5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: finn glanfield

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce size of EXMO_20 or remove it and focus development closer to public amenities.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Significantly reduce or remove EXMO_20 from the strategic plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: finn glanfield

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the strategic plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified".

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Significantly reduce the size of EXMO_20

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Significantly reduce the size of EXMO_20 and take away access from the B3179

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) ... are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: EXMO_20 should be removed from the strategic plan in its entirety.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: finn glanfield

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the strategic plan.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Reduce or remove EXMO_20 from the strategic plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: EXMO_20 should be at least reverted to EXMO_20B or removed from strategic plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: emily glanfield

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from strategic plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the strategic plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove access to B3179. Reduce the size of EXMO_20

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Massively reduce the size of EXMO_20

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Joe Glanfield

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Reduce or remove

EXMO_20

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the strategic plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20
OR Remove access from B3179 and reduce.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town

settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage

of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heath. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this

building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk

pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. 9.. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been

taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". POLICIES REFERRED TO IN SUGGESTED OBJECTIONS National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan- makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on

locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, and which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscapes and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset from development within its setting should require clear justification. Assets of the highest significance, notably....grade I and II * listed buildings should be wholly exceptional.2nd Regulation 19 Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where

avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017 Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. PolicyTR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be Made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5 miles). Factors such as topography also influence walking choices. Paragraph 13.10 aims to protect irreplaceable habitats and important features. Paragraph 13.11 states that some habitats, including ancient woodlands and veteran trees are irreplaceable due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Kate Grant

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This is an area of Outstanding Natural Beauty - not enough consideration has been given to this. Trees will be unnecessarily felled - thousands of years worth of history gone. Birds and other wildlife will be disturbed and their natural habitat removed. I strongly object to this area of Outstanding Natural Beauty being destroyed - EDDC have a duty to conserve and enhance this. The landscape and associated plants and trees act as a natural flood defence. If these are removed, so is natural drainage and flooding will increase. The town's infrastructure is not equipped for this massive development. Our sewage system is already not fit for purpose - the addition of 700 homes will only add to this. The same applies to GP Surgeries and Schools. There are not enough to serve Exmouth and Budleigh as it stands now. I fail to see the need for 700 additional houses when other local developments remain unoccupied. It is shameful to even consider destroying this area of beautiful landscape - to do so will deprive both current and future generations of this natural amenity .

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan - Leave the natural landscape and associated nature alone - You have a duty to protect it. Enough of it has already been taken to build homes that remain unoccupied.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I

wish to lodge my objection to the proposed development of this combined housing/industrial units on National Landscape land. It beggars belief that such a proposal should be considered, let alone countenanced, on what is supposed to be protected status land - a valuable and dwindling resource. The development would seriously impact upon the existing cycle path/footpath between Budleigh Salterton and Exmouth as it would be bisected by the proposed road network. Additionally, shifting the rural boundary on the approach to Exmouth would increase the length of the suburban section entering Exmouth, thus spoiling further the scenic nature of this route and adding traffic hazards. Furthermore, increased traffic on often congested and definitely crumbling roads will sorely test the patience of the local population. What proposals and, indeed, guarantees are to be in put place to avoid any further strain on our woefully inadequate water supply and sewage systems? It is common knowledge that S.W. Water cannot today meet its obligations to the community - preventing and repairing leakages - so how will it cope with further development? Additional housing we may need but not before the infrastructure - schools, health care, sewage treatment etc. - is prepared for them. If it is decreed that we must create additional dwellings then repurpose empty buildings or develop brownfield sites, but hands off our green spaces.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: NPPF (2023) requires that plans set out contributions from development. However, not in the revised Infrastructure Delivery Plan (KSD - 001 (REV), nor anywhere else in the current Regulation 19 documentation is the necessary transport or other infrastructure, i.e. technical adequacy, safety and cost, considered in sufficient detail to show that Exmo_20 is deliverable. In particular the IDP does not consider the need for widening or otherwise safely upgrading the northern (B3179) route nor the southern access option via Dinan Way to meet predicted increases in traffic use. Similarly there is no discussion of how new utilities and drainage and flood alleviation will be provided, what adverse effects there maybe on the existing highway and drainage networks during construction, and whether the developer will pay, or not. Without considering such issues in reasonable detail there is no evidence that proposed Exmo_20 site is deliverable, particularly as compared with other site options for the proposed 700 new homes, sites where, whether or not they have yet been considered by EDDC, the existing area infrastructure may already be better developed and hence able to accommodate any new development. The policy in respect of Exmo_20 is this unsound in my view.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The

IDP should be revised provide the level of detail described in 2(b) above in respect of the Exmo_20 site to show that it is deliverable.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The IDP should be revised provide the level of detail described in 2(b) above in respect of the Exmo_20 site to show that it is deliverable.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Traffic impact assessments, outline highway designs and infrastructure designs should be discussed with DCC etc and costed.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: In respect of Exmo_20 it does not show any evidence of detailed discussion with Devon County Council on highway matters nor with utility companies.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Holly Griffiths

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration

of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of

recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this

building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified”

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heath and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk

pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

Objection 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st & 2nd Regulation 19 evidence library falsely claiming to be, with no record of the May 2022 version. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected since the site failed the HELAA stage, being not suitable or achievable. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. Objection 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by

road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. Objection 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". -----

----- LIST OF POLICIES REFERRED TO IN SUGGESTED
OBJECTIONS (FOR YOUR REFERENCE ONLY) National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan-makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that

when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 170b states that development should not increase flood risk elsewhere Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, and which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscapes and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset from development within its setting should require clear justification. Assets of the highest significance, notably....grade I and II * listed buildings should be wholly exceptional. 2nd Regulation 19 Local Plan Policy PB01 states that international

followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017 Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. Policy TR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be Made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5 miles). Factors such as topography also influence walking choices. Paragraph 13.10 aims to protect irreplaceable habitats and important features. Paragraph 13.11 states

that some habitats, including ancient woodlands and veteran trees are irreplaceable due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Amanda Gulbranson

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am genuinely concerned about the impact of this development, both on the existing town and infrastructure and current population, as well as the impact on the environment, the landscape and nature and the eco system. I do not believe that there has been adequate thought or planning, and that if this has been considered, no evidence forthcoming to demonstrate this about the impact of a significant number of new houses being build to an already expanding town- where existing development has still not been completed. The local secondary school is one of the biggest (the biggest) in the UK- and is already over-subscribed, with local children having to access places elsewhere (which requires travelling by bus etc) We have inadequate provision for GP and dental services, and congestion and commuting in and out of Exeter/ access to M5 is becoming increasingly difficult and taking longer, as – despite the new road layout linking dinan way to the Exmouth- Exeter road – there are still only 2 main routs in and out of Exmouth. In addition to this there is the obvious challenges of infrastructure around water and sewerage- with South West Water still providing no reassurance or a clear plan as to how this will be addressed for the current population, let alone significant grown. Access to the proposed site (Exmo_20) is also significantly restricted. This will create a bottle neck of traffic entering/ exiting the site (during development and when completed) via a current residential housing estate My understanding is that Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel. Whilst previous comments by developer have stated that many will walk/ take the bus (assuming new bus routes are possible / viable) many households now have 2

cars....and even if they don't use a car- there is a high likelihood that they will have shopping/ orders delivered – which will also increase traffic with access being through restricted sites and surrounding roads not able to support increased volume of traffic (as demonstrated recently where St Johns Road was used as a diversion- this quickly resulted in grid lock and large queues of traffic trying to exit the road onto Dinan Way. Due to access, the isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home. If walking and cycling is to be encouraged, the current infrastructure for cycling needs to be significantly improved in order to achieve/ enable this (with current access to cycle paths from proposed location requiring access via busy road. My understand in that Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. As eluded to above- there is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (Nov 25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site's inclusion in the plan appears to be unlawful due to there being no reasonable scientific certainty presented for mitigation. For the several parts of my submission I acknowledge that I am drawing on information, and the wording, that has been discussed and shared locally. Life is busy with a family and working – but I feel incredibly strongly about the proposed development- and therefore felt it was important to submit my concerns and objection.....and that this in any form would be better than none at all in order to ensure the council are fully aware of the concerns: Noted that allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Exmo_20 lies next to Pebblebed Heaths . The mitigation strategy included in the plan states that “It was not

possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was identified September 2024, with the Regulation 19 draft Local Plan approved in Dec 2024 on the assumption that a mitigation strategy would be forthcoming; Sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. Exmo_20 site supports a huge diversity of wildlife, and the habitat is vital for the homes and foraging of the animals, birds and insects that inhabit this area already. Nature in the UK is in crisis, with more and more building encroaching on land. Mammals and birds include badgers, dormouse, firecrest, goldcrest, nightjars and bats to name but a few. The area also provides an important corridor between other woodland and farm land and the pebble bed heaths. Nature is vital for our (human) health too- with increasing studies to demonstrate this- therefore a healthy balance and careful planning needs to support this to protect this for future generations as well. Once it is gone it is gone and reversing a decision of this magnitude will be impossible. It is my opinion that The Exmo_20 allocation is hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” In addition to this the RSPB’s view states “ mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to

development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heathlands" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." Continuing with concerns regarding the environment and ecosystems; the allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heathlands SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heathlands and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local

Plan”. Objection 7. And finally, it is my understanding that Exmo_20 is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. I am concerned that these need to be corrected and reconsulted upon before any further discussion/ decisions can be made, as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I appreciate that

there is a need to include the building of more houses within local planning....but that this also has to be balanced with sensible consideration of appropriate sites. At this time, I do not think that Exmo_20 is a viable site to consider for inclusion in the local plan due to locatio, size and access of the proposed site, in addition to wider local infrastructure that is not currenly in place to support current growth. Limited access to the siter alone, given the number of proposed houses and limited points form Southern Wood and B3179 are inadequate and likely to causes significant disruption to current routes and environment, includingclose proximity to pebble bed heaths. Due to these concerns - as highlighted in 3B- I would proose that site Exmo_20 is currently removed from the local plan, or at best the size of the prposed site and dvelopment significantly reduced. In the future, is land use changes and access changes (in addition to strengthened and improved infrastructure of town) it may be appropriate to reconsider this.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: P. Hagerty

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Large housing estates should not be built on National Landscape. Building on land outside the National Landscape would be cheaper, making possible to build a bigger percentage of affordable homes. The exit from this site (Exmo-17) would create traffic chaos and the access road would go straight across the much-used Exmouth to Budleigh cycle/footpath, endangering users. (children/elderly/cyclists/families/dogs). The sewage system can't cope with the housing we already.

Full name: Lesley Hall

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to put forward my objections to the proposed development of site Exmo_20

1. It will destroy the wildlife-rich habitats including some protected species.

2. It will increase the risk of flooding in Withycombe brook, also...

3. With the increased pressure of water running down the stream it could cause landslides in residents' back gardens.

Please listen to the people that live around the proposed development site & take on board their objections.

We know & understand the damage this development will cause to this significant area. Thank you for reading.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to strongly object to this above plan to build on this land. There are so many reasons why this should not be allowed and here are some of them: It is a Site of Special Scientific Interest and as such should remain untouched for the obvious reason that building in this land will cause untold damage to wildlife and the land in general. Traffic - the roads around Exmouth are gridlocked now so any more traffic will simply cause chaos during peak times and contribute to the pollution of the area so damaging health of the general public and lungs of little children. Flooding - obviously this risk will increase with building on concreted land that will no longer be able to absorb rainfall. Sewage - we already have a massive sewage overflow problem in Exmouth (beach closed after heavy rain/swimming banned/tourism affected etc etc) Exmouth does not have the infrastructure to cope with any more inhabitants. We will not have enough doctors' surgeries, schools etc to cope with the population already here. Both of us (***) Personal details have been removed ***) strongly object to this proposal.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am listing my objections to the proposed development of site Exm_20 as follows:

Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats & Species Regulations 2017. The proposed development will destroy the wildlife rich habitats including some protected species.

The proposed second access to the South of the site in Southern Wood is wholly inappropriate & likely to be quite dangerous. Residents wishing to travel to Tesco's or Exmouth town or the local schools are likely to use this access. From Southern Wood they will need to enter Meadow View Road which is likely to cause congestion whilst trying to exit on to Dinan Way. Meadow View Road is not very wide & there is only room for single file traffic & with cars parked on the road there is already a need to be very vigilant when driving on the road. Children also play outside on their bikes etc. It feels like an accident waiting to happen. Meadow View Road cannot cope with the increase in traffic on this road if the proposed access goes ahead.

It will increase the risk of flooding in Withycombe Brook & the increase in flow of water from entry would cause more pressure & could result in landslides of residents' back gardens.

Policy OL01d states that development will only be permitted where it will not harm the aesthetic & perceptual factors such as "tranquility, wildness & dark skies" St Johns Church is a listed grade 11 building & is recognised for its architectural & historical significance. The surrounding area & St Johns road leading to the church should be left well alone.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Please note these objections. If the development goes ahead as planned it will destroy this part of Exmouth & will be irrecoverable .

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)].

Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths

SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”.

The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory.

NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.”

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Both EDDC and Commonplace have made participation in this so called Consultation virtually impossible, I am very keen that the Inspector hears from ordinary residents affected by this proposal.

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant.

The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate t consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: remove Exmo_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To be heard

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
EXmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of EXmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to EXmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of EXmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The EXmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: REmove Exmo_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This proposal is wrong on so many fronts and no one has been listening

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands."

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Because I need to have views considered

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Being adjacent to the Pebblebed Heaths SAC/SPA/SSSi the allocation relies on significant habits and species mitigation which has not been shown to be achievable or viable. The plans HRA states "there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks". Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (especially footnotes 38 & 7) 180d, 180e, 181, 185a, 186b, 188, & 191c, of the NPPF December 2023 and is unsound and not legally compliant. Allocation of of Exmo_20 is inc oncnflict with the paragraph 165 of the NPPF December 2023. It also conflicts witgh paragraph 3.6, policy AR01 (b) of the Local Plan and is therefore unsound. Exmouth is noted as having numerous significant flood risk pathways, with fluvial flooding in 1960, 1983 and 2012 recorded. Withycombe Brook currently has significant flood risk areas. It should be noted that the change in weather patterns as a result of climate change are increasing the likelihood and ferocity of flooding events with intense rainfall events happening with greater frequency and strength. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook, and flows through the mots populous wards o East devon. The LPA have not deployed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179 to access facilities and service (2.3 miles to Budleigh Salterton and 4 miles to Exmouth).It is therefore an unsustainable location for development. The site would overwhelm the local villages and Budleigh Salterton and is in conflict with the stettlement hieracrhry. The plans do not take into account Budleigh Salterton by the LPA. Policy TR01 states

that walking/cycling must be the natural first choice for transport which cannot be achieved for Exmo_20. The site's and the local area's topography makes the potential cycling and walking options unviable which is not apparent on the policy maps. The allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03 and therefore unsound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The best remedy would be to remove Exmo_20 from the Local Plan. Brownfield sites within Exmouth should be reviewed to address any housing needs before this greenfield site. If not in terms of modification the following would mitigate some of the effects. - Do not access the site via the B3179 - Do not access the site via the Southern Wood. - Move the settlement boundary away from the Pebbelbed heaths. - Revert to 20b as previously proposed.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Full name: Matthew Hart

Proposal:

5. Development in the Towns and Villages

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Second Regulation 19 Consultation – East Devon Local Plan – Responses by Chapter

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Full name: Matthew Hart

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

.Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Full name: Matthew Hart

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To be informed, updated and to participate in person.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: My comments as follows: Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebbled Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore, selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: remove exmo_20 from local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: . MY COMMENTS AS FOLLOWS: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188-figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebbled Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: MY COMMENTS AS FOLLOWS Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The sites and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: MY COMMENTS AS FOLLOWS: Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebbled Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: MY COMMENTS AS FOLLOWS: Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: my comments as follows: Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebbled Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebbled Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: my comments as follows: Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this fall within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: my comments as below Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebbled Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebbled Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: . my comments as follows: Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebbled Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebbled Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebbled Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: .

following comments as below: Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebbled Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebbled Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and

therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: remove Exmo_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. My comments as follows: Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebbled Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore, selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: please remove Exmo_20 from local planning

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I would like to express my objection to the labyrinthine procedure demanded by commonplace for East Devon District Council for this development. Many residents are still unaware of this, and the ones who have been made aware have found the commonplace site extremely difficult to navigate. I have put some objections on that site today but would like to add some more comments.

This extraordinary proposal for a vast building site next to the B 3179 that is used by all Budleigh and some Exmouth residents to get to Exeter by car. This road would have to be dramatically widened to cope with all the extra traffic involved, first for the building itself of 800 + houses, involving lorries and suppliers, and if each potential house then had one or two cars, the scenario would be nightmarish. The alternative route to Exeter from Exmouth to the west would also be impacted.

The site proposed is nearer to Budleigh centre (2.3 miles) than to the centre of Exmouth (4.0 miles). Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179, even if widened, to access facilities and services, therefore an unsustainable location for development.

The site allocation would overwhelm Budleigh Salterton, which has not been taken into account by the LPA when considering the Exmo_20 site. At present, our surgery and primary school are struggling to cope with the existing population.

I have seen that 'alternative sites' have been discounted for Exmouth, but a contact at Friends of the Earth tells me that 'brownfield first' might be a plan to consider. Their website states: "Done badly, new housing could exacerbate the climate and nature crises", and brownfield sites should be the first option. Those are also likely to be closer to urban and industrial areas where there will be employment. Friends of the Earth also states: "Wherever new homes are built, they need good public transport links and cycle routes, as well as good access to services. Without them, there's a danger of increased car dependency, which disadvantages those who can't drive or afford a car." Greenfield sites such as this one should surely be used for growing our own food instead of having to import it.

The existing population of Exmouth at the 2021 (last) census, was 35,488, the fifth largest settlement in Devon by population. This of course increases massively with the influx of visitors and tourists, not only in the summer but all year round.

Exmouth has a long and fascinating history - Byzantine coins were found on the beach in 1970. Evidence of people living at Exmouth Point goes back to the 11th century, when it was called Lydwicnaesse, meaning "the point of the Bretons". Two ecclesiastical parishes that make up Exmouth - Littleham and Withycombe Raleigh can be traced back to before Saxon times. The history of Exmouth makes it all the more incredible that the planners/developers could think it desirable to build round St John in the Wilderness Church (grade II* listed) which will have a significant adverse effect on the tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by the sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

The environmental and conservation impact of such a large development should not be dismissed. The site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of the site would undermine the conservation objections of the

SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area aimed at combining existing wildlife sites and extending habitats.

By building hundreds of houses? The site contains many veteran trees, ancient woodland and hedgerows which are at risk of becoming fragmented habitats. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography makes the potential cycling and walking option less viable, which is not apparent on the policy maps.

So for environmental, conservation and heritage reasons, I object to Exmo_20.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to Exmo_20 for environmental, conservation and heritage reasons. It would be a tragedy if it is allowed to go ahead. This part of Exmouth does not have the infrastructure to support the number of houses proposed. A beautiful area used by local people for walking and cycling would disappear. Many trees and habitats would be lost. My partner and I live in the immediate vicinity and would be horrified if this beautiful area of countryside was lost .

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: To whom it may concern

As a longterm Budleigh Salterton resident, I wish to register my objection to the proposed site Exmo_20 in the strongest terms. Below I outline the specifics of my objections, outlining 9 valid reasons to oppose this proposed development.

OBJECTION 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind”. Furthermore selecting sites with known mitigation requirements requires clear

justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32.

OBJECTION 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

OBJECTION 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt. In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA.

OBJECTION 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, PL09 and PB04 and Paragraphs 11.2 of the Local Plan. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion

and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality”, due to the primary access to Exmo_20 being onto the B3179, sending traffic along the boundary of the Pebblebed Heath SAC/SPA/SSSI. Allocation of Exmo_20 is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance over mitigation. The Exmo_20 allocation is unlawful due to there being no reasonable scientific certainty presented for mitigation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To whom it may concern

As a longterm Budleigh Salterton resident, I wish to register my objection to the proposed site Exmo_20 in the strongest terms. Below I outline the specifics of my objections, outlining 9 valid reasons to oppose this proposed development.

OBJECTION 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32.

OBJECTION 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with

paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

OBJECTION 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt. In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA.

OBJECTION 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, PL09 and PB04 and Paragraphs 11.2 of the Local Plan. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality”, due to the primary access to Exmo_20 being onto the B3179, sending traffic along the boundary of the Pebblebed Heath SAC/SPA/SSSI. Allocation of Exmo_20 is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance over mitigation. The Exmo_20 allocation is unlawful due to there being no reasonable scientific certainty presented for mitigation.

OBJECTION 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

OBJECTION 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats.

OBJECTION 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

OBJECTION 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also

conflicts with paragraph 3.6, 11.2 & 11.6 of the Local Plan. Exmo_20's limited access would significantly increase the need for car travel from the main access point proposed (B3179) to access facilities and services, being 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road, therefore an unsustainable location for development. This allocation would overwhelm Budleigh and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and local area's topography makes potential cycling and walking options less viable, which is not apparent on the policy maps.

OBJECTION 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process, not the December 2024 amended version, presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected.

Yours sincerely

Full name: Emma Heath

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: To whom it may concern

As a longterm Budleigh Salterton resident, I wish to register my objection to the proposed site Exmo_20 in the strongest terms. Below I outline the specifics of my objections, outlining 9 valid reasons to oppose this proposed development.

OBJECTION 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind”. Furthermore selecting sites with known mitigation requirements requires clear

justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32.

OBJECTION 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

OBJECTION 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt. In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA.

OBJECTION 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, PL09 and PB04 and Paragraphs 11.2 of the Local Plan. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion

and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality”, due to the primary access to Exmo_20 being onto the B3179, sending traffic along the boundary of the Pebblebed Heath SAC/SPA/SSSI. Allocation of Exmo_20 is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance over mitigation. The Exmo_20 allocation is unlawful due to there being no reasonable scientific certainty presented for mitigation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: To whom it may concern

As a longterm Budleigh Salterton resident, I wish to register my objection to the proposed site Exmo_20 in the strongest terms. Below I outline the specifics of my objections, outlining 9 valid reasons to oppose this proposed development.

OBJECTION 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind”. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32.

OBJECTION 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with

paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

OBJECTION 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt. In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA.

OBJECTION 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, PL09 and PB04 and Paragraphs 11.2 of the Local Plan. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality”, due to the primary access to Exmo_20 being onto the B3179, sending traffic along the boundary of the Pebblebed Heath SAC/SPA/SSSI. Allocation of Exmo_20 is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance over mitigation. The Exmo_20 allocation is unlawful due to there being no reasonable scientific certainty presented for mitigation.

OBJECTION 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

OBJECTION 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats.

OBJECTION 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

OBJECTION 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also

conflicts with paragraph 3.6, 11.2 & 11.6 of the Local Plan. Exmo_20's limited access would significantly increase the need for car travel from the main access point proposed (B3179) to access facilities and services, being 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road, therefore an unsustainable location for development. This allocation would overwhelm Budleigh and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and local area's topography makes potential cycling and walking options less viable, which is not apparent on the policy maps.

OBJECTION 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process, not the December 2024 amended version, presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected.

Yours sincerely

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(c). If the comment is related to a site, please state the site reference here::

Exmo_17

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the proposed Exmo_17 plan because: Large housing estates should not be built on National Landscapes. Building on land outside National Landscapes would be cheaper, making a bigger percentage of affordable homes. Exit from this site (Exmo_17) would create traffic chaos and the access road would go straight across to the much-used Exmouth to Budleigh cycle/footpath endangering users (child, elderly, cyclists, families and dogs).

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing to object to the EDDC local plan for development on land off Higher Marley Road. There are already more than 1000 homes designated for building across a town that is already fit to bursting with traffic. This patch of land contains some of the oldest Luccombe Oak trees in the country and has an underground stream, both of which by themselves make it unsuitable for building on. Then on top of this the increase in people trying to use the already overflowing infrastructure in the town like roads, health services and school places. This country is already one of the most nature depleted in the world and the tidal wave of substandard new build developments is pushing it to the brink. Exmouth can't even cope with the current population, let alone another thousand properties. I was born and raised in Exmouth and am saddened by the changes in recent years.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Good morning,

I wish to object to the EDDC Local Plan which includes 700 houses at St Johns Road, 450 at Littleham and more to be added to Dinan Way.

As an Exmouth girl I cannot afford to buy a house in my own town as there is no affordable housing. It is constantly people from up-country moving down to Exmouth and knocking the prices up.

The GP Surgeries, Dentists and schools are finding it difficult to cope with the influx of new people to the area.

Sewage is struggling as it needs to be updated as too many people making demands on the system. The roads that are used constantly for the vehicles bringing building supplies damage the roads and cause potholes. Douglas Avenue the prime example.

There is also the damage that would be done to endangered species and there are many veteran/ancient trees on site. You will be damaging ancient woods and a stream, all to make more money and bring more people from up-country, while the locals have to move it.

Living in Littleham, it will be even more of a nightmare if more houses are built there.

A concerned local

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear Sir

I am writing to object to the possibility of new houses being built on land at Higher Marley Road, Exmouth. The area of land has several ancient trees on it and to tear them up would be heartbreaking. They must be well over 100 years old.

Government guidelines, suggest that for our mental health and well being being outside and walking in areas that bring calm and peace is so beneficial to us all. Taking this away would be a detrimental decision in my view.

Exmouth is an over developed town and is unable to provide enough facilities for the amount of families they already live there. The traffic and parking can be stressful and the character of this lovely little seaside town will be gone forever. It's just to big.

Please think carefully about the decision to allow yet more houses on such a beautiful area. Exmouth is being ruined by developers greed and got the sake of those who live nearby I am strongly objecting to this piece of land being destroyed for developer greed.

Second Regulation 19 Consultation – East Devon Local Plan – Responses by Chapter

So much of our beautiful spaces in Eadt Devon has gone forever and replaced with small, cramped in and poorly built houses that we, who live here, have to look at every time we pass by. Once it's gone, it's gone.

Please think carefully before allowing this to happen.

