *** Personal details have been removed ***

REPRESENTATION: The Blackdown Hills Parish Network is an association of 49 parishes wholly or partially within, or adjacent to, the National Landscape. The Network supports the comments made by Broadhembury Parish Council in response to both the first and second invitations to comment on the draft Local Plan. In particular: 1: the site allocation process has not been positively prepared or justified. Consistent criteria have not been applied to all sites both within and adjacent to the National Landscape - since the preparation of the Plan a rejected site has been granted outline permission. 2: Proper consideration has not been given to the Broadhembury Conservation Area. 3: The District Council has not discharged its statutory duty under LURA24 to 'seek to further the purposes of a Protected Landscape' as a 'responsible Authority'. This qualified active duty has been helpfully defined by Mr Justice Mould (New Forest National Park v Secretary of State 2025). The duty means that a local planning authority

has to decide if development 'promotes' the conservation and enhancement of natural beauty and the Network has seen no evidence that the District Council has engaged in this active process. We believe you have to consider: + if there are viable alternatives (there are because you have approved an alternative rejected site), + what mitigation to the harm caused could be made (your suggestion of a hedge is clearly not adequate mitigation) + how natural beauty could be enhanced by approval (we have seen no evidence that you have engaged in an active process to do this. In fact in response to your own question 'effect on National Landscape?' you have recorded 'none'. For clarity: it is important you understand that the LURA24 statutory duty applies to Plan- making and to actions by 'relevant authorities' which affect the setting of a Protected Landscape.

*** Personal details have been removed ***

Chairman

Blackdown Hills Parish Network (sent from my personal email account because of problems this morning with my official .gov account)

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The Network would urge the District Council to withdraw from consideration all sites in Broadhembury parish, both within or adjacent to the National Landscape.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I can confirm the Network wishes to be represented at Public Enquiry.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD12

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Brhe_09

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The report's core legal-compliance concern is that the site selection / allocation process fails to demonstrate compliance with the strengthened statutory duty introduced by the Levelling Up and Regeneration Act 2023 (described in the report as a requirement for relevant authorities to "seek to further the purposes" of Protected Landscapes/National Landscapes), including the need for documented evidence showing the duty has been enacted in plan-making and site allocations.

Based on the report, the reasons are:

1. Failure to integrate the strengthened LURA 2023 duty into plan-making/site selection evidence

The report states there is no mention of the duty in the Site Selection Methodology (2024) despite post-dating LURA 2023.

It also states there is no specific consideration of the special qualities of the National Landscape (or Broadhembury’s local expression of those special qualities) within the Broadhembury site assessment.

2. Lack of documented evidence showing how the allocation seeks to further the statutory purposes

The report says there is no clear consideration of how development might “further the purpose of designation” and no differentiation between mitigation and measures that further the purposes.

3. No evidence of alignment with the Blackdown Hills Management Plan objectives/principles/policies for this allocation decision

The report states there is no evidence of how Brhe_09 allocation aligns with Management Plan objectives/principles/policies.

4. Potentially flawed / inconsistent evidence base and reasoning used to justify Brhe_09

The report identifies inconsistencies in sensitivity scoring (e.g., Brhe_09 sensitivity “underestimated” and should be “high” using the matrix).

It also identifies inconsistencies in heritage judgements between sites (e.g., Brhe_05 versus Brhe_09 conclusions).

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally

compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Below are targeted modifications the representation could request, reflecting the report's findings. I've written them in a way you can paste into a representation.

Modification 1 — Add an explicit LURA 2023 “seek to further” requirement to SD12

What to modify: Strategic Policy SD12 (Broadhembury Brhe_09).

Why it makes it legally compliant: The report emphasises that the duty is now active, requires reasonable proportionate steps, and must be evidenced; SD12 currently frames matters largely as mitigation and “careful design”, without requiring demonstration of “seeking to further” statutory purposes.

Modification 2 — Require the “furthering” analysis at allocation stage (plan-making), not deferred to application

What to modify: The supporting text to SD12 and/or the site allocation evidence requirements.

Why it makes it legally compliant: The report argues that key impacts (especially on heritage setting and landscape) should be determined prior to allocation, and criticises the absence of evidence showing how the allocation itself meets the duty.

Modification 3 — If the above cannot be evidenced, delete or replace the allocation

What to modify: Remove Brhe_09 from SD12 allocations or replace with a bespoke dispersed/windfall strategy for Broadhembury.

Why it makes it legally compliant: The report concludes allocation of Brhe_09 is likely contrary to Management Plan policy/guidance and questions whether it can “seek to

further” statutory purpose at all; it suggests a bespoke dispersed strategy with windfalls supported by detailed assessment.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The report concludes the allocation risks undermining soundness because:

- it is based on inconsistent/biased site selection judgements;
- Brhe_09 sensitivity is underestimated and should be high;
- mitigation measures in SD12 are described as conceptually appropriate but unlikely to be achievable in practice, raising deliverability concerns and “misleading expectation of developability”.

Using the NPPF soundness themes (Justified / Effective / Consistent with national policy), the report supports the following unsoundness points:

A) Not justified (reasonable alternatives / proportionate evidence)

- The report identifies inconsistencies and an apparent bias leading to selection of Brhe_09 as preferred allocation.
- It argues that, using the sensitivity matrix properly, Brhe_09 should be “high” sensitivity and is the most susceptible, undermining the justification for choosing it.
- It also critiques “value” scoring that appears to rely mainly on the site lying outside the designation boundary, without a nuanced valued-landscape assessment.

B) Not effective (deliverability / realistic mitigation)

- The report states that achieving SD12-style mitigation (screening, design to preserve spaciousness, retain enclosure patterns, protect views, maintain rural approaches and dark skies) is highly unlikely for up to 10 dwellings on Brhe_09.
- It highlights a tension between SD12’s desire for pedestrian improvements and the valued character of unlit, path-less rural lanes, making “enhancements” potentially harmful to special qualities.
- It concludes the site is “unlikely to be deliverable” and risks a “misleading expectation of developability.”

C) Not consistent with national policy / statutory context (Protected Landscape duties)

- The report says the process does not evidence how allocation aligns with the duty to seek to further Protected Landscape purposes and does not reference special qualities/Management Plan policies in a meaningful way.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Option 1 (Preferred):

Delete Brhe_09 and replace with a dispersed strategy Why sound: Addresses justification and effectiveness by avoiding an allocation considered highly sensitive/poorly evidenced and adopting the report's recommended strategy.

Option 2: Retain Brhe_09 but strengthen SD12 so the allocation is demonstrably deliverable and evidenced Why sound: Attempts to fix effectiveness and justification problems by front-loading assessment and tightening criteria. Key additions (drawing directly from report concerns):

- Require a site-specific Landscape/Heritage evidence package before allocation is confirmed (not deferred).
- Require retention of key views (church tower approaches), indented vegetated edge, small enclosure pattern, and dark skies, with measurable design requirements.
- Replace vague "opportunities to enhance pedestrian access" with a requirement that any measures must not suburbanise rural lanes (no standard kerbs/lighting unless clearly justified and designed to conserve tranquillity). This responds to the report's lane character concern.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD12

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Brhe_09

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: On behalf of Broadhembury Parish Council.

Broadhembury Parish Council has commissioned an independent consulting report to determine whether your site selection process has been carried out in a systematic and consistent way, and whether you have complied with the law relating to Protected Landscapes. The report is attached and it forms the detail of our submission to the Planning Inspectorate. It elaborates on our submission to you in March 2025 in response to your first consultation and is consistent with our first comments to your department in 2023.

In summary, the report documents that sites have been reviewed in an inconsistent and 'apparently biased' way and that your legal duty to further the purposes of a Protected Landscape as enacted in LURA (23) has not been observed and complied with. The Broadhembury Parish Council believes that these points go way beyond any question of the plan's 'soundness'; if found to be substantial at Inquiry than they risk placing your Authority in legal jeopardy.

I would emphasise that since the drafting of the various documents which contribute to your plan, your department has approved for Outline Permission, the alternative site

which you discard in your Local Plan assessment. This is also the site preferred by the Parish Council. It is the one which will cause the least harm to the Protected Landscape and where mitigation can be most effectively designed.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We would urge you to give personal and serious consideration to the points made in the report and reconsider the site allocation proposal in the Local Plan for Broadhembury as a result. If you are unable to do this we shall pursue our arguments at Public Inquiry and, since we believe a point of law is at stake, we shall pursue the argument beyond if unable to persuade the Inspector of the merits of our case.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD13

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Char_04a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The legal compliance concerns raised by the submitted representation (Summerfield Homes) are: (1) Wrong national policy basis applied at plan-making stage

The letter argues the Council should not rely on the previous NPPF iteration and should instead prepare/examine the Local Plan in accordance with the December 2024 NPPF (and associated housing need calculation approach), because the Second Reg 19 changes are so substantial they amount to a “whole new Regulation 19 document”).

(2) The “Second Reg 19” consultation is said to be a new Reg 19, triggering PPG treatment

The letter cites PPG para 86 (Reference ID 61 086 20250616) and argues that where the content changes significantly, the plan may be treated as having reached Regulation 19 at the later consultation date; consequently, the plan should be progressed under the newer framework.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Correct the plan-making basis for national policy (NPPF)

What to change: The Council's approach to the applicable NPPF version for examination (and associated evidence/requirements).

Why: The representation contends that the extent of changes at Second Reg 19 means the plan should be prepared/examined against the December 2024 NPPF, not the earlier version relied upon for the first Reg 19 stage.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Highways / transport support

- The Highway and Transport Review concludes the site is in a sustainable location with key local services (shop, school, hall) within short walking distance and public transport access in the wider vicinity.
- It proposes an access arrangement with a 5.5m access width and visibility splays designed for the 20mph context, and notes no injury collisions in the vicinity within the reviewed period.
- The forecast vehicle trips for around 30 dwellings are described as low (c. 15 two-way trips in AM peak and 14 two-way trips in PM peak; 129 two-way over 12 hours), and the report states impacts would be negligible and acceptable.

Landscape / visual support

- The Landscape Visual Baseline states the site is not within a landscape designation, but lies close to the Blackdown Hills National Landscape, with the National Landscape abutting Chardstock to the north/west.
- The baseline findings indicate views are often limited by existing vegetation and built form; where glimpses occur (including from PRow/bridleways within the National Landscape), mitigation is identified through boundary enhancement and structural planting.
- The report concludes the site would be “deemed suitable for accommodating development” provided mitigation measures are incorporated to assimilate the development into its context.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Modification 1 — Amend SD13 PRow requirement (clarify or remove)

Issue: The updated SD13 wording is said to be ambiguous and potentially threatens deliverability by requiring a connection to PRow Chardstock Footpath 30 without clarifying where. The letter explains that if the intended connection is at a point where Green Lane is not adopted highway / is unregistered land, it could jeopardise deliverability.

Requested change (as stated in the letter):

- Either remove the requirement to connect to Footpath 30
- Or amend the policy to clarify the precise point of connection and provide planning

Modification 2 — Extend the allocation boundary to include the northern parcel (without increasing dwelling numbers)

Issue: The letter maintains that the adjoining land parcel to the north (also under option) should be included to enable a higher quality scheme, with lower density, enhanced landscaping, public open space, and stronger integration with local character—while retaining around 30 dwellings.

Why this supports soundness: It strengthens effectiveness/deliverability and design/landscape integration, consistent with the landscape strategy principles described in the Landscape Visual Baseline (structural planting, GI breaks, strategic landscaping, SuDS, open space).

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD16

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Ebud_01

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.:

1. Failure to select the “most appropriate” site using robust, evidence based reasoning
Local Plan Strategic Policy AR01 requires that there be no preferable location to
Ebud_01. The representation argues this test has not been met because Collins Park is
demonstrably safer and more sustainable.

2. Inadequate consideration of safety and sustainable access (Objectives 1, 9 and 11)

- Pedestrian access from Ebud_01 requires crossing the dangerous B3178 near Rolle Arms on an unpaved stretch.

- Access onto narrow Frogmore Road, much used by walkers/cyclists, conflicts with Objective 9 (walking & cycling priority).

- Sight lines and parked vehicles create hazards. The Plan must demonstrate these risks were assessed properly at allocation stage.

3. Failure to properly assess environmental constraints and landscape policy conflicts

- Ebud_01 lies on Grade 1 agricultural land, used for grazing.

- Parts of the area fall within or adjacent to National Landscape and near a Nature Reserve.

- Development would harm views from the Otter Valley and conflict with Strategic Policies OL01 (Landscape Features) and OL02 (National Landscapes). If these were not fully considered, legal compliance is at risk.

4. Failure to consider flood risk appropriately

- Frogmore Road “periodically becomes impassable” due to flooding and abuts Flood Zone 3.
- Collins Park has “negligible” flood risk. If flood implications were not fully tested, the Plan may not comply with statutory flooding requirements.

5. Failure to reflect relevant planning history The representation describes past applications where only very small scale development was considered acceptable, due to:

- Landscape sensitivity
- Grade 1 agricultural land
- Visual/amenity impact concerns The Local Plan must explain how these issues have now been overcome.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Modification 1 — Reassess site options to demonstrate compliance with Policy AR01 Undertake a transparent reassessment comparing Ebud_01 with Collins Park, using:

- pedestrian safety
- vehicle access
- flood risk
- landscape impact
- agricultural land quality
- alignment with Local Plan Objectives 1, 8, 9, 11 Why: Policy AR01 requires that allocated sites be shown to be the least constrained and most appropriate. Evidence provided demonstrates Collins Park is preferable.

Modification 2 — Consider reallocating the housing site from Ebud_01 to Collins Park Why:

- Safer pedestrian access via existing footpath and Middletown Lane (restricted to vehicles).

- Better vehicular access with long straight sight lines on B3178.
- Negligible flood risk.
- Lower agricultural quality and historically limited farming use.
- Less landscape impact due to existing screening.

Modification 3 — If Ebud_01 is retained, require full mitigation evidence at allocation stage Include requirements for:

- safe pedestrian crossings
- safe vehicular access without harming Frogmore Road's amenity
- measures to protect the Otter Valley views
- landscape screening compliant with OL01 and OL02
- flood mitigation appropriate for an area near Flood Zone 3 Why: Without these, the allocation would not be legally robust.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Not justified (reasonable alternatives not properly assessed) The representation shows that Collins Park is:

- safer
- better connected
- less constrained by landscape policy
- not on Grade 1 land
- not at risk of flooding

Yet it was rejected for reasons the representation challenges.

2. Not effective (allocation unlikely to be deliverable without unacceptable impacts) Issues include:

- Dangerous pedestrian access across B3178
- Hazardous vehicle access onto Frogmore Road

- Visual/amenity harm due to slope and proximity to housing
- Difficulty in screening impact on National Landscape and views

3. Not consistent with policies OL01, OL02, Objectives 1, 8, 9 and 11 These require:

- protecting landscape character
- conserving National Landscape
- promoting healthy, safe communities
- supporting walking/cycling
- supporting village facilities The representation demonstrates Ebud_01 performs poorly, while Collins Park performs well.

4. Planning history contradicts suitability of Ebud_01 Previous approvals were granted only because the development was extremely small scale, and even then generated significant opposition.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Modification 1 —

Allocate Collins Park instead of Ebud_01 This reflects the representation's core evidence:

- far safer pedestrian and vehicle access
- better landscape fit
- negligible flood risk
- avoids loss of Grade 1 agricultural land

Modification 2 — Re evaluate Ebud_01 with full constraints analysis If retained, require:

- crossing improvements at B3178
- redesigned vehicle access avoiding Frogmore Road
- mitigation for harm to Otter Valley views

Second Regulation 19 Consultation – East Devon Local Plan – Responses by Chapter

- agricultural land assessment justifying loss
- flood risk assessment

Modification 3 — Include policy wording prioritising safe and sustainable movement

Add: “Development must deliver safe pedestrian access to facilities without requiring users to cross the B3178 at unsafe locations.” (Reflects Objective 1, 9, 11).

Wood_28

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: Yes

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: We continue to support Strategic Policy SD17 and specifically the proposed allocation of the Land north and east of Exton Farm (Wood_28). We outlined in our representations to the first Regulation 19 consultation why we consider Exton to be an entirely suitable location for future growth, and support for the Council's commitment to direct a proportion of the required growth to the village. We continue to maintain that the proposed allocation of Wood_28 for the development of 39 residential dwellings will provide much needed market and affordable housing to help meet local housing needs, as well as helping to sustain the vitality and viability of the existing services and facilities in the village. In terms of the draft allocation wording itself, we note that the draft allocation text has been amended from that included within the first Regulation 19 consultation draft, and now reads: Land north and east of Exton Farm (Wood_28) The site is allocated for around 39 dwellings. Development will need to provide safe and suitable pedestrian and cycle access along Mill Lane south to the existing pedestrian crossing at the A376/Station Road junction, to enable easy access to facilities in the settlement. This pedestrian crossing should be upgraded to accommodate cyclists, to enable access to the Exe Estuary Trail via Station Road. Development should provide pedestrian/cycle links to Wood_01 adjacent to the north - west. Development should include tree planting on the southern field to reflect their historic presence; and retain the hedgerow that dissects the site, as far as practically possible. Development should address the existing flooding issues along Mill Lane. The

south-west corner of Wood_28 is within the Vulnerable Building Distance statutory safeguarding zone surrounding the Royal Marines Commando Training Centre, within which inhabited buildings must be deemed as ‘non vulnerable’ structures that are of a robust design and construction to the satisfaction of the Ministry of Defence. Anyone preparing a planning application at or for this allocation site should consult with the Ministry of Defence with whom the local planning authority will also engage with in respect of determination of any planning application. January 2026 7 The design and layout of development should conserve and enhance the rural setting grade II* listed Exton Farmhouse, including through the provision of public open space in the northern part of the site. Flood mitigation is required to ensure existing surface water flood risk along Mill Lane is not exacerbated by the development. We do not have any concerns about the request to engage with the MOD as part of a future planning application. We understand their interests given a small part of the site falls within the Vulnerable Building Distance statutory safeguarding zone surrounding the Royal Marines Commando Training Centre. However, we do question the specific reference to the need for the provision of open space in the northern part of the site in order to “conserve and enhance the rural setting grade II* listed Exton Farmhouse”. The farmhouse is situated to the west of the site and the most sensitive part of the site would be the north west corner where there may be visibility to and from the listed farmhouse. In our view it is only this north western part of the site which is likely to be more sensitive, so we do not agree with the inclusion of the broad requirement for the provision of open space in the ‘northern part of the site. For example, the north and north eastern parts of the draft allocation could easily be developed through sensitive design and layout work to ensure that any impacts on the nearby listed farmhouse are limited. Therefore, to ensure the allocation accurately reflects the known constraints whilst not imposing restrictions which are over and above that necessary, we request that the last paragraph of the allocation text is changed as follows: The design and layout of development should conserve and enhance the rural setting grade II* listed Exton Farmhouse, including through the provision of public open space in the north west northern part of the site. Flood mitigation is required to ensure existing surface water flood risk along Mill Lane is not exacerbated by the development. Overall, the land north and east of Exton Farm remains a strong candidate for allocation in the emerging Local Plan Review. The site is available and very much capable of accommodating the 39 new homes proposed in draft Policy Wood_28, including a policy compliant level of affordable housing.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

We welcome the additional policy text requiring that the design and layout of development should conserve and enhance the rural setting of grade II* listed Exton Farmhouse, including through the provision of public open space in the northern part of the site.

However, it is unclear whether the stated capacity of 39 homes is achievable on this site with the recommended mitigation and we therefore request that a concept plan is provided to justify the site allocation and that, if necessary, the site capacity is reduced accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We request a concept plan to justify the proposed capacity for the site allocation and that, if necessary, the capacity is reduced accordingly.