Kind Regards

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paras 16c, 32, 73b, 180d, 180e, 181, 185a, 186b, 188 and 199. I believe it is unsound and not legally compliant. As the site is adjacent to the Pebblebed Heaths SAC/SSSI/SPA the allocation relies on significant habitat and species mitigation, which has not been shown to be achievable or realistic. The mitigation strategy states "it was not possible to screen out a likely Significant Effect for other units within the EDPH, SAC and SPA." The plan HRA also states "there is inherent conflict in the growth proposed in the Plan, which would exceed threshold levels and there is no means to mitigate or address the risks." The site was selected, and the draft plan approved on the assumption that there would be a mitigation strategy forthcoming. It must also be noted that the proximity of the site to the Pebblebed Heaths SAC/SSSI/SPA gives a clear and significant predation risk for the ground nesting Nightjars, as well as an obvious impact from walkers, dogs etc which would cause heavy disturbance to this crucial nesting area. Exmo_20 is also in conflict with paras 92 and 109 of the NPPF December 2023 and policies TR01 and TR03, and is therefore unsound. The limited access arrangements would very significantly increase the need for car travel from the main access point proposed on the B3179 to access services and facilities, being 2.3 miles from the centre of Budleigh Salterton by road and 4 miles from the centre of Exmouth, and is therefore an unsustainable location for development. The site would overwhelm Budleigh Salterton, which has not been taken into account by the LPA. Policy TR01 states that walking/cycling must be the natural first choice for transport, which will be impossible in this case

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point of Exmo_20 is significantly closer to BudleighSalterton than Exmouth, making Budleigh it's most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the Local Plan. An alternative site to Exmo_20 for housing allocation should be selected, one which was deemed available, achievable & suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. Exmo_20 would cause harm to the heritage assets, most significantly St John in the Wilderness Grade II* listed church and churchyard, drastically altering the attractive rural setting for worship & burials which currently exists. This is contrary to POLICY HE02. Exmo_20 would have a detrimental effect on the adjacent designated wildlife sites and destroy the "tranquility, wildness and dark skies" of the countryside, which is contrary to POLICY OL01. Exmo_20 development would be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would cause harm to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9. Exmo_20 is in conflict with POLICY OL09 and POLICY PB04 as the Habitats Regulations Assessment (30.01.25) states that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA) such that the Plan fails the integrity test. Development of

Exmo_20 on heavy clay subsoil with ineffective soakaways, would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already beyond its design capacity. This is in conflict with POLICY AR01B. Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location is unsustainable development as people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan or Do not assess the site via B3179

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Anna Howell

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town

settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage

of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/ SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this

building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified” 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk

pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/ cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on- site driving every time residents went anywhere and returned home. 9.. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2. 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been

taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 11. Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". POLICIES REFERRED TO IN SUGGESTED OBJECTIONS National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan- makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on

locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife- rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, and which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscapes and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset from development within its setting should require clear justification. Assets of the highest significance, notably....grade I and II * listed buildings should be wholly exceptional.2nd Regulation 19 Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where

avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017 Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. PolicyTR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/ or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be Made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5 miles). Factors such as topography also influence walking choices. Paragraph 13.10 aims to protect irreplaceable habitats and important features. Paragraph 13.11 states that some habitats, including ancient woodlands and veteran trees are irreplaceable due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Josie Howick

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process, not the December 2024 amended version, presented in the 1 st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6, 11.2 & 11.6 of the Local Plan. Exmo_20's limited access would significantly increase the need for car travel from the main access point proposed (B3179) to access facilities and services, being 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road, therefore an unsustainable location for development. This allocation would overwhelm Budleigh and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and local area's topography makes potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Josie Howick

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: remove Exmo_20 from the plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, PL09 and PB04 and Paragraphs 11.2 of the Local Plan. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality”, due to the primary access to Exmo_20 being onto the B3179, sending traffic along the boundary of the Pebblebed Heath SAC/SPA/SSSI. Allocation of Exmo_20 is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance over mitigation. The Exmo_20 allocation is unlawful due to there being no reasonable scientific certainty presented for mitigation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove and stop Exmo_20 from the plan totally

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Josie Howick

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt. In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

Full name: Josie Howick

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the See Stop Exmo.20 Facebook page for full comments SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind”. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: did not pass the initial HELAA stage in 2022, which meant it automatically failed site sifting and could not be considered for allocation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with paragraph 16(d) of the National Planning Policy Framework (December 2023) and is therefore unsound and not legally compliant. The Local Plan includes too many housing allocations because it does not use the most up-to-date ONS data, as is required by national guidance (MHCLG Housing and Economic Needs Assessment). The 1,188 figure quoted in paragraph 3.11 was calculated in February 2025, before the 2024 ONS data was published, and is therefore incorrect. Using the latest data, the correct housing figure should be 1,156, with 80% being 925, and a 22-year plan requirement of 20,342. This represents a reduction of 567 homes. Many policies in the plan rely on a claimed “overriding need” to justify impacts or harm. Because the housing figures are wrong, there is no valid justification, particularly for mitigation measures. Exmo_20 must be removed from the plan because it requires multiple mitigation strategies due to its impacts on the internationally and nationally designated Pebblebed Heath SPA, SAC and SSSI. Additional numerical and calculation errors are found in evidence documents HOU-002 (October 2025) and HOU-001 (November 2025). These must be corrected and reconsulted on, as they form the basis of the Local Plan’s housing policies. Finally, paragraph 16(d) of the NPPF states that

plans must be clearly written and unambiguous so decision-makers can easily understand how to respond to development proposals. The current errors make the plan unclear and unsound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: REMOVE EXMO_20 FROM THE LOCAL PLAN

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Barbara Howick

Proposal:

5. Development in the Towns and Villages

It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
REMOVE EXMO_20 FROM LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with paragraph 109 of the National Planning Policy Framework (December 2023) and is therefore unsound. It also conflicts with Local Plan policy TR01 and paragraph 11.6 of the Local Plan. The main vehicle access to Exmo_20 is 2.3 miles by road from the centre of Budleigh Salterton and 4 miles by road from the centre of Exmouth. This location would place significant pressure on Budleigh Salterton and does not respect the settlement hierarchy. Budleigh Salterton has not been properly considered by the Local Planning Authority when assessing the impacts of the Exmo_20 allocation. The site's location means residents would be likely to rely heavily on Budleigh Salterton for services, even though it is not identified to accommodate this

level of growth. In addition, the steep and challenging local landscape makes walking and cycling difficult. These constraints are not clearly shown on the policy maps, giving a misleading impression of sustainable travel options. As a result, Exmo_20 does not support sustainable transport choices and conflicts with national and local planning policy.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. REMOVE EXMO_20 FROM LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with paragraph 32 of the National Planning Policy Framework (December 2023) and is therefore unsound. The Local Planning Authority has attempted to change the Site Selection Methodology (SSM) after the event in order to justify the inclusion of Exmo_20. The Site Selection Methodology dated May 2022 was the version used for the Regulation 18 stage of the Local Plan. After 11 December 2024, when the draft Local Plan was approved to proceed to Regulation 19, the SSM was altered. A revised version dated December 2024 was then included in the first and second Regulation 19 evidence libraries and presented as if it had been used to select sites. In reality, this revised version was not used during site selection, and the original

May 2022 version was not included. This raises serious concerns about transparency and decision-making. The May 2022 Site Selection Methodology, which was used at Regulation 18, does not allow Exmo_20 to be selected. The site failed the HELAA assessment, as it was not considered suitable or achievable. The methodology is clear that only sites assessed as suitable, available and achievable in the HELAA can progress beyond Stage 2 of the site selection process. It also explicitly states that sites within 400 metres of the Pebblebed Heaths SAC should be ruled out as unsuitable, or failing that, removed at Stage 2. Exmo_20 does not meet these requirements. Its inclusion therefore conflicts with the agreed site selection process and national planning policy, making the allocation unsound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. REMOVE EXMO_20 FROM LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with paragraph 170b of the National Planning Policy Framework (December 2023). It also conflicts with paragraph 3.6 and policy AR01(b) of the Local Plan and is therefore unsound. The Strategic Flood Risk Assessment (Level 1) gives very little attention to Withycombe Brook, where it is only mentioned in a footnote in Table 5-3. However, Exmouth is known to have several significant flood risk routes, with recorded fluvial flooding in 1960, 1983 and 2012. Withycombe Brook already has areas at high risk of flooding, even before taking account of the increased risk expected from climate change. The Exmo_20 site is greenfield land located above the town, with tributaries and surface water runoff flowing directly into Withycombe Brook. This brook

then runs through the most densely populated parts of East Devon. The Local Planning Authority has not applied the required sequential, risk-based approach to site selection to avoid flood risk to people and property. As a result, the allocation of Exmo_20 does not comply with national or local planning policy.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: did not pass the initial HELAA stage in 2022, which meant it automatically failed site sifting and could not be considered for allocation.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
REMOVE EXMO_20 FROM THE LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 and 191 of the National Planning Policy Framework (December 2023) and is therefore unsound. It also conflicts with Local Plan policies PB01, PB02, PB03 and PB04, and with paragraphs 3.6, 13.10, 13.11 and 13.24 of the Local Plan. The Exmo_20 site forms part of Strategic Nature Area 368. This area provides an important buffer between Exmouth and the internationally and nationally protected Pebblebed Heaths SPA, SAC and SSSI. It also supports key wildlife functions, including Nightjar foraging habitat, which is important because the Nightjar is a qualifying species for the SPA and a Section 41 species of principal importance. The site also acts as a wildlife corridor

linking the Pebblebed Heaths to the coast. Developing Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council is in the final stages of designating this site as a Local Nature Recovery Area as part of its Local Nature Recovery Strategy, due to be published in March 2026. This designation supports the aims of the Environment Act 2021 by linking existing wildlife sites and expanding habitats. Development would directly conflict with these objectives. The site contains veteran trees, ancient woodland and historic hedgerows, all of which would be at risk from habitat loss and fragmentation if development were allowed. Devon Wildlife Trust, in its response to the Regulation 19 consultation, stated that the entire Exmo_20 allocation lies within a Strategic Nature Area identified for its nationally important habitats, woodlands and wide range of species, including birds, insects, mammals and amphibians. They emphasised that Strategic Nature Areas are a key part of Devon's Nature Recovery Strategy and should be enhanced rather than developed. Devon Wildlife Trust also stated that development of Exmo_20 would expose sensitive habitats and species associated with NNRS, SAC, SPA and SSSI designations to significant harm. They concluded that it is not feasible to develop the site without causing adverse effects on the integrity of the SAC and strongly urged East Devon District Council not to include Exmo_20 in the Local Plan. I reserve the right to comment further if, and when, a supporting Habitats Regulations Assessment and mitigation strategy are provided for the Local Plan, and I request to be notified at that time.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: REMOVE EXMO_20 FROM THE LOCAL PLAN

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Barbara Howick

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: did not pass the initial HELAA stage in 2022, which meant it automatically failed site sifting and could not be considered for allocation.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
REMOVE EXMO_20 FROM LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with paragraph 206 of the National Planning Policy Framework (December 2023) and is therefore unsound. It also conflicts with Local Plan policies HE02 and OL01(D). A development the size of Exmo_20, surrounding the Grade II* listed Church of St John in the Wilderness, would cause serious harm to the church and its setting. The church and churchyard sit within a remote and tranquil landscape that reflects their historic origins as part of a medieval Saxon settlement. This area is defined by dark skies and a strong sense of isolation and “wilderness”. Building housing around the church would permanently damage this setting, even if a buffer zone were left around it. The quiet, rural character that contributes to the significance of the

church would be lost. Historic England, in its response to the Regulation 19 consultation, stated that Exmo_20 covers a very large area to the east and north-east of Exmouth, much of which lies within the setting of the Grade II* listed church and churchyard. They warned that development could cause considerable harm to the setting of this highly significant heritage asset. Historic England also raised concerns about the proposed long access road from the B3179 to the north, stating that this could itself cause significant harm to the setting and increase future pressure for further development in the area. They advised that alternative access from the south of the site should be explored. Historic England further stated that if evidence shows development could be accommodated in less sensitive areas to the south, the site boundary should be changed. If this is not possible, then the scale and type of development should be limited to what can be properly justified.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: REMOVE EXMO_20 FROM THE LOCAL PLAN

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: did not pass the initial HELAA stage in 2022, which meant it automatically failed site sifting and could not be considered for allocation.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
REMOVE EXMO_20 FROM LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with paragraphs 16c, 92, 114b, 114d, 180e and 181 of the National Planning Policy Framework (December 2023). It is therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04, and paragraph 11.2 of the Local Plan. There is no realistic or viable access to the site. The current proposal relies on most of the site access being taken from the B3179. However, making this work would require major highway works that are uncertain, not costed, and not confirmed or agreed by Devon County Council. The cumulative and in-combination impacts on the B3179 must also be considered. These include increased traffic congestion and worsening air pollution, which would directly affect the

Pebblebed Heaths. The Habitats Regulations Assessment dated 18 November 2025 confirms that there is currently not enough certainty to rule out harmful effects on the integrity of the East Devon Pebblebed Heaths SAC and SPA due to air quality impacts. This is because the main access to Exmo_20 would be from the B3179, which runs along the boundary of the Pebblebed Heaths. The allocation of Exmo_20 therefore conflicts with the required precautionary approach and the mitigation hierarchy, which prioritises avoiding harm before trying to mitigate it. This hierarchy is mandatory under the Environment Act 2021. The Mitigation Strategy itself states that mitigation cannot be assumed without clear evidence, as confirmed by the People Over Wind and Sweetman judgments. As no reasonable scientific certainty has been provided to demonstrate that impacts can be avoided or effectively mitigated, the inclusion of Exmo_20 in the Local Plan is unlawful. I reserve the right to comment further if, and when, a supporting Habitats Regulations Assessment and mitigation strategy are provided for the Local Plan, and I request to be notified at that time

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: did not pass the initial HELAA stage in 2022, which meant it automatically failed site sifting and could not be considered for allocation.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
REMOVE EXMO_20 FROM THE LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with paragraphs 16c, 32, 181, 185, 186b and 188 of the National Planning Policy Framework (December 2023). As a result, it is unsound and not legally compliant. It also conflicts with paragraph 3.6 and policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. The Exmo_20 site lies next to the Pebblebed Heaths SAC, SPA and SSSI. Because of this location, it would be very difficult to provide Suitable Alternative Natural Greenspace (SANGS) that is good enough, close enough, and attractive enough to stop new residents from using the Pebblebed Heaths for activities such as dog walking, cycling and walking. Increased use of the heathland would harm these highly protected habitats and species. Research shows that even a

single disturbance event can cause breeding failure for sensitive species such as the European Nightjar. In the absence of clear evidence showing how this harm would be avoided, the Local Planning Authority, as the Competent Authority, should apply a precautionary approach. The RSPB, in its response to the first Regulation 19 consultation, stated that mitigation measures for allocations closest to the designated heathlands, particularly Land at St John's (Exmo_20), are unlikely to be effective. They also raised concerns about additional nitrogen deposition from increased traffic linked to new development. The RSPB expressed serious concern that the St John's (Exmo_20) allocation would cause damaging impacts on the designated heathland SAC and SPA. These impacts include loss of potential foraging habitat, changes to farmland used as green infrastructure or public open space, increased cat predation on ground-nesting birds, and increased recreational pressure on the heathland, including dogs off leads. The RSPB considers there to be a significant risk that SANGS and on-site public open space would not be sufficient to prevent increased recreational use of the designated heathlands by new residents. Although policy SD01 states that development causing unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths, there is no practical way to prevent people or domestic cats from accessing the heathland. This risk increases the closer new housing is built, due to higher numbers of residents, dogs and cats. I reserve the right to comment further if, and when, a supporting Habitats Regulations Assessment and mitigation strategy are provided for the Local Plan, and I request that I be notified at that time.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: did not pass the initial HELAA stage in 2022, which meant it automatically failed site sifting and could not be considered for allocation.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
REMOVE EXMO_20 FROM LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with the National Planning Policy Framework (NPPF, December 2023), specifically paragraphs 16c, 32, 73b (including footnotes 38 and 7), 180d, 180e, 181, 185a, 186a, 186b, 188 and 191c. For these reasons, the allocation is unsound and not legally compliant. It also conflicts with paragraph 3.6 and policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum buffer of 400 metres next to the Pebblebed Heaths SAC, SPA and SSSI must be removed from the Exmo_20 site. This buffer is intended to reduce impacts such as cat predation and other urban pressures. Evidence shows that domestic cats can range well beyond 400 metres, and in rural areas can roam over 2 kilometres. Given that the European Nightjar, a ground-

nesting bird, is a qualifying feature of the SPA, the risk of predation is significant. Research confirms that a single predation event can cause a nesting attempt to fail. For this reason, a buffer significantly greater than 400 metres would be the precautionary and appropriate approach. The continued inclusion of Exmo_20 relies on a mitigation strategy and Habitats Regulations Assessment (HRA) that have not yet been demonstrated to be adequate. The current documents do not support the Plan. In the absence of a lawful and effective mitigation strategy, a precautionary approach is required. At the very least, this means removing the minimum 400 metres of land closest to the Pebblebed Heaths SAC/SPA/SSSI from the allocation. This land is functionally linked habitat, providing important foraging areas for the European Nightjar, which is both a key SPA qualifying species and a Section 41 Species of Principal Importance. In addition, a much wider buffer will be needed to address impacts from recreational pressure, including dogs off leads, cycling and walking. These impacts have not been assessed at a site level, so they must be addressed through a precautionary strategic approach. This position is supported by a number of ecological bodies, including Devon Wildlife Trust (DWT) and the RSPB. The East Devon National Landscape Partnership, in its response to the first Regulation 19 consultation, stated that a 400m buffer is not large enough to protect the designated sites from disturbance, increased visitor numbers, traffic and access pressures. They also highlighted that the allocation would further fragment surrounding habitats, making the protected sites more vulnerable to damage. As a result, they support non-adoption of the site, or if that is not possible, a significant reduction in the scale and boundary of the development, with fewer homes and development focused closer to the existing town to maintain a stronger rural buffer. The allocation of Exmo_20 is also difficult to justify because there were other suitable sites available that would have required less mitigation. In addition, the Plan includes an over-supply of housing allocations, resulting from the failure to use the latest mandatory ONS population data. Natural England has also raised concerns, noting that the policy is unclear about where employment uses would be located and gives developers too much flexibility. Natural England recommends a natural green buffer along the north-eastern boundary of the site, potentially secured through a Section 106 agreement, which would pull development further away from the SAC/SPA. They state that this would represent clear and sound planning and would better protect the East Devon Heaths SAC/SPA. I reserve the right to make further representations if and when a legally compliant HRA and mitigation strategy are produced in support of the Local Plan, and I request that I be formally notified when these documents are made available.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: REMOVE EXMO_20 FROM THE LOCAL PLAN

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Barbara Howick

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(a). If yes, and you wish to support the legal compliance of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.: it should not have been considered in the first place as it did not pass the initial HELAA stage in 2022, which meant it automatically failed site sifting and could not be considered for allocation.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
remove EXMO_20 from the plan

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with multiple paragraphs of the National Planning Policy Framework (NPPF, December 2023), specifically paragraphs 16c, 32, 73b (including footnotes 38 and 7), 180d, 180e, 181, 185a, 186b, 188 and 191c. As a result, the allocation is unsound and not legally compliant. It also conflicts with paragraph 3.6 and policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. The site lies adjacent to the Pebblebed Heaths SAC, SPA and SSSI. As such, the allocation depends on major mitigation for impacts on protected habitats and species. However, it has not been demonstrated that this mitigation is achievable or viable. The mitigation strategy itself

states that “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA”, and the Plan’s HRA acknowledges that “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” Despite this, the site was selected on 03.09.24, without any opportunity for reconsideration, and the Regulation 19 draft Local Plan was approved on 11.12.24. This was done on the assumption that a mitigation strategy would be produced later, even though an appropriate assessment was not completed until 30.01.25. This approach is contrary to the CJEU “People Over Wind” judgment and fails to apply the legally required precautionary approach, which is particularly important given the CJEU “Dutch N” ruling. Where sites are known to require mitigation, the NPPF (paragraph 32) requires clear justification through the Mitigation Hierarchy. The Local Planning Authority has not undertaken this assessment stage. The allocation of Exmo_20 is therefore difficult to justify, especially as there were multiple alternative sites that were both viable and less reliant on mitigation. In addition, the Plan includes an over-supply of housing allocations, resulting from the failure to use the latest mandatory ONS population data. In its first Regulation 19 response, Devon Wildlife Trust stated that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries.” Taken together, this demonstrates a dismissive approach and widespread failures by the Local Planning Authority in carrying out its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to make further comments if and when a compliant HRA and mitigation strategy are produced in support of the Local Plan, and I request that I be formally notified should these documents become available.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from local plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: IAN HOWICK

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: PROPER LEGAL PROCESS NOT FOLLOWED

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
DRASTICALLY REDUCE SIZE OF EXMO_20 AWAY FROM PEBBLEBED HEATHS AND B3179

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposed allocation of Exmo_20 is inconsistent with paragraphs 92 and 109 of the National Planning Policy Framework (NPPF), December 2023, which require development to support sustainable communities and promote sustainable transport modes. As such, the allocation fails to meet the tests of soundness. Conflict with Local Plan Transport Policies: The allocation is contrary to Local Plan Policies TR01 and TR03, which prioritise sustainable transport, accessibility, and the reduction of reliance on the private car. Non-compliance with Local Plan Strategy: The allocation conflicts with paragraphs 3.6, 11.2, and 11.6 of the Local Plan, which set out the spatial strategy, settlement hierarchy, and sustainable distribution of development. Unsustainable

Accessibility and Increased Car Dependency: Exmo_20 has limited access and would necessitate a significant increase in private car travel, with the principal access proposed via the B3179. The site is located approximately 2.3 miles by road from the centre of Budleigh Salterton and 4.0 miles by road from the centre of Exmouth, placing it at an unsustainable distance from key services and facilities. Failure to Accord with the Settlement Hierarchy: The scale and location of the allocation would place undue pressure on Budleigh Salterton, contrary to the established settlement hierarchy. Budleigh Salterton has not been adequately considered by the Local Planning Authority in assessing the implications of the Exmo_20 allocation. Incompatibility with Policy TR01 (Active Travel): Policy TR01 requires walking and cycling to be the natural first choice for everyday journeys; this requirement cannot realistically be met in respect of Exmo_20. Topographical Constraints: The site and surrounding area are subject to topographical constraints that materially limit the feasibility of walking and cycling. These constraints are not clearly or accurately reflected on the relevant policy maps, thereby underestimating their impact on deliverability and sustainability.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: DRASTICALLY REDUCE SIZE OF DEVELOPMENT AWAY FROM B3179 AND PEBBLEBED HEATHS - FOOTPATHS / CYCLEWAYS CANNOT GO ONTO A LETHAL ROAD

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: NO CO-OPERATION

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: TO ENSURE LEGAL AND CORRECT PROCESS IS FOLLOWED

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
DRASTICALLY REDUCE THE SIZE OF EXMO20 - AWAY FROM VULNERABLE SITES - B3179 & PEBBLEBED HEATHS

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Conflict with National Planning Policy Framework (NPPF): Allocation of Exmo_20 is inconsistent with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188, and 191 of the NPPF (December 2023). As such, the allocation is unsound in principle and fails to meet the requirements of national planning policy. Conflict with Local Plan Policies: Allocation of Exmo_20 conflicts with Policies PB01, PB02, PB03, and PB04. It is also inconsistent with paragraphs 3.6, 13.10, 13.11, and 13.24 of the Local Plan. Impact on Strategic Nature Area (SNA): Exmo_20 forms part of Strategic Nature Area 368, which functions as a critical buffer between Exmouth and the Pebblebed Heath SPA/SAC/SSSI. The site provides foraging habitat for Nightjar, a key qualifying species for

the SPA and a Section 41 Priority Species. It serves as a wildlife corridor connecting the Pebblebed Heaths and the coast, essential for ecological connectivity. Threats to Conservation Objectives: Development of Exmo_20 would undermine the conservation objectives of the SPA, compromising the integrity of protected habitats. The site contains veteran trees, ancient woodland, and hedgerows, which are at risk of fragmentation and ecological degradation. Alignment with Emerging Nature Recovery Strategy: Devon County Council is in the final stages of designating Exmo_20 as a Local Nature Recovery Area under its Local Nature Recovery Strategy (to be published March 2026). The strategy aims to connect existing wildlife sites and extend habitats, which would be jeopardized by development on Exmo_20.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: DRASTICALLY REDUCE THE SIZE OF EXMO20 - AWAY FROM VUNERABLE SITES - B3179 & PEBBLEBED HEATHS

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: NO CO-OPERATION WITH LOCAL RESIDENTS OR RELEVANT BODIES

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: TO ENSURE CORRECT PROCESS IS FOLLOWED

Full name: IAN HOWICK

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: INCORRECT LEGAL FORMAT FOLLOWED

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
DRASTICALLY REDUCE SITE AWAY FROM B3179 AND PEBBLEBED HEATHS

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 conflicts with paragraphs 16c, 92, 114b, 114d, 180e, and 181 of the NPPF (Dec 2023), rendering the allocation unsound and non-compliant with national planning policy. The allocation also conflicts with Paragraph 3.6 and Policies TR01, PL09, PB04, and Paragraph 11.2 of the Local Plan. The current proposal relies on primary access to Exmo_20 from the B3179, which would require major, uncertain, and uncosted highway works, yet Devon County Council has not confirmed their feasibility. Cumulative and in-combination impacts on the B3179 must be fully considered, particularly regarding traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms that there is insufficient certainty to rule out adverse effects on integrity in relation to air quality, due

to the location of the primary access along the boundary of the Pebblebed Heath SAC/SPA/SSSI. Allocation of Exmo_20 contravenes the precautionary approach and the Mitigation Hierarchy, which prioritizes avoidance over mitigation. The allocation is unlawful because there is no reasonable scientific certainty presented regarding mitigation measures.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
DREASTICALLY REDUCE SITE AWAY FROM B3179 & PEBBLEBED HEATHS

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with NPPF (Dec 2023) paragraphs 16(c), 32, 73(b) (including footnotes 38 & 7), 180(d), 180(e), 181, 185(a), 186(a), 186(b), 188, and 191(c), rendering it unsound and non-compliant with the law. It also conflicts with Local Plan paragraph 3.6 and policies PB01–PB04 and OL02. A minimum 400 m buffer from the SAC/SPA/SSSI should be excluded from Exmo_20. Given that cats can range over 2 km in rural areas (HRA 4.10) and the ground-nesting Nightjar is a qualifying feature of the SPA, this buffer is insufficient to mitigate predation risk. Even a single predation event can disrupt a nesting attempt; therefore, a significantly larger precautionary buffer is necessary than the 400 m currently proposed (Underhill-Day, 2005). Furthermore, Exmo_20 provides functionally linked supporting foraging habitat for Nightjar. Additional buffer distance is required to mitigate recreational impacts, including dogs off-lead, cycling, and walking, which have not yet been assessed at the site level. A precautionary approach at the strategic level is therefore warranted.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: NO CO-OPERATION

Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is inconsistent with paragraph 32 of the National Planning Policy Framework (NPPF) December 2023 and is therefore unsound. The Local Planning Authority (LPA) attempted to retrospectively amend the Site Selection Methodology (SSM) to provide justification for the inclusion of Exmo_20. The SSM dated May 2022, which underpinned the Regulation 18 consultation process, is the authoritative version; the amended December 2024 version, submitted in the first Regulation 19 evidence library, was incorrectly presented as the operative SSM. This conduct may be in potential conflict with the Nolan Principles of public life. The original May 2022 SSM, used during the Regulation 18 stage, contains provisions that do not permit the selection of Exmo_20.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of site Exmo_20 is in conflict with paragraph 165 of the National Planning Policy Framework (NPPF), December 2023. The allocation also conflicts with paragraph 3.6 and Policy AR01(b) of the Local Plan, and is therefore unsound. Exmouth is identified as having numerous and significant flood risk pathways, including recorded fluvial flooding events in 1960, 1983, and 2012. Withycombe Brook currently contains significant flood risk areas, even before accounting for current and future climate change impacts. The Exmo_20 greenfield site is located above the town and has tributaries and surface runoff that flow directly into Withycombe Brook, which passes through the most populous wards in East Devon. The Local Planning Authority (LPA) has not applied the required sequential, risk-based approach to site selection aimed at avoiding flood risk to people and property.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: NO CO-OPERATION SHOWN

REDUCE SIZE OF EXMO_20 AWAY FROM B3179 AND PEBBLEBED HEATHS

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is inconsistent with paragraphs 16(c), 32, 181, 185, 186(b), and 188 of the NPPF (December 2023) and is therefore unsound and non-compliant with national policy. It also conflicts with paragraph 3.6 and policies PB01, PB02, PB03, PB04, and OL02 of the Local Plan. Given Exmo_20's proximity to the Pebblebed Heaths SAC/SPA/SSSI, it is unlikely that any proposed SANGs could provide sufficient ecological or recreational capacity to prevent substantial disturbance from recreational activities—such as dog walking, cycling, and general foot traffic—which would harm the designated habitats and species. It must be noted that a single predation event can terminate a nesting attempt. In the absence of evidence demonstrating adequate

mitigation, the Competent Authority, the LPA, should adopt a precautionary approach in accordance with relevant environmental safeguards.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

NPPF Non-Compliance: Allocation of Exmo_20 conflicts with NPPF Dec 2023: paras 16c, 32, 73b (footnotes 38 & 7), 180d, 180e, 181, 185, 186b, 188, 191c. Allocation is unsound and legally non-compliant. Local Plan Conflict: Contravenes paragraph 3.6 and policies PB01, PB02, PB03, PB04, OL02. Environmental Constraints: Adjacent to Pebblebed Heaths SAC/SPA/SSSI. Reliance on significant habitat and species mitigation which has not been demonstrated as achievable or viable. Mitigation strategy: “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA.” Plan HRA: “Growth proposed exceeds threshold levels; no means to mitigate or address the risks exists.” Procedural Breach: Site selected 03.09.24; draft Local Plan approved 11.12.24, before an appropriate assessment in HRA (30.01.25), contrary to CJEU People over Wind. Mitigation Hierarchy: Allocation of sites with known mitigation requirements lacks clear justification, contrary to NPPF paragraph 32. Conclusion: Exmo_20 allocation is unsound, legally non-compliant, environmentally risky, and procedurally flawed.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's proposed allocation is inconsistent with paragraph 32 of the NPPF (Dec 2023) and is therefore unsound. The Local Planning Authority (LPA) has attempted to retrospectively amend the Site Selection Methodology (SSM) in order to justify the inclusion of Exmo_20. However, the SSM relied upon for the Regulation 18 process is the May 2022 version, not the December 2024 version cited in the first Regulation 19 evidence library, which was presented misleadingly as the operative methodology. This conduct may raise concerns under the Nolan Principles of public life, particularly with respect to integrity and transparency. Critically, the original May 2022 SSM—utilized during the Regulation 18 consultation—contains wording that precludes the selection of Exmo_20.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with paragraphs 16(c), 25, 180(d), 181, 185(a), 186(a), 186(c), 188 and 191 of the National Planning Policy Framework (December 2023) and is therefore unsound. It is also inconsistent with Policies PB01, PB02, PB03 and PB04, and with paragraphs 3.6, 13.10, 13.11 and 13.24 of the Local Plan. The Exmo_20 site lies within Strategic Nature Area 368, which functions as a critical buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI. The area provides essential foraging habitat for nightjar—a key qualifying species of the SPA and a Section 41 species of principal importance—and forms an important wildlife corridor linking the Pebblebed Heaths with the coast. Development of Exmo_20 would therefore undermine the conservation objectives of the SPA. Devon County Council is in the final stages of designating this land as a Local Nature Recovery Area as part of its Local Nature Recovery Strategy (scheduled for publication in March 2026), which seeks to connect existing wildlife sites and expand habitat networks. The site contains numerous veteran trees, areas of

ancient woodland and established hedgerows, all of which would be at risk of fragmentation and ecological degradation as a result of development.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: TO ENSURE ITS LEGALLY COMPLIANT

Full name: Chrissy Howick

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
REMOVE EXMO_20 FROM THE LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with paragraph 206 of the National Planning Policy Framework (December 2023) and is therefore unsound. It also conflicts with Local Plan Policies HE02 and OL01(D). A development of the scale proposed at Exmo_20 would result in significant and unacceptable harm to the setting of St John in the Wilderness Church, a Grade II* listed building. The church and its churchyard derive substantial heritage significance from their remote, tranquil and undeveloped surroundings. The area is characterised by dark skies, openness and a strong sense of isolation, consistent with the church's historic 'wilderness' setting. The encircling of this heritage asset by a large housing development would fundamentally alter its setting, eroding its rural character and sense of remoteness, and causing irreversible harm to its significance. Such harm is neither justified nor outweighed by public benefits, and the allocation therefore fails to meet national and local policy requirements for the conservation and enhancement of heritage assets and their settings.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: REMOVE EXMO_20 FROM THE OCAL PLAN