We write on behalf of South West Strategic Developments Limited in relation to the Second Regulation 19 version of the East Devon Local Plan and the proposed allocation at Land Adjacent to Beechwood, Feniton (ref. Feni_08). We have reviewed the updated Local Plan and tracked changes and confirm that we continue to support the emerging Local Plan, including the Spatial Strategy and the continued allocation of Land Adjacent to Beechwood, Feniton for residential development. Our previous Regulation 19 representations set out in detail our support for the allocation, the sustainability of the site, and its availability and deliverability. Those representations remain valid and should be read alongside this submission. We note that the revisions to the Regulation 19 Plan do not materially alter the policy approach to Feniton or the role of the site within the spatial strategy. Since the submission of the previous representations, an outline planning application has been submitted in respect of the site. All consultee comments raised to date have been addressed through the application process, and the proposals are progressing positively. The application is to be reported to Planning Committee on the 27th Jan 2026, further demonstrating the site's deliverability and suitability to underpin its allocation through the Local Plan examination. Accordingly, we welcome the Council's decision to maintain the allocation and confirm our continued support for the Plan progressing to examination on this basis.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Feni_05, Feni_08

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Site Feni 11 (Land East of Colestocks Road) is not referred to in the Local Plan site allocations for Feniton. Consent for housing has been granted at appeal following the District Council's failure to determine the original application and logically it should be included in the local plan. It has no different status to Feni 05, Burlands Mead which also has planning consent and which contributes to the local plan housing figures. The inclusion of Feni 11 would significantly increase the stated level of housing provision being made in Feniton in the plan period. There is no legal case for treating Feni 11 any differently to Feni 05.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
Identify Feni 11 as a housing allocation in the Local Plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The draft local plan allocated only sites Feni 05 Burlands Mead (42 dwellings) and Feni 08 Beechwood (60 dwellings). This reflected the plan's strategy to provide for limited development in the Tier 4 Service Villages sufficient to meet local need. Given that Feni

11 Colestocks Rd has now been granted consent for 85 dwellings, which will be delivered in the plan period, there is no justification for also including Feni 08 Beechwood. The total allocation in Feniton is now out of line with the plan's spatial strategy of only limited development in tier 4 settlements to meet local need.

Full name: Christopher Dyson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Feni_05, Feni_08

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Planning permission has recently been granted to Application Ref 24/0431/MOUT for 86 dwellings and this application, Feni 11, needs to be taken into account before the Plan is approved.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
Remove Feni 08 from the application, 60 houses, replace with Feni 11.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The draft local plan allocated ONLY sites Feni 05 and Feni 08 (102 dwellings). Although local residents would say this is too much, it was intended to reflect the plans strategy to provide LIMITED development to a tier 4 service village sufficient to meet the local need. Now that Feni 11 has been granted consent for a further 85 dwellings, agreed at appeal not by EDDC, there is NO justification for continuing to include Feni 08 within the plan. Had Feni 11 been included initially included Feni 08 would never have been agreed as it takes the total allocation for Feniton now out of line with the plans spatial strategy of only limited development in tier 4 settlements.

Full name: Pamela Rink

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD18

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.: Feni 08, Feni 11, Feni 05

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Permission has been given via the inspectorate for Application ref 24/0431/MOUT for 86 dwellings (Feni 11). This needs to be taken into consideration before the Local Plan is approved. If consideration is not given to this, the policy for tier 4 villages has been ignored, allowing an unreasonable and unsustainable increase in development to take place.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Feni 08 (60 dwellings) should be removed and Feni 11 added.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The inclusion of Feni 05 and Feni 08 - a total of 102 houses - reflected the strategy to allow limited development sufficient to meet local need. The approval of Feni 11 has increased the number of houses to far in excess of this (123), thus there is no justification for continuing to include Feni 08 within the plan. Its continued inclusion makes the allocation for Feniton contrary to the plan's special strategy for tier 4 villages.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Feni 08

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD19

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Hawk_01

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

While C G Fry & Son remain supportive of the principle of the allocation of the site for development, it is disappointing given the availability, suitability and deliverability of the wider site (refer to Appendix B), that there have been no alterations to the extent of the site allocation since the first regulation 19 consultation. As such, and for reasons set out in the Regulation 19 stage 1 representation, C G Fry & Son maintain that Policy SD19 is not justified. The site has capacity to deliver up to 38 dwellings, including a mix of affordable homes. The wider site is both;

- Suitable, available and deliverable
- Consistent with the objectives of the emerging local plan
- Well-related to the existing built form of the settlement
- Capable of contributing to identified housing needs, including affordable housing.

C G Fry & Son are cognisant of the need to bring forward a design that respects the local character, integrates with the existing settlement and seeks to deliver green

infrastructure alongside biodiversity enhancements. The wider site would provide development that accords with the aims and objectives of the emerging local plan, seeking to provide development which is ‘balanced, sustainable and beneficial to our communities’. Additional wording has been included to policy SD19 requiring a contamination assessment to be provided as part of any planning application. C G Fry & Son consider this to be superfluous given that this requirement is clearly set out within the East Devon’s validation checklist and similarly repeats paragraph 196 of the NPPF resulting in unnecessary duplication of policy. This inclusion of this additional wording clearly demonstrates that there is understanding of potential contamination on site and need for remediation measures. The significant upfront costs associated with such works have not however been accounted for in policy.

1(c). If the comment is related to a site, please state the site reference here::
Kilm_05

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Previously Developed or Brownfield Land An appeal decision for this site from March 2020 concluded that the site is a brownfield site, and factors of perceived neglect are not uncommon with many brownfield sites. Nevertheless, the NPPF acknowledges the significant role of brownfield sites to meet housing need and encourages development of these sites, with Paragraph 123 stating that: “Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or ‘brownfield’ land”. We consider that appropriate weight has not been given to the site’s status as previously developed land in the site assessment for Kilm_05.

Environmental Considerations Ecological matters have never been cited as reasons to refuse planning permission on this site. Furthermore, both preferred allocation options in Kilminster would be caught by both Nutrient Neutrality and mandatory Biodiversity Net Gain requirements which would limit their deliverability and site yield. As Pit Orchard already benefits from an extant planning consent, development would not be subject to the same restrictions either through implementation of the current consent or a variation thereto. CONCLUSION Fundamentally, the reason given by EDDC for not

allocating Kilm_05 is inconsistent with assessments of the site undertaken by officers in determining the previous planning applications on the site. The conclusion that development of the site will create visual impact on the wider parts of the National Landscape overlooks documented evidence contained within the extensive planning history of the site. For example, the description of the site and the ability to develop the site under the extant planning consent are not considered in the EDDC site assessment. Moreover, there is no reference in the EDDC site assessment to Kilm_05 being a brownfield site. This is surprising as the NPPF clearly favours the use of brownfield land for the development of new homes which is a key component in the core theme of 'making effective use of land'. It is considered that much greater weight should be afforded to this status. In the context of the Framework and other material considerations, aspects of the Draft Plan appear inconsistent with these, and sufficient justification is not provided to demonstrate that the housing trajectory is robust, particularly when considering the approach for windfall sites. In the event that additional housing sites are required to meet the identified housing needs of the District, the site is in a prime position to accommodate a modest level of growth. Development of the site is shown to provide very limited impact on heritage assets and areas of landscape importance and is located in a sustainable location with good access to local services and facilities as confirmed by the decision of EDDC in granting permission for residential development of the site in April 2016. Finally, the site is deliverable in BNG and nutrient neutrality terms by virtue of the extant consent. These characteristics put the site head and shoulders above any other site in the village and in our opinion make it a logical and essential choice for allocation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

CarneySweeney acts for Mr and Mrs Hansford, in connection with land at Pit Orchard, Bim Bom Lane, Kilmington which our client has been seeking to promote for open market led housing development through the draft East Devon Local Plan.

CarneySweeney submits the following representations on behalf of our clients which are to be read in conjunction with previous representations submitted to the Regulation 19 Publication draft in March 2025 (Reg 19 Rep) which are appended in full. We maintain that our client's site is a suitable and appropriate location for new development and with the benefit of the extant consent for 6 new homes, is capable of coming forward early in the plan period to deliver a modest but nonetheless important level of new housing. The Council's continued failure to allocate the site is not justified in light of the previous planning history and additional submissions made in support of the allocation. It is also noted that since our previous representation no applications have come forward on the two sites allocated in the made neighbourhood plan or the two sites proposed to be allocated in the draft LP. Once again, we write to confirm that a series of inaccuracies have arisen within reporting of this site by the Council hat has led to the site not being considered for allocation for market-led residential development. The characteristics of the site, and its location, inform its development potential and its omission from the Draft Local Plan is unjustified. The Site and Surroundings The site – shown below - extends to 0.56ha and is located to the south of Kilmington. The site fronts on to Bimbom Lane from which access is taken:

Topographically, the lane is lower than the surrounding landscape, with the exception of a narrow band of land already developed for housing to the north that runs east to west along a section of Silver Street and Silver Lea. The site largely consists of scrubland with the central part of the site already been cleared and an access road constructed up to base course level in connection with an existing planning consent. The site also includes narrow but steep banks in the south west, south and east with heavily planted mature trees positioned at the top of the slope. The northern boundary consists of a low bank topped with a mature hedgerow and trees. The topographical nature of the site and the presence of a band of heavily planted mature trees around the boundary, with the exception of the point of access, means that the views out of the site are very limited. The level central part of the site falls away from Bimbom Lane meaning that the site is not visible in any views from the east. At this location, Bimbom Lane acts as a small ridge with it being the local high point for views from the east coming from other areas of Kilminster, and Axminster beyond. In addition to the topography of the site, a strong mature Devon hedgebank on the east side of Bimbom Lane prevents any views towards the site from the east, as demonstrated in Photograph 3 of this report. Kilminster itself is a village with a population of just under 1,000, situated south of the A35. Kilminster has a good range of community facilities including a church, primary school, pub, petrol station, farm shop and cricket pavilion with bus services available to the larger settlements of Honiton and Axminster. These factors contribute to Kilminster being able to accommodate suitable levels of development.

Planning History The site has a relatively extensive planning history and benefits from an extant planning consent (ref: 15/1746/OUT and 16/1586/RES) for 6 residential dwellings. The planning consent is for an affordable housing led development, therefore, there is a recognition that residential development can be accommodated at the site. Correspondence received from East Devon District Council by email dated 15th May 2018 states that “the development has begun within the requisite time period established” and consequently, it can be said with confidence that the principle of residential development of this site has been established and secured. In granting consent for the proposal for 6 residential dwellings, the Council concluded that “the benefits of the scheme are considered to outweigh any harm”. In relation to character and appearance, it was determined that the “site would be apparent from localised views... such views as would be afforded would though be localised only and although likely to have a slight negative impact this could be minimised through the use of appropriate design and materials”. Furthermore, landscape impact was considered to be “limited”.

Subsequently, two more detailed planning applications have been submitted to EDDC for residential development (19/0077/FUL and 20/0435/FUL) with both being refused. The former was dismissed at appeal in March 2020, yet raises pertinent points regarding the development prospects of the site. Notably, in coming to their decision, the Inspector concluded that the development would “utilise a brownfield site which is encouraged by the Framework”, suggesting that weight should be added to the re-use of the site for residential development. Notable in its absence, was any discussion around landscape impact, particularly of interest as the site is within the AONB suggesting that landscape impact was not fundamental to the case for refusal. The latter application provided new commentary on landscape impact, stating that “the impact of the development on visual receptors is likely to be negligible in most views although the visual impact on residents and pedestrians from Silver Street is likely to be moderate adverse during construction and on completion reducing to low as new perimeter planting matures”. These recent applications demonstrate that development would give rise to very limited landscape harm. The fact remains that the site has secured a consent for 6 dwellings which has been lawfully commenced through the creation of the access road and remains capable of implementation in full.

Policy Context for Plan-Making Provisions for plan-making are set out within the NPPF and NPPG. Plan makers are required to take account of the following points when preparing their Local Plan. Under the transitional arrangements of the December 2024 NPPF, the new Local Plan will be considered under the provisions of the December 2023 NPPF. National Planning Policy Framework (December 2023)

- Paragraph 31 states that “The preparation and review of all policies should be underpinned by relevant and up-to-date evidence. This should be ...focussed tightly on supporting and justifying the policies concerned and take account of relevant market signals.”
- Paragraph 35 identifies the tests of soundness as being: a) Positively prepared: As a minimum, seeking to meet the area’s objectively assessed needs and informed by agreements with other authorities so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with sustainable development. b) Justified: An appropriate strategy based on taking account of reasonable alternatives and proportionate evidence. c) Effective: Deliverable, based on effective joint working on cross-boundary strategic matters, evidenced in a Statement of Common Ground. d) Consistent with national policy. Previously Developed or Brownfield Land An appeal decision for this site from March 2020 concluded that the site is a brownfield site, and factors of perceived neglect are not uncommon with many brownfield sites. Nevertheless, the NPPF acknowledges the significant role of brownfield sites to meet housing need and encourages development of these sites, with

Paragraph 123 stating that: “Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or ‘brownfield’ land”. We consider that appropriate weight has not been given to the site’s status as previously developed land in the site assessment for Kilm_05.

Environmental Considerations Ecological matters have never been cited as reasons to refuse planning permission on this site. Furthermore, both preferred allocation options in Kilminster would be caught by both Nutrient Neutrality and mandatory Biodiversity Net Gain requirements which would limit their deliverability and site yield. As Pit Orchard already benefits from an extant planning consent, development would not be subject to the same restrictions either through implementation of the current consent or a variation thereto. CONCLUSION Fundamentally, the reason given by EDDC for not allocating Kilm_05 is inconsistent with assessments of the site undertaken by officers in determining the previous planning applications on the site. The conclusion that development of the site will create visual impact on the wider parts of the National Landscape overlooks documented evidence contained within the extensive planning history of the site. For example, the description of the site and the ability to develop the site under the extant planning consent are not considered in the EDDC site assessment. Moreover, there is no reference in the EDDC site assessment to Kilm_05 being a brownfield site. This is surprising as the NPPF clearly favours the use of brownfield land for the development of new homes which is a key component in the core theme of ‘making effective use of land’. It is considered that much greater weight should be afforded to this status. In the context of the Framework and other material considerations, aspects of the Draft Plan appear inconsistent with these, and sufficient justification is not provided to demonstrate that the housing trajectory is robust, particularly when considering the approach for windfall sites. In the event that additional housing sites are required to meet the identified housing needs of the District, the site is in a prime position to accommodate a modest level of growth. Development of the site is shown to provide very limited impact on heritage assets and areas of landscape importance and is located in a sustainable location with good access to local services and facilities as confirmed by the decision of EDDC in granting permission for residential development of the site in April 2016. Finally, the site is deliverable in BNG and nutrient neutrality terms by virtue of the extant consent. These characteristics put the site head and shoulders above any other site in the village and in our opinion make it a logical and essential choice for allocation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

These comments should be read in conjunction with Place Land Limited's representations on this policy at the first phase of the Regulation 19 plan. We object to the revised wording regarding careful design to conserve and enhance the natural beauty of the site. The NPPF (2024) requires planning policies to contribute towards and enhance the natural and local environment by protecting and enhancing valued landscapes, recognising the intrinsic character and beauty of the countryside (paragraph 187). Great weight should be given to conserving and enhancing landscape and scenic beauty in National Landscapes (paragraph 189). These policy requirements recognise the need to identify features of particular character and beauty, which are intrinsic to the value of the protected landscape. A policy requirement to conserve and enhance the natural beauty of the site introduces a local policy requirement which is inconsistent with national policy. To conserve and enhance the natural beauty of the site could go beyond the national policy requirement and impose an onerous requirement on the site allocation which could unduly restrict development. As drafted, the wording is not consistent with the NPPF and could prove ineffective in respect of the delivery of this housing allocation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The policy should be amended to comply with national policy as follows: “The site is in the East Devon National Landscape and requires careful design to conserve and enhance the natural beauty of the protected landscape.

National Landscapes (NL) and Policies SD01, SD03, SD04, SD06, SD08, SD15, SD16, SD22 and SD23 Policy OL02 provides strong protection for the NL areas. Quote: "The highest level of protection will be given to the landscape and scenic beauty of the National Landscapes (NLs) in East Devon: A. Development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities, character and natural beauty of the NL (including the coastline, where relevant); B. Major development in a NL will only be permitted in exceptional circumstances and where it can be demonstrated to be in the public interest; and East Devon Local Plan 2020 to 2042 – Second Regulation 19 Publication Draft 223 C. Any relevant National Landscape Management Plans will be a material consideration in decision making. This policy will also apply to the Heritage Coast. This policy applies across the whole plan area including the Cranbrook Plan area". However there are a significant number of proposed development sites which are within the NLs, or have an affect upon its setting or appearance. • Newt_04 and NEWT_05: 20 new homes at each location at Newton Pop, again inside the NL. Most, if not all, of these sites cannot be justified as exceptional circumstances.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:
N/A

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This part of the Development in the Towns and Villages chapter is not sound. The statement

“The site is allocated for 20 dwellings” imposes a fixed quantum that has not been justified by detailed site capacity testing, masterplanning or technical evidence. As drafted, the policy is not justified or effective, as required by paragraph 36 of the NPPF, because it does not allow for a reasonable degree of flexibility to respond to site-specific constraints and opportunities identified through the detailed design and technical assessment process. Furthermore, by limiting development to a fixed number of 20 dwellings, the policy risks undermining the objective of making efficient use of land, as required by paragraphs 124 to 130 of the NPPF. This may also unnecessarily constrain the delivery of affordable housing on the site. In addition, this policy conflicts with draft policy DS02 (Housing density and efficient use of land) within the Regulation 19 Local Plan, which requires residential development proposals to maximise the number of new homes and density of development of any site but to do so in a manner that is compatible with site setting and characteristics and which conserves or enhances the character of the area especially in a National Landscape and makes efficient use of land. Currently, the policy prevents more than 20 dwellings from coming forward even where a higher quantum could be delivered in a manner that is compatible with the site’s setting and characteristics, conserves and enhances the character of the National Landscape, and makes efficient use of land.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Current wording:

“The site is allocated for 20 dwellings”. Proposed wording: “The site is allocated for around 20 dwellings”. This modification introduces an appropriate level of flexibility to reflect the fact that the final developable capacity of the site will be informed by detailed design work, technical assessments and the planning application process. This modification, therefore, ensures the policy is sound in accordance with the tests set out in paragraph 36 of the NPPF.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: N/A

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To explain why an appropriate degree of flexibility in the stated number of dwellings is necessary to ensure the site can be delivered efficiently and in accordance with national and emerging local policy objectives for making effective use of land.

National Landscapes (NL) and Policies SD01, SD03, SD04, SD06, SD08, SD15, SD16, SD22 and SD23 Policy OL02 provides strong protection for the NL areas. Quote: "The highest level of protection will be given to the landscape and scenic beauty of the National Landscapes (NLs) in East Devon: A. Development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities, character and natural beauty of the NL (including the coastline, where relevant); B. Major development in a NL will only be permitted in exceptional circumstances and where it can be demonstrated to be in the public interest; and East Devon Local Plan 2020 to 2042 – Second Regulation 19 Publication Draft 223 C. Any relevant National Landscape Management Plans will be a material consideration in decision making. This policy will also apply to the Heritage Coast. This policy applies across the whole plan area including the Cranbrook Plan area". However there are a significant number of proposed development sites which are within the NLs, or have an affect upon its setting or appearance. • Otto_01: 10 new homes at Otterton (Behind Hayes), again inside the NL boundary. Most, if not all, of these sites cannot be justified as exceptional circumstances.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Payh_03a

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We continue to support Strategic Policy SD24 and specifically the proposed allocation at Payhembury, the Land adjacent to Markers Park (Payh_03a).