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: NO CO-OPERATION HAS BEEN SHOWN WITH RESIDENTS OR RELEVANT BODIES

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: TO ENSURE CORRECT LEGAL PROCESS AND PROTOCOL

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposed allocation of site EXMO_20 is contrary to national planning policy and is therefore unsound and not legally compliant. In particular, the allocation conflicts with paragraphs 16(c), 32, 181, 185, 186(b) and 188 of the National Planning Policy Framework (December 2023), which collectively require plans to be positively prepared, justified, effective, consistent with national policy, and to protect and enhance sites of international and national biodiversity importance. The allocation also fails to accord with the adopted Local Plan, specifically paragraph 3.6 and Policies PB01, PB02, PB03, PB04 and OL02, which seek to safeguard the natural environment, protect designated sites, and ensure development does not result in unacceptable environmental harm. The EXMO_20 site is immediately adjacent to the Pebblebed Heaths SAC/SPA/SSSI, a highly sensitive European and nationally designated site. Given this proximity, it is not demonstrated that Suitable Alternative Natural Greenspace (SANGS) of sufficient size, quality, functionality, and geographical convenience could be delivered to effectively divert recreational pressure away from the Pebblebed Heaths. In particular, there is no evidence that future residents would be dissuaded from undertaking recreational activities such as dog walking, walking, and cycling within the designated site. Increased recreational pressure poses a clear risk of adverse effects on the integrity of the SAC/SPA, including disturbance to protected habitats and species. It is well-established that even a single disturbance or predation event can be sufficient to cause the failure of a nesting attempt, resulting in significant ecological harm. In the absence of adequate and legally robust evidence demonstrating that the proposed allocation would not result in adverse effects on the integrity of the Pebblebed Heaths SAC/SPA/SSSI, the allocation fails to meet the requirements of the Habitats

Regulations. Accordingly, the Competent Authority, namely the Local Planning Authority, is required to apply the precautionary principle. Without such certainty, the allocation cannot lawfully proceed.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Remove Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with paragraphs 16(c), 32, 73(b) (including footnotes 7 and 38), 180(d), 180(e), 181, 185(a), 186(a), 186(b), 188 and 191(c) of the NPPF (December 2023) and is therefore unsound and not legally compliant. It also conflicts with paragraph 3.6 and policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum buffer of 400 metres adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. This buffer is required as mitigation for potential impacts arising from domestic cat predation and other urban effects. Evidence within the HRA (para. 4.10) confirms that in rural environments cats may roam in excess of 2 kilometres. Given that the Nightjar is a qualifying ground-nesting feature of the SPA, there is a clear and significant risk of predation, noting that a single predation event can result in nesting

failure. In these circumstances, a buffer substantially greater than the pragmatic 400 metres proposed (Underhill-Day, 2005) is required in accordance with the precautionary principle. The land also constitutes functionally linked supporting foraging habitat for Nightjar. Furthermore, a significantly greater buffer is necessary to mitigate recreational impacts, including dog walking (particularly off-lead), cycling and walking. As these impacts have not been assessed at the site level, a precautionary approach must be applied at the strategic plan-making stage.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Full name: Chrissy Howick

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposed allocation of site EXMO_20 is neither sound nor legally compliant. It is inconsistent with several provisions of the National Planning Policy Framework (December 2023), notably paragraphs 16(c), 32, 73(b) (including footnotes 7 and 38), 180(d) and (e), 181, 185, 186(b), 188, and 191(c). It also conflicts with paragraph 3.6 and policies PB01, PB02, PB03, PB04, and OL02 of the Local Plan. The site is located adjacent to the Pebblebed Heaths SAC, SPA, and SSSI, meaning its allocation is wholly dependent on substantial mitigation to avoid adverse effects on internationally and nationally protected habitats and species. However, there is no robust evidence demonstrating that the required mitigation is deliverable, effective, or viable. On the contrary, the mitigation strategy itself concedes that a Likely Significant Effect could not be ruled out for other units within the EDPH SAC and SPA. This is reinforced by the Plan-level Habitats Regulations Assessment (HRA), which explicitly states that there is an inherent conflict, as the scale of growth proposed exceeds established thresholds and no confirmed mechanism exists to mitigate or resolve the resulting risks. Despite these acknowledged deficiencies, the site was selected on 03 September 2024 without any meaningful opportunity for review or reassessment, and the draft Local Plan was approved on 11 December 2024 on the speculative assumption that a mitigation strategy would be produced at a later date. An Appropriate Assessment was only undertaken subsequently, as part of the HRA dated 30 January 2025. This approach is inconsistent with established legal principles, including the People Over Wind judgment, which makes clear that mitigation measures must not be relied upon at the

screening stage and must be fully assessed prior to plan adoption. In addition, where sites with known and significant environmental constraints are proposed for allocation, the NPPF requires a clear, transparent, and evidenced justification through the application of the Mitigation Hierarchy (paragraph 32). No such justification has been provided for EXMO_20, nor has any explanation been offered as to why less harmful or less constrained alternatives were not selected instead. For these reasons, the allocation of EXMO_20 fails the tests of soundness and legal compliance. The site should therefore be removed from the Plan unless and until a fully evidenced, deliverable, and legally compliant mitigation solution is clearly demonstrated.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the local plan - or reduce the size of the plan so it is less houses and in Exmouth

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To see that the correct guidelines and legal requirements are adhered to

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
Restart the process with correct consultation process and informing local residents

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of site EXMO_20 is unsound and not legally compliant, as it conflicts with multiple provisions of the National Planning Policy Framework (NPPF, December 2023), specifically paragraphs 16(c), 32, 73(b) (including footnotes 7 and 38), 180(d) and (e), 181, 185, 186(b), 188, and 191(c). The allocation also conflicts with paragraph 3.6 and policies PB01, PB02, PB03, PB04, and OL02 of the Local Plan. The site lies adjacent to the Pebblebed Heaths SAC, SPA, and SSSI, and its allocation is therefore dependent upon significant mitigation for impacts on protected habitats and species. However, the deliverability, effectiveness, and viability of the required mitigation have not been demonstrated. The mitigation strategy itself confirms that “it was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA,” while the

Plan-level Habitats Regulations Assessment (HRA) explicitly acknowledges that “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” Despite this acknowledged uncertainty, the site was selected on 03.09.24, without any opportunity for reconsideration, and the draft Local Plan was approved on 11.12.24 on the assumption that a mitigation strategy would be produced. An Appropriate Assessment was only undertaken subsequently as part of the HRA dated 30.01.25. This approach is contrary to established case law, including the CJEU judgment in *People Over Wind*, which requires that mitigation measures must not be taken into account at the screening stage and must be assessed before plan adoption. Furthermore, where sites with known and significant mitigation requirements are proposed for allocation, the NPPF requires clear and transparent justification through the application of the Mitigation Hierarchy (paragraph 32). No such justification has been provided in this case, nor has it been demonstrated why less harmful or unconstrained alternatives were not preferred. For these reasons, allocation EXMO_20 fails the tests of soundness and legal compliance and should be removed from the Plan unless and until a fully evidenced, deliverable, and legally compliant mitigation solution is demonstrated.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Allocation so far has been inaccurate - parts of the plan changed after they should have been - I would like to make sure correct legal and functional process has been followed

Full name: Chrissy Howick

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is in conflict with policy HE02. There is a new addendum document SAL-022a which details the Historic Site Assessment that has been carried out by EDDC. Within this document there are several statements that are misleading, specifically paragraphs 7.32 and 7.34. 7.32 states that the site assessment was carried out in August 2025 when trees and hedgerows were in full bloom and it states "The extent and density of planting means that in the summer months there are limited views and intervisibility with surrounding fields. In the winter, with the falling of leaves, this will increase but even then the evergreens and mass of branches on the deciduous trees will result in a retained degree of screening." The winter views of the surrounding fields are VERY different and any future assessment needs to be carried out in the Winter months NOT IN THE SUMMER!!! What exactly is the point of this addendum? As there has been quite a bit of work carried out and the map on page 38 and the tabular information on page 42 are taking into account the August 2025 site assessment with regards to visual connectivity and identifies areas not to build on. Yet paragraph 7.38 then states the following: 7.38 It is stressed that this work is not a formal detailed assessment and in no sense is it intended to form policy or establish any specific set of proposals or patterns for development. Rather it is illustrative and approximate of comparative areas of sensitivity and is set out as a means to illustrate the scale or level of development that could potentially be achieved by directing development to the less or nil sensitive locations only. It is worth highlighting, however, that development when well designed and implemented can frame and enhance heritage assets and as such 'sensitive areas' can in some cases be appropriate and positive for development and built uses. The above statement basically deletes all of the work detailed in this addendum. Why

bother doing this work, oncluding it as evidence then effectively saying that it is not worth the paper it is written on????? This SHOULD form policy, establish a set of proposals and patterns for development. Otherwise why carry out the work???? In addition to the above I would like it noted that it states in the Draft Local Plan that "Support will be given for expansion of the churchyard, to provide more burial/interment of ashes space at St John in the Wilderness". This land needs to be identified and included in any Heritage assessment, as this would in effect alter the views of the surrounding area from the Church. One final point is that the NEW wording for Exmo_20 states "An extensive area must be established around the church in master planning work within which built development will not be allowed, though, subject to not having adverse heritage impacts, open space non-sports pitch uses will be permitted". This is an ambiguous statement and leaves things open to interpretation, and the words after "development will not be allowed" need to be removed.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Any heritage assessment MUST be carried out during the Winter and NOT the summer. Reword paragraph 7.38, so that the details identified within this document are not just ignored.... Wording needs to be added to the plan stating that the additional land to be provided to the Church needs to be identified and agreed before any heritage assessment is carried out. The ambiguous wording identified regarding the use of land around the church needs to be amended as requested. with a

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The Church setting is important and needs to be protected. The Draft Local Plan and the new addendum SAL-022a need to be more specific.

Full name: Alison Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Sustainability Appraisal Report has been changed significantly and is fundamentally a different document, providing very different justification to the previous First Regulation 19 version, not least regarding the inclusion of HELAA failed sites such as Exmo_20. This appraisal has been retrospectively written based on consultation feedback regarding its shortcomings. The decisions made prior cannot rely on a subsequently fabricated document to provide evidence to somehow inform decisions such that] they change from unsound to sound. The retrospectively created Site Selection Methodology (v2 December 2024) is now significantly relied upon in a futile attempt by the LPA to provide justification. The sites that failed HELAA including Exmo_20 are now being justified based on the Site Selection Methodology that was NOT applicable when they were allocated, therefore the inclusion of these sites in the Draft Local Plan, and specifically Exmo_20, CANNOT be justified and is UNSOUND. The Site Selection Methodology document dated May 2022 was applicable for the entire Reg 18 process and also when Exmo_20 was allocated in the Strategic Planning Committee meeting on the 3rd September 2024 in Reg 19. Exmo_20 failed HELAA and therefore should not have been available for Reg 18 nor to be allocated for Reg 19. I attach the applicable document as evidence below.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Exmo_20 should not

have been considered for Reg 18 or Reg 19 as per the EDDC's own policies and procedure. Remove this site from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: The plan making process for site Exmo_20 has not been in accordance with the PCPA 2004, nor the NPPF. As a group, myself and my colleagues have raised concerns with EDDC on several occasions regarding publicity and communications to the public in relation to the Consultations process, with the most recent being at the Strategic Planning Committee meetings on the 25th November 2025 and the 6th January 2026. At these meetings and others throughout 2025 we have highlighted our concerns regarding the lack of communications and information being provided to the public and have had to “fight tooth and nail” to get the level of information that we have managed to gather so far. These shortcomings have been highlighted and we are still encountering resistance with regards to publicity and communications, despite EDDC stating that they are committed to public engagement.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The plan making process for site Exmo_20 has not been in accordance with the PCPA 2004, nor the NPPF. I have raised concerns with EDDC on several occasions regarding publicity and communications to the public in relation to the Consultations process, with the most recent being at the Strategic Planning Committee meeting on Tuesday the 6th September 2026. At this meeting I specifically raised my concerns regarding the fact that the Sustainability Appraisal Report (SAR) has been changed significantly and is fundamentally a different document, providing very different justification to the previous First Regulation 19 version, not least regarding the inclusion of HELAA failed sites such as Exmo_20. This document now includes changes as a result of the comments made in the First Reg 19 Consultation. Pages 76 to 113 of the SAR detail the comments and the councils responses and the document has been changed significantly to accommodate these responses. However, this has not been communicated to ANY of the organisations or members of the public that made them. The organisations and members of the public that raised these comments are not aware of them, and may disagree with the Councils response, I KNOW I DO. However, if these changes are not communicated, then the chances are high that no-one will check them (especially as this is a 686 page document, nearly double the size of the Draft Local Plan). IF THERE ARE NO COMMENTS/OBJECTIONS TO THESE CHANGES THE COUNCIL WILL TAKE THIS AS APPROVAL --- THIS IS NOT ACCEPTABLE. There is also no "Schedule of Changes" listed for the Sustainability Appraisal Report, which is inconsistent with the rest of the chapters of the Draft Local Plan detailed within Commonplace. Again highlighting the lack of communication by the EDDC. I attach an email that I sent to the Strategic Planning Committee chair person and the other members of the committee regarding

the SAR and other concerns (including my speaker notes from the 6th January 2026). I sent this email on the 13th January 2026, and as I submit this comment on Sunday 25th January 2026, I have still to receive a response, which is too late for this consultation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: The plan making process for site Exmo_20 has not been in accordance with the PCPA 2004. I raised several comments in the First Reg 19 Consultation regarding the EDDC's failure to adhere to their own processes and procedures in relation to site Exmo_20. These have been ignored not only through this process but also despite me bringing these issues to the attention of the Strategic Planning Committee and the Planning Officers. I have followed this up by raising a Freedom of Information request in July 2025 asking 5 questions (see evidence). I received a response to my FOI request in August 2025 (see evidence). The FOI responses provide the data as evidence so I could not refute the findings. However, the fact remains that the responses effectively confirm what I have been saying in relation to sites Exmo_20, Exmo_20a, Exmo_20b and Exmo_46, and also confirms that EDDC have not followed their own policies and procedures. It also raises the point that I have been asking the Planning Officers for some time, and that is - are documents and decisions being "approved by default" if they are not discussed at the Strategic Planning Committee meetings (see evidence)? I include my comments against the FOI responses for clarity (see evidence, and also the point made below regarding the fact that sites Exmo_20a and Exmo_20b are never discussed at the meeting on the 1st November 2022, despite these sites never being visible until this meeting). In brief, Exmo_20 failed HELAA. Exmo_46 was the only site that should have gone forward into Reg 18. Sites Exmo_20a and Exmo_20b were suddenly created as NEW sites, and appear in maps for the first time at the Strategic Planning Committee meeting on the 1st November 2022, but are never mentioned or discussed at this meeting. Also to be noted is the fact that the Draft Local Plan that was presented at this meeting did not include Exmo_20a or Exmo_20b, yet Exmo_20b is

included in the Draft Local Plan for Reg 18 6 days later as part of the consultation, but Exmo_20a is NOT. These sites are then classed as consulted on at Reg 18 even though Exmo_20a is identified as a REJECTED site (why would you consult or comment on a rejected site that is not even described in the Draft Local Plan?). It should be noted that the three main supporting documents for Reg 18, the HELAA report, the Sustainability Appraisal Report and the Exmouth Site Selection Document ONLY mention Exmo_20 and Exmo_46. With HELAA rejecting Exmo_20 but letting Exmo_46 progress. The Sustainability Appraisal Report highlighting that Exmo_20 is not to be progressed and that Exmo_46 is to be progressed. The Exmouth Site Selection document highlighting again that Exmo_20 is NOT to be progressed but that Exmo_46 is to be progressed. IT IS TO BE NOTED THAT NONE OF THESE DOCUMENTS MENTION EXMO_20a OR Exmo_20b.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
Remove Exmo_20 from the plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The plan making process for site Exmo_20 has not been in accordance with the PCPA 2004. I raised several comments in the First Reg 19 Consultation regarding the EDDC's failure to adhere to their own processes and procedures in relation to site Exmo_20. These have been ignored not only through this process but also despite me bringing these issues to the attention of the Strategic Planning Committee and the Planning Officers. With HELAA rejecting Exmo_20 but letting Exmo_46 progress. The Sustainability Appraisal Report highlighting that Exmo_20 is not to be progressed and that Exmo_46 is to be progressed. The Exmouth Site Selection document highlighting again that Exmo_20 is NOT to be progressed but that Exmo_46 is to be progressed. IT IS TO BE NOTED THAT NONE OF THESE DOCUMENTS MENTION EXMO_20a OR Exmo_20b.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I have raised my concerns detailed above with EDDC, the Strategic Planning Committee, EDDC Planning Officers etc.. but no one seems to listen or be concerned that policies and procedures have been ignored.

Full name: Nigel Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I submitted a comment within the First Reg 19 Consultation identifying the fact that the site maps for Exmo_20 were conflicting with NPPF chapter 3 'Plan Making' where it states that plans should be 'up to date'. The EDDC have been contacted on numerous times to update the map for Exmo_20 to stop promoting the site with land that is not available (i.e. existing homes, listed buildings and the grade II * church and its lands). This was confirmed and the settlement boundaries identified. However, there were still instances where the incorrect maps were still being used. I identified the Sustainability Appraisal Report and the Site Allocations 'SAL' document for Exmouth (SAL-022), as documents that needed to be corrected. The Sustainability Appraisal Report has been updated and a new version published. However, the SAL-022 document has not, and the incorrect map is still visible in two sections of this document. This is unacceptable and again highlights the fact that our comments are being ignored. To make matters worse, a new addendum SAL-022a has been added as part of the Second Reg 19 Consultation. This document was made available on the EDDC website on the 26th November 2025. I highlighted this to EDDC along with issues around tabular data that was incorrect (See attached emails as evidence). My comments were supposedly acted upon. However, I bring pages 26, 27 42 and 43 of this document to your attention (SAL-022a is attached). The change regarding the map has been completed on page 26, but "red" text has been added which tries to explain the reason for the change and contains a link to the original SAL-022 document (no new version of this since February 2025) telling you that the old map can be seen here. THIS AGAIN SHOWS THAT MY FIRST REG 19 COMMENTS HAVE BEEN IGNORED. AS STATED ABOVE I HIGHLIGHTED THAT THE MAP IN SAL-022 WAS INCORRECT AND SHOULD BE CORRECTED, YET THIS RED TEXT

REFERS YOU TO AN INCORRECT MAP. EVEN THE WORDING USED IN THE RED TEXT IS WRONG AS IT STATES "To avoid any potential confusion in respect of land allocated for development in the 2nd Regulation 19 Local Plan.....". THE LAND ALLOCATED FOR DEVELOPMENT RELATING TO EXMO_20 HAS NOT CHANGED FROM THAT IDENTIFIED IN THE FIRST REG 19 LOCAL PLAN. THE FACT THAT OUR COMMENTS CONTINUE TO BE IGNORED CANNOT AND SHOULD NOT BE ALLOWED. For further proof of this, I bring to your attention the red text on pages 42 and 43, as this text does not belong in this document. The data should have been changed to be correct, not left as it is with an additional CONFUSING bit of text. This highlights a total lack of document version control within EDDC.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Correct SAL-022 and SAL-022a as requested. Provide evidence that our comments raised in the First Reg 19 Consultation and this Second Consultation are being noted and actioned upon.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: I submitted a comment within the First Reg 19 Consultation identifying the fact that the site maps for Exmo_20 were conflicting with NPPF chapter 3 'Plan Making' where it states that plans should be 'up to date'. The EDDC have been contacted on numerous times to update the map for Exmo_20 to stop promoting the site with land that is not available (i.e. existing homes, listed buildings and the grade II * church and its lands). This was confirmed and the settlement boundaries identified. However, there were still instances where the incorrect maps were still being used. I identified the Sustainability Appraisal Report and the Site Allocations 'SAL' document for Exmouth (SAL-022), as documents that needed to be corrected. The Sustainability Appraisal Report has been updated and a new version published. However, the SAL-022 document has not, and the incorrect map is still visible in two sections of this document. This is unacceptable and again highlights the fact that our comments are being ignored. To make matters worse, a new addendum SAL-022a has been added as part of the Second Reg 19 Consultation. This document was made available on the EDDC website on the 26th November 2025. I highlighted this to EDDC along with issues around tabular data that was incorrect (See attached emails as evidence). My comments were supposedly acted upon. However, I bring pages 26, 27 42 and 43 of this

document to your attention (SAL-022a is attached). The change regarding the map has been completed on page 26, but "red" text has been added which tries to explain the reason for the change and contains a link to the original SAL-022 document (no new version of this since February 2025) telling you that the old map can be seen here. THIS AGAIN SHOWS THAT MY FIRST REG 19 COMMENTS HAVE BEEN IGNORED. AS STATED ABOVE I HIGHLIGHTED THAT THE MAP IN SAL-022 WAS INCORRECT AND SHOULD BE CORRECTED, YET THIS RED TEXT REFERS YOU TO AN INCORRECT MAP. EVEN THE WORDING USED IN THE RED TEXT IS WRONG AS IT STATES "To avoid any potential confusion in respect of land allocated for development in the 2nd Regulation 19 Local Plan.....". THE LAND ALLOCATED FOR DEVELOPMENT RELATING TO EXMO_20 HAS NOT CHANGED FROM THAT IDENTIFIED IN THE FIRST REG 19 LOCAL PLAN. THE FACT THAT OUR COMMENTS CONTINUE TO BE IGNORED CANNOT AND SHOULD NOT BE ALLOWED. For further proof of this, I bring to your attention the red text on pages 42 and 43, as this text does not belong in this document. The data should have been changed to be correct, not left as it is with an additional CONFUSING bit of text. This highlights a total lack of document version control within EDDC.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure that the Planning Inspector and EDDC are aware of the publics views and concerns.

Full name: Martin Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove this site from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF December 2023. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, and still applicable when this site was allocated on the 3rd September 2024, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Exmo_20 should never have been included, so remove it from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023. It also conflicts with policies TR01 and TR03 along with paragraphs 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking, and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation, as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location, topography (a steep sloping site from North to South), and Exmo_20's B3179 access arrangements, would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan. In the Strategic Flood Risk Assessment Level 1, Withycombe Brook is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. It is clear that the LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to the First Regulation 19 consultation that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to

development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". PLEASE NOTE; I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the First regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified".

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Draft Local Plan.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. PLEASE NOTE: I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Full name: Martin Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt. What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to

use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." PLEASE NOTE: I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and it is to be noted that in more rural areas (which Exmo_20 is) cats can roam over 2km, and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that "A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased

visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths". NATURAL ENGLAND state in their response that "the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA." PLEASE NOTE : I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable. The mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plans HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without any opportunity being given for it to be reconsidered), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select. It should also be noted that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA

demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. PLEASE NOTE ; I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove this site from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove this site from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure that the public are listened to with regards to this site, instead of being ignored.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and over 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove this site from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This site is unsuitable, unsustainable and not viable. This needs to be recognised.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF December 2023. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, and still applicable when this site was allocated on the 3rd September 2024, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023. It also conflicts with policies TR01 and TR03 along with paragraphs 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking, and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation, as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location, topography (a steep sloping site from North to South), and Exmo_20's B3179 access arrangements, would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan. In the Strategic Flood Risk Assessment Level 1, Withycombe Brook is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. It is clear that the LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to the First Regulation 19 consultation that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to

development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". PLEASE NOTE; I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the First regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove this site from the Draft Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To get someone to finally listen and that can get the EDDC to realise that this site should be removed from the plan.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. PLEASE NOTE: I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To get someone to finally realise that this site is not suitable, sustainable or viable, and to get it removed from the plan for good.

Full name: Nigel Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt. What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to

use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." PLEASE NOTE: I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Take Exmo_20 out of the Draft Local Plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure that the public are taken note of.

Full name: Nigel Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and it is to be noted that in more rural areas (which Exmo_20 is) cats can roam over 2km, and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that "A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased

visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths". NATURAL ENGLAND state in their response that "the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA." PLEASE NOTE : I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure that my comments are finally listened to.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable. The mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plans HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without any opportunity being given for it to be reconsidered), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select. It should also be noted that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA

demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. PLEASE NOTE ; I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure that my voice is heard.

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and over 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF December 2023. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, and still applicable when this site was allocated on the 3rd September 2024, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023. It also conflicts with policies TR01 and TR03 along with paragraphs 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking, and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation, as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location, topography (a steep sloping site from North to South), and Exmo_20's B3179 access arrangements, would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan. In the Strategic Flood Risk Assessment Level 1, Withycombe Brook is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. It is clear that the LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to the First Regulation 19 consultation that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to

development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". PLEASE NOTE; I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the First regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from this plan for good.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. PLEASE NOTE: I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt. What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to

use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." PLEASE NOTE: I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The council need to finally take account of not only the public's views but also those of key organisations such as DWT, the RSPB, East Devon Natural Landscapes etc. Remove Exmo_20 from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Alison Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and it is to be noted that in more rural areas (which Exmo_20 is) cats can roam over 2km, and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that "A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased

visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths". NATURAL ENGLAND state in their response that "the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA." PLEASE NOTE : I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove this site from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Do the right thing and remove this site from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposal of site Exmo_20 is in conflict with paragraph 11.6. This is a large development of between 700 to 1000 homes. The majority (if not all) of this site is NOT within 800m (approx 10 mins walk) of any existing key services and facilities. There are no plans to provide significant key services on site so residents will likely need to drive over two miles (via the B3179) just to access them within Exmouth or neighbouring settlements. They will also need to travel over 4 miles to access Exmouth town centre and its railway station. The topography of the site does not promote walking or cycling, especially not for main shopping, doctors, dentists, school, etc.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove site Exmo_20 from the plan now.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This site is remote from the town centre and is not suitable, sustainable or viable and needs to be removed from the plan now.

Full name: Nigel Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocating Exmo_20 is in conflict with policy TR01. No matter what the developers say, walking and/or cycling will not be the first choice of transport from this site for people to do their shopping/ work/ school run etc. because the distances are too far. The studies cited in the Local Plan show that most people prefer to walk if their destination is within 0.5 miles, however, beyond the distance of 1 mile cars are the dominant mode of travel and that beyond 2 miles trips on foot are few. If people live at the Northern part of this site, they will have to walk nearly 0.5 miles to get to the bottom of the site. Exmo_20 is by its position remote, and people will have to travel significantly further than 0.5 miles or even 1 mile to get to essential infrastructure and services. Based on this, walking or cycling as first choice of transport is unviable. Providing walking routes, cycle paths or public transport will not alleviate the amount of car journeys this development would generate, especially taking into account the steep local topography and the distance people will have to travel to access essential infrastructure and services.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This site needs to be removed from the plan now.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This site is on the edge of Exmouth and will not promote walking and cycling no matter what the developer says. You need to see this proposed site to understand this.

Full name: Nigel Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is in conflict with paragraph 11.2. There are two proposed access points for this site. One to be created at the South of the site via the existing Southern Wood cul-de-sac but only to accommodate 'modest' development, with the other access point being at the North of the site for the 'majority/bulk' of the development via the B3179. This will increase travel needs and necessitate cars to take longer routes for the majority (if not all) of the site. The main vehicular access point (B3179) is at the very northern edge of the site, adjacent to the Pebblebed Heath (SAC/SPA/SSSI). Due to the mandatory 400m buffer zone to SAC/SPA/SSSI no housing is permitted within the top 400m, resulting in approximately 0.3 of a mile drive just to get from the site entrance to the housing. This would result in upwards of over 0.5 miles of 'on site' driving for most people every time they went out anywhere and returned home. In addition to this, from the B3179 site entrance you need to drive between 4.0-4.3 miles to get into Exmouth centre. Exmo_20 is a large site and its positioning does not promote less travel, nor will it do anything to reduce traffic congestion in and out of Exmouth. This site is not sustainable.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This site is not suitable, sustainable or viable and needs to be removed from the plan now.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This site is not suitable, sustainable or viable and will only increase car journeys onto already congested local routes.

Full name: Nigel Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is in conflict with paragraph 3.34: Although Exmouth is classed as a tier 1 settlement, it does not have sufficient infrastructure and services for the existing population. Even if the proposed development brings financial contributions towards infrastructure etc., it will not add another Doctors surgery or Dentists surgery - both of which are already insufficient for the current population of Exmouth. Neither will it provide another secondary school - numerous children already have had to travel to Cranbrook for secondary school provision due to there being no capacity at Exmouth Community College. The existing sewerage system in Exmouth cannot handle the current population, with sewage being discharged into the sea on a very regular basis, with 'closed for swimming' notices becoming a regular feature on our beach. Not a very good advertisement for a seaside tourist spot! Exmouth's sewerage problems have already been highlighted on national news several times.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove this site from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Just because Exmouth is classed as tier 1 does not mean that it can continue to expand to meet the government numbers. Exmouth has already reached its limits and this continued push to expand when it cannot cope will destroy our town.

Full name: Nigel Humphrey

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposed site Exmo_20 is in conflict with paragraph 13.23. The whole of this site lies within an identified 'Strategic Nature Area' (SNA 368) on the Nature Recovery Network. It is part of the Local Nature Recovery Strategy aimed at combining existing wildlife sites and extending habitats. It provides connecting habitats and wildlife corridors between the Pebblebed Heaths at the north of the site through to the woodland at the south and beyond, all of which would be adversely impacted by the development of this site. The amount of wildlife that utilises this land and the nearby SSSI Pebblebed Heaths is diverse. Of particular note is the Nightjar, a qualifying feature of the East Devon Heaths SPA, and studies show that these fly up to 7km from nesting sites to feed at night. Loss of foraging habitat or disruption of routes to feeding areas could undermine the conservation objectives of this SPA. A 20% BNG WILL NOT REPLACE THE DESTRUCTION THAT THIS SITE WILL CAUSE!!

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This site is not suitable, sustainable or viable. It will also destroy the wildlife habitat and the area itself.