We outlined in our representations to the first Regulation 19 consultation why we consider Payhembury to be a suitable location for future growth, and support for the Council's commitment to direct a proportion of the required growth to the village. We continue to maintain that the proposed allocation of Land adjacent to Markers Park (Payh_03a) for the development of around 15 residential dwellings will provide much needed market and affordable housing to help meet local housing needs, as well as helping to sustain the vitality and viability of the existing services and facilities in the village.

This Representation is made in response to the second Regulation 19 Publication Draft of the East Devon Local Plan Review, predominantly to support the emerging allocation for the Land adjacent to Markers Park, Payhembury (Payh_03a).

We fully support the inclusion of the Land adjacent to Markers Park (Payh_03a) in the plan, and consider Payhembury to be a suitable location for future growth and to

accommodate a proportion of the required growth within the spatial strategy. The proposed allocation of Land adjacent to Markers Park (Payh_03a) for the development of around 15 residential dwellings will provide much needed market and affordable housing to help meet local housing needs, as well as helping to sustain the vitality and viability of the existing services and facilities in the village.

We have however suggested in the representations some changes including that we consider it would be sensible to amend the extent of the allocation boundary to align with the Indicative Layout Plan appended to these representations.

Outside of this draft allocation however, we continue to have significant concerns over the proposed housing requirement and whether the plan can even proceed under the transitional arrangements set out in the NPPF.

Our concerns relate to both the proposed stepped trajectory, which we consider is not supported by any evidence or justification, and the proposed housing requirement which in our view should be increased in order to reflect the updated Standard Method.

We hope that these comments will be helpful to inform the submission version of the Local Plan, but would be very happy to assist further with any queries relating to Payh_03a, particularly any discussions relating to the proposed allocation boundary.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: In terms of the draft allocation itself, we specifically welcome the proposed changes to the draft policy text which partially addresses the comments we made at the last Regulation 19 stage.

We note the new draft wording reads: Land adjacent to Markers Park (Payh_03a) This site is allocated for 15 homes. Design and layout of proposals should be appropriate to this village gateway location and sensitively sited to take account of both the topography, with built development limited to the lower two-thirds of the site and the heritage and any ecological significance of the marl pit (a non- designated heritage asset) which must be retained in the end proposals. Access should be designed to

retain existing mature trees and minimise hedgerow removal, whilst ensuring highway safety. No house shall be occupied until a footpath connection is provided with existing pedestrian routes to the centre of the village. Landscaping which responds appropriately to the introduction of built form in this location shall be provided, including the introduction of substantial boundary screening along the southern boundary to maintain the rural character of the lane and the significance of the setting of the Grade II listed Glebe Farm on the southern approach.

We consider that whilst the scale of development proposed is supported, it would be helpful in order to provide flexibility for future delivery to amend the allocation text to read: “This site is allocated for around 15 homes”.

Whilst we welcome the changes already proposed which have introduced a recognition that the lower parts of the site are likely to be more suitable in order to help manage heritage and ecological constraints, we cannot see any proposed changes to the extent of the draft allocation boundary. In our representations to the first Regulation 19 consultation we appended the attached Indicative Layout Plan (Appendix 1) which we consider would best enable the delivery of the new homes whilst providing a suitable access and associated open space.

We continue to maintain that the allocation boundary for Payh_03a should be amended to align broadly with the extent of the Indicative Layout Plan attached at Appendix 1. This would help to ensure the future allocation best reflects what is likely to be delivered on the site. Indeed, to ensure flexibility for future delivery we suggest that the new allocation boundary broadly reflects that suggested in Appendix 1, but also ensures space within the allocation boundary to accommodate not only the developable area but also the necessary landscaping and public open space which would be required as part of a future planning application. We therefore recommend officers build in this flexibility and propose a revised allocation boundary with this extra space incorporated rather than a boundary which is unnecessarily tightly drawn.

We did provide an Indicative Layout Plan with our first Regulation 19 representations which reflects the current extent of the allocation boundary, confirming that none of the identified constraints represent an insurmountable bar to delivery of the policy aspirations. It is our view however that the allocation should best reflect the extent of site which will facilitate the best scheme for the site, and therefore our view is that the boundary should be amended as requested above.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD24

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Payh_03a

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We object most strongly to any development of this site for the following reasons –

1. EDDC Development Plan survey 2022. At that stage the site was designated as being unsuitable for development. Nothing has changed, and it is still unsuitable.
2. The Environment Strategy published by Devon County Council states: One of Devon County Council's roles is to support the protection, management and enhancement of the County's rich and varied landscape, its unique wildlife and important historic and geological features. This development would completely contradict this policy.
3. This field is unsuitable for development because of the ground conditions. Local people know that this field contains many springs, some feeding the two ponds and others forming marsh areas. There is an underground spring running east-west and discharging through the bank onto the road in the northwest corner. This spring runs 24 hours a day, 365 days a year, even during the drought period last summer.
4. The treatment plant cannot accept any more surface water.
5. All the trees and hedges have protection orders.
6. Exit from the field will necessarily be onto the single-track road with blind summit and bend, on a road of speed limit 60 mph. Any visibility splays will destroy long

lengths of protected hedgerow. A previous application from Glebe Farm to convert outbuildings was rejected because of highway exit dangers. The number of cars exiting would have been far fewer than those of the proposed development. The road there is also much wider with good visibility in both directions. It is now apparently permissible to exit more cars onto a narrower road next to a blind bend.

The overall picture is a development on land which is unsuitable both geologically, geographically and socially, the very reasons that it has not been developed before. Serious consideration should be given to stopping any development.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear *** Personal details have been removed ***, I wish to register a formal objection to the proposed development at the above site. Having considered the application in detail, it is clear that the proposal raises serious and unresolved concerns relating to highway safety, environmental protection, land suitability and planning policy compliance. For these reasons, I believe the development should not be permitted. The most immediate concern relates to access and highway safety. The proposed exit from the site would be onto a narrow single-track road subject to a 60mph speed limit, with a blind bend and summit severely restricting visibility. Any attempt to achieve acceptable visibility splays would require the removal of long stretches of established hedgerow, causing harm to protected landscape features while still failing to address the inherent dangers of the location. It is particularly relevant that a previous planning application from previous owners of our property, Glebe Farm, involving the conversion of existing outbuildings, was refused on highway safety grounds. That proposal would have generated significantly fewer vehicle movements than the current scheme and benefited from a wider road with clearer sightlines. Allowing a more intensive development onto a more constrained and hazardous section of road would represent an inconsistent and unsafe planning decision. Beyond highway issues, the land itself is fundamentally unsuitable for development. Local knowledge confirms that the field is affected by numerous natural springs, several of which feed existing ponds, while others create persistent areas of marshy ground. An underground spring runs east to west across the site and discharges onto the road at the north-west boundary. This water flow is continuous throughout the year, including during periods of prolonged dry weather, raising serious concerns regarding drainage, flooding risk and ground stability.

In addition, it is understood that the existing treatment infrastructure cannot accommodate any further surface water or effluent. This places further doubt on the practicality and sustainability of the proposal. The site is bounded by mature trees and hedgerows that are subject to protection. Development would inevitably place pressure on these features, either directly through construction or indirectly through access requirements, lighting and ongoing activity, resulting in unacceptable harm to the character of the area. It is also important to note that during the East Devon District Council Development Plan Survey in 2022, this site was identified as unsuitable for development. There has been no material change in circumstances since that assessment. The same environmental, infrastructural and locational constraints remain firmly in place. Furthermore, the proposal conflicts with Devon County Council's Environment Strategy, which seeks to protect and enhance the county's distinctive landscapes, wildlife, and geological features. Developing this site would run counter to those objectives and result in permanent environmental damage. Taken together, these issues present a clear picture of a site that is inappropriate for development in planning, environmental and safety terms. These longstanding constraints explain why the land has not previously been developed, and they remain compelling reasons for refusal today. I respectfully request that the planning authority gives full weight to these considerations and rejects the application. Yours faithfully, *** Personal details have been removed ***

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

OBJECTIONS: Increase of 15 is 12% increase in size of village of 134 dwelling. Recognise steady increase, having 9 built at present on Pay02. Highest Q class conversions in Devon. INFRASTRUCTURE: Local sewerage works cannot cope at present 1708 hours of discharge into the Tale. A recent upgrade has just been cancelled (some work completed on storm overflows during 2025). Primary school up to capacity with out of village children, with no room for expansion. The secondary school in Ottery is full. GPs and dentists up to capacity and struggling. TRANSPORT: Single tract lanes into the village from all directions. Now effectively a commuter village to Exeter. Increased traffic from developments in Feniton. No public transport - 3 buses/week. 2 miles to Feniton railway station down narrow twisty lane with no footpath or cycle ways. ACCESS: From single track lane on a bend and hill. No possibility of access from Markers Park or Hillside. All facilities would come from the lane. ENVIRONMENTAL IMPACT: Proven bat presence including 2 threatened species Barbastelle and Seratine. Mature oaks up to 180 yrs old (some now with tree preservation orders – 2025) VISUAL IMPACT: As it rises up the slope, the development would be highly visible. The site was not recommended in the 2022 East Devon Plan. The reasons for rejection have not changed. Our major worry is that this development of 15 houses allows access with utilities to Payh_3 and that this would be the first of several developments until there were 60+ dwellings on the site.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD26

1(c). If the comment is related to a site, please state the site reference here::
Sidm_34

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: We accept the principle of housing on this site subject to - (i) Natural Landscape (former AONB). This proposal contradicts Policy OL02 of this new version of the Local Plan 2020 - 2042 that gives sites like this the 'highest level of protection to the landscape and scenic beauty of land such as this in the 'National Landscapes in East Devon'. In putting this site into the emerging plan the council and officers did not follow their duty as it is not legally compliant with the designation of National Landscapes, Specifically, section 245 (Protected Landscapes) of the Levelling Up and Regeneration Act 2023. We need to understand how this issue will be addressed. (ii) Flood Risk and resilience This proposal requires adequate drainage through the public sewers rather than relying on draining off across the public Highway across as has been suggested the privately owned Sidbury Mill into the River Sid. It should be noted, that in response to the current planning application Devon County Council advise that they are 'not in a position to accept this development proposal as it stands'. This view is endorsed by South West Water. (v) Conflict with a policy area of significant archaeological interest. Devon County Council (DCC) Historic Environment Officer in his comment dated 13th December 2024 on the current outstanding planning application. We are concerned by the proximity of this site to Sidbury Castle, an early Iron Age Fort, less than half a mile west of the subject site. Accordingly the DCC Officer requires investigation works before any development can take place. So we need to understand how this issue will be addressed.