Full name: Nigel Humphrey

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposal for Exmo_20 is in conflict with paragraph 13.9. The NATIONAL PLANNING POLICY FRAMEWORK defines 'irreplaceable habitat' as "habitats which would be technically very difficult (or take a significant time) to restore, recreate or replace once destroyed". Exmo_20 will cause loss of irreplaceable habitats. It has a great number of mature trees, which provide unique micro habitats and their loss cannot simply be mitigated by planting new trees. This site also contains many long-established hedgerows across the site, the lengths of which are considerable. The trees and hedgerows have high intrinsic biodiversity value providing habitats and wildlife corridors, and even if the developers promise that space can be left around them, degradation and fragmentation of habitat is unavoidable. The variety of wildlife that abound in these fields, trees and hedgerows will undoubtedly be affected by this development. Of particular note is the Nightjar, a qualifying feature of the East Devon Heaths SPA, and studies show that these fly up to 7km from nesting sites to feed at night. Loss of foraging habitat or disruption of routes to feeding areas could undermine the conservation objectives of the SPA. The whole of the Exmo_20 site lies within an identified 'Strategic Nature Area' (SNA 368) on the Nature Recovery Network, part of the Local Nature Recovery Strategy aimed at combining existing wildlife sites and extending habitats. It provides connecting habitats and wildlife corridors between the SSSI Pebblebed Heaths at the north of the site through to the woodland at the south and beyond, all of which would be adversely impacted by this development.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan now.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This site is not suitable, sustainable or viable. This development will destroy the “irreplaceable habitats” that abound on this site.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Proposed site Exmo_20 is in conflict with policy OL01. The site is distinctive for its dark skies, tranquillity and wildness. In addition to light from the proposed housing development itself, with the 'majority/bulk' of this sites access being at the B3179, directly opposite the SPA/SAC/SSSI, would cause a significant flow of car headlights destroying the darkness across the entire length of the site and all shining directly onto the Pebblebed Heaths as vehicles exit the site. The area around St John in the Wilderness church is characterised by its remoteness, tranquillity, and the dark skies (especially when within the churchyard itself). This provides a 'wilderness' setting integral to the grade II* listed church which would be lost forever by having a housing development encircling it, regardless of any buffer zone being provided.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This site is not suitable, sustainable or viable, and should be removed from the plan now.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This site is already not suitable, sustainable or viable.

However, the amount of buffering that would be needed to retain the setting of the Church is substantial and just compounds the issues on this site.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Proposed site Exmo_20 is in conflict with policy HE02 - this proposed site is a 'very large' development of between 700 to 1000 homes. The majority of these homes will surround the Grade II* listed St. John in the Wilderness Church and will have significant adverse effects on the remoteness and tranquillity that is so unique to this church, its surroundings and the churchyard. This development will drastically alter this peaceful and tranquil setting, not only for the congregation, but also the numerous visitors that come to pay their respect's to their relatives in the churchyard and to see the church and its setting.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: This site is not suitable, sustainable or viable and needs to be removed from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: The council and the developer state that the views from the church will not be impacted. Yet they carried out site visits in the Summer and

state that there will be limited change of views in the winter. This is not correct. This impacts the suitability and viability of this site.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Proposed site Exmo_20 is in conflict with policy OL05. The main access point for this site (via the B3179) is between 4 and 4.3 miles from the centre of Exmouth and only 2.2 miles from the centre of Budleigh Salterton, making Budleigh significantly more accessible to the residents of this development. The access arrangement for the site leads naturally down the B3179 into Budleigh Salterton High Street, but to get into Exmouth will mean travelling twice the distance and having to go around the edge of Exmouth to get back down into it. The High Street, Doctor's surgery, Dentists, schools, beach etc in Budleigh would be the most accessible and obvious choices for residents of this site. Currently Exmouth and Budleigh are separated in terms of functionality but this development would effectively merge the two, with residents living in one town whilst relying on day-to-day services and infrastructure of the other.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This site is not suitable, sustainable or viable and need to be removed from the plan now.

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Proposed site Exmo_20 is in conflict with paragraph 3.30. The settlement boundary around Exmouth has been extended to include not only the land which housing will be built on but also to include the 400m buffer zone adjoining the Pebblebed Heaths, effectively defining this land as acceptable for development. Although housing cannot be built on the buffer zone, by including it within the settlement boundary indicates that it may be available for other kinds of development. Therefore, the plan fails to robustly protect against adverse effects of recreational use etc, in relation to the SSSI Pebblebed Heaths.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: The 400m buffer zone needs to be removed from the settlement boundary and the policy map.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: There are multiple concerns regarding the 400m buffer zone and these need to be heard and addressed.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with policies SP01, TR03, OL09 and OL05, along with paragraphs 11.2 and 3.34. The description in the Draft Local Plan for Exmo_20 in relation to the vehicular access is ambiguous and open to interpretation. It states that 'Vehicular access to accommodate modest levels of development, will be allowed for southern site parts from the road Southern Wood.... Primary vehicle access to the site, serving the large majority/large bulk of development, will be from the B3179 to the North'. So 'modest' can be anything from 0% to 49% of development (0 to 343 homes), and 'bulk' can be anything from 51% to 100% of development (357 to 700 homes). I have asked for clarity with regards to the vehicular access for Exmo_20 on numerous occasions without any further clarification forthcoming (see attached evidence for an example of this). Due to this uncertainty I have been pushed to raise numerous submissions to cover all possibilities. This submission relates to the 0% and 100% option. This means that ALL vehicular access will be from the North of the site via the B3179. This will result in ALL of the residents having to travel over half a mile just to get out of the site, then another 4.3 miles to get to Exmouth town centre , or 2.2 miles to Budleigh Salterton town centre.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Exmo_20 is not suitable, sustainable or viable and needs to be removed from the plan now.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Site Exmo_20 is in conflict with policies SP01, TR03, OL09 and OL05, along with paragraphs 11.2 and 3.34. The description in the Draft Local Plan for Exmo_20 in relation to the vehicular access is ambiguous and open to interpretation. It states that 'Vehicular access to accommodate modest levels of development, will be allowed for southern site parts from the road Southern Wood.... Primary vehicle access to the site, serving the large majority/large bulk of development, will be from the B3179 to the North'. So 'modest' can be anything from 0% to 49% of development (0 to 343 homes), and 'bulk' can be anything from 51% to 100% of development (357 to 700 homes). I have asked for clarity with regards to the vehicular access for Exmo_20 on numerous occasions without any further clarification forthcoming (see attached evidence for an example of this). Due to this uncertainty I have been pushed to raise numerous submissions to cover all possibilities. This submission relates to the 49% and 51% option. This means that the site will effectively be split into two, as access to the North and South of the sites will have to be restricted to stop residents utilising both access points. This highlights new 'major' concerns for the Southern Wood access point, as this means that a development the same size as currently accessing Dinan Way from Meadowview Road, will be coming through Southern Wood (currently a cul-de-sac), onto Meadowview Road then onto Dinan Way. So, 'doubling' the amount of traffic currently using these routes which are already congested. This will still result in the majority of residents having to travel over half a mile just to get out of the site, then another 4.3 miles to get to Exmouth town centre, or 2.2 miles to Budleigh Salterton town centre.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

Continued from 69933b4cd22e167662e672f0 ///

Over the years the Village has grown and changed. The only area that has relatively unchanged (apart from some former buildings and railway line) is the area that borders Littleham including site Exmo_17 with its long agricultural history. On the proposed plan, very little detail is given regarding the local listed church compared to other sites that have been rejected. St Margaret's and St Andrews Church, which borders the site is grade 2* which carries much more of a historical significance. The plan states is that there is a listed Church to west of site and is of prominence in views and setting for southerly parts of the site as much of the site is remote from church. The site is not remote from the church. The church forms part of the special distinctive village and rural country feel of the whole site and is a significant heritage asset and has a direct impact on potential scope for accommodating residential development. To have an intensification of urban activity and vehicle movements, could adversely impact on heritage value as could other aspects of urbanisation. One example would be the potential over use of the public access through the churchyard, from the site to Littleham Road, south of the site.

On the proposed plan it also states that there are no other identified designated heritage features that would impact on site. However, when looking the Historic Environment Records (HERS) there are multiple HER Monuments. The first being that Littleham is the bounds of the original Saxon Manor (MDV41872). The current parish boundaries are unchanged since *** Personal details have been removed *** the Confessor or possibly earlier and the site has always been rural. Others include the 19th Century churchyard (MDV112441); the Exmouth to Budleigh Salterton Branch line Railway (MDV22498); Pond to the East of Capel Lane shown on previous maps including the Littleham Tithe Map of 1844 and is on current OS and Google maps (MDV111969); Extraction Pits on northern part of the site, of probable Post Medieval to Modern Earthwork Pit on aerial photos of 1950 onwards and LiDAR 1998-2012 (MDV106427 and MDV106428); Extraction Pit to the South East of probable Post Medieval to Modern and is visible as an earthwork pit on aerial photos 1946 onwards and on digital LiDAR images 1998-2012 (MDV196331); Pond to the South of Salterton Road on Tithe Map of 1844 and OS Maps (MDV111967); Extraction Pit to the Northwest (MDV106423); possible field boundary to south of Liverton Business Park. Potential Medieval to Post Medieval and visible as a two Cropmark Bank on aerial photos in 1969 (MDV106429); possible Early Medieval to Post Medieval field boundary to the south. Visible as a cropmark ditch on aerial photos in 1969; Orchard Banks to the North of St Margaret's and St Andrew's Church, Littleham. Orchard is likely Post Medieval to Modern. Linear earthwork banks on aerial photos 1946 onwards and digital images taken in 2010 (MDV106422); Earthwork Pit to the north of St Margaret and St Andrews Church, Littleham. Probable Medieval to Post Medieval in origin and is visible on aerial photographs 1950 onwards and LiDAR images 1998-2012. This could possibly be the former Manor House built in the 15th Century and known as The Lords House; and Buildings to the East of Capel Lane (MDV111334). Local to the site are several other listed buildings. These are the Lichfield Gate to the churchyard (grade 2) near the bottom of Littleham road and 1-5 Castle Cottages (grade 2 and HER Monument (MDV51057) which are visible from the site and near potential access to the site. Further away in the village are, Littleham Tithe Barn (grade 2), Mundy's Farm and cottage (grade 2), Green Farm (grade 2) Prattshayes Farm (grade 2) and 2 sets of Gate piers and iron gates at Prattshayes. The churchyard which borders the site contains several prominent resting places including the tomb of Lady *** Personal details have been removed *** as well as war graves. Littleham Village on the current neighbourhood plan is a potential site for a new conservation area, which it deserves to be. Ecological In the NPPF paragraph 174, planning policies, and decisions should contribute to and enhance natural and local environment by protecting and enhancing valued landscapes and sites of biodiversity; recognise intrinsic character and beauty of the countryside and its wider benefits. The site is seen as being favourable from an ecological perspective on the proposed plan. However, many ecological considerations have not been considered.

National Landscapes positively enhance their beneficial use, provide access and opportunities for recreation, as well as retain and enhance the landscapes visual amenity and biodiversity. The site may not be part of the Pebblebed Heaths on Woodbury Common, but the site does act as a wildlife corridor towards this and is in the National Landscape. From site Exmo_17, you can access Woodbury Common, which is not far away for wildlife. Site Exmo_17 is also near World of Country life, that promotes the local habitat for bees and other insects. Also at night site Exmo_17 does not suffer from artificial light pollution, which helps to support our nocturnal wildlife. Paragraph 176 in the NPPF states that great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and National Landscapes which have the highest level of protection in relation to these issues. The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas and are given great weight to avoid or minimise adverse impacts on designated areas. There are many local features of interest, notably mature hedgerows, and trees, including Oak trees, which help support the local wildlife. The site is near local woodland and the bordering churchyard offers a biodiversity of local flora and fauna including a habitat for butterflies, birds, bats, and other insects. In certain parts of the churchyard, the grass is not cut to help provide biodiversity. The churchyard also contains a natural burial ground which backs onto site Exmo_17.

On first looks of site Exmo_17, agricultural fields are seen, but on further inspection, the site offers a well-known wildlife habitat for various species including bats, various birds including Green Woodpeckers, badgers, deer, dormice, adders, rare wood crickets, butterflies, dragonflies, and plants. This is signposted on the information boards along the cycle path and walkway that runs through the site. To develop this site would have a vast detrimental affect on the local wildlife that would permanently destroy their habitats. NPPF paragraph 180 when determining planning applications consider if significant harm to a biodiversity resulting from development cannot be avoided, adequately mitigated, or compensated for it should be refused. This is further supported by the Governments 25-year Environment Plan which sets out goals for improving the environment within a generation and leaving it in a better state. Also, the current landowner of site Exmo_17 Devon Clinton Estates on their website states the following: “Doing today what is right for tomorrow”; “By handing on the land to future generations in a better condition”; “By investing in the local community” and “Everything we do is with tomorrow in Mind”. To continue these principles, site 17 should not be developed. The site should be protected from development and the local wildlife habitats and landscape saved for future generations. It is also important to recognise that (P35 paragraph 120b of the NPPF) when making effective use of land,

some undeveloped land can perform many functions such as wildlife, recreation, flood risk mitigation, carbon storage and food production.

The East Devon National Landscape Support farming in the National Landscape to help protect habitats, species and support local communities in sustainable farming. Over 90 percent of the UK population live in areas where local government has declared a climate emergency. With native species and habitats in decline like never before, National Landscape partnerships have made a formal commitment of their own to increase scale and pace of delivery of nature in form of the Colchester declaration. Therefore, how can Exmo_17 be considered for development. It is used for farming and wildlife is abundant there.

Accessibility on the proposed plan it is stated that parts of site fall within 1600m of facilities; parts of the site are close to a frequent bus service and that Littleham village is to the south of the site with an industrial estate to the north, though it is across a busy main road. There is no mention that site Exmo_17 is outside the town boundary and is one of the furthest sites away from the town centre. The closest bus service predominantly only covers Exmouth. Buses to Sidmouth are infrequent and to go to Exeter, the best option is to catch the 57 buses from Littleham Cross, which is at least a 25-minute walk away from the closest part of the site. The closest supermarket would more than 1600 metres from the mid to furthest part of the site. There are no shops in Littleham Village and the only amenities are the pub and tearoom. The local primary school on the furthest part of the site would unlikely be in walking distance. The only secondary school is most definitely not in walking distance and the local bus does not go near the secondary school. The secondary school is in cycle distance along the cycle path after Littleham Cross but may not be suitable after dark due to it backing onto gardens from both sides with limited street lighting. The local train station is in the town centre, which is a lot further than 1600 metres from the closest site and would be at least a 60-minute walk. There is no pathway along Castle Lane and no pathway directly outside the site on Salterton Road. The main accessibility along the site is from the cycle path and walkway. Traffic through Littleham can be busy when Devon Cliffs and World of Country life are open. Most employment opportunities are in Exeter, and there are only 2 main roads out of Exmouth due to its location, which are already struggling with excess traffic and will only worsen with more development.

Site Constraints on the proposed plan it states that there are no significant site constraints, but there would be expected local constraining within the site due to its size. I disagree with this. This site does have significant site constraints. Firstly, the sites

ecological value to the local habitat and wildlife which would be permanently destroyed if development was to go ahead. Secondly the green infrastructure of the former railway line which is now part of the well-established cycle path and walkway. It forms part of the National Cycle Network (Sustrans) NCN2 from Dover to St Austell and the international Tour de Manche between Plymouth and Poole. This is a valued form of green infrastructure valued by not only the local community, but further afield as well. There are 9 design principles to be on the Sustrans including its attraction and enhanced ecological features as well as being safe and accessible traffic free paths. Its currently a free to use and safe path for cyclists and walkers of all ages and accessibility needs, with no risk of potential harm from vehicles. It also helps to support both health and wellbeing of the community, deliver wider benefits for nature and support efforts to address climate change (an issue raised in the NPPF, p27 paragraph 92c and p28 paragraph 98). This could easily be lost through development due to having to meet set criteria. Paragraph 100 p29 of the NPPF, discusses that planning policies and decisions should protect and enhance public rights of way including current access links to national trails. It is proposed to have a road go straight through this network, which will severely impact on the safety of children, dogs, wildlife, families, walkers, runners, cyclists and those who use mobility scooters who use the cycle path and walkway. Are cars really going to stop to let people pass? The site is boarded by both a busy road and 2 lanes, which would struggle to cope with increased traffic as well as adding to increase both environment and noise pollution. There are very limited foot pathways with none on Castle Lane (and unlikely to be) and none outside the site on the busy B3178 (Salterton Road). The only lane that has footpaths is Capel Lane, although not along its full length. Within site Exmo_17 there are mature hedgerows and trees including Oak, with 2 trees having a TPO. North of the site is the SWW underground reservoir with evidence of possible private piping near this on the site. Devon Air Ambulance are also known to use part of the site to land the helicopter in an emergency for this side of Exmouth. The site also contains multiple HERs and borders the local grade 2* church and its surrounding 12-acre churchyard.

Inappropriate development in green belt land including National Landscapes is treated as being harmful and in paragraph 144 of the National Planning Policy Framework (NPPF) paragraph 172, is a reason for refusal in general development control in National Landscapes. The Exmouth Neighbourhood Plan argues against any development outside the current BUAB due to the amount of housing development within Exmouth without any provision to improve local infrastructure and does not support any development outside of the BUAB.

According to the National Flood and Coastal Erosion Risk Management strategy for England and the South West River Basin Direct Flood Risk Management Plan 2021 to 2027 (December 2022 by the Environment Agency), Littleham is in a flood risk area (FRA). Due to its location, Littleham and parts of site Exmo_17 are at risk of fluvial flooding from the Littleham Brook, surface water flooding from runoff and flooding from the drainage network due to the inability of the sewage network to cope during high rainfall and tidal locking. All forms of flooding impact on the local area including the environment, listed buildings, homes and businesses. Littleham, as per the government website, is currently a high-risk area of surface water flooding. Littleham and part of site Exmo_17 is in a high-risk fluvial flood zone, which is greater than 3.3% Annual Exceedance Probability (AEP) and not flood zone 2 which is 0.1% AEP on the current draft plan. Within Littleham village there is a history of flooding from the Littleham Brook and surface water runoff from Castle Lane and the Devon Cliffs access road to the south. Replacement of the road culvert has alleviated much of this flooding, but there is still surface flooding in Maer Lane. Due to the area becoming more urbanised, resulting in more surface water runoff and the aging drainage infrastructure there is an increase in risk level. This will only worsen with more development and climate change. Rainfall intensity is expected to increase in the future and cause higher river flows and levels with rapid run off from upper catchments and more flooding. The middle part of Littleham Brook flows through an urban area which will see an increase in flood frequency and impacts. This is also partly due to the limited scope to increase the capacity of the structures that cross through Littleham Brook which may further constrict flow. Tide locking of the outfall of Littleham Brook into the sea will also occur more frequently due to sea level rise. It is also expected to frequently overload the aging sewage network, placing a greater reliance on pumped systems to disperse the drainage and an increase in pollution. Flooding is also discussed in the NPPF chapter 14 that inappropriate development in areas at risk of flooding should be avoided by directing development from higher risk areas, so as not to increase flood risk elsewhere. All plans should apply a sequential risk-based approach to location of development and consider all sources of flood risk both now and in the future and to safeguard land from development that may be required for future flood management.

Site Opportunities Site Exmo_17 on the proposed plan is stated as being a large-scale site, that if it is allocated for development as a whole or just parts, it would be expected that a mixed-use development could deliver a range of positive outcomes. I disagree with this. The site is currently used for farming, which is vital if we are to become sustainable. Also, with the closer proximity to Exeter, most employment opportunities are in Exeter, which has better links to other areas of the country compared to Exmouth. The site sits outside of the BUAP and is further away from the town centre. Site Exmo_18 in Exmouth, which is land directly to east of Liverton Business Park and is close to site

Exmo_17, is for employment allocation. Liverton business park tends to have smaller businesses that have lower employment numbers of staff required locally except for 3 businesses. There is currently no need for the site Exmo_17 to be developed for other employment uses and would be far better to be kept for farming, where there is a need.

Paragraph 177 in the NPPF states when considering applications for development within National Parks, the Broads and National Landscape 1permissions should be refused for major development, other than in exceptional circumstances where it can be demonstrated that the development is in the best public interest. Consideration of the following (a) need for development including in terms of any national considerations and the impact of permitting it or refunding it upon local economy; (b) cost of and scope for developing outside designated area, or meeting need for it in some other way; (c) any detrimental effect on environment, landscape and recreational opportunities and extent to which it could be mandated. Footnote 60 p51. For the purposes of paragraphs 176 and 177, whether a proposal is a ‘major development’ is a matter for the decision maker, considering its natural scale and setting and whether it could have a significant adverse impact in the purposes for which the areas has been designates or defined. There is no clear definition of a major development, but in the NPPF glossary, it is described as a site of more then 10 houses or a site bigger then 0.5 hectares. For site Exmo_17, I would consider this as being a major development in the National Landscape.

The housing that is needed in Exmouth is affordable housing for the local community, rather than new houses on the open market (this is supported by NPPF paragraph 78 p21). Brown field sites not allocated for housing, could be used as Entry level exception sites for first time buyers and those looking to rent their first home. Entry level exception sites are not permitted in the National Landscape and green belt areas (p19 paragraph 72b of the National Planning Policy Framework, 2021). As large-scale developments tend to have very little affordable housing, I can only imagine developers using this to their advantage and limiting the number of affordable homes and instead build unwanted expensive houses that the community does not need and cause a major destruction of the National Landscape. Paragraph 73 p20 of the NPPF, describes larger scale development as significant extensions to existing villages and towns, that need to be well allocated and designed and supported by necessary infrastructure and facilities including a genuine choice of transport modes, economic potential, and scope for net environmental gains. Also, when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre (NPPF paragraph 88 p25). Site Exmo_17 sits outside of the BUAB with poor road infrastructure both locally and outside of Exmouth. Public transport is poor in

this area and the site is not well served by local amenities. In the healthcare sector, emergency health care and Gp practices are struggling and there are long waiting lists to join an NHS dentist. There is only 1 local Acute Hospital in Exeter.

Due to location of site Exmo_17 in the National Landscape, the opportunity is there for further environmental net gains, provided it is kept free of development such as building on the current biodiversity and habitat protection the site offers. An economic potential is to retain the cycle path and walkway, which also supports green tourism and maintain the rest of the site for agricultural use. This helps to support sustainability and the health and wellbeing of the community.

I agree that the whole, the site would be a poor choice for allocation of development, even if only a part of it was developed considering major development within the National Landscape in appendix 2 in the NPPF a development of more than 10 houses or the site is 0.5 hectares, or more is seen as a major development. Also, the chances are high that any potential housing would be unaffordable for the local community. The site sits within open countryside inside the National Landscape and is outside of the BUAB. The site offers far reaching views and feels separate from the urban sprawl of Exmouth. The site has a local intrinsic value that is enjoyed by both the local community and those from further afield. The site has an already established green infrastructure that is enjoyed by those of all ages and abilities and is part of the well-known National Cycle Network and is a viable habitat for the various local wildlife and not of low ecological value as stated in the proposed plan. This would be permanently destroyed with development. The site also borders the grade 2* village church, which is a significant heritage asset and development of the site could have a significant detrimental effect on both the church and the surrounding graveyard and its biodiversity. There are also other grade 2 listed buildings near by as well as HERs.

For employment reasons, the site is currently used as agricultural land, which it has been for many years. To be sustainable, we need our farmland, so we can try to be more carbon neutral and support local farm businesses. If this site was developed, this would be lost forever. The site if developed, would raise significant issues about suitability and desirability of accommodating a major large-scale development in the National Landscape. The NPPF discusses sustainable development for plan making, and the application of policies in this framework seek to protect areas or assets of particular importance and provides strong reason for restricting overall scale or type of development or destruction of landscape in the National Landscape. The effects of pollution on health, living conditions, natural environment as well as the potential

sensitivity of the site that could occur from development should be identified. This includes both air quality, light pollution, and excess noise from traffic. Rejecting site Exmo_17 for development will help to protect this tranquil area which has remained relatively undisturbed by noise and pollution. The site is currently prized for its recreational and amenity value including the current habitat and biodiversity; the dark landscape at night, which can aid nature conservation and the cycle path and walkway. To develop site Exmo_17 would only lead to increase in noise, pollution and destruction of the local wildlife habitats and amenity value including the health and wellbeing of the community. Also, the site prevents the urban sprawl of Exmouth encroaching further into the much-needed countryside. In November 2022 Historic England and National Landscapes signed joint statement to manage, conserve and celebrate our iconic historic environment. This helps set a precedent on the value that National Landscapes can offer not only the local community, but nationally as well. Too much land designated in the National Landscapes has been lost to development nationally and now the government would like to increase the number of National Landscapes. Site Exmo_17 location carries a significantly high amenity value compared to sites that are not in the National Landscapes or near conservation areas. It is a both wildlife corridor for this side of Exmouth and a link to the proposed Mear Valley Park.

With the policies regarding the National Landscape and the NPPF, development should not be considered if in conflict with neighbourhood plans. Site 17 being outside of the BUAB is not supported on the neighbourhood plan.

Many sites with similar characteristics to site 17 have been rejected, with the issues raised considered significant enough to reject other sites given less weighting for site Exmouth 17. The reasons for rejection include:

- Grassland fields that are open and exposed in landscape terms and large parts have a rural rather than urban fringe character. There are some hedgerow boundaries with some mature trees. The views from the site are open and exposed, including long distance views. Easterly parts of site are remote from services and facilities and if developed would form a quite large ‘tongue of development’ projecting into open countryside with visual impacts on areas of open countryside and designated National Landscape. Exmo_17 which is in the National Landscape has far reaching views and quality land, and can be seen from the South West Coast Path. The site is also exposed and can be remote from public services.
- Proximity to a Grade 2 listed building. This reasoning has not been applied to Exmo_17 which borders the more significant higher graded Grade 2* Church in Littleham.

- High landscape value as it lies within the AONB, and impact on local listed buildings. Reasons which are also true for Exmo_17.
- Existing field forms being an attractive feature and development could affect the setting of designated and non-designated heritage assets. These reasons equally apply to Exmo_17, but have not been included in the plan.
- Being in a National Landscape and having high landscape sensitivity. Both reasons apply to Exmo_17.
- The site is bordered by agricultural fields despite local residential development providing some context of built form. Whereas this reasoning is turned upside down for Exmo_17, where the local residential development providing some context for development is used as a benefit for development. The argument cannot be used both ways.
- Development would affect the special character of local listed heritage assets. A reason which holds true for Exmo_17.
- High landscape sensitivity to new development, a reason which holds true for Exmo_17.
- Location of the site within the National Landscape and the effect of development on local heritage assets. Reasons which are also true for Exmo_17.
- Open and exposed nature of the site in terms of landscape and its rural rather than urban fringe character. These characteristics apply equally to Exmo_17, therefore should be rejected since in addition to its open landscape and rural character, also lies within the National Landscape.
- Development would have a high landscape impact and the site being within the AONB. Both being reasons against development within Exmo_17.
- Site falling within the National Landscape and having a high impact on the landscape. Despite the site being located next to a major junction and sandwiched between two main roads. Surely the landscape impact of development within Exmo_17, must be greater.
- Impact of development on landscape and heritage due its location within the AONB and the adjoining grade 2* church. This is the same situation as Exmo_17. Therefore, surely it must be rejected for the same reason. There are many other examples of this inconsistent approach to assessing the development potential of Exmo_17, which are too numerous to detail here. It is apparent that only the benefits of the development of Exmo_17 have been considered any negative impacts glossed over by the plan as it stands. Prior to adoption of the plan, a full assessment of the benefits

and negative impacts of development within Exmo_17 could only conclude that the site be rejected for development within the East Devon Local Plan.

This is an area the size of 4 football fields that stretches from opposite McDonalds right down to Castle Lane with industrial units next to Salterton Road plus 410-450 houses. There would be one access road with one exit onto Salterton Road. The access road would go straight across the old railway line which is now a well-used wide cycle and footpath.

I believe, alongside many in our community, that the natural beauty of Exmo_17 should be preserved. EDDC has a legal duty to 'conserve and enhance' National Landscape and I want to stop the loss of our precious space and natural beauty. Until very recently it had two protections to prevent building: National Landscape and Coastal Preservation Area. EDDC consulted on whether the CPA protection should be removed. Hundreds of Exmouth residents said no, but despite this, EDDC voted to remove that protection. National Landscape is of equal importance to National Parks and should not have large scale building on it. If house building and light industry on Exmo_17 were allowed, it would take away the beauty that attracts visitors to the area: tourism that the town depends upon. It would also create a precedent that could destroy areas of National Landscape that surround East Devon's coastal towns. Based on local building projects in recent times, we cannot be certain either that the 'affordable' homes will be in the reach of people on low incomes or that the number of such homes promised by the developer will actually materialise. The proposal to build industrial units next to the main road, the entranceway to the town from the East, is incongruous. It would make much more sense to add them to the trading estate on the opposite side of the road, which is owned by the same landowner.

A further fault with this location is the fact the proposed access road has only one exit (onto the main road) and would go straight across the old railway line which is now a well-used wide cycle and footpath. It would also result in the felling of mature trees and bushes and a biodiversity loss, that has not been fully considered. It would be too much of a biodiversity loss.

I believe that to destroy this beautiful landscape would be sheer folly, depriving both present and future generations of enjoyment and wellbeing. It would not be in the public interest of Exmouth to allow building on Exmo_17. EDDC are expected to be clearly demonstrate that they have considered the purposes of the National Landscape

designation in their decision which I feel they have not as why would this proposed development to get this far? This site as previously stated is protected land and not for the profit of development. Let the site continue to be protected as per the statutory laws there to protect land within National Landscapes now and for future generations.

Full name: Chrissie Hunn

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: ///
Continued from 6980b6177faabad74e38a226 ///

National Landscapes are afforded the highest standards of protection in relation to landscape and scenic beauty, reflecting their importance under long established legislation. In practice permission for development can only be granted by the local planning authority national park authority or the planning inspectorate on behalf of the Secretary of State, and only in exceptional circumstances. David Reed believes that delivering homes the community needs, without sacrificing the very landscapes that make places like East Devon special.

*** Personal details have been removed ***, on behalf of the Housing Minister, ***
Personal details have been removed ***, has confirmed this in a letter to our local MP David Reed in August 2025, regarding protection of land in the National Landscape .

The Rt hon *** Personal details have been removed *** 16th December 2024, spoke about protected landscapes to be strengthened with new legislation and guidance to protect nature. This move comes amid the Government's push to promote access to nature, as part of the wider Plan for Change. New powers are to be granted to the

country's iconic National Parks and National Landscapes to boost nature's recovery and access to the outdoors. New legislation and guidance will give National Parks and National Landscapes a clear mandate to widen the public's access to nature through strengthened purposes and make changes to improve their governance that will allow for greater innovation and collaboration to prepare them for the future. The changes announced will see more trees planted, more peat restored and more habitat created, supporting Protected Landscapes to play a leading role in meeting Net Zero, Environment Act targets and the commitment to protect 30% of land for nature by 2030 as part of our Plan for Change. Covering a quarter of England's land area, improving the state of nature in our National Parks and Landscapes is vital to the health of our ecosystems. Our Protected Landscapes are home to nationally important habitats and our most iconic species – yet many are in a poor condition with the wildlife that lives within their boundaries in steep decline and the waterways that give many of these landscapes their magic now sadly polluted. The measures will include a general power of competence for National Park Authorities, which will clarify their legal framework, removing restrictions which prevent an entrepreneurial approach, and cutting through bureaucracy to remove barriers to achieving more for people and nature. The package will also strengthen the role that public bodies, including water companies, must play in delivering better outcomes for nature, water, climate and access to nature in these special places, through new regulation that will support public bodies and Protected Landscape organisations to work more closely together. Refining the purpose and powers of National Parks and National Landscapes will promote access to nature for the millions of people who visit these iconic landscapes each year, helping them to support a thriving rural economy and enable people to reap the benefits of spending time in greener and wilder places. These changes will empower Protected Landscapes to deliver more for nature and tackle climate change over the next 75 years and beyond. This reflects their vital importance to the nation – from protecting us from flooding, to celebrating our heritage and restoring our health and wellbeing. It's seventy-five years since our National Parks and National Landscapes were created, and they have done incredible work protecting some of our most treasured and beautiful landscapes. But so much of our countryside and wildlife is in decline so we must do more to protect it. To mark this anniversary the Government will introduce new laws to boost protections for the natural world, strengthen our National Parks and National Landscapes and increase opportunities for millions of people to enjoy the great outdoors. As an immediate step, the new guidance will help public bodies work together to make these special places greener, wilder and more accessible.

Natural England Chair *** Personal details have been removed *** said The 1949 National Parks Act laid the foundations for modern nature conservation, enshrining in law the means to protect dozens of exceptional landscapes and thousands of our best

wild places while bringing joy to millions of people across multiple generations. Despite the achievements, however, these legal protections have not been sufficient to prevent Nature's continuing decline. And whereas in decades past the challenge was about conservation, today we must not only hang on to what is left, but to also invest in Nature's recovery. Our countryside and green spaces are a source of great national pride, and government's commitment to delivering on nature, increasing access, planting three new National Forests, creating nine new National River Walks and empowering communities to create new parks and green spaces in their communities with a new Community Right to Buy.

The Government states that it is committed to restoring nature across the country, and announced a rapid review of the Environmental Improvement Plan, which thriving Protected Landscapes will be essential in delivering. This will set out pathways to clean up our waterways, reduce waste across the economy, plant millions more trees, improve air quality and halt the decline in species by 2030. A healthy natural environment is crucial to the nation's health and prosperity, which is why nature recovery is an integral part of the Government's Plan for Change to create a decade of national renewal. Protected Landscapes – the collective term for National Parks and National Landscapes – range from lowland landscapes, such as the Cotswolds and the Norfolk Coast, to uplands such as the North Pennines and the Lake District. Protected Landscapes contain half of England's priority habitats and Sites of Special Scientific Interest, 60% of deep peat and around 88% of heather and acid grassland habitats. Restoring our Protected Landscapes will be essential to protecting 30% of the UK's land and sea by 2030. Protected Landscapes' refers to National Parks, the Norfolk and Suffolk Broads and National Landscapes in England. National Landscapes' is the rebranded name for areas of outstanding natural beauty (AONBs). This name change is not statutory. The Protected Landscapes duty guidance sets out how the Protected Landscapes duty is intended to operate and provides broad principles to guide relevant authorities in complying with it. Relevant authorities must now 'seek to further' the statutory purposes of Protected Landscapes. This replaces the previous duty on relevant authorities to 'have regard to' their statutory purposes. The duty is intended to facilitate better outcomes for England's Protected Landscapes, which are in line with their statutory purposes. The duty does not prevent relevant authorities from undertaking their statutory functions and discharging their legal duties and other responsibilities. The duty is intended to complement these requirements by ensuring that the purposes for which Protected Landscapes are designated for are recognised in reaching decisions and undertaking activities that impact these areas. Exmo_17 needs to be recognised as a site of protection from development.

As previously mentioned, National Landscapes have equivalent protection to National Parks. Duty of EDDC is to ‘conserve and enhance’ the National Landscapes in our area. Despite this, they have allocated National Landscapes on the edge of Exmouth, for building a huge estate and industrial buildings. These fields serve 2 farms and their sale would make millions for both Clinton Devon Estates and Bloor Homes, opened by a billionaire. Clinton Devon Estates could have offered land on the opposite site of Salterton Road, which is outside the National Landscape. Maintaining the National Landscape protection for the community and wildlife, is more important than making money.

Consideration of what is reasonable and proportionate in the context of fulfilling the duty is decided by the relevant authority and should take account of the context of the specific function being exercised. Relevant authorities will need to apply the duty when undertaking any function in relation to, or so as to affect, land in a Protected Landscape. This may include the preparation of Development Plans and associated assessments and documents and decision making in respect of development management, planning applications and nationally significant infrastructure projects, functions outside of a Protected Landscape which may have an effect on land in a Protected Landscape. When seeking to further the purposes, relevant authorities should consider the information contained in a Protected Landscape’s Management Plan. Management Plans describe the natural beauty, special qualities and key characteristics of and targets and objectives for the designation. Relevant authorities should make efforts to understand the Management Plan and relate their functions to it. Dialogue with the Protected Landscape team (National Park Authority, Conservation Board, National Landscape Partnership, or Joint Advisory Committee) can assist the relevant authority. A relevant authority should take appropriate, reasonable, and proportionate steps to explore measures which further the statutory purposes of Protected Landscapes. As far as is reasonably practical, relevant authorities should seek to avoid harm and contribute to the conservation and enhancement of the natural beauty, special qualities, and key characteristics of Protected Landscapes. A relevant authority should be able to demonstrate with proportionate, reasoned, and documented evidence the measures to which consideration has been given when seeking to further the statutory purposes of Protected Landscapes - for example, policies, strategies, operational procedures, estate management plans, investment plans, contracts, works instructions, assessments and reports which should be able to evidence the proper discharge of the duty by the relevant authority. For development plan making and development management decisions affecting a Protected Landscape, a relevant authority should seek to further the purposes of the Protected Landscape - in so doing, the relevant authority should consider whether such measures can be embedded in the design of plans and proposals, where reasonably practical and operationally feasible.

For the development and management of land, water and estates, relevant authorities should seek to further the purposes of the Protected Landscape when designing and undertaking these activities, where reasonably practical and operationally feasible. Public authorities must also comply with the strengthened Biodiversity that the Environment Act 2021 introduced.

The statutory purposes of National Landscapes (areas of outstanding natural beauty) with Conservation Boards are conserving and enhancing the natural beauty of the area of outstanding natural beauty and increasing the understanding and enjoyment by the public of the special qualities of the area of outstanding natural beauty.

The Management Plan describes the natural beauty, special qualities and key characteristics of a Protected Landscape. This will articulate the features of the landscape which warrant its nationally designated and protected status.

The duty also applies to functions undertaken outside of the designation boundary which affects land within the Protected Landscape. Natural beauty, special qualities, and key characteristics can be highly dependent on the contribution provided by the setting of a Protected Landscape. Aspects such as tranquillity, dark skies, a sense of remoteness, wildness, cultural heritage or long views from and into the Protected Landscape may draw upon the landscape character and quality of the setting. Functional connectivity is also important where there are flows or close interconnection between the Protected Landscape and its setting, for example a shared water catchment and management of water resources; ecological connectivity where species are able to move across and between the designated and non-designated area; Rights of Way, Open Access Land and other recreational links joining the designated area to the wider countryside.

Development and the management of land, water and estates located in the setting have the potential to adversely affect the natural beauty, special qualities, and key characteristics of a Protected Landscape.

On 21st March 2025 it was published a meeting of major landowners to boost nature's recovery to discuss land management plans to meet the country's legal Environmental Act targets (Department for Environment Food and Rural Affairs and The Rt Hon Steve Reed OBE MP). It is part of Government's commitment to transform how we use land in

this country to protect the environment, support economic growth and deliver on our Plan for Change. It will play a pivotal role in supporting the Government's ambitious environmental goals, including statutory targets in the Environment Act and the commitment to protect 30% of land by 2030. With the natural world facing species decline and a biodiversity crisis, Reed called on the group for action to collectively protect and restore nature on their estates across England. Landowners must go further and faster to restore our natural world. The 'National Estate for Nature', who manage a tenth of the land in this country, have a responsibility to future generations to leave the environment in a better state. We have a unique opportunity to work together on common sense changes that create a win-win for nature, the economy, and make the best use of the land around us. Tony Juniper, Chair of Natural England talked of if we are to reverse the historic declines in nature, we must take urgent action at every level to restore nature on the ground. This group is an important first step in securing a strong commitments from landowners across the country to collaborate on managing land in a more sustainable way, for the benefit of both people and nature. We need work together to find the long-term solutions for key challenges, such as the demand for new homes and infrastructure, and the need to halt long-term biodiversity loss and recover nature.

*** Personal details have been removed ***, Director of Land and Nature at the National Trust said as the Government's Land Use Framework makes clear, a transformation in the use of land is needed if we are to meet our nature and climate targets. Only by working together will be able to restore our landscapes at the scale needed to put nature in recovery by 2030, lock up enough carbon in the English countryside to reduce greenhouse gas emissions to required levels, and prepare for the worsening impacts of climate change. We are committed to playing our part.

It represents institutions with significant holdings across the country, and associated significant potential to drive nature's recovery, a vital part of the government's national conversation about land use ahead of publishing a Land Use Framework in 2025. The broad representation also ensures that the group can draw on a wealth of expertise and experience in land management, conservation, and sustainable development, enabling them to develop and implement effective strategies for nature recovery, sustainable land use, and environmental protection. Defra will actively participate as a member, leading by example and supporting the group with guidance, resources, and coordination as they work toward meeting the Government's environmental targets. Further quarterly meetings will focus on developing and implementing agreed on-the-ground plans to drive nature's recovery. This comes following the introduction of new measures to strengthen our protected areas and meet 30by30 that show this government is committed to delivering for nature. As part of the government's

Environmental Improvement Plan (EIP), everyone, from land managers to homeowners, has a crucial role to play in restoring the natural environment.

‘Protected Landscapes’ refers to National Parks, the Norfolk and Suffolk Broads and National Landscapes in England. ‘National Landscapes’ is the rebranded name for areas of outstanding natural beauty (AONBs). The Protected Landscapes duty is intended to operate and provides broad principles to guide relevant authorities in complying with it. Section 245 (Protected Landscapes) of the Levelling-up and Regeneration Act 2023 (LURA) amends the duty on relevant authorities in respect of their functions which affect land such as in National Landscapes in England. Relevant authorities must now ‘seek to further’ the statutory purposes of Protected Landscapes. This replaces the previous duty on relevant authorities to ‘have regard to’ their statutory purposes. The duty is intended to facilitate better outcomes for England’s Protected Landscapes, which are in line with their statutory purposes. The duty does not prevent relevant authorities from undertaking their statutory functions and discharging their legal duties and other responsibilities. The duty is intended to complement these requirements by ensuring that the purposes for which Protected Landscapes are designated for are recognised in reaching decisions and undertaking activities that impact these areas. Consideration of what is reasonable and proportionate in the context of fulfilling the duty is decided by the relevant authority and should take account of the context of the specific function being exercised. Relevant authorities will need to apply the duty when undertaking any function in relation to, or so as to affect, land in a Protected Landscape. The preparation of Development Plans and associated assessments and documents; decision making in respect of development management, planning applications and nationally significant infrastructure projects; functions outside of a Protected Landscape which may have an effect on land in a Protected Landscape; the drafting of Protected Landscape Management Plans; planning appeals and public inquiries; the drafting of Local Nature Recovery Strategies; other plans such as Neighbourhood Plans.

When seeking to further the purposes, relevant authorities should consider the information contained in a Protected Landscape’s Management Plan. Management Plans describe the natural beauty, special qualities and key characteristics of and targets and objectives for the designation.

Relevant authorities should make efforts to understand the Management Plan and relate their functions to it. They should also refer to the Protected Landscapes Targets and Outcomes Framework. A relevant authority should take appropriate, reasonable,

and proportionate steps to explore measures which further the statutory purposes of Protected Landscapes. As far as is reasonably practical, relevant authorities should seek to avoid harm and contribute to the conservation and enhancement of the natural beauty, special qualities, and key characteristics of Protected Landscapes. The statutory purposes of National Landscapes are:

- conserving and enhancing the natural beauty of the area of outstanding natural beauty. The Management Plan describes the natural beauty, special qualities and key characteristics of a Protected Landscape. This will articulate the features of the landscape which warrant its nationally designated and protected status. The duty also applies to functions undertaken outside of the designation boundary which affects land within the Protected Landscape. Natural beauty, special qualities, and key characteristics can be highly dependent on the contribution provided by the setting of a Protected Landscape. Aspects such as tranquillity, dark skies, a sense of remoteness, wildness, cultural heritage or long views from and into the Protected Landscape may draw upon the landscape character and quality of the setting. Functional connectivity is also important where there are flows or close interconnection between the Protected Landscape and its setting, for example, access for wildlife and rights of way, open access land and other recreational links joining the designated area to the wider countryside. Exmo_17 already offers this, and to build on the site, would have a detrimental affect to the area. Development can the have the potential to adversely affect the natural beauty, special qualities, and key characteristics of a protected landscape. The National Landscapes Association (NLA) is a registered charity that supports the mission to conserve and enhance natural beauty in National Landscapes and other protected areas. One of our key aims is to support and develop a network of ambitious National Landscape teams and partnerships that have a strong collective voice and a positive impact on the places for which they care. This consultation response has been developed by the National Landscapes Association in collaboration with the Planning and Place making specialist panel of representatives from across the National Landscapes network.

National Landscapes are areas whose natural beauty is so outstanding that it is in the nation's interest to safeguard them. They are also living and working environments that need to help mitigate and adapt to the impacts of climate change. However, the proposed reforms would set an expectation for a quantum of housing development, in local authority areas that overlap with National Landscapes, that is likely to result in significant harm to the natural beauty of our National Landscapes. As such, the reforms would conflict with the statutory purpose of conserving and enhancing this natural beauty. The reforms would also conflict with the statutory duty to seek to further this

purpose. Therefore, they consider that the proposed reforms would not be legally compliant in this regard.

The NLA believe that the Government's aspiration to build 1.5 million homes over the next five years can be delivered in a way that would be less harmful to the natural beauty of our National Landscapes than would be the case with the proposed reforms. In particular, the NPPF should make more explicit reference, including in paragraphs 35(a) and 61, to the fact that there may be circumstances where the protection afforded to areas or assets of particular importance, including National Landscapes, may mean that objectively assessed needs for housing development cannot be met in full.

Exmo_17 was agreed for allocating despite being a poor choice for development but in context of plan strategy directing large scale development to Exmouth on balance despite site limitation considerations allocation is seen as appropriate. Sensitive in landscape terms with extensive views south, more tranquil and more stark north, but the report fails to mention the wide views you get from the top of the site. Fields of low ecological value do still provide a habitat for wildlife. Deer have been seen in the fields. There is not a frequent bus service. Littleham village has a pub, a seasonal café but no shops.

The neighbourhood plan talks of the built up area boundary (BUAB) to cater for and contain the town and future planned development needs to protect the open countryside. There is a presumption against development in the National Landscape outside of the defined boundary. This is particularly relevant to Exmouth given the very special environment that surrounds it. However, the amount of housing development in Exmouth without the provision of adequate infrastructure argues against any development outside the boundary. The neighbourhood plan will not be allocating sites for housing outside the BUAB.

Exmouth should not be a tier 1 site as does not offer potential for accommodating growth and development. Even the EDDC are not based in Exmouth, and instead are based at Honiton. Site Exmo_17 is a large, sloped site area of open space that is to the east of the historic Village of Littleham. The entire site is within the National Landscape and sits outside of the built-up area boundary (BUAB). It contains a network of agricultural fields that are currently farmed and a well-established walkway and cycle path, as well as the Littleham Brook and multiple Historic Environment Records (HERS). In the current neighbourhood plan the National Landscape is a designation that

recognises the protection of its special landscape as being of national importance, equal to landscapes of our national parks. It also states that development outside of BUAB will not be supported.

According to the draft plan there is no direct infrastructure concerns, but if developed there would be large scale infrastructure needs. For example, exit from site Exmo_17 would create traffic chaos and the access road would go straight across the much used Exmouth to Budleigh cycle path and walkway, endangering children, families, elderly, walkers, cyclists and both dogs and wildlife. South of the site is Castle Lane, a single narrow country lane with no pavement which is in a high flood zone area (as per the current Environment Agency Flooding Plan) due to proximity to Littleham Brook and surface water run-off. West of the site is Capel Lane, a narrow road, which is sealed off to traffic 1/3 of the way up and is busy already with traffic accessing Littleham Village and the surrounding housing estate. Site 15 would have its access from Capel Lane, and this currently has a tall hedgerow across and is on one of the narrowest parts of the Lane, close to another road junction. Both Capel Lane and Castle Lane join Littleham Road which can be busy with traffic especially when Devon cliffs and World of Country life is open. Access through Littleham Village can be busy due to the bridge access near the Clinton Arms being for single traffic despite being widened in the 1930s. North of the site is B3178 (Salterton Road), a busy main road. The site access that would need to be created is opposite a very busy junction off Liverton Business Park. It is also where the local Ambulance and Fire Station is based. Recently the junction was extended to help ease traffic but has not been effective. Further down (Salterton Road) are traffic lights, but traffic lights here would be ineffective due to the increase in stationary traffic it would cause. There are no public pathways along the site's boundary with Salterton Road and it would be difficult to create a public crossing as Salterton road slopes downwards and vision would be poor for oncoming traffic. North of the site is next to a very large underground water reservoir and there is evidence of underground piping going southwards through the site, possibly a private network. There is also Littleham ponds which are evidenced on the current OS maps. Littleham Brook runs east to west, south of the site with a pumping station further up. Running east to west through the middle of the site is the former historic Exmouth to Budleigh railway line which is now a well valued cycle path and walkway. It forms part of the National Cycle Network (Sustrans) NCN2 from Dover to St Austell and the international Tour de Manche between Plymouth and Poole. This is a valued form of green infrastructure valued by not only the local community, but further afield as well. There are 9 design principles to be on the Sustrans including its attraction and enhanced ecological features as well as being safe and accessible traffic free paths. It is currently a free to use and safe path for cyclists and walkers of all ages and accessibility needs, with no risk of potential harm from vehicles. It also helps to support both health and wellbeing of the community,

deliver wider benefits for nature and support efforts to address climate change (an issue raised in the NPPF, p27 paragraph 92c and p28 paragraph 98).

The site sits outside of the BUAB and is further away from local amenities and the town centre. The local historic Littleham village contains a pub, 2 community halls and a seasonal tearoom, but no shops. The closest supermarket and post office from the furthest part of the site would be more than 1600 metres. There is a small Primary School in Littleham but would be some distance from the furthest part of the site. Other primary schools and the only secondary school would not be within walking distance. The bus service is unreliable and the only bus directly to Exeter is now mainly from the town centre (a good hours walk from the closest area of the site). The closest train station is on the outskirts of Exmouth town centre and therefore not local to the site. These issues alone would add to more burdening traffic and an increase in pollution and carbon emission.

Site Exmo_17 is protected by the Countryside and Rights Of Way Act 2000 (CROW). It protects the land to conserve and enhance its natural beauty. AONB require good quality scenic landscape that is relative wild due to distance from housing or having few roads, where natural sounds is predominant. It can also include natural heritage features such as habitats and cultural heritage. I agree that the site is very sensitive in landscape terms due to its location and visual prominence. The whole site sits within the National Landscape and sits above the local built-up area. The fields are currently used for agricultural use by the local farms and is rated as good to moderate. The site slopes north to south which offers extensive views into and out of site including from looking into and out of the National Landscape the Southwest Coast Path. The whole site which was part of the Coastal Preservation Area, but now borders onto the Jurassic Coastline which is part of the UNESCO World Heritage Site. I disagree that the higher northerly parts are starker, as further north of the site offers some of the best views in Exmouth of the far-reaching views of the AONB, Maer Valley and coastline. The whole site has a particular tranquillity of peace away from traffic and the built-up areas of Exmouth and a distinctive rural countryside feel, that over the years, other areas of Exmouth has lost to development. The site is also intimate in nature with mature hedgerows and trees, including 2 trees with a TPO. Littleham Brook south of the site, also supports the local natural habitat. The site boarder's local woodland areas, private gardens, and the local churchyard. Currently the churchyard west of the site is an established biodiversity for the local flora and fauna. The whole site offers a habitat as well as a wildlife corridor for local wildlife including Bats, Birds, Hedgehogs, Deer, and Badgers. Looking at the Valley Parks and working draft plan for Exmouth, Exmo_17 is a suggested area of land of local amenity importance due to being outside of the BUAP

and in the National Landscape and could easily join up to the Maer Valley Park, a supposed greenspace for the community to access and enjoy. The site would also make a wonderful Dark Night at Skies protected area due to having very little light pollution facing eastwards and the only light comes from the odd farmhouse. The dark skies also help to support the local nocturnal wildlife. Paragraph 84 of the NPPF supports the need of open space. Exmo_17, being in the National Landscape offers the open space for free and for anyone to access.

Historic Littleham has a long significant history and is older than Exmouth. It was a Saxon subdivision with its own court and was retained by the Kings of Wessex until the 11th Century when it was given by *** Personal details have been removed *** the Confessor to his Master *** Personal details have been removed ***, who then passed it onto the Monastery (Horton in Dorset 970 AD) who held it until the Dissolution of the Monasteries, before descending into the *** Personal details have been removed *** Family and *** Personal details have been removed ***. The area has historically been forested and agricultural and used by local Farms including Liverton and Woodlands, once part of the Manor of the Wade in the 1300s. The *** Personal details have been removed *** family are also well linked to the area, having lived at the now Prattshayes in the village, funded the Drake Aisle in the church and being buried there. It's mentioned in the Domesday record of 1086.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am greatly concerned about the proposed local plan of building over 400 houses and industrial units on the fields, that are on a protected area of the National Landscape on the eastern edge of Exmouth (Exmo_17). This site is outside the Exmouth Town Build Up Area Boundary (BUAB), that was agreed in the Neighbourhood plan in 2015. The Plan was to provide the community's vision for the future until 2031 and set out clear planning policies, to realise the vision and to sit alongside the East Devon Local Plan (EDLP) at the same time, carrying equal legal weight. The Neighbourhood Plan appears to of been ignored in the new draft version of the EDLP. As required by the Localism Act, the Neighbourhood Plan is accorded with higher level planning policies. The Plan is concerned with land use and its policies to help inform future planning applications. Site Exmo_17 would never have been considered for development in the Neighbourhood plan and the idea of a large-scale housing development, goes against the views of the local community. Both East Devon County Council (EDDC) councillors and Clinton Devon Estates (the landowner) have not listened to the views of the community and appear to be pushing this development through. To have Bloor Homes, the potential house builder holding public consultations, when the new Local Plan has not been finalised and planning requests for screening opinion and EIA scoping request for the proposed development of up to 450 houses (was initially for 410 houses) on the planning portal demonstrates that the community views are not being listened to. It would also have a negative impact on Littleham Village and Exmouth in many ways. The area is one of the major attractions of Exmouth, with its far reaching views, near to the

coast, cycling and running events and tourist attractions. National Landscapes are also regional and national assets.

Another concern is that Clinton Devon Estates, has ended the lease to Woodlands Farm, of fields around Quentance Farm, some 84 acres. There is a rumour that Clinton Devon Estates, is selling this land to Bloor Homes. If this is true, it indicates that Clinton and Bloor are confident that EDDC will allow them to build on another large area of protected National Landscape. This domino-effect could happen if Blood Homes are allowed to build a big estate on Exmo_17. This land is too precious to present and future generations for it to be destroyed. It appears that Clinton Devon Estates environmental focus on protecting the environment and wildlife and working with the local community is fraud.

According to the Council for Protection of Rural England, there are 27 brownfield sites in East Devon, contributing to over 16,700 potential homes across Devon. Some may have already been allocated in the local plan. Prioritising greenfield countryside development over available brownfield land, is inconstant with sustainable planning principles and the National Policy emphasis on brownfield-first development. Brownfield sites and land outside the National Landscape should be the ones to build on, and a site like Exmo_17 should not be considered for development.

When I attended the Bloor Homes event, the plan was to enhance the public open space, as well as the housing, employment land and a community hub. We already have an amazing space to walk, cycle and enjoy the open countryside. What is planned, will not enhance, but permanently destroy the National Landscape. Formally known as the Area of Outstanding Natural Beauty (AONB), it really is a beautiful area. The views are far reaching of the countryside, with its rural charm and is valued by the community as a place to get away for exercise and health and wellbeing. Exmo_17 is also near to and can be seen from the Southwest Coast Path, which is also part of the National Trail, called the King Charles III England Coast Path. It is part of a legacy to be enjoyed by walkers. However, the far- and wide-reaching views from the SW coast path, will be ruined by this potential housing development.

The National Planning Policy Framework (NPPF) talks of sustainable development which was agreed in the Neighbourhood plan. The BUAB for Exmouth was to contain the town's future planned development needs and to protect the open countryside outside the boundary from development. This is particularly relevant to Exmouth given the very

special environment surrounding the town such as the National Landscape, Jurassic coast and the Estuary.

East Devon District Council (EDDC) has a legal duty to ‘conserve and enhance’ National Landscapes in their area. Large developments can only happen in ‘exceptional circumstances’ and when in the public interest. As there is land outside the National Landscape that could be built on, there is no exceptional circumstances and just irreversible damage to local farms, farmland and the health and wellbeing on the community.

Site Exmo_17 provides a much-valued green space of local amenity value. The site has the combined footpath and cycleway with countryside views and tranquillity freely available to the public. By protecting the site, it would also continue to ensure a much-needed wildlife corridor. It is of great importance to protect existing open spaces. Planning authorities have a responsibility to minimise impacts and provide net gains in biodiversity. Green corridors provide for wildlife movement in turn enhancing biodiversity, in effect bringing the joys of the countryside into the town. Site Exmo_17 already provides this and can continue to do this in the future if not developed. National Landscapes are areas legally designated as areas of outstanding natural beauty under the National Parks and Access to the Countryside Act 1949 and Countryside and Rights of Way Act 2000. The site was also in the Coastal Preservation Area, and this status was unjustifiably removed by the East Devon County Council. This went against the views of the local community, which has been ignored. Considering the coastal views and location of the site near the Jurassic coast, the World Heritage Site and coastal path, Exmo_17 needs to have this status. In the National Landscapes briefing, Guidance for Local Planning Authorities (November 2024), there was discussion of Section 85 of the Countryside and Right of Way Act 2000 (CRoW Act), which was amended by the Levelling-up and Regeneration Act in December 2023. It requires relevant authorities, in exercising or performing any function that affect AONBs in England, to “seek to further the purpose of conserving and enhancing the natural beauty of the Area of Outstanding Natural Beauty.” This is a statutory duty, which has been in force since December 26, 2023. The use of the word ‘duty’ in the legislation means that it is something all relevant authorities must do. The duty is considered to be a strengthening of the previous ‘duty of regard’ and seeks positive outcomes for the natural beauty, such as with National Landscapes. Within the planning context, relevant authorities are the Local Planning Authorities, the Planning Inspectorate and the Secretary of State, along with Parish Councils producing Neighbourhood Plans. The duty applies to all aspects of the development management process and the plan-making process such as planning application decisions, enforcement, and decisions relating to planning policies and site

allocations in Local Plans. The duty is considered to require a pro-active approach by the decision-maker; relevant authorities are expected to be able to demonstrate that they have fulfilled the duty, and how compliance with the duty has been embedded in the plan-making and decision-making process. Natural England have advised that relevant authorities must take all reasonable steps to explore how the statutory purposes of the Protected Landscape can be furthered. The duty applies to plan-making and decision-making in relation to, or so as to affect, land in National Landscapes, not only in considering proposals within a National Landscape, but also for affecting its setting. It is important to ensure that 'to conserve and enhance' is a priority in every relevant decision. The statutory duty needs to be considered in tandem with the National Planning Policy Framework (NPPF), in particular paragraphs 11, 182 and 183. Paragraph 182 of the NPPF (2023) sets out that great weight should be given to conserving and enhancing landscape and scenic beauty in national Landscapes, whereas conservation and enhancement of wildlife and cultural heritage are important considerations. However, it is important to remember that natural beauty is not just the look of the landscape, but includes landform and geology, plants and animals, landscape features, and the rich history of human settlement over the centuries. It includes landscape and scenic quality and natural heritage such as species, habitats, geology and physical such as wildness, tranquillity and dark skies, and cultural heritage (including cultural traditions and the historic and other built environment that makes the area unique). (Levelling-up and Regeneration Act 2023 section 245; Countryside and Rights of Way Act 2000 section 85). Natural England (2023) states enhanced duty in relation to Protected Landscapes refers to National Landscapes (AONBs) and National Parks. Natural England's Planning policies and decisions must also reflect relevant international obligations and statutory requirements. It is very difficult to see how building over 400 houses and industrial units on National Landscape land, is in any way seeking to further conservation and enhancement of natural beauty of National Landscapes. In fact, it is clearly doing the opposite and seems EDDC would be failing in its statutory duty, if this allocation remains in the plan. The plan is also very weak regarding National Landscapes. Planning is very different for National Landscapes, compared to areas that are not, such as brownfield sites. Both seem to of been lumped together in calculations and projections for development in Devon. East Devon has a high proportion of National Landscape land and this has not been considered in targeted housing numbers. It is also illegal under the CRoW Act (2000) to keep increasing sewage load, when the sewage is already damaging the National Landscapes. Exmouth is having a detrimental impact with sewage overflow, that is impacting our local rivers and sea, including Littleham Brook, that runs through Exmo_17. Historic England make clear that the historic environment is fundamental to the distinctive character, sense of place and natural beauty of each National Landscape. It is the conservation and enhancement of all this natural beauty (usually defined in the specific statutory National Landscape Management Plan) that is the

primary purpose of designation, and that Local Planning Authorities must consider in discharging their duty under CROW Act (2000) s.85. LPAs are advised to ensure internal Local Authority legal teams are aware of the s.85 duty. Use of the relevant National Landscape Management Plan, which is a statutory document, which will have been adopted by the Local Authority and which formulates their policy for the management of the area and for the carrying out of their functions in relation to it. It is the key principle for ensuring that the statutory purposes of the National Landscapes are met, and is a material consideration in the planning process. This has not been done so far for Exmo_17. If it had been, this site would be excluded from development.