We are concerned that this development contains no Affordable Housing as required in this draft Local Plan.

We are also concerned that this development should achieve this Local Plans' own Strategic Policy PB05 (Page 257) to achieve 20% Biodiversity Net Gain (BNG) from this proposed development on existing agricultural land with a history of flooding on to the busy road below.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: We are concerned by this proposed Land South of Furzehill, Sidbury (Sidm_34) proposal and need to be assured that the requirements of the existing Local Plan and the various statutory bodies can be satisfied before any development takes place.

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

See enclosed representations which set out the requested amendments to the draft site allocation policy. We continue to fully support Strategic Policy SD26 and specifically the proposed allocation of the Land South of Furzehill, Sidbury (SIDM_34). It is noted however that the draft allocation text for the site has changed. We have no objections to the changes proposed to draft allocation SIDM_34. We recognise that there will be a need to secure the delivery of the component of the second phase of the Sidford to Sidbury multi-use path which would run through the site. Indeed, ensuring this is in place in the early stages of the development is sensible as it will enable the available connections at the outset of the scheme. In terms of the latest position on the site itself, a comprehensive overview of the land south of Furzehill, Sidbury was provided as part of representations to the previous stages of the Local Plan, and an update was provided as part of representations to the first Regulation 19 consultation draft. Rather than repeat this, the latest position is set out below. Outline Planning Application and Public Consultation An outline planning application for the site was submitted in November

2025 (ref: 24/2434/MOUT) and is currently pending determination with East Devon District Council. The proposals are for the development of 43 residential dwellings, and entirely consistent with the emerging allocation in terms of scale and nature. Indeed, the following aspects of the pending outline planning application demonstrate consistency with the emerging allocation for the site under SIDM_34: the delivery of 43 new homes, comprising 28 market homes and 15 affordable homes for the local community to address the current housing shortfall;

- the delivery of a high quality and sustainable off-road multi-use path linking Hillside and Furzehill - extending the proposed Devon County Council multi-use path, for which the first phase has now received planning permission;
- integration of the development with the existing urban form and surrounding landscape (specifically ensuring that the upper slopes are kept free of development in accordance with the requirements of emerging policy SIDM_34);
- the delivery of a high-quality residential environment;
- delivery of considerable open space provision, over and above adopted policy requirements;
- net biodiversity gain through the retention and enhancement of existing habitats, and creation of new habitats alongside delivery of a range of ecological mitigation and enhancement measures. Indeed, as demonstrated by the supporting plans the application proposals can provide more than the Government's 10% requirement in Biodiversity Net Gain across habitats, hedgerows and watercourses; and
- a sustainable drainage strategy which will restrict site runoff to the greenfield equivalent rate and provide long-term storage. The submission of the outline planning application demonstrates the intent of the applicant, Sidbury LVA LLP, to deliver the site in the context of the significant need for housing in the district, as well as delivering the second phase of the multi-use path. Importantly, the first phase of the multi-use path was approved by Devon County Council on 28 April 2025 (ref: DCC/4404/2024). This is a significant update to the position set out in our previous representations in early 2025 when the application was still pending. This now further demonstrates the importance and significance of the Land South of Furzehill to enable both the delivery of housing to address local housing needs but also to deliver the second phase of the multi-use path. The submitted masterplan includes a significant amount of integrated multifunctional green space that is easily accessible for the use and enjoyment of the whole community and makes connections with the wider landscape - including a new pocket park, a community orchard and new hedgerows, wetland and meadow areas to enhance biodiversity. The development of the site would comprise a natural extension to the existing houses at Furzehill and Hillside, sitting in the lower part of the valley with minimal landscape and visual impact on the wider area, sensitive to the AONB setting.

Indeed, the site is physically surrounded by built development to the north, south and east, and is therefore capable of seamless integration with the village and being developed with relatively limited visual impact. Overall, it is clear from the submitted planning application plans and documents that the pending outline planning application demonstrates intent by Sidbury LVA LLP to bring forward this site now to facilitate new homes and the delivery of the second phase of the multi-use path. It also demonstrates that the pending outline application is entirely consistent with the requirements of the emerging allocation particularly through the number of new homes proposed, the provision of the second phase of the multi-use path and the protection of the upper slopes from built development. In terms of engagement and joint working with key stakeholders, much of this was set out in our representations to the first Regulation 19 consultation draft. Engagement is ongoing with Devon County Council in relation to the delivery of the second phase of the multi-use path, and how the pending planning application can facilitate that, as well as ongoing engagement in relation to the outline planning application, particularly with officers at East Devon District Council. In summary, the Land south of Furzehill, Sidbury remains a very good candidate for allocation in the emerging Local Plan Review. As the masterplan for the site and supporting technical work demonstrates, the site is capable of accommodating the 43 new homes proposed in draft Policy SIDM_34, including a policy compliant level of affordable housing, as well the delivery of the second phase of the Sidford to Sidbury cycle link. Given the lack of local affordable housing delivery and lack of any other feasible options at Sidbury, the Land south of Furzehill is an ideal candidate for allocation in the plan and we will continue to support it through the development of the draft plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: See enclosed representations

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: In order to represent the interests of Sidbury LVA LLP in relation to their interests in the Land south of Furzehill (SIDM_34), and other draft policies in the plan.

Full name: Philip Parsons

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD26

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_34

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I have always believed that the council has not followed the law, in that they have suggested building in the National Landscape without the requirement of explaining how their decision enhances or conserves this part of the National Landscape. I looked at a planning application for this site. I just realised that this plan for over 40 houses is in fact a “major” development. The policy states “Major developments in a NL will only be permitted in exceptional circumstances and where it can be demonstrated to be in the public interest”. During the process of putting together the local plan the council has never articulated, discussed, or published what exceptional circumstances or public interest would be in building 40 new houses in agricultural fields entirely within this part of the National Landscape. It should be stopped immediately. As a note: The developer has added a cycle route as a red herring, as it’s only a few hundred metres and the rest of the route, several miles, is unfunded and without planning permission, so should be discounted completely as a reason to support their plan. Background: The text in Policy in OL02, National Landscapes, follows the wording in the Countryside and Rights of way act that was recently updated in 2023. The council should be congratulated for documenting their responsibilities. It states that “development in a NL will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities , character and natural beauty of the National Landscape”. In putting together the local plan the council has clearly not followed this policy, and taken steps directly opposed to the policy. the council has proposed over 40 houses on an agricultural field - no mention was made in the sessions of it avoiding harm or contributing positively to the landscape. The council records all their sessions, and it is informative if one views the sessions

where Sid_34 was debated. On youtube the Strategic planning committee meeting Sept 11 2024 (starts at 1hr 34m) and Nov 1 2024 (starts 2hr 6m) is where Sid_34 is debated. During the discussion there is no mention from anyone on the committee about how the proposed development would enhance the landscape; in fact in the discussion the only mention is about how to minimise harm by different locations of the new houses on the existing green fields. I simply can not understand how a council can write clearly down their responsibilities and then totally ignore them when putting the plan together. I am sure Sid_34 is not the only site in the National Landscape be earmarked for new developments. There might be a real need for extra housing in East Devon, but the council should follow the law in where it plans to locate these new houses.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Remove this site from the emerging local plan, and possibly other sites that they have included which sit in the National Landscape.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The council have not respected the legal necessity to treat National Landscapes with respect. In addition the site has many technical issues which would make the site highly unattractive to develop (no drainage solutions, local flooding, ancient sites would need a thorough dig and investigation , nearby listed building, sensitive protected animals and highly suspect safe access).

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove the site Sid_34 from the plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please

be as precise as possible.: If they had cooperated with the body that over sees the National Landscape they would not have made the mistake of including Sid_34.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I have been to many council planning meetings, making a public comment in the 3 or so minutes they give. I have no confidence the council ever listens and acts on the public contributions. I would like to participate in the hearing session to build some confidence that the process is a fair one and legally compliant.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD26

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_34

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: In putting this site into the emerging plan the council and officers did not follow their duty and is not legally compliant with the designation of National Landscapes, Specifically, section 245 (Protected Landscapes) of the Levelling Up and Regeneration Act 2023. On 11th September 2024 the council voted to accept Sid_34a but not 34_b to limit the extent of the development and to reduce the harm to the landscape. Surprisingly the developer persuaded the planning team to propose at the next meeting, Nov 1st 2024 to combine 34a and 34b (now called just Sid_34). Although the committee seemed surprised to have the proposal in-front of them it did get accepted, arguing that a less dense development spread across the whole site would cause less harm to the landscape than a similar number of buildings in just 34a. The discussion was always focused on mitigating the harm of the development. At no point did the committee ever discuss how to enhance and conserve the National Landscape in this sensitive location, next to an Iron Age fort and listed farm buildings. There was no evidence that the planning department or committee were following their legal duty of the Levelling Up and Regeneration Act 2023. In fact their actions were demonstrably acting against this legislation. At the first consultation many pointed to this error, and belatedly the council planning team have realised their mistake. Instead of revisiting the validity of proposing development on this agricultural land they have tried to save face by adding a clause to the document which is putting the onus on the future developer of this site to “enhance” the landscape. Simply adding a clause to the document does not get them over the fact that they put the plan together with a non legally compliant process. It also appears to make no sense how a rural landscape can be enhanced by building over 40 houses on green fields, and joining two existing conurbations together.