Conserving and enhancing the natural beauty of the specific National Landscape will mean conserving and enhancing the character components or special qualities identified in the management plan, and the reason why it became part of the National Landscape (AONB). To build on Exmo_17 would destroy the views from within and outside the National Landscape, as the views are far reaching towards the heritage coast and out towards Torbay. The site is also a historically important, with a grade 2* Church and churchyard, which would be detrimentally affected. There would also be a potential loss of Biodiversity from the National Landscape. This 3000% potential or more would not be off set by the 10% National Planning Policy Framework. Housing development results in the loss of 119 hectares of greenfield land within National Landscapes annually. These developments, however do appear smaller than what is proposed for Exmo_17.

To lose our irreplaceable areas of the National Landscape, there will be no where to visit, that is away from traffic, noise and pollution. You cannot add urban sprawl to areas of natural beauty. It is important that food production and recreation areas of community interests are protected. At the moment Exmo_17 is available for all to enjoy at any time. Many studies have shown that access to greenspaces is very beneficial for health and wellbeing. To remove these areas would cause real harm to farming, people and nature.

To build on Exmo_17, would potentially cause another 800 plus vehicles on local roads. The current roads, are not built for heavy traffic and never were designed to. The proposed exit onto Salterton Road, is already a bottle neck with queues of traffic. A proposed roundabout and 2 new pedestrian crossings, would only further add to this. Buses, are not regular and it takes 2 buses or 1 bus and train to Exeter, if sustainability has tried to be considered. Many will likely drive to Exeter, where most employment opportunities are.

Local Planning Authorities must be able to demonstrate that they have complied with the strengthened duty in any decision or action that impacts or could potentially impact on the National Landscape. To demonstrate that they have sought to further the purpose of designation in making decisions regarding planning policies, site allocations, and development management (including planning enforcement), it is considered LPAs will need to; establish the facts about the natural beauty of the area, especially with reference to the statutory Management Plan for the specific National Landscape; identify what comprises the natural beauty, using descriptions of natural beauty, including Statements of Significance, description of key characteristics and special qualities, as set out in National Landscape Management Plans; and the natural beauty criteria (Natural England (2017) Areas of outstanding natural beauty: designation and management; Natural England (2021) Guidance for assessing landscapes for designation as National Park or AONB in England). I feel this has not been done for Exmo_17 and feel that it is being pushed by Clinton Devon Estates and Bloor Homes to get the site quickly through planning and be developed.

The duty to seek to further the purpose of conserving and enhancing the natural beauty of National Landscapes applies to the full range of aspects of the plan-making process. An LPA will need to be able to demonstrate how it has, throughout all stages of the preparation of the Local Plan, sought to further the purpose of conserving and enhancing the natural beauty of the National Landscape. This includes at examination stage, addressing the s. 85 duty actively in responses to Inspector's Findings and in any proposed modifications to Local Plans including consideration of Neighbourhood Plans and to ensure the overall vision and development strategy would align with the objectives/principles/policies of the relevant National Landscape Management Plan. To identify how much of a district's objectively assessed need can be met without harming the natural beauty of the relevant National Landscape, particularly where meeting the need would require allocations that would not further the purposes of National Landscape designation which may involve setting a lower Local Plan housing requirement figure. If a draft planning policy would not align with the duty to seek to further the applicable legislative purpose (e.g. if it would conflict with any of the Management Plan's objectives/principles/policies), then consider amending the policy such that you could confidently say the decision does seek to further the relevant purpose. For decisions relating to site allocations assess what impact the proposed site allocation would have on the natural beauty of the National Landscape, considering its scale, location and landscape setting with reference to the character components/special qualities set out in the National Landscape Management Plan. (In this regard, consider including a specific criterion regarding 'natural beauty' within the

Strategic Housing Land Availability Assessment (SHLAA)/Housing and Economic Land Availability Assessment (HELAA), and within the Sustainability Appraisal). This does not appear to have been considered for Exmo_17. A large scale development is going to affect the local area for many reasons as discussed.

Regarding the objectives/principles/policies of the National Landscape Management Plan, Natural England have advised that the strengthened duty underlines the importance of avoiding harm to the statutory purposes of Protected Landscapes. If promoting a site allocation would not align with the duty to seek to further the conservation and enhancement of natural beauty, then consider amending or deleting a site allocation such that you could confidently say the decision does seek to further the statutory purpose. (For example, choosing not to allocate a particular site within or close to the National Landscape boundary could demonstrate compliance, where this results in avoiding harm.) Evidence how the LPA has sought to further the purpose of conserving and enhancing the National Landscape in its decision, with reference to aligning with National Landscape Management Plan objectives/principles/policies. Natural England (2023). This has not been done, as Exmo_17 is still being considered for site allocation for large scale development.

The duty to seek to further the purpose of conserving and enhancing the natural beauty of National Landscapes applies to the full range of development management decision-making, including considering applications for outline, full and reserved matters, listed building consent, applications for works to protected trees, and prior notifications, along with enforcement work on planning breaches. An LPA should also ensure that local validation checklists require the submission of sufficient, specific information to enable them to fulfil the s.85 duty in their decision-making. For decisions relating to planning applications, assess what impact the proposal would have on the purpose of designation; consider how the natural beauty of the area might be affected, were the proposal to go ahead how the proposal would align with the National Landscape. Natural England have advised that the strengthened duty underlines the importance of avoiding harm to the statutory purposes of Protected Landscapes. Where harm is identified, enhancements themselves, including biodiversity net gain (BNG) provision, are unlikely to be sufficient to align with the duty, which has the dual consideration of conserving and enhancing natural beauty. Also, ensure that any ‘enhancements’ within the proposal do genuinely align with, and help deliver, the objectives, principles and/or policies and resulting actions of the specific National Landscape Management Plan, by way of scope and location. Natural England have advised that the proposed measures should align with and help to deliver the aims and objectives of the designated landscape’s statutory Management Plan. Ensure a clear differentiation between any

proposed measures that seek to mitigate or compensate for harm (e.g. like-for-like replacement), and those that further the conservation and enhancement of the natural beauty of the National Landscape. Natural England have advised that measures that further the purposes are required in addition to mitigation. This appears not to have been considered.

The s.85 duty by ensuring the impact on the natural beauty of the National Landscape forms part of the assessment of ‘amenity’ when considering when making decisions on applications for works to protected trees, ensure the impact on the natural beauty of the National Landscape forms part of the assessment of the amenity value of the tree or woodland and the likely impact of the proposal on the amenity of the area. The site does have TPOs and development would completely ruin all character and biodiversity that there currently is. The beauty Exmo_17 offers would be changed forever.

S.84 of the CROW Act (2000) sets out that LPAs have power “to take all such action as appears to them expedient for the accomplishment of the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty, or so much of it as is included in their area”. Assess if the planning harms the natural beauty of the National Landscape, with regard to the Management Plan Statement of Significance and objectives, principles and/or policies. Consider if any amendments could help further the purpose of conserving and enhancing the natural beauty. Ensure clear differentiation between any proposed measures that seek to mitigate or compensate for harm (e.g., like-for-like replacement), and those that further the purpose of conserving and enhancing the natural beauty of the National Landscape. Natural England have advised that measures that further the purposes are required in addition to mitigation. To build on Exmo_17 goes against your conserving and enhancing of the natural beauty of the area.

The housing and economic land availability assessment does not determine whether a site should be allocated for development, but it’s up to the development plan itself to determine which of those sites are the most suitable to meet those requirements. It appears that the EDDC are using our National Landscape to meet housing targets when brownfield sites have been allowed by the planner to build inappropriate housing. Plan-making bodies should consider constraints when assessing the suitability, availability and achievability of sites and broad locations. For example, assessments should reflect the policies in footnote 6 of the National Planning Policy Framework, which sets out the areas where the Framework would provide strong reasons for restricting the overall

scale, type or distribution of development in the plan area (such as the Green Belt and other protected areas).

Neighbourhood planning bodies may use the method set out in this guidance to assess sites but any assessment needs to be proportionate to the nature of the plan.

Neighbourhood planning bodies may also make use of existing site assessments prepared by the local planning authority as a starting point when identifying sites to allocate. The East Devon planning guidance for National Landscapes states that they are Nationally designated protected landscapes. Receives the highest level of protection under the National Planning policy unique and special area. Development proposals in and affecting the national landscape must have a regard to the conservation and enhancement of its natural beauty. Give great weight to conserving and enhancing the landscape and scenic beauty of the area in order to be in conformity with the national planning policy framework. National landscapes are becoming attractive, profitable places for housing and development. Plan-making bodies should consider constraints when assessing the suitability, availability and achievability of sites and broad locations. For example, assessments should reflect the policies in footnote 6 of the National Planning Policy Framework, which sets out the areas where the Framework would provide strong reasons for restricting the overall scale, type or distribution of development in the plan area (such as the Green Belt and other protected areas). Plan-making bodies should consider constraints when assessing the suitability, availability and achievability of sites and broad locations. For example, assessments should reflect the policies in footnote 6 of the National Planning Policy Framework, which sets out the areas where the Framework would provide strong reasons for restricting the overall scale, type or distribution of development in the plan area (such as the Green Belt and other protected areas). Plan-making bodies should consider constraints when assessing the suitability, availability and achievability of sites and broad locations. For example, assessments should reflect the policies in footnote 6 of the National Planning Policy Framework, which sets out the areas where the Framework would provide strong reasons for restricting the overall scale, type or distribution of development in the plan area (such as the Green Belt and other protected areas). This has not been done for Exmo_17. If it had, major development would not be considered for Exmo_17 and it would be removed from the proposed plan.

National Planning Policy Framework Plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that all plans should promote a sustainable pattern of development that seeks to: meet the development needs of their area; align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to

its effects; strategic policies should, as a minimum, provide for objectively assessed needs for housing and other uses, as well as any needs that cannot be met within neighbouring areas, unless the application of policies in this framework that protect areas or assets of particular importance provides a strong reason for restricting the overall scale, type or distribution of development in the plan area or any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole. For decision-taking this means, not approving development proposals in protected areas of particular importance such as National Landscapes and provides a strong reason for refusing the development proposed; or any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole, having particular regard to key policies for directing development such as housing to sustainable locations, making effective use of land, securing well-designed places and providing affordable homes, individually or in combination. As established through statements of common ground (see paragraph 28) the policies referred to are those in this Framework (rather than those in development plans) relating to: habitats sites (and those sites listed in paragraph 194) and/or designated as Sites of Special Scientific Interest; land designated as Green Belt, Local Green Space, a National Landscape, a National Park or defined as Heritage Coast; irreplaceable habitats; designated heritage assets and areas at risk of flooding or coastal change. Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and National Landscapes which have the highest status of protection in relation to these issues. The conservation and enhancement of wildlife and cultural heritage are also important considerations in these areas and should be given great weight. The scale and extent of development within all these designated areas should be limited, while development within their setting should be sensitively located and designed to avoid or minimise adverse impacts on the designated areas. When considering applications for development within National Parks, the Broads and National Landscapes, permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest. Consideration of such applications should include an assessment of: a) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; b) the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and c) any detrimental effect on the environment, the landscape and recreational opportunities. This has not been done for Exmo_17 as the legal protection of a National Landscape has been not fully considered and it feels that Exmo_17 is being proposed, to make up housing numbers, which is not a reason for major development this is not an exceptional circumstance. Due to the location, any development would affect the

sensitivity of the site and ignores the highest status of protection that National Landscapes have in law.

Clinton Devon Estates (CDE) on their website, talk of their wildlife vision to embed wildlife improvement into all business activities and hand onto future generations a countryside more diverse, resilient, functional and ecologically valuable than we have today. CDE Strategy 2030 doing today what is right for tomorrow. Development proactive approach will be taken to identifying appropriate opportunities to provide homes and business premises for local people with sustainability at the forefront of decision making. Net zero carbon emissions by 2030. Agriculture farming models should provide products customers want to buy, enhance our soils and natural environment and provide viable business models which wildlife can flourish. Increase woodland cover and enhance soils and natural environment. If this is their goal, then it's very hypocritical, as they are wanting major development within the National Landscape.

In the spring 2026 National Trust magazine, Director- General *** Personal details have been removed ***, interviewed Prime Minister Sir Keith Starmer. Key points in the interview included:

- Growing up in a rural area, surrounded by fields. "For me, it's been there from the very start, and I value it so highly now, both as an individual and as a Prime Minister".
- Regarding being one of the most nature-depleted countries and seeing nature decline. "Yes and it's a real cause for concern. We need to do everything we can to prevent that decline and to turn it around, because we're losing things we may never get back and children born today, may never know and see and enjoy the things that I enjoyed as a child".
- If the government is doing enough to meet long-standard targets such as protecting 30% of land and sea for nature by 2030, to support the global '30by30' target agreed at the UN Biodiversity Summit in 2022. We're only at 6% at the moment. "I am confident and I'm determined as well as confident. There are great things that many governments have done - Areas of Outstanding Natural Beauty, National Parks – these things matter hugely and we want to add to that... And one of my concerns is that in a number of urban areas, there's not enough access to greenery or nature".
- Building vs blockers and nature against growth. "I think we can have both... We want to preserve nature and the beauty of this country. We need to get the balance right between the two".

- Wildlife Corridors. “ Corridors for nature, but also physical and mental health is enhanced through nature. Physical health because there is a nice place to walk and fresh air is hugely important. But also mental health, just the ability to have bit of still time outside.
- Your legacy in nature and history. “In nature, we will add forests to National Parks and the Areas of Outstanding Natural Beauty”.

*** Personal details have been removed ***, the local MP, states that National Landscapes are irreplaceable part of our natural environment and local identity. He believes they should be protected long term. The need for homes must be balanced carefully against the protection of valued landscapes and protective agricultural land. The National Planning Policy Framework is clear that planning decisions should contribute to and enhance natural and local environment, including protecting and enhancing valued landscapes.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: In the section discussing Exmo_17 there is very little emphasis on the site being in the National Landscape and what that entails. There is no mention of the laws that protect the National Landscape from large scale development. In fact in the draft plan, it is very blasé. The site sits outside the build up area boundary. To build here would completely destroy the landscape beyond recognition. There will be no biodiversity net gain. The views are dark reaching and are seen from the world heritage Jurassic Coast and coastal path. The sites location to this has not been mentioned nor three fact the fields are used by local farms. There is also every chance the fields next door to this site which back onto woodland, may be being sold for further development in the National Landscape. To build on Exmo_17 will most certainly open the doors to further large scale development in the area. Exmouth cannot cope with further development as it's infrastructure cannot cope with demand. This will only worsen. Think sewage, flooding as no land to soak up the water, worsen traffic as only 2 main roads out of the town. Exmouth cannot cope with further development. Also with Devon Cliffs, the population significantly increases, adding further strain, something which has not been considered. EDDC have a legal duty to 'conserve and enhance' National Landscapes in their area. Large developments can only happen in 'exceptional circumstances' and when in public interest. As there is land outside the National Landscape that can be built on, there is no exceptional circumstances and just irreversible damage to local farms, farmland and the health and wellbeing of the community. Exmo_17 provides a much valued greenspace for the local community. The site having the shared cycle path and footway, offers countryside views and tranquility freely available to the public. It also ensures a much needed wildlife corridor.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Remove Exmo_17 from the plan. Give the CPA protection back to this site, which is what many in the community objected to its removal. Protect the National Landscape from development, which clearly this is not being practiced, as otherwise this site would have not been considered. The site is already valued by the community, including children, families, walkers, cyclists those with wheelchairs and mobility scooters, as well as dogs and wildlife. To have a road go across the cycle path and walkway will make access unsafe and stop cycle and running events from occurring. Are cars really going to stop? Allow the site to be left as it is and enhance what is already there, rather than development. National Landscapes are areas legally designated as areas of Outstanding Natural Beauty under the National Parks and Access to the Countryside Act 1949 and Countryside Rights of Way Act 2000. The CROW Act was amended in December 2023 by the Levelling up and Regeneration Act. It requires relevant authorities in exercising or performing any function that affect AONB to "seek to further purpose of conserving and enhancing the natural beauty of the Area of Outstanding Natural Beauty". This statutory duty, which all relevant authorities must do and seek positive outcomes. In the NPPF paragraph 182 sets out that great weight should be given to conserve and enhancing landscape and scenic beauty in National Landscapes. To build over 400 houses and industrial units goes completely against legislation. EDDC would be completely failing in its statutory duty if Exmo_17 remains in the plan. It is also illegal under the CROW Act to keep increasing sewage load, when the sewage is already destroying the National Landscape. Exmouth is having a detrimental impact with sewage overflow, that is impacting our local rivers and sea, including Littleham Brook, that runs through the site. Historic England make clear that it is the enhancement and conservation of this natural beauty of the landscape and is fundamental to its distinctive character and sense of place. Legally this site is awarded the greatest protection from development, making Exmo_17 in the local plan illegal.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: As previously mentioned, Exmo_17 is protected by various laws, which has not been mentioned fully in the plan. There is no description of the site and its topography. The site is very exposed fields of farmland, hedges and trees with the cycle path and walkway running straight through, that links up with Budleigh and Woodbury Common

in one direction and towards Exmouth in another. It sits outside the BUAP, as agreed in the neighbourhood plan, that has been ignored. The site is rural with the Littleham Brook running through and is next to listed grade 2* parish church and church yard, which is one of the biggest in Devon. The area towards the bottom of the site is known to flood. Concerns about the site being developed have not been listened to by the council and the landowner. Prime Minister Sir Keir Starmer has stated the value of greenspaces and fields and corridors for nature and that physical and mental health is enhanced through nature. Areas of Outstanding Natural Beauty matter hugely and want to add to that. "In nature we will add forests to National Parks and the Areas of Outstanding Natural Beauty". There is no talk of development of housing, but rather enhancing the environment that is already there. Something that the plan goes against. The Local MP for Exmouth David Reed also states that National Landscapes are irreplaceable part of our environment and local identity and be protected long term. There is no talk of housing developments in National Landscapes, but instead about improving nature and protection. How can Exmo_17 be sound, when it goes against this? The Rt hon Steve Reed, has stated that protected landscapes are to be strengthened with new legislation and guidance to protect nature, boost its recovery and access to the outdoors. More trees planted and more habitat created. It will also help to tackle climate change. The Government states that it is committed to restoring nature across the country. A healthy Natural environment is crucial to the National health and prosperity and create a decade of Natural renewal. They want to restore protected landscapes which site Exmo_17 would fall under. The Government is aiming to meet the long standing target of protecting 30% of land and sea for nature by 2030. Currently we are only at 6%. The government want to increase and enhance National Landscapes, so why is EDDC intent on going against this and potentially developing land at Exmo_17 in the National Landscape? If anything EDDC need to support statutory law and instead protect and enhance Exmo_17 and put pressure on Clinton Devon Estates (the landowner) to maintain and enhance the site, which CDE seem to talk about wildlife protection etc on their website. Clinton Devon Estates (CDE) are also on the East Devon National Landscape committee, which is very hypocritical, considering they are on a board wanting to protect and enhance the National Landscape, but yet Site Exmo_17, any large chunk of land within the East Devon National Landscape, they clearly want to sell for profit and large scale development, considering they have drawn up plans with Bloor Homes. This fully goes against the legislation governing protected landscapes and damages CDE goals of protecting the environment. Building over 400 houses and industrial units is not conserving and enhancing the landscape. It goes against the 30by30 target agreed by the Government on protecting land and sea for Nature at the UN Biodiversity Summit in 2022, and the updated legislation by the Government wanting to protect and expand National Landscapes and wildlife corridors.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: To have greater emphasis on the Exmo_17 site being in the National Landscape and the law that protects the site from development, due to statutory reasons of conserving and enhancing the landscape. To add details about the site and the impact developing in National Landscape can have.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To stand up for Exmo_17 and protect the National Landscape site from major development, so that it can be nature enhanced and conserved for now and in the future. The Government are wanting to protect, improve and grow National Landscapes, so I want to know why EDDC are against this and would rather development the site for housing and industrial units that would stand out hugely on the landscape and irreversibly damage biodiversity and nature that is already there and impact on the community who access the site, as well as tourism, due to its location near to and seen by holiday accommodation and tourist attractions, as well as cycling and running events. When this site was first discussed by the council, some councillors did not know Exmo_17 location was within the National Park, but when voted, still voted for it to be considered. That to me feels that there is lack of understanding regarding the law and legislation that governed National Landscapes and it was just put through to make up numbers. The landowner, who is also part of the East Devon National Landscape, is intent on having this site developed for housing. This is very hypocritical.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_17

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: To develop on land within the National Landscape, goes against all the protective legislation that governs National Landscapes. If this was legally compliant, EXMO_17 would be rejected for development.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
Remove from the site allocation plan, sites like Exmo_17 that are in the National Landscape.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Allocation of Exmo_17 is in conflict with the National Planning Framework December 2023 and is unsound and not legally compliant. It also conflicts with protecting the National Landscape as outlined in another chapter of the proposed local plan.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_17 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I want to help protect the National Landscape and feel that EDDC and Clinton Devon Estates have not listened to the local community and ignored the protective status of National Landscapes. Even the Prime Minister *** Personal details have been removed *** recognises the importance of protecting National Landscapes now and for future generations. Once lost, it is gone forever.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -

Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To be part of important discussions around the towns future

Full name: Caroline Hunt

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate t consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, - Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To be part of such important discussions around the towns future

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To be part of such an important discussions about the towns future and ensure the people of the town are listened to

Full name: Caroline Hunt

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, - Do not access the site via Southern Wood. -Move the settlement boundary away from the Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: This is too important to miss and not be part of

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: It is in conflict with paragraphs 16c, 32, 73b, 180d, 180e, 181, 185a, 186b, 188 and 191c of the NPPF December 23; it is unsound and not legally compliant. It also conflicts with para 3.6 policies PB01, PB02, PB03, PB04 and OL02 of the Local plan. The proposal is adjacent to Pebblebed Heaths SAC/SPA/SSSI and the plan HRA states, "There is, as yet, no means to mitigate or address the risks" to significant habitats and species. So this is clearly, at the moment, an unsuitable site. The Mitigation Hierarchy set out in NPPF para 32 has to be followed; and allocation of this site cannot be justified where there are other viable and less mitigation-reliant sites to select. NB the plan has an over-supply of housing allocations; so development of this site is not necessary.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This large development is surrounded by countryside and is not attached to any town or village. It's not right to build a new settlement in the middle of virgin countryside. The nearest settlement is the very small hamlet of Ting Tong, which is a drive away. It urbanises the green buffer between a highly protected nature reserve and farmland, and the villages and hamlets of Ting Tong, Budleigh Salterton, and (further away), Exmouth. The only argument in its favour seems to be that it's flat; presumably for sale, and a drive away from an out of town Tesco and a Civic Amenity site.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I don't think it's necessary to participate; this is a different question from whether I wish to (I don't really)! Please don't dismiss my objection if I'm not there. I'm happy to answer questions if it will help.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

xmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Full name: Robin Corse

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Second Regulation 19 Consultation – East Devon Local Plan – Responses by Chapter

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Full name: Robin Corse

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and

supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Regarding the most objected to and unpopular proposed development of 700 new houses as indicated on the Site Selection Report at East Devon District Council, reference Exmouth20, I am objecting to developers, Eagle Investments, aiming to forever change and spoil Southern Wood on the outskirts of Exmouth, to change it from a cul de sac into a potentially busy through road, by stripping and ploughing through established woodland at the bottom of the road, in order to build a bridge over Withycombe Brook for vehicle access to their proposed development site, a site set at a much higher level than Southern Wood. Planning Officers must come and see for themselves the folly of this idea of a through road before it becomes a pending nightmare. They need to see for themselves, not rely on photographs or second hand information, how wide Withycombe Brook is at the bottom of Southern Wood, how much higher the land is on the other side of the brook, so that they will know a very substantial structure would need to be built to support a bridge for any vehicle access, also to consider the future safety, the upkeep and maintenance costs which would be the sole responsibility of the council. Planning Officers also need to see for themselves the parking issues in Meadow View Road which runs along the top of Southern Wood; how access will be frustrating if more traffic goes back and forth through Southern Wood. If homeowners use this route from the new development, they would be no nearer present schools, shops or any infrastructure because of the disadvantage of having to navigate these minor roads with parked vehicles. The parking issues have arisen because some landlords, who own properties in the proximity, have let their garages out separately, leaving tenants with no off-road parking. An unresolvable problem. I live in Southern Wood. It is a quiet cul de sac with just 12 houses. The road is

approximately 6.2 m at its widest point, with raised curbs and paths. The road slopes downwards towards Withycombe Brook with woodland and fields beyond. Every house from the top of Southern Wood falls lower than its neighbour. As an example, our house is approximately one metre lower than our neighbours. The houses at the bottom of Southern Wood, numbers 5 and 6, both nearest Withycombe Brook, I understand are level 3 flood zone. The brook does gush after heavy rainfall. We now have slight flooding down the side of our house to paddle through after heavy rain and must make sure our drains are always clear of leaves. There is also puddling in our rear garden after heavy rainfall which is a new occurrence. Flooding concerns would become an issue as our winters are becoming wetter, if 700 or more new houses are built at a much higher level than Southern Wood. We have been protected with trees and fields taking up most of the rainwater, but a housing estate would not do this. In the Exmouth Journal, 19th January 2026, they included a report by the environmental group Round Our Way, quoting East Devon had 673 alerts and warnings recorded since 2011 during the most severe flood seasons, according to a new analysis based on Environment Agency data. This equates to 436.1 alerts and warnings per 100,000 residents, placing East Devon among England's top 20 most impacted areas. Eagle Investments appear to be confident they will be awarded planning permission to have vehicle access through Southern Wood, as they have already felled many trees surrounding Withycombe Brook where it runs along the bottom of Southern Wood. They started felling the trees in 2023. When asked by neighbours the reason, they were told it was due to Ash dieback. I understand Eagle Investments obtained a licence from the Forestry Commission, application Ref: 018/2753/2022, a licence with permission "to fell trees for silvicultural thinning to improve the quality and vigour of the remaining trees and that any planning permission sought after would not override any conditions of the licence". Sadly, Eagle Investments workers have felled many trees located in the path of their new proposed bridge and road before any planning permission has been given. You can now see through the woods towards the fields; the denseness has been depleted. Crows used to nest in the trees at the bottom of Southern Wood and fly around in circles above before roosting, but they have mysteriously moved on. We know trees are important, not only in helping flood management but also helping to minimise pollution. If Eagle Investments are given permission to go through Southern Wood and build a bridge over Withycombe Brook for vehicle access, they will need to clear all the remaining trees, therefore disregarding any conditions of their licence from the Forestry Commission "to fell trees for silvicultural thinning to improve the quality and vigour of the remaining trees and that any planning permission sought after would not override any conditions of the licence". It will be a shame if an unnecessary through road is allowed to change the environment we presently enjoy in Southern Wood, especially as there is already access to the proposed development site from the entrance to Liverton Business Park, on the B3178, the Salterton Road. This business park has established roads and retail units with free parking and leads directly to the proposed development site. It is also

home to the emergency services. To use the route through the Liverton Business Park would save pointless junctions being created on our country roads, many without footpaths, therefore limiting destruction to our wildlife and I expect saving costs. There are traffic lights at the Tesco store on the Salterton Road, there are traffic lights at the top of Dinan Way successfully serving many established developments and keeping traffic safe. So, traffic lights at the entrance to Liverton Business Park, which is presently quite dangerous as some drivers take chances to leave, would make any new junctions or through roads unnecessary, and so much safer and more convenient for all. I can see no point in causing chaos and structural upheaval to Southern Wood by making it a through road, forever spoiling its environment and established woodland with its homes for wildlife and I object to this. I can see no point in creating unnecessary new junctions on our country roads as proposed and I object to this. I trust that planners will consider these issues and protect our environment. I would point out to the reader the red line Eagle Investments have drawn on Exmouth 20b, shows intended access not from Southern Wood, but from Woodfield Close, an area with garages and parking for the residents there. This error should be corrected.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmouth_20 from the local plan. Do not access the site from Southern Wood.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Regarding the most objected to and unpopular proposed development of 700 new houses as indicated on the Site Selection Report at East Devon District Council, reference Exmouth20, I am objecting to developers, Eagle Investments, aiming to forever change and spoil Southern Wood on the outskirts of Exmouth, to change it from a cul de sac into a potentially busy through road, by stripping and ploughing through established woodland at the bottom of the road, in order to build a bridge over Withycombe Brook for vehicle access to their proposed development site, a site set at a much higher level than Southern Wood. Planning Officers must come and see for themselves the folly of this idea of a through road before it becomes a pending nightmare. They need to see for themselves, not rely on photographs or second hand information, how wide Withycombe Brook is at the bottom of Southern Wood, how much higher the land is on the other side of the brook, so that they will know a very substantial structure would need to be built to support a bridge for any vehicle access, also to consider the future safety, the upkeep and maintenance costs which would be the sole responsibility of the council. Planning Officers also need to see for themselves the parking issues in Meadow View Road which runs along the top of Southern Wood; how access will be frustrating if more traffic goes back and forth through Southern Wood. If homeowners use this route from the new development, they would be no nearer present schools, shops or any infrastructure because of the disadvantage of having to navigate these minor roads with parked vehicles. The parking issues have arisen because some landlords, who own properties in the proximity, have let their garages out separately, leaving tenants with no off-road parking. An unresolvable problem. I live in Southern Wood. It is a quiet cul de sac with just 12 houses. The road is