As a local authority, you must make sure that any proposals in the local plan seek to further the purpose of conserving and enhancing the natural beauty of the (AONB) National Landscape. This was not done, and has still not been done in putting the plan together.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Remove this site from the emerging plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The site selection followed a flawed process. In addition to not following the law regarding National Landscapes the site also has huge issues with drainage, and access to the main road. A developer has already submitted an application for this site, and one year later they still have not come up with an acceptable drainage plan. It was not a sound decision to include this site which has so many constraints that make a potential development very difficult.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove this site from the plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: There is no evidence of any cooperation between the council and other national bodies, for example the body that oversees the National Landscape. When the body responsible for National Landscapes saw this site in the plan they objected to it in the strongest terms, an action demonstrating no previous cooperation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure the council is held to account for not following the law in putting the plan together and Ignoring their duty to enhance and conserve the National Landscape

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD26

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Sidm_34

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: 1) The cycle route has not been altered from the first proposed route using Ebdon Lane. As previously noted, this is about 15% (1 in 7) which is considerably steeper than the absolute maximum gradient of 8% specified in LTN 1/20 (Local Transport Note on Cycle infrastructure design, Para 10.8.21), so how can you still be considering the same route? 2) It is a statutory duty under Section 85 of the Countryside and Right of Way Act 2000 (CRoW Act) (as amended by the Levelling-up and Regeneration Act² in December 2023) requiring relevant authorities, in exercising or performing any function that affects AONBs in England, to “seek to further the purpose of conserving and enhancing the natural beauty of the Area of Outstanding Natural Beauty,” and the LPA will need to be able to demonstrate how it has done this. The changes listed are; a) higher parts of the site remaining undeveloped, b) restrictions on building heights, c) materials used in the buildings, and d) planting along field boundaries. a) The top of the site was always shown as being undeveloped except for an attenuation pond to catch runoff. b) The height of buildings on a hill will probably make little to no difference as to their visibility unless the top row of planned houses is moved a very long way further down the site and the height of the houses and flats is kept to a single level. c) Unless the new houses are cob and thatch or replicas of the Victorian and Edwardian brick houses opposite how will they fit in? d) Aside from the fact that trees planted along the Chapel Street boundary will cause issues as they mature because of the numerous overhead power lines, they will also cause a light loss to the houses opposite. Will any of these proposed alterations either conserve or enhance the landscape? No, of course they won't. How could any of this enhance a rolling green field? And new build properties on virgin land is diametrically opposite to the meaning

of conserve' The joining of two separate areas of the village by removing the few remaining green field wedges that currently break up the largely, newer end of the village from the oldest parts, will destroy the remnants of ancient field systems. We should be preserving these open spaces not allowing the village to coalesce into one continuous settlement.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The planning team have not in any way shown how this proposal, even with these amendments, will conserve and enhance the landscape - They can't because it won't. The only solution is to find a more suitable place for this development to be built.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The planning team have not in any way shown how this proposal, even with their amendments, will conserve and enhance the natural beauty of the landscape - They can't because it won't. This is not legal under Section 85 of the Countryside and Right of Way Act 2000 (CRoW Act) (as amended by the Levelling-up and Regeneration Act 2021 in December 2023)

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The planning team have not in any way shown how this proposal, even with their amendments, will conserve and enhance the landscape - They can't because it won't. The only solution is to find another site for this development.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The planning team have not in any way shown how this

proposal, even with their amendments, will conserve and enhance the landscape - They can't because it won't. The only solution is not to build in an AONB

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: A wish is not a necessity. This makes no sense whatsoever.

Summary and conclusions 10.1 These representations are submitted on behalf of DWH, who are part of Barratt Redrow PLC. They control land to the west of Lilypond Lane, Whimble. 10.2 DWH are pleased to see further progress is being made on the emerging Local Plan and are generally supportive of its content. However, in their consultation responses to the 2023, 2024 and 2025 consultations, and in correspondence to the Strategic Planning Committee in Autumn 2024, they outlined a number of areas where they believed further consideration was necessary. In the main, these concerns remain unaddressed. Their concerns are: LAND TO THE WEST OF LILYPOND LANE, WHIMPLE ? Land to the west of Lilypond Lane is suitable and available for residential development. It is also a deliverable proposition. It is well located in close proximity to a range of existing services and facilities, including Whimble Railway Station, which is described as a strategic facility in the Local Plan's evidence base, providing services to a range of destinations, including the West End and Exeter. ? The development of land to the west of Lilypond Lane would deliver a number of benefits, including potential improvements to the local highway network and a drainage strategy that could assist reduce downstream flood risk.

Whim_12

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: THE PROCESS ADOPTED BY THE STRATEGIC PLANNING COMMITTEE WHEN SELECTING SITES IN AUTUMN 2024

9.17 Based upon the HELAA conclusion that the site was ‘probably undeliverable’ and therefore the Local Planning Authority considered that it was far from certain that the site was undeliverable, site

SECOND EAST DEVON LOCAL PLAN PUBLICATION DRAFT CONSULTATION 54
WHIM_12 was not included within the potential options for accommodating residential development within Whimple³⁶.

9.18 However, as set out above, in the period between the publication of the HELAA and the publication of the Site Selection Report for Whimple, highways and access technical work, the latest of which is provided at Appendix 2, was prepared on behalf of DWH. This work was provided to the Local Planning Authority as part of DWH response to the last Regulation 18 and 19 consultations.

9.19 Despite this work highlighting the obvious technical flaws in the HELAA regarding the treatment of site WHIM_12, the conclusions of the HELAA were not revisited and they were rolled into the 2024 site selection work, which excluded site WHIM_12 from consideration.

9.20 DWH set out their concerns to the approach being adopted and the opportunity provided by WHIM_12 in correspondence to Officers on 17th September 2024, and then in detail to each Member of the Strategic Planning Committee on 20th September 2024. Despite the obvious flaws in the HELAA evidence base which were not revisited, DWH were prevented from presenting the opportunity provided by WHIM_12 at Strategic Planning Committee meetings in September and October 2024. Many other developers of sites that were considered to be developable opportunities were allowed to speak at the series of Strategic Planning Committee meetings held in Autumn 2024, including the two allocations at Whimple.

9.21 DWH considers that the approach taken to site selection by the Local Planning Authority and then again in 2024 via the Strategic Planning Committee has created inequity between how differing sites have been considered during the formation of the Local Plan. By not revisiting the conclusions of the 2022 HELAA despite clear and up-to-date evidence and then rolling the HELAA conclusions into the Site Selection Report, the approach has been unfairly prejudicial to the promotion of site WHIM_12.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Whim_12

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

9.1 Throughout this representation, DWH has raised a number of concerns with the evidence base underpinning the emerging Local Plan. Their principal concerns relate to: ? the HELAA; ? the process adopted by the Strategic Planning Committee when selecting sites in Autumn 2024; ? the Sustainability Appraisal; ? the Role and Function of Settlements Background Paper; and ? viability concerning the Marlcombe new community.

9.2 These concerns are outlined below.

9.3 If unresolved, they could result in a Plan that is not positively prepared, is unjustified and inconsistent with national planning policy. It would therefore be unsound. HELAA – DOCUMENT HOU-003

9.4 Land to the west of Lilypond Lane was assessed in the HELAA at Site Whim_12 (see pages 2113 to 2117 of Appendix F(ii) of Document HOU-003).

9.5 The assessment identified the following benefits associated with the development of the site: ? it avoids the major biodiversity designations; ? other than the site being located in the 10km buffer zone to the Pebblebed Heaths, no other biodiversity constraints to development were identified; ? no landscape constraints to the development of the site were identified; ? no overhead power lines cross the site and neither do high-pressure gas mains; ? Whimble Primary School is capable of supporting

further development; ? it is outside the Airport Vector; and ? it is located in close proximity to a range of local facilities and public transport opportunities, including a railway station.

9.6 DWH agrees with these conclusions. They also draw attention to the other benefits associated with the development of the site, which are outlined in Section 2 of these representations.

9.7 Notwithstanding the above, they strongly disagree with Devon County Council's Highway comments made in respect of the site, which resulted in the site being incorrectly considered as 'probably unachievable.'

9.8 The County Council raised concerns that access off Grove Road and Lilypond Lane was challenging and it was not readily apparent about how it could be achieved. This incorrect conclusion was taken forward by the Panel, who also raised concerns about the need to improve the road network and bridge over the railway. Consequently, despite being considered as being suitable and available, the overall conclusion for the site was that it was probably unachievable.

9.9 Even without having regard to the evidence presented by DWH, it would seem to be unjustifiable to rule out the site at such an early stage, when the use of the word 'probably' suggests that there was some doubt as to whether the constraints could be overcome, or not.

SECOND EAST DEVON LOCAL PLAN PUBLICATION DRAFT CONSULTATION 53

9.10 Moreover, work undertaken on behalf of DWH has demonstrated that these conclusions are incorrect and are unjustified. DWH's technical work (see Appendix 2) confirms that having regard to existing vehicular flows, likely two-way vehicle movements resulting from the proposed development and the site's accessibility to a strategic sustainable transport connection, Lilypond Lane could easily accommodate the traffic generated from the proposals and therefore provides a sensible location for a vehicular access. Moreover, improvements could be made to enhance the route and reinforce pedestrian safety and improve vehicular passing, particularly at the railway bridge. The work also notes that there is a growing shift in transport policy to a vehicle capacity last approach, with a preference given to locations that can maximise sustainable travel and local living. Whilst any increase in movements on Lilypond Lane and other local routes could increase the likelihood of driver inconvenience, there are no contemporary policies that support driver convenience. Indeed, a modest increase in driver inconvenience could create a positive 'nudge' towards shifts to active and sustainable travel modes.

9.11 Consequently, they conclude that: “...there are no technical highways reasons not to support the development, and the residual traffic impacts can largely be offset by wider changes in mobility patterns in the village, which can be accelerated with investment offered by the development.”

9.12 Given the above, the conclusion that land to the west of Lilypond Lane is probably unachievable for housing is incorrect. This should be amended in future versions of the HELAA, which in turn should be fed into other evidence base work underpinning the emerging Local Plan (i.e. the Sustainability Appraisal).

9.13 This will be particularly important in the context set out in Sections 6, 7 and 8 of these representations, where the Local Planning Authority will need to find additional housing land.

9.14 The opportunity presented could help focus a greater proportion of development at a settlement, which, having regard to its services and facilities, could accommodate a greater proportion of the District’s needs. Moreover, it would also result in a greater focus of development along the West of England Mainline strategic transport corridor, which provides sustainable transport connections to and from Whimple to a range of services, facilities and employment opportunities to both the east and west. It would help to maximise opportunities to encourage use of the railway line at Whimple.

9.15 These are points which have been made to the Local Planning Authority during previous Regulation 18 and 19 consultations, as well as separately in writing to Officers and Members of the Strategic Planning Committee in Autumn 2024. Despite this compelling evidence, the Local Planning Authority have chosen not to reconsider the deliverability and developability of the site through their now dated HELAA.

9.16 The treatment of the site through the HELAA process is even more unjustified, when noting that site Whim_04 was considered as being a potential site to accommodate housing, despite it likely requiring pedestrian, cycle and vehicular access onto Lilypond Lane. The treatment of site Whim_12 by the Local Planning Authority is therefore clearly unequitable.

1(b). Does your comment relate to one of the changes listed above?: Yes

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: See enclosed representations

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Strategic Policy: SD29: Development allocations at Whimple We continue to object to draft Policy SD29 in its current form on the basis that insufficient allocations are included. As per our response to draft Policy SP02, the housing requirement should be increased and further allocations included within the plan, including at sustainable settlements such as Whimple. Whimple, unlike a number of other small towns and villages in the district, benefits from a railway station providing mainline railway services. The village is therefore very well connected to Exeter, providing direct connections into Exeter. These public transport services provide residents with good connections to Exeter and the range of regional employment, retail and leisure facilities on offer as a result. The village hosts a range of day-to-day services and facilities which supports its sustainability and promotes self containment. This includes a shop / convenience store, post office, primary school and GP surgery. As a result, we continue to maintain that Whimple is an entirely appropriate location for additional growth beyond that proposed. Again, in the context of the need to increase the overall housing requirement and with it the need for the Council to identify additional site allocations, we continue to promote the land north of Grove Road, Whimple, (Whim_13) as one such site which the Council could look to as an easy way to identify an additional small site

at one of the sustainable villages. We specifically consider that the land north of Grove Road, Whimble, (Whim_13) should be included in the plan as an allocation to help support a potential increase in the overall housing requirement. The site has been assessed previously by the Council as part of the emerging local plan, and specifically through the HELAA process but was rejected in earlier stages of the draft local plan and not included as a preferred allocation in the Regulation 19 draft. The latest site assessment evidence is contained within the Site Selection Report Whimble (February 2025). Within the Site Selection Report, the site is assessed under reference 'Whim_13' 'Land North side of Grove Road'. The site is assessed on the basis of a potential capacity for around 100 dwellings. However, the Council's site assessment assess the whole site, identifies the relevant constraints and then makes conclusions on that basis. The red line boundary for the whole site assessed under Whim_13 is far larger than it necessarily needs to be, and results in the site being considered unsuitable as a whole. However, there is no recognition in the site assessment that the north western part of the site, closest to the village, is suitable for development. Indeed, the top field is separated from the remainder of the site to the east by a tree / hedgerow which provides two distinct and separate parcels. Instead the top field is very well contained, surrounded by either existing built development or trees / hedgerows on all sides. Any landscape and visual impacts of developing that parcel would be limited. The top parcel is outside of the flood zone, identified in the Council's assessment as covering the bottom part of the site, beyond the centre tree belt. This parcel of land already benefits from an existing access from Grove Road between existing housing. As stated, this parcel falls within flood zone 1 with only the northern boundary of the site falling within flood zone 3 nearest to a watercourse. There are no other environmental designations or constraints to development. We therefore consider that the Council's assessment of the site unnecessarily discounts Whim_13 on the basis that there are constraints relating to the part of the site we would consider to be least suitable. Equally, it is misleading to assess a potential site capacity of around 100 homes and then use that to conclude that the site is unsuitable as it would represent a scale of development too large for the village. If the Council were to assess just the top parcel then that would likely represent a scale of development of around 50 dwellings.

Local Plan Review, predominantly to promote the Land north of Grove Road, Whimble, (Whim_13) as an additional allocation for residential development. We have outlined why we consider Whimble a suitable location for a higher level of growth than that already proposed in the plan, and why the site itself is suitable to be included as a third allocation at the village. Outside of this, we continue to have significant concerns over the proposed housing requirement and whether the plan can even proceed under the transitional arrangements set out in the NPPF. Our concerns relate to both the proposed stepped trajectory, which we consider is not supported by any evidence or justification,

and the proposed housing requirement which in our view should be increased in order to reflect the updated Standard Method.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Overall, there is a clear need for the Council to revisit and increase the housing requirement as part of the draft local plan and Whimble is a suitable location to accommodate a proportion of the future growth. To assist the Council with this inevitable further work, we have appended to these representations a plan which outlines the boundary for the site we consider should be reassessed, and for which we are confident officers would agree is suitable for inclusion as an additional allocation. The plan is attached at Appendix 1. In addition, to further assist, we believe the text for an allocation for the site could be included as set out below:

Land north of Grove Road, Whimble, (Whim_13)

The site is allocated for around 50 homes.

The site will need to deliver safe and accessible walking and cycling routes through to the primary school, shop and other facilities at the centre of the village.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: See enclosed representations

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: In order to represent the interests of The Exeter Diocesan Board of Finance Ltd in relation to their interests in the Land North side of Grove Road (Whim_13) (omission site), and other draft policies in the plan.

Full name: robert glanville

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Whim_08a

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The Whim_08 proposed site is not founded on a robust evidence base. All the evidence for Whim_08 given by the EDDC officers was unfavourable to the development for multiple reasons. Despite the fact that nothing has changed, the local Lib Dem councillor, with no support from the village or Parish Council, proposed building on the promised Green Wedge site of Whim_08 - on which promise he was elected to protect, as councillor. Reference EDDC Strategic Planning Committee Meeting Autumn 2024. Surely this disregard for clearly unfavourable evidence does not comply with 'maintaining public trust'.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
There are no obvious modifications that could render this site a safe development, or protect the habitat - Little Owls, bats etc - of protected species.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main road through the village is nothing more than a lane in places, resulting in several one-way traffic stretches. Additionally the lack of pavement and lighting on this road,

which leads to the village square, shop, railway station, school and village hall, clearly demonstrates that it is totally unsuitable for the extra traffic, which the development of Whim_08 would bring.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Whimple is a small village obviously not established with today's traffic in mind. The main road could not be widened to accommodate pavements to provide safety to pedestrians and drivers alike. Road safety is already a huge issue in Whimple.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.:

The Highways Agency would surely be concerned about serious traffic safety due to any increase of traffic in an already overcrowded 'lane' through the village. Also, has there been any engagement with Wildlife Trusts or similar bodies in relation to the protection of habitats for Little Owls, bats etc.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Site Whim 11. *** Personal details have been removed *** a key playing in the decision making process did not have a comprehensive understanding of the old cricket ground site and in particular, the results of a survey collated in Jan 2023 indicting that 64 /80 were opposed to the development. It is clear that the law regarding Localism is irrelevant at EDDC. It is my understanding that there is a covenant on the site by Whiteways Family, to use for recreation purposes only, not housing. Site Whim 11 - land adjacent to Bramley close. The councillors at the Strategic Planning Meeting which approved the development on this site were provided with false information by the individual acting for the developers. That there is no evidence that *** Personal details have been removed *** yung had visited the site before voting for the development. Within the emerging draft Neighbourhood plan great emphasis was place on securing a green wedge between Whimple and Cranbrook, the draft was advocating no development west of the core village. The wishes' of the villagers have been ignored. The village survey found that 86/87 were opposed to the site being developed. Councillors have acted without due diligence and unprofessionally in making 'seismic' major decisions without fully appreciating the evidence gathered about what development is acceptable and what is not by the citizens of Whimple. This includes the Whimple EDDC Councillor *** Personal details have been removed ***. Localism matters, but this has been steamrollered by the inadequately informed. In the EDDC draft Local Plan indicated only 41 houses were to be located in Whimple, but now we have 83 houses. This is totally unacceptable and an unsafe decision. Accordingly, one needs to determine the true motivating forces behind the decision to build twice the number? Furthermore, there is a very clear conflict of interest that *** Personal details

have been removed *** as a Parish Councillor and a District Councillor and in the role of Chair of the Strategic Planning Committee. In essence he is a developer, therefore he should have pulled away from the decision making process, instead he proposed the development of site Whim 8 . Accordingly, this decision should be consider unsafe. 50 houses does have a major impact on this village. In addition Whimble 500 homes have been allocated to the Parish of Whimble as part of Cranbrook. The geographical map Data provided by EDDC did not include, within the delineated boundary of Whimble the site for 500 homes, just site 8 and 11.

2(c). 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Whim_11

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I do not believe that the flood risks have been adequately addressed. I am concerned for properties at risk of flooding down from the site.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Land at risk of flooding should not be built on.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD29

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Whim_08

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The views of the residents have not been taken on board despite following the procedure and commenting on the Reg 19.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I believe Whim_08 needs looking at in more detail, fully taking on board the views of the residents and amending the document.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Many of the comments made by the public regarding the suitability of Whim_08 have not been addressed at all. For example the increase in traffic through narrow roads, the road safety for pedestrians, the loss of habitats and the erosion of the green wedge.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I believe the whole section needs revising, taking into account all the points raised by the concerned villagers. I also think the word 'mandatory' should be added when explicitly asking for works to be undertaken, to ensure it happens. The wording 'where development cannot be located outside of the area at risk of flooding....' highlights what is wrong with the soundness of this plan. Development should not happen where there is a risk of flooding and potential knock-on effects to nearby properties.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I do not believe that the council have fully co-operated and listened to the voices of the local residents.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am willing to speak for the residents of Whimble.

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

We welcome the additional policy text to clarify that archaeological assessment will be required prior to development commencing. This resolves the issue we raised in our response to the Regulation 19 Plan.