approximately 6.2 m at its widest point, with raised curbs and paths. The road slopes downwards towards Withycombe Brook with woodland and fields beyond. Every house from the top of Southern Wood falls lower than its neighbour. As an example, our house is approximately one metre lower than our neighbours. The houses at the bottom of Southern Wood, numbers 5 and 6, both nearest Withycombe Brook, I understand are level 3 flood zone. The brook does gush after heavy rainfall. We now have slight flooding down the side of our house to paddle through after heavy rain and must make sure our drains are always clear of leaves. There is also puddling in our rear garden after heavy rainfall which is a new occurrence. Flooding concerns would become an issue as our winters are becoming wetter, if 700 or more new houses are built at a much higher level than Southern Wood. We have been protected with trees and fields taking up most of the rainwater, but a housing estate would not do this. In the Exmouth Journal, 19th January 2026, they included a report by the environmental group Round Our Way, quoting East Devon had 673 alerts and warnings recorded since 2011 during the most severe flood seasons, according to a new analysis based on Environment Agency data. This equates to 436.1 alerts and warnings per 100,000 residents, placing East Devon among England's top 20 most impacted areas. Eagle Investments appear to be confident they will be awarded planning permission to have vehicle access through Southern Wood, as they have already felled many trees surrounding Withycombe Brook where it runs along the bottom of Southern Wood. They started felling the trees in 2023. When asked by neighbours the reason, they were told it was due to Ash dieback. I understand Eagle Investments obtained a licence from the Forestry Commission, application Ref: 018/2753/2022, a licence with permission "to fell trees for silvicultural thinning to improve the quality and vigour of the remaining trees and that any planning permission sought after would not override any conditions of the licence". Sadly, Eagle Investments workers have felled many trees located in the path of their new proposed bridge and road before any planning permission has been given. You can now see through the woods towards the fields; the denseness has been depleted. Crows used to nest in the trees at the bottom of Southern Wood and fly around in circles above before roosting, but they have mysteriously moved on. We know trees are important, not only in helping flood management but also helping to minimise pollution. If Eagle Investments are given permission to go through Southern Wood and build a bridge over Withycombe Brook for vehicle access, they will need to clear all the remaining trees, therefore disregarding any conditions of their licence from the Forestry Commission "to fell trees for silvicultural thinning to improve the quality and vigour of the remaining trees and that any planning permission sought after would not override any conditions of the licence". It will be a shame if an unnecessary through road is allowed to change the environment we presently enjoy in Southern Wood, especially as there is already access to the proposed development site from the entrance to Liverton Business Park, on the B3178, the Salterton Road. This business park has established roads and retail units with free parking and leads directly to the proposed development site. It is also

home to the emergency services. To use the route through the Liverton Business Park would save pointless junctions being created on our country roads, many without footpaths, therefore limiting destruction to our wildlife and I expect saving costs. There are traffic lights at the Tesco store on the Salterton Road, there are traffic lights at the top of Dinan Way successfully serving many established developments and keeping traffic safe. So, traffic lights at the entrance to Liverton Business Park, which is presently quite dangerous as some drivers take chances to leave, would make any new junctions or through roads unnecessary, and so much safer and more convenient for all. I can see no point in causing chaos and structural upheaval to Southern Wood by making it a through road, forever spoiling its environment and established woodland with its homes for wildlife and I object to this. I can see no point in creating unnecessary new junctions on our country roads as proposed and I object to this. I trust that planners will consider these issues and protect our environment. I would point out to the reader the red line Eagle Investments have drawn on Exmouth 20b, shows intended access not from Southern Wood, but from Woodfield Close, an area with garages and parking for the residents there. This error should be corrected.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am objecting to the proposed development of 700 new properties indicated on the Site Selection Report at East Devon District Council, reference Exmouth20. I believe this area, set approximately three miles from Exmouth town centre, the train station and sea front, is an unsuitable location for further development. Do we need years and years of destruction and disruption to build such a high volume of new properties, spoiling a beautiful area of Exmouth, when there are already extensive and ongoing developments at Goodmores and Plumb Park in Exmouth. Has anyone calculated with so many new properties being built, how our struggling sewage system will cope, what new flooding issues will arise, how our local services will manage when already stretched, and sadly our country roads, few with footpaths, will inevitably become even busier. The A376 is one of only two traffic routes out of Exmouth towards the M5 and Exeter, and all know the nightmare of the queuing traffic when using this road and the delays for our buses. The new roundabout at the top of Dinan Way will give new access to the A376, and although it will make the point of entry onto the A376 easier, it is still joining the busy traffic on the same road, the A376. The other traffic route to the M5 and Exeter via Woodbury is already causing problems for those roads, most without footpaths and are now too dangerous to walk or cycle due to the fast through traffic. The easier route is by train, but you would still have to drive to the station, find expensive parking or travel by bus. Not many would want to cycle, to negotiate heavy traffic or breathe in traffic fumes in all weathers. We are told we need more housing, but do we have proof that so many people want to move to Exmouth when there is not enough employment available for the local population, they cannot all work from home? Can Liverton Business Park, situated adjacent to the new proposed development, cater for such a huge population burst. Do we know how many of the new houses on the Goodmores or Plumb Park developments have sold? Housing in Exmouth is expensive and to buy these new

homes would require owners to be able to afford a substantial mortgage and have reliable employment. If we do not heed the warnings of over development in unsuitable areas, of properties built but not wanted, we could end up with half-built developments deteriorating as is happening in Cornwall. The ongoing trauma of this planned development on the outskirts of Exmouth, knowing it will spoil this area forever, with residents unsure of the impact on their homes and location is unfair and has been going on for so long and is distressing for all. Yes, if we need more housing, build in suitable locations, closer to cities, towns and industrial estates. The proposed new community being planned near Exeter Airport, with more employment possibilities, is a far more suitable and sensible location and would benefit all.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmouth_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Resubmitting this comment as did not receive email confirmation that the comment had been received/accepted. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from planning and reconsider other sites.

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Resubmitting this comment as unsure if it was accepted the first time Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in

cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from plans and revert to previously site.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove exmo_20

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: It is necessary that the Inspector learns from members of the public not just the one sided view of ***** and Officers of EDDC

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate t consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I want the Inspectors to hear directly about the failings in this proposal

Full name: John Hamill

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To ensure the Inspector hears my objection

Full name: John Hamill

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: EXMO_20 is at variance with Section 32 of the NPPF of December 2023 and must be considered as unsound. It was falsely claimed that it was available for site selection when this was not the case. Originally under HELAA it was deemed unsound but this was subsequently changed but without the detailed supporting evidence covering surrounding roads' capacity, and safety for pedestrians, educational and health facilities, leading to greater potential pressure on already overloaded facilities in neighbouring communities.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
EXMO20 should be removed from consideration.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the EXMO_20 planned development of 700 homes. Firstly it is detrimental to our beautiful Pebblebed Heaths. (SAC/SPA) Secondly the preposed access point onto the B3179 is nearer to Budleigh Salterton than Exmouth and would put an obvious strain on services, already under pressure, such as GP services and schools and the infrastructure of Budleigh town to include the high street, beach and utilities. Specifically waste water and drainage. THIS IS CONTRARY TO POLICY 0L05 of the local plan. SE water already struggle to maintain services to Budleigh and 700 more homes would inevitably result in more sewage spills into the sea impacting wildlife and the health of local residents.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st & 2nd Regulation 19 evidence library falsely claiming to be, with no record of the May 2022 version. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected since the site failed the HELAA stage, being not suitable or achievable. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: the current Goodmores development increase in construction traffic, general increase in traffic that new accommodation brings has and will continue to degrade the already poor state of the roads to and from and around Exmouth. Further increase in both construction and housing traffic can only cause more damage, wear and tear which is currently unable to be managed.

Commuter traffic is already causing significant delays to Exeter

All roads to and from Exmouth to surrounding areas are regularly hit by accidents and congestion.

Housing stock: there are a number of proposals for new housing in Exmouth, all rapidly eroding the natural beauty of our area and will undoubtedly have an impact on wildlife in Particular Pebble Bed Heaths, Bystock fishponds etc.

Is adequate consideration/forecasting made for the general impact of all these schemes both in terms of current occupancy of all new build projects and proposed projects and the impact on domestic and town amenities.

Second Regulation 19 Consultation – East Devon Local Plan – Responses by Chapter

Where are 1400 people going to work, park their cars educate their children visit healthcare settings. All these services are under pressure now before this or other projects get the go ahead.

We already have water pollution a regular basis.

Local plan, is the need for continuous housing development evidenced or just part of a national target.

Does the local plan evidence population growth going forward rather than just meeting set targets.

Starting to build on exmo_20 site will not be part of a real community it will probably need to attract people with their own transport. It will undoubtedly increase pollution to sensitive open areas we have all supported.

What financial benefit can be demonstrated as a result of this development to the town.

What remedial/repair work will be funded by the developers

Can the developers evidence the impact they will have, hard facts, monies or grants rather than rhetoric.

I would ask the planning panel to seek/use formal processes to ensure concerns have been fully considered and that any current and future planning props have to meet stringent tests on local need/impact analysis.

Do we need these houses Will they be affordable for young families Will they provide jobs Can south west water cope with the sewage/water Can roads be maintained better than now Can wildlife be protected Is it morally right to erode natural often protected habitats

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I wish to submit my objection to the proposal for a vast building site next to the B3179 that is used by all Budleigh and some Exmouth residents to travel to and from Exeter by car. This road would have to be widened significantly to cope with all the extra traffic generated, first for the building itself of 800 + houses, involving lorries and suppliers, and further by each potential house likely having one or two cars. The alternative route to Exeter from Exmouth to the west would also be impacted.

The site proposed is nearer to Budleigh centre (2.3 miles) than to the centre of Exmouth (4.0 miles). Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179, even if widened, to access facilities and services, therefore an unsustainable location for development. The site allocation would overwhelm Budleigh Salterton, which has not been taken into account by the LPA when considering the Exmo_20 site. At present, our surgery and primary school are struggling to cope with the existing population.

It has been stated that 'alternative sites' have been discounted for Exmouth, but can we be sure that all potential brownfield sites have been considered?

The existing population of Exmouth at the 2021 (last) census, was 35,488, the fifth largest settlement in Devon by population. This figure increases massively with the

influx of visitors and tourists, not only in the summer but all year round, bringing an inevitable increase in road traffic on our narrow roads.

It is incredible that the planners/developers could think it desirable to build round St John in the Wilderness Church (grade II* listed) which will spoil the tranquility of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by the sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

The environmental and conservation impact of such a large development should not be dismissed. The site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of the site would undermine the conservation objections of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area aimed at combining existing wildlife sites and extending habitats. The site contains many veteran trees, ancient woodland and hedgerows which are at risk of becoming fragmented habitats. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography makes the potential cycling and walking option less viable, which is not apparent on the policy maps.

So for environmental, conservation and heritage reasons, I object to Exmo_20.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in direct conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound, and not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed

allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Move the settlement boundary away from the Pebblebed Heaths

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I must object to the building of a new estate of 700 new houses of local plan EXMO20. The project is, by far, too ambitious and far too close to Budleigh Salterton. In the summer months the high street is full to overflowing and parking becomes a lottery at best. We already have a new estate on the outskirts of the town, plus on the outskirts of Exmouth of around two and a half miles away, the new estate that begins at the top of Dinan Way and is still expanding westward. Surely that is enough building of new properties around Budleigh and Exmouth for the foreseeable future ??

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am objecting to the building of approximately 700 houses plus industrial units on the area known as Exmo20. This land is still an area of outstanding natural beauty and the land is now part of the National Landscape. Building on land outside the National Landscape would be cheaper, making possible a bigger percentage of affordable homes. The exit from this site would increase traffic at an already very busy road junction. There would be a road going straight across the much used safe Exmouth to Budleigh Salterton cycle/footpath, endangering families with young children, elderly people, cyclists and people in wheelchairs and on mobility scooters. EDDC's duty is to conserve and enhance this land, building a large estate on Exmo17 is neither conserving or enhancing it.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to the building of housing and industrial buildings on the Exmo-17 site for the following reasons:-

1. A large housing estate and industrial buildings should not be built on protected farmland in an area of outstanding natural beauty, now called National Landscape. EDDC have a duty to conserve and enhance it.

2. The proposed vehicle access road would go across the existing Exmouth to Budleigh Salterton cycle and walking path. This path is at present a safe place to walk and cycle with children away from traffic. It would not be the case if the access road crosses it.

3. This prime site with sea views would be used largely for high end housing which would probably be purchased by those outside of Exmouth. The need locally is for affordable housing. Clinton Devon Estates have other less valuable land that should be considered rather than this land in the protected National Landscape.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: I strongly urge you to consider other options.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1. Allocation of Exma_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies P801, PBOZ, PB03, PB04 and OLO2 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states "it was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA" and the Plan HRA states "there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks." This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU "People over Wind". Furthermore, selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32. 2. Allocation of Exmo 20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, P803, PB04 and OLO2 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km (HRA 4.10), and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and

significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m (Underhill-Day, 2005) currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt. In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TRO1, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath SAC/SPA/SSSI. Allocation of Exmo_20 is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance over mitigation. The Exmo_20 allocation is unlawful due to there being no reasonable scientific certainty presented for mitigation. 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it. 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December

2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo 20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats.. 7. Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TRO1 and TRO3, and therefore unsound. It also conflicts with paragraph 3.6, 11.2 & 11.6 of the Local Plan. Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179 to access facilities and services, being 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road, therefore an unsustainable location for development. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. Policy TRO1 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process, not the December 2024 amended version, presented in the 1" Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. 10. As a local resident my family and I have felt the effects of overloaded local infrastructure. Budleigh Salterton had the most incidents of sewage outlets directly into

the sea of any place in the UK. On numerous occasions last summer visitors to Budleigh beach were unable to enter the water. How can the addition of 700 homes be justified when the current sewage system clearly can't cope with the houses that are already in place? 11. The B3179 is a dangerous and highly trafficked road that cannot take more throughput without incurring serious risk. There is no obvious way to upgrade this road as it passes through protected habitats. Thank you

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan or reduce it in size so as not to infringe upon the Pebbleben Heaths and remove access via the B3179.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Adjacent to Pebblebed heaths which the council have refused permission for other nearby homes to have holiday cottages on their own land as extra footprint from people would severely damage the Pebblebeds. Infrastructure is not capable of supporting this development as it is already breaking down for the current population. Secondary school in Exmouth is not adequate for increase in children attendance. Wildlife - both animals and plants would be severely affected, if not destroyed, having a knock on effect on our environment. Loss of green spaces/rambling - soon have less green space than London. The plan is in conflict with so many current lives and the well-being of Exmouth and surroundings.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: remove Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am writing as a local resident to object to the proposed development on Exmo_17, which lies within a protected National Landscape.

Exmouth needs genuinely affordable homes for local people, not predominantly high-end housing in a sensitive landscape. Building outside the National Landscape would allow more affordable homes to be delivered at lower land cost.

The development would add hundreds of extra vehicles to already congested roads, particularly opposite the Liverton Trading Estate. For many people working in Exeter, driving would remain the only realistic option.

I walk the Exmouth–Budleigh path regularly with my dog and also cycle and run along it, as do many of my friends. I also spend a great deal of time on the South West Coast Path, which looks directly across these open fields. The proposed access road would cut across the cycle and footpath, require the loss of mature trees, and permanently change the character and safety of these much-loved routes.

For these reasons, I strongly object to the development of Exmo_17 and urge the council to protect this precious landscape.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Ellen kinnear

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

OBJECTION Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt. In the absence of information relating to this, a precautionary approach should be applied by the competent authority the LOA

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the See Stop Exmo.20 Facebook page for full comments SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI, the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states "it was not possible to scene out a Likely Significant Effect for other units within the EDPH SAC and SPA" and the Plan HRA states "there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks". This site was selected on 03/09/24 (without option to reconsider) with the draft local plan approved on 11/12/24, on the assumption that a mitigation strategy would be forthcoming prior to undertaking an appropriate assessment in 30/01/25 HRA, contrary to CJEU 'People over Wind'. Please note, selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF para 32.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: Allocation of Exmouth_20 is in conflict with-areas.16c, 32, 181, 185, 186b, and 188 of the NPPF December 2023 and therefore unsound and not legally compliant. it also conflicts with par3.6, policies PB01, PB02, PB03, PB04, and 0L02 of the Local Plan. Due to the Exmouth_20 site being so close to the adjacent Pebbled Heats SAC/SPA/SSSI, it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreation activities like dog

walking, cycling and walking, thus causing harm to highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt of a rare species like the nightjar. In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: It is in conflict with paras 16c, 32, 73b (specifically footnote 38 and 7) 180d, 180e, 181, 185a, 186b, 188, and 191c of the NPPF December 2023 and is unsound and not legally compliant. It also conflicts with para 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the local Plan. Allocation of Exmo_20 is in conflict with paras 16c, 92, 114b, 114d, 180e and 181 of the NPPF December 2023 and is therefore unsound and not legally compliant. It also conflicts with para 3.6, policies TR01, OL09 and PB04 and para 11.2 of the Local Plan. The current proposal is to have the bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncounded highway works, not confirmed by Devon County Council. The B3179 is a narrow windy road that is heavily used at rush hour times and the inevitable increase in traffic will cause countless delays for people getting to work and school. Cumulative and in-combination effects on B3179 MUST be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The HRA (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation...to air quality", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath SAC/SPA/SSSI. Allocation of Exmo_20 is contrary to the precautionary approach and goes against the Mitigation Hierarchy of avoidance over mitigation. The Exmo_20 allocation is unlawful due to there being no reasonable scientific certainty presented for mitigation.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Joanna Knott

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

llocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I want my voice to be heard

Full name: NICHOLAS LAMBRECHTS

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: REMOVE EXMO_20 FROM LOCAL PLAN

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st & 2nd Regulation 19 evidence library falsely claiming to be, with no record of the May 2022 version. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected since the site failed the HELAA stage, being not suitable or achievable. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any

matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of

sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Do not access the site via B3179

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: REMOVE EX

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: To check due process has been followed and be kept informed

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Objections to building on Exmo_17 (National Landscape) Re The proposal to build a huge housing estate and industrial building on our protected farmland which is an Area of Outstanding Natural Beauty (now known as National Landscape), opposite MacDonalds, Exmouth. Should this go ahead, I will regard it as crass negligence and maladministration on the part of EDDC, who will have failed to take into account the need for nature for our future generations. I also have other reasons for not wanting to see any building here.

1. Large housing estates should not be built on protected National Landscape (already mentioned, but needs emphasising again.)

2. The exit from this Exmo-17 site would create traffic chaos and the proposed vehicle access road would go straight across the existing Exmouth to Budleigh cycle/foot path and would require the felling of mature trees and bushes. This well-used path gives safe, tranquil access to cyclists, dog walkers, children, recreational walkers and people in wheelchairs and on mobility scooters. I think this would endanger these users and there would be a loss of a peaceful amenity within the National Landscape.

3. Chapter 8: Housing Needs Building on land outside the National Landscape would be cheaper, making it possible for a larger percentage of affordable homes. We desperately need more social housing and affordable homes, but those being proposed on the National Landscape will be neither affordable nor social housing, as they are being built

as usual for profit, being high end, with no thought to the needs of the local people. Instead, they will be bought by incomers who can afford them, once again lining the pockets of the builders. They might claim to be proposing to build affordable homes, but in reality this rarely happens and any numbers mentioned are greatly reduced. Has Exmouth Town Council's assessment of housing needs been consulted?

4. Chapter 11: Sustainable Transport The access road would be directly opposite the Liverton Trading Estate, which is a well-known bottleneck with queues of cars waiting to exit. A new roundabout has been projected plus two pedestrian crossings on the busy main road into and out of Exmouth. Traffic would be significantly held up at this point, as we experience with the pedestrian crossing outside Marks and Spencer causing traffic and the chaos caused with the building work and Dinan Way extension onto Exeter Road – in the middle of winter! What it will be like in summer is anybody's guess, but it can only get worse. To reach Exeter, where the jobs are, the choice would be to drive there, to catch two buses (passing every half hour) or a bus plus a train.

5. Chapter 12: Landscape Exmo_17 had two protections until EDDC , without any justification, recently removed its Coastal Preservation area status - despite hundreds of objections from residents. Why did you ignore these objections? It sounds suspiciously like another tick box exercise to say you have consulted with residents – not because you wanted to listen to what Exmouth residents had to say, but because you were obliged to consult. It is a very large, precious area of National Landscape farmland that is protected against large-scale developments. EDDC's duty is to 'conserve and enhance' it. (***) Personal details have been removed (***) on behalf of the Housing Minister, (***) Personal details have been removed (***), has confirmed this in a letter to our MP, (***) Personal details have been removed (***), of 18th August 2025 extracts from which I give below). "I would like to assure your constituent that the Government recognises the importance of the natural environment to both mental and physical health, and I hope that my response will provide reassurance and be of help in this regard. While the Government believes the reforms in its Bill are critical to meeting its ambitious targets of building 1.5 million safe and decent homes by the end of this Parliament, we are clear that this should not come at the cost of the environment. The Nature Restoration Fund (NRF) is not simply about streamlining how environmental obligations are discharged, but about using funds more effectively to secure better outcomes for the environment. ...the NPPF is clear that decision-makers should recognise the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services. Great weight should be given to conserving and enhancing landscape and scenic beauty in National Landscapes which have the highest status of protection in relation to these issues. The scale and extent of development within all these designated areas should be limited, while development within their setting should be sensitively located and designed to avoid or minimise adverse impacts on the designated areas." In no way is building a large estate of 450

houses on Exmo_17 conserving or enhancing it, let alone being sensitively located and designed to avoid or minimise adverse impacts on the designated areas. Instead, it would decimate the natural beauty of the land, be noisy, an eyesore and no more would people be able to enjoy the peace, flora and faunas of this beautiful area. There is no reason to build proposed industrial units on this land. Logically, they should be built on the Trading Estate opposite or Exmo_18, both of which have the same landowner. The landowner has recently terminated the lease to a nearby farm of National Landscape pastureland adjacent to Exmo_17. Does this mean that they are hoping for a domino effect, building further estates on our irreplaceable National Landscape?

6. Chapter 15: Historic Environment The proposed estate would be close to Littleham's medieval church where Lady Nelson is buried. There is also an old farmhouse on the perimeter. These National Landscape fields are in plain view from the coast path that runs along the World Heritage Jurassic Coast – a place of haven for people to view and walk along. Exmouth is advertised as being part of this world heritage site, but could easily lose this status and the tourism it brings, if house building were to start on this land.

7. The Exmouth Conservation Area Management Plan mentions that “..the removal of small building details or the addition of inappropriate extensions will have a marked effect over a longer period of time. It is therefore important to manage, monitor and enforce seemingly insignificant changes within the conservation area”. I do not call the building of 450 houses in an Area of Outstanding Natural Beauty an insignificant change, but a major one that will not enhance the town, but will in fact detract from its beauty. It also mentions that green spaces are offered additional statutory protection through local planning policies and that trees are often very much part of the visual structure of a town or village. Their retention and appropriate management therefore needs to be kept a high priority. The designation of conservation areas offers such protection to trees and woodland. Whilst the builders will claim that they will restore biodiversity, etc., there is no way they are going to be able to replace the trees they fell to the size at which they are now. At the moment all I can see is that Exmo 17 is being treated as Green Belt land, which is about urban planning and growth management. However, it is not Green Belt land, but National Landscape land, which is about landscape protection and conservation and nothing to do with building a massive number of houses. Furthermore, National Landscapes are given equal protected status with National Parks. A policy paper published by the previous government in 2022 gives a response entitled “ Landscapes Review (National Parks and AONBs) government response” gives a lot of information regarding the protection of our National Landscapes and National Parks. It starts off by saying: “All of England's landscapes are important, but National Parks and Areas of Outstanding Natural Beauty (AONBs) are our most iconic and beautiful places. Based on their geology and history, these characteristic landscapes contain swathes of ancient woodland, deep peat and

grassland, and many of our most threatened species such as the red squirrel, curlew and water vole. Protected landscapes represent our shared heritage and national identity, and are home to many of our rural communities and businesses. They also support our nation's health and wellbeing as unique places to experience natural beauty and tranquillity.” and: “Our vision for protected landscapes is: ‘A coherent national network of beautiful, nature-rich spaces that all parts of society can easily access and enjoy. Protected landscapes will support thriving local communities and economies, improve our public health and wellbeing, drive forward nature recovery, and build our resilience to climate change.’” The review recognised the vast majority of AONBs are indistinguishable from National Parks and are just as important for people and nature National Planning Policy chapter 15 and para 189 – 191 and 193, also states: “189 Great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and National Landscapes which have the highest status of protection in relation to these issues. The conservation and of wildlife and cultural heritage are also important considerations in these areas, and should be given great weight in National Parks 190 When considering applications for development within National Parks, the Broads and National Landscapes, permission should be refused for major development other than in exceptional circumstances, and where it can be demonstrated that the development is in the public interest. Consideration of such applications should include an assessment of: a) the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy; b) the cost of, and scope for, developing outside the designated area, or meeting the need for it in some other way; and c) any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated. 191 Within areas defined as Heritage Coast (and that do not already fall within one of the designated areas mentioned in paragraph 189), planning policies and decisions should be consistent with the special character of the area and the importance of its conservation. Major development within a Heritage Coast is unlikely to be appropriate, unless it is compatible with its special character.” Para 193 mentions that when determining planning applications, local planning authorities should apply various principles. The first mentioned states: “... if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated, or, as a last resort, compensated for, then planning permission should be refused” This alone shows that considerable harm would be done to this site in building any houses, let alone 455, as they can be located on an alternative, non National Landscapes site – so planning permission should be refused.

8. EDDC must abide by The Countyside and Rights of Act 2020, in particular paras 85 and 87. “85.— General duty of public bodies etc. (A1) In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty

in England, a relevant authority other than a devolved Welsh authority must seek to further the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty. 87.— General purposes and powers (A1) It is the duty of a conservation board established in relation to an area in England, in the exercise of their functions, to seek to further— (a) the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty, and (b) the purpose of increasing the understanding and enjoyment by the public of the special qualities of the area of outstanding natural beauty, but if it appears to the board that there is a conflict between those purposes, they are to attach greater weight to the purpose mentioned in paragraph (a).” This means that EDDC will be acting illegally if they decide to grant planning permission to Bloor Homes to build on National Landscape Land and should in fact be promoting Exmo 17 Area of Outstanding Natural Beauty to residents and tourists alike.

I am also attaching two letters that were sent to the Exmouth Journal in 2025, by other people who clearly were not happy. I agree with their sentiments and would like you to take them into account.

Finally, I would appreciate it if, for once, you read and consider carefully all the objections you receive from people regarding Exmo 17 and do not treat them as just a tick box exercise to say that you have consulted with people. It does not matter whether it is one or a billion and one people who object, they all count and not only must be taken into account, but their concerns must be acted upon and not disregarded. Your portal is extremely difficult to get into and I consider that this is done deliberately so that people give up and the Council can claim that not many people objected – which could well be far from the case.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the draft local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st & 2nd Regulation 19 evidence library falsely claiming to be, with no record of the May 2022 version. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected since the site failed the HELAA stage, being not suitable or achievable. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change

of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(a). If yes, and you wish to support the soundness of this part of the Development in the Towns and Villages chapter, please use this box to set out your comments.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st & 2nd Regulation 19 evidence library falsely claiming to be, with no record of the May 2022 version. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected since the site failed the HELAA stage, being not suitable or achievable. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_2 from the draft plan

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Good evening. I am a frequent user of the Exmo_17 walk path and today I have learned that there are plans to build more houses and a road in the middle of the path leading to Budleigh. As someone who is autistic and uses this walk path as a safe space away from noisy roads, I am very upset that this walk path will be built upon with even more houses and a road. This walk path is used regularly by everyone every day and considering this walk path is also an area of outstanding natural beauty, it is horrible and upsetting that this path is even considered for building upon. Please DO NOT build on this path. Not only will building upon it be upsetting to everyone who uses it, but it would also disturb the natural wildlife that lives there as well as local farmers who use the nearby fields for their animals.

I appreciate you taking your time to read this and please consider what I have written. Thank you.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge

East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Take Exmo_20 out of the local plan

Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East

Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I strongly object to the allocation of Exmo_20. A video taken at St John's Campsite on 21 January 2026 shows powerful, overflowing drains during heavy rain. This is real-world evidence of how vulnerable this area already is to flooding. Adding a major housing development above the town will only make this worse. Withycombe Brook already has a long history of flooding in Exmouth, and the Strategic Flood Risk Assessment barely mentions it. The Exmo_20 site sits on higher ground, and its runoff flows directly into the brook, which then passes through some of the most populated parts of East Devon. This puts homes, businesses and residents at even greater risk.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 16(d) of the NPPF (Dec 2023) and is therefore unsound and not legally compliant. The Plan contains an over-supply of housing allocations because it does not use the "most recent data published at the time" from the ONS, as required by the MHCLG Housing and Economic Needs Assessment guidance. The figure of 1,188 quoted in paragraph 3.11 was calculated in February 2025, before the release of the 2024 ONS data, and is therefore invalid. Using the correct dataset reduces the figure to 1,156, with 80% equating to 925, and produces a 22-year plan requirement of 20,342 (without rounding errors). This represents a reduction of 567 dwellings. Many policies in the Plan rely on demonstrating an overriding need to justify impact or harm. Because the housing figures are incorrect, this justification does not exist—particularly in relation to the Mitigation Hierarchy assessment. Exmo_20 should be removed from the Plan due to the extensive mitigation required to address its impacts on the internationally and nationally designated Pebblebed Heaths SPA/SAC/SSSI. Additional numerical and mathematical errors appear in evidence documents HOU-002 (Oct 2025) and HOU-001 (Nov 2025). These errors must be corrected and re-consulted upon, as they underpin the Local Plan's housing policies. Paragraph 16(d) of the NPPF (Dec 2023) requires that "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals." The current evidence base does not meet this standard

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 109 of the NPPF (Dec 2023) and is therefore unsound. It also conflicts with Policy TR01 and paragraph 11.6 of the Local Plan. The proposed main vehicular access for Exmo_20 lies 2.3 miles from the centre of Budleigh Salterton and 4.0 miles from the centre of Exmouth. This would place disproportionate pressure on Budleigh Salterton, contrary to the settlement hierarchy, yet the town has not been properly considered by the LPA in assessing the impacts of this allocation. The site's topography, and that of the surrounding area, further reduces the practicality of walking and cycling—an issue not reflected in the policy maps—resulting in a development pattern that would embed car dependency rather than support sustainable travel.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF (Dec 2023) and is therefore unsound. The LPA has attempted to retrospectively alter the Site Selection Methodology (SSM) to justify including Exmo_20. The May 2022 SSM was the version used during the Regulation 18 process. However, after 11 December 2024—the date the draft Local Plan was approved for Regulation 19 publication—the methodology was amended. This December 2024 version was then presented in the first Regulation 19 evidence library as though it had been used for site selection, despite not being applied at that stage. Such retrospective alteration raises serious concerns and appears inconsistent with the Nolan Principles. The original May 2022 SSM, which was used for Regulation 18, contains wording that would have prevented Exmo_20 from being selected. Relevant extracts include: Stage 2: Site Sifting (1.8) A sifting process is undertaken to ensure that only “reasonable alternatives” progress. Only sites meeting criteria a), b) and c) are carried forward to Stage 3. Criterion a) Site must be assessed as “suitable, available and achievable” in the HELAA. Subtext point 6 “It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.” Under the methodology actually used at Regulation 18, Exmo_20 should have been excluded.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in conflict with NPPF (Dec 2023) paragraphs 92 and 109, and with Local Plan policies TR01 and TR03, rendering it unsound. It also conflicts with paragraphs 3.6 and 11.2 of the Local Plan. Exmo_20 would substantially increase reliance on car travel, requiring residents to make additional and more convoluted journeys via the proposed B3179 access point to reach everyday facilities and services. There is no evidence that essential local services can be accessed safely or conveniently by walking or cycling. Recent changes to Policy TR01 strengthen this conflict, as walking and cycling being the primary modes of travel is now a mandatory requirement rather than an aspirational one. The site's isolated location and its dependence on the B3179 for access would result in an unsustainable pattern of development, generating significant vehicle movements for residents travelling to Budleigh Salterton and Exmouth. For homes located in the southern part of the site, the proposed access arrangement would require at least 1km of internal driving for every outward and return journey, further embedding car dependency. These roads are dangerous with hidden dips, extreme bends and accident hotspots.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF (Dec 2023) and with Local Plan paragraph 3.6 and policy AR01(b), rendering it unsound. The Level 1 Strategic Flood Risk Assessment references Withycombe Brook only as a footnote in Table 5-3, despite Exmouth having numerous and significant flood-risk pathways, with recorded fluvial flooding in 1960, 1983 and 2012. Withycombe Brook already presents notable flood-risk areas, even before accounting for current and future climate-change impacts. Exmo_20 is a greenfield site located upslope of the town, with tributaries and surface runoff feeding directly into Withycombe Brook, which flows through the most densely populated wards in East Devon. The Local Planning Authority has not applied the required sequential, risk-based approach to site selection to avoid increasing flood risk to people and property. I have video of overflowing drain taken outside St Johns campsite on 21st January which I am unable to upload but happy to share.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in conflict with NPPF (Dec 2023) paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 and 191, and is therefore unsound. It also conflicts with Local Plan Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 and 13.24. Exmo_20 lies within Strategic Nature Area 368, which functions as a critical buffer between Exmouth and the internationally and nationally designated Pebblebed Heaths SPA/SAC/SSSI. The site provides supporting habitat for Nightjar foraging—a key qualifying species for the SPA and a Section 41 Priority species—and forms an important wildlife corridor linking the Pebblebed Heaths to the coast. Development here would undermine the conservation objectives of the SPA. Devon County Council is in the final stages of designating this land as a Local Nature Recovery Area within its forthcoming Local Nature Recovery Strategy (due March 2026), in line with the Environment Act 2021. The site contains veteran trees, ancient woodland and species-rich hedgerows, all of which are vulnerable to fragmentation if development proceeds. Devon Wildlife Trust, in their Regulation 19 response, emphasise that the entire Exmo_20 allocation lies within a Strategic Nature Area identified for nationally important habitats and species. They state that SNAs should be prioritised for enhancement, not development, and warn that the sensitive habitats and species associated with the NNRS/SAC/SPA/SSSI designations would be exposed to significant detrimental effects. They conclude that it is not feasible to develop this site without causing adverse effects on the integrity of the SAC and strongly urge East Devon District Council to remove the allocation from the Local Plan. I reserve the right to comment further once a supporting HRA and mitigation strategy are available and request to be notified when these documents are provided.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF (Dec 2023) and is therefore unsound. It also conflicts with Local Plan Policies HE02 and OL01(D). A development of this scale surrounding St John in the Wilderness Church (Grade II* listed) would cause significant harm to the church's remote, tranquil setting. The church, churchyard and surrounding buildings—part of a Medieval Saxon settlement site—are defined by dark skies, seclusion and a distinctive 'wilderness' character. This setting would be irreversibly damaged by encircling the area with housing, even if a buffer zone were retained. Historic England, in their Regulation 19 consultation response, emphasise that Exmo_20 covers a large area to the east and northeast of Exmouth, much of which lies within the setting of the Grade II* listed church. They state that development "could result in considerable harm" to this asset, which the NPPF identifies as being of the highest significance (para 206b). They also raise concerns about the proposed long access road from the B3179, noting that it could itself harm the setting and create future development pressure. Historic England advise that alternative access from the south should be explored. If evidence shows development can be accommodated in less sensitive southern areas, the site boundary should be amended. If this is not achievable, the scale and type of development should be reduced to only what can be justified without causing unacceptable harm.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with NPPF (Dec 2023) paragraphs 16c, 92, 114b, 114d, 180e and 181, rendering it unsound and not legally compliant. It also conflicts with Local Plan policies TR01, OL09 and PB04, as well as paragraphs 3.6 and 11.2. There is no viable access solution for the site. The proposal to route the majority of traffic onto the B3179 would require major, uncertain and uncostered highway works that Devon County Council has not confirmed as feasible. The cumulative and in-combination impacts on the B3179 must be assessed, including increased congestion and air-quality effects on the adjacent Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) states that there is “currently not sufficient certainty to rule out adverse effects on integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA).” This is directly linked to the proposed primary access onto the B3179, which would channel additional traffic along the boundary of the protected site. Allocating Exmo_20 is therefore incompatible with the precautionary approach required under the Habitats Regulations and contrary to the Mitigation Hierarchy—where avoidance must be prioritised over mitigation, as mandated by the Environment Act 2021. The Mitigation Strategy itself confirms that “mitigation cannot be assumed without evidence (People Over Wind; Sweetman).” As no reasonable scientific certainty has been provided, the inclusion of Exmo_20 in the Plan is unlawful.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan.

Full name: Keith Luckhurst

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with NPPF (Dec 2023) paragraphs 16c, 32, 181, 185, 186b and 188, rendering it unsound and not legally compliant. It also conflicts with Local Plan paragraph 3.6 and policies PB01, PB02, PB03, PB04 and OL02. Because Exmo_20 lies directly adjacent to the Pebblebed Heaths SAC/SPA/SSSI, it is unlikely that Suitable Alternative Natural Greenspace (SANG) of the necessary quality, scale, and proximity could be provided to divert residents from using the designated heathland for dog walking, cycling and other recreational activities. Such use would risk harm to protected habitats and species. Evidence shows that “just one event leading to predation is enough to end that nesting attempt” for ground-nesting European Nightjar, a qualifying SPA feature [Langston et al., 2007]. In the absence of robust evidence to the contrary, the Competent Authority must apply the precautionary principle. The RSPB, in their response to the first Regulation 19 consultation, expressed strong concerns that mitigation for allocations closest to the heathlands—particularly Exmo_20—would be ineffective in preventing damaging impacts on SPA/SAC habitats and species, including additional nitrogen deposition from increased traffic. They highlight risks of both direct and indirect loss of foraging habitat, increased cat predation on ground-nesting birds, and increased recreational pressure (including dogs off leads) if residents choose to use the heathland for daily activities. The RSPB further notes a significant risk that SANG and open space associated with the development would be insufficient to prevent harmful increases in recreational use of the designated heathlands. Although SD01 states that development within 400m of the Pebblebed Heaths will not be permitted, there is no mechanism to prevent residents or domestic cats from accessing the heathland. This risk increases the closer new dwellings—and their associated cat

populations and recreational needs—are located to the protected site. I reserve the right to comment further once a supporting HRA and mitigation strategy are provided and request to be notified when these become available.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with NPPF (Dec 2023) paragraphs 16c, 32, 73b (including footnotes 38 & 7), 180d–188 and 191c, rendering it unsound and not legally compliant. It also conflicts with Local Plan paragraph 3.6 and policies PB01–PB04 and OL02. A minimum 400m exclusion zone next to the Pebblebed Heaths SAC/SPA/SSSI is required. This buffer is intended to mitigate cat predation and other urban pressures, yet evidence shows domestic cats can roam over 2km in rural areas [Hall et al., 2016; Metsers et al., 2010; HRA 4.10]. Given that the ground-nesting Nightjar is a qualifying SPA feature and highly vulnerable to predation—where even a single event can end a nesting attempt [Langston et al., 2007]—a precautionary buffer significantly greater than the pragmatic 400m currently proposed is warranted. Exmo_20's inclusion depends on a mitigation strategy and HRA that have not yet been produced in a form capable of supporting the Plan. In their absence, the precautionary principle must apply. At minimum, the 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI should be removed from the allocation. This land provides functionally linked foraging habitat for the European Nightjar (a key SPA species and Section 41 Priority species), and a larger buffer will also be required to address recreational impacts—dogs off leads, cycling, and walking—none of which have been assessed at site level. This position is supported by multiple ecological bodies, including DWT and RSPB. The East Devon National Landscape Partnership stated in the first Regulation 19 consultation that a 400m buffer “does not seem significantly large enough” to prevent disturbance, habitat fragmentation, and degradation, and therefore supports non-adoption of the site. If the site must remain under consideration, they recommend a substantial reduction in scale and a shift of development closer to the existing settlement to maintain a meaningful

rural boundary with the Pebblebed Heaths. The allocation is further weakened by the availability of multiple alternative sites requiring far less mitigation, and by the Plan's over-allocation of housing due to the failure to use the latest mandatory ONS data. Natural England also notes that the policy lacks clarity on the location of employment uses and recommends a natural buffer along the B3179, with potential to move the settlement boundary further from the SAC/SPA and secure a green buffer via S106. This would represent clearer, sounder planning and better reflect the restrictions required around the East Devon Heaths SAC/SPA. I reserve the right to comment further once a compliant HRA and mitigation strategy are provided and request to be notified when these become available.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the plan

Full name: Keith Luckhurst

Proposal:

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 conflicts with multiple requirements of the NPPF (paras 16c, 32, 73b with footnotes 38 & 7, 180d–188, and 191c) and is therefore unsound and not legally compliant. It also conflicts with Local Plan paragraph 3.6 and policies PB01–PB04 and OL02. Because the site sits directly next to the Pebblebed Heaths SAC/SPA/SSSI, it depends on extensive habitat and species mitigation that has not been shown to be achievable or viable. The mitigation strategy itself states that a Likely Significant Effect could not be ruled out, and the Plan’s HRA confirms that the proposed growth would exceed threshold levels with no current means of mitigation. The site was selected on 03.09.24 and included in the draft plan approved on 11.12.24 on the assumption that mitigation would be developed later. An appropriate assessment was only undertaken in the 30.01.25 HRA, contrary to the CJEU “People Over Wind” ruling and the required precautionary approach, reinforced by the “Dutch N” judgment. Selecting a site with known mitigation requirements also requires clear justification under the Mitigation Hierarchy (NPPF para 32). The LPA has not carried out this assessment, despite the availability of other suitable, lower-risk sites and an overall oversupply of allocations caused by not using the latest mandatory ONS data. Devon Wildlife Trust has already stated that the site currently acts as an essential buffer between Exmouth and the designated heathland, and that development would degrade ecologically important land outside the protected boundaries. Overall, the LPA has shown significant failings in its duties as the Competent Authority under the Habitats Regulations. I reserve the right to comment further once a compliant HRA and mitigation strategy are provided and request to be notified when these become available.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation is unsound as it conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179 but to make this viable would require major uncertain and uncounted highways works not confirmed by EDCC. Cumulative and in combination effects on B3179 must be considered both in terms of traffic and congestion and air pollution.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the plan.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Substantially reduce the area of proposed development if it cannot be excluded completely in light of other developments in East Devon.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the LPA completely, as new towns around Exeter and Clyst St Mary will provide adequate housing in more convenient areas for transport and work links.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA appears to be in conflict with EDDC's responsibilities as a competent authority under the Conservation of Habitats and Species regulations.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the Local Plan in its entirety.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: EDDC have largely ignored the substantial objections presented at the initial consultation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmouth 04 should have never been included in the Local Plan, it was included at second meeting as 'least worse option', when in fact it is one of the worst options. This area is old parkland, laid out in mid to late 1700s, it contains many ancient and veteran trees and woodland., as verified by EDDC's own tree officer. This area is home to many endangered species, many of which are on the RED LIST, This area is WOODPASTURE PRIPORITY HABITAT, which has its own protections, however these protections are increased by the presence of many veteran and ancient trees. National Planning Policy standing advice is that planning should be refused, therefore it begs the question Why is this site being put forward? 50 houses could be accommodated on other sites in ,East Devon without destroying so much.. EDDC want to increase tree cover and increase biodiversity and yet want to destroy one of the most biodiverse sites in Exmouth . This site is unsustainable as a car would be required . This is a sloping site with water runoff from commons, hard landscaping could result in flooding further into Exmouth. This site is up to 400m buffer zone to the Pebblebed Heaths. Access to this site is dangerous

Repeatedly I have tried to get on the Commonplace site to object, to find the site is not available. So I am contacting you this way. I wish to strongly object to the above development which will have a huge impact on Budleigh Salterton - as this is the nearest town 2.3. miles away. The planned development is on the far north east reach of Exmouth & although within its boundary is far nearer to Budleigh Salterton. We have little enough infrastructure in Budleigh as it is, adding 700 homes = at least 1400 cars & more than 1400 people is not sustainable.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear Planning Policy Team,

I am writing to formally object to the proposed allocation of land known as Exmouth 04 (off Higher Marley Road, known locally as The Lawn) in the Second Ref 19 Consultation of the East Devon Local Plan.

This site is a historic parkland and wood-pasture priority habitat of exceptional environmental and heritage value. It supports numerous protected and endangered species, many of which are recorded on the Red List, as detailed in the ecological reports. The site also contains a significant number of veteran and ancient trees, including some of the oldest Lucombe Oaks in the country. Such habitats are irreplaceable and should be afforded the highest level of protection.

The Lawn predates the Marley estate and was likely laid out in the mid-18th century when the former house “Whimsey” was built. Its historic parkland character remains intact and contributes substantially to the local landscape setting and heritage value of the area. Development would result in irreversible harm to this historic environment.

The site also functions as a vital wildlife corridor, with ancient woodland on either side of a narrow field, enabling species movement through the landscape. Additionally, there is an underground stream running through the centre of the site. Any diversion or hard landscaping associated with development would significantly increase flood risk, with potential downstream impacts on Exmouth, particularly given runoff from surrounding commons.

Access to the site via Higher Marley Road would increase traffic pressure, with knock-on effects on Dinan Way and routes across the Common. This raises serious concerns regarding highway safety, congestion, and the sustainability of access arrangements. Furthermore, the site lies within approximately 400 metres of the Pebblebed Heaths, an area of internationally recognised ecological importance, and development risks increasing recreational and environmental pressure on this sensitive landscape.

I understand that national planning policy and standing advice indicate that development on such sensitive wood-pasture and historic parkland sites should be refused. It is therefore deeply concerning that this allocation has been put forward despite the acknowledged constraints. The scale of development proposed (up to 130 dwellings) is wholly inappropriate for a site that was previously considered suitable for far fewer homes, if any.

For these reasons, I strongly object to the allocation of Exmouth 04 in the Local Plan and urge East Devon District Council to remove this site from consideration and afford it appropriate long-term protection.

Thank you for considering my objection.

Yours faithfully,

*** Personal details have been removed *** Exmouth Resident

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: This email is to protest strongly, but calmly & rationally, about the above project.

By way of briefest possible background, I am 3rd generation Budleigh Salterton, and my paternal ancestors lived & farmed in Devon for centuries.

The second point I would place on record is that, after a business career spent almost entirely abroad & spanning 34 years, I have spent my last 31 years working for wildlife conservation across the world, and my wife and I have been long-running supporters of Devon Wildlife Trust. We are both now 85, but still reasonably fit, active and capable of rational thought

The beautiful and wildlife friendly habitat on Woodbury Common is far too valuable to be turned into yet more 'Urban Sprawl'. In fact the whole of the much loved SW countryside is now under constant threat from development - to say nothing of the massive increase in road traffic. And when we made our last trip to Exeter along the B3179 last week we were horrified by the sheer quantity of roadside litter.

I will not expect a response to this message, other than a possible routine standard acknowledgement, or spark reconsideration of the proposed large scale housing

development. However, If this sort of development on natural landscapes continues, all our future generations will bitterly regret it.

We are always open to contact by telephone and would welcome a chance for calm discussion: we know that some of our friends and neighbours have already raised highly relevant issues concerning increased pressure on local schools, medical facilities, public transport etc.

Best wishes, because we know you are all very busy, but a development of this size in this location is seriously wrong from every angle.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Delete Exmo_20.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I still think there are far too many homes being built on green belt land, particularly the area just off Salterton Road, opposite Liverton Business Park where The Range, Pets At Home etc are. More "brown field" sites in town should be found to build on, if people are supposed to be so desperate to find homes.

Also, will there be more cycle paths built as part of this new "Local" plan? There are nowhere enough cycle paths in Exmouth at present. Exeter, in comparison, is quite well provided for with cycle paths.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The main access point of Exmo_20 is significantly closer to BudleighSalterton than Exmouth, making Budleigh it's most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the preferred choice for residents of Exmo_20. This undermines the settlement hierarchy and would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the Local Plan. An alternative site to Exmo_20 for housing allocation should be selected, one which was deemed available, achievable & suitable in the HELAA. Exmo_20 would cause harm to the adjacent Pebblebed Heaths (SSSI/SAC/SPA/NNR) due to Exmo_20 being a supporting foraging habitat. Developing Exmo_20 is contrary to POLICY PB01 of the local plan and not in accordance with the mitigation strategy. Exmo_20 would cause harm to the heritage assets, most significantly St John in the Wilderness Grade II* listed church and churchyard, drastically altering the attractive rural setting for worship & burials which currently exists. This is contrary to POLICY HE02. Exmo_20 would have a detrimental effect on the adjacent designated wildlife sites and destroy the "tranquility, wildness and dark skies" of the countryside, which is contrary to POLICY OL01. Exmo_20 development would be in conflict with the Strategic Nature Area 368, fragmenting and isolating habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would cause harm to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9. Exmo_20 is in conflict with POLICY OL09 and POLICY PB04 as the Habitats Regulations Assessment (30.01.25) states that there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (East Devon Pebblebed Heaths SAC/SPA) such that the Plan fails the integrity test. Development of

Exmo_20 on heavy clay subsoil with ineffective soakaways, would exacerbate the already identified downstream flood risk along Withycombe Brook through Exmouth, which is already beyond its design capacity. This is in conflict with POLICY AR01B. Exmo_20 would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. The isolated location is unsustainable development as people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre to use walking or cycling as their choice of transport. This is contrary to POLICY TR01.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Complete overhaul of infrastructure before new developments occur. Also increase in medical facilities for elderly population.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Current infrastructure including sewerage, medical facilities are unable to cope with current population & this will proposal will cause additional pressure. Also the huge damage caused to the environment to this area which is rich in wildlife should be considered. Brownfield sites should be used before any greenfield development is considered.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am very concerned about the proposed Local Plan particularly the proposal in it to build 400 odd houses and industrial units on the fields to the immediate East of Littleham church, Exmo_17 (National Landscape). This would have a negative effect on Exmouth in many ways. The area is part of an Area of Outstanding Natural Beauty (or National Landscape) and is one of the major attractions of Exmouth and particularly the eastern edge of the town.

But National Landscapes are also regional and national assets and should be protected as such. Building on them on this scale should be very much a last resort. There is a briefing document dated November 2024, Guidance for Local Planning Authorities, produced by the National Landscapes Association which makes this very point and indeed in stronger terms. It states that Section 85 of the Countryside and Right of Way Act 2000 (as amended by the Levelling-up and Regeneration Act² in December 2023) requires ‘relevant authorities’, in exercising or performing any function that affect AONBs in England, to “seek to further the purpose of conserving and enhancing the natural beauty of the Area of Outstanding Natural Beauty.” It states that this is a ‘statutory duty’, not discretionary, and is a strengthening of the previous ‘duty of regard’.

When it comes to site allocation the guidance states that if promoting a site allocation would not align with the duty to seek to further the conservation and enhancement of

natural beauty, then consider amending or deleting a site allocation (For example, choosing NOT to allocate a particular site within or close to the AONB boundary)

It is extremely difficult to see how building 400 odd houses and industrial units on the AONB is in any way seeking to further the conservation and enhancement of the natural beauty of the AONB. In fact clearly it is doing the opposite and therefore it would seem to me East Devon would be failing in its statutory duty if it were allow this allocation to remain in the plan.

In fact, as far as I can see the plan as a whole is very weak indeed on the question of AONBs. In its calculations and projections it seems to ignore the fact that planning and development in AONBs are totally different to in none-NL areas. Both areas seem to be just lumped in together. This seems particularly significant in an area like East Devon as it has such a high proportion of AONB land. It seems to me that this must call into question as to whether or not the plan as a whole can be considered a reliable enough document to underpin so many planning decisions for such a long period of years.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_17

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:
Chapter 8: Housing Needs

The real need in Exmouth is for houses that include social rent as well as shared housing schemes - my daughter cannot get social housing even though she is homeless. Has Exmouth Town Council's assessment of housing need been consulted for this?

The vast majority of houses proposed for the prime site of Exmo_17 will be very expensive and bought up by people from outside the area as well as those looking for second homes. The number of affordable houses will likely be fewer than proposed.

Chapter 11: Sustainable Transport

The proposed estate on Exmo_17 would bring a further 800-900 vehicles onto local roads. The access road would be directly opposite the Liverton Trading Estate, which is a well-known bottleneck with queues of cars waiting to exit.

A new roundabout has been proposed, plus two pedestrian crossings on the busy main road into and out of Exmouth. Traffic would be significantly held up at this point, causing increased air pollution and slowing drivers' progress. To reach Exeter, where the jobs are, the choice would be to drive there, or to catch two buses (passing every half hour) or to catch a bus plus a train.

The A376 is already problematic as it is so busy at commute times - one minor accident leaves the area gridlocked as traffic cannot get into or out of Exmouth when this road is out of action.

Chapter 12: Landscape

Exmo_17 had two protections until EDDC , without any justification, recently removed its Coastal Preservation area status, despite hundreds of objections from residents. It is a very large, precious area of National Landscape farmland that is protected against large-scale developments.

EDDC's duty is to 'conserve and enhance' it. (***) Personal details have been removed *** on behalf of the Housing Minister, (***) Personal details have been removed ***, has confirmed this in a letter to our MP, (***) Personal details have been removed ***, of 18th August 2025). In no way is building a large estate on Exmo_17 conserving or enhancing it. Once gone, it is gone forever.

There is no reason to build the proposed industrial units on this land. Logically, they should be built on the Trading Estate opposite or Exmo_18, both of which have the same landowner.

The proposed vehicle access road would go straight across the existing Exmouth to Budleigh cycle/foot path and would require the felling of mature trees and bushes. This well-used path gives safe, tranquil access to cyclists, dog walkers, children, recreational walkers and people in wheelchairs and on mobility scooters. We think this

is dangerous and a loss of a peaceful amenity within the National Landscape. It is a loss of irreplaceable mature trees which take 30-60 years to get to early maturity.

The landowner recently terminated the lease to a nearby farm of National Landscape pastureland adjacent to Exmo_17. Could it be that they are hoping for a domino effect, building further estates on our irreplaceable National Landscape?

Chapter 15: Historic Environment

The proposed estate would be close to Littleham's medieval church where Lady Nelson is buried. There is also an old farmhouse on the perimeter.

These National Landscape fields are in plain view from the coast path that runs along the World Heritage Jurassic Coast. We risk losing this status.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Removal of Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Amanda Moors

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Environmental Impacts:

- The site is habitat for deer, rabbits, hedgehogs, foxes, badgers, which need to be preserved, along with trees, birds, insect life, butterflies, etc.
- East Devon Wildlife Trust Nature Reserve is in the immediate vicinity and will be affected by:
 - increase (in large amounts) of traffic, which will pass nearby;
 - footfall will dramatically increase, and disturb a nature reserve with its birds and wildlife;
 - beavers (which are a protected species) are resident at Bystock Pool on the Nature Reserve, and active there at this time. Mental Health:
- Ruination of yet more natural beauty, by massive development such as the one proposed. Traffic Concerns:
 - Monumental increase in traffic (700-1,000 more vehicles at a conservative estimate).
 - Impact on Dinan Way of a major through road into Dinan Way from the development; already a hugely busy road, it will now become more of:
 - an eyesore;
 - noise and pollution will be horrendous;

- Dinan Way will soon become a potential motorway in a residential area.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Full name: Helen Morgan-Parra

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st & 2nd Regulation 19 evidence library falsely claiming to be, with no record of the May 2022 version. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected since the site failed the HELAA stage, being not suitable or achievable. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear Council, I wish to lodge my objection to the proposed application of Exmo-17. I do not believe that it would be in the interest of the public, to permit Bloor Homes, to construct a large housing estate and industrial units on land adjacent Capel Lane and Salterton Road, Exmouth, known by yourself as Exmo-17. This land is a protected area of Outstanding National Beauty, now known as National Landscape.

As well as the obvious permanent destruction of the land and wildlife, I have other major concerns as follow; -

1. Large housing estates should not be built on National Landscape.
 2. Building on land outside of the National Landscape, would be considerably cheaper, thus providing the option of the inclusion of a higher percentage of 'affordable' homes.
 3. The proposed exit from the site (Exmo-17), would almost certainly cause traffic chaos, and the access road would directly cut across the much-used Exmouth to Budleigh cycle/footpath, thus endangering all users including the aforementioned, together with the sizeable number of users with disabilities, children, families and dogs.
- Yours sincerely, *** Personal details have been removed ***

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proximity to the Pebblebed Heaths is too great and will undoubtedly lead to disturbance of the unique wildlife of this site. I do not believe a 400m buffer is sufficient to mitigate against these impacts. The additional public pressure 700 new homes will generate from dog walkers in particular will have significant impacts together with the high likelihood that domestic cats from the site will predate sensitive birds and invertebrates such as butterflies. They also predate lizards and snakes. This must not be allowed to happen. Once this special wildlife are lost it is extremely hard to replace. The wildlife of the Pebblebed heaths need to be able to move outside of the area itself they cannot be expected to remain in the boundaries so 400m is a zone in which the wildlife may move so a further buffer zone is needed from the 400m point of about the same again to minimise impacts on this sensitive flora and fauna. Also, migratory birds may be deterred from accessing the Pebblebed heathland because of the disturbance caused by both the building works and the new conurbation with associated people and traffic movements and also the additional night time lighting which will appear. Additional issues that a development of this size will cause include a significant increase in sewerage loading. The Exmouth sewerage system is already overloaded and regularly causing operation of the storm overflows which are affecting water quality in the watercourses and of course at our bathing beaches. Until this excessive operation of storm overflows is stopped this development should not proceed and nor should any others in this sewerage catchment. Then there is the impact of the additional vehicles and vehicle movements in this area. Exmouth already suffers congestion problems especially at peak times of day this development would add additional loading to some

significant congestion hotspots and to the problems of congestion on the Exmouth-Exeter Road.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: On page 392 of the Sustainability Appraisal, it is stated that the 400 metre buffer from the Pebblebed Heaths SAC/SPA coincides with the higher, more prominent parts of Exmo_20, and that built development will not be permitted in this area, thereby reducing adverse landscape effects to a minor negative. However, this conclusion is not reflected in the Local Plan policies, which repeatedly state that development, including buildings, may be located within the upper parts of the site, including within the 400 metre zone. The Local Plan should accord with the findings of the SA, explicitly confirming no built development within 400 metres of the Pebblebed Heaths. This discrepancy is material. The exclusion of built development within the 400 metre zone significantly reduces the developable area of the site and directly affects its viability. This constraint further compounds the significant and material reduction in site area from the 85 hectares presented to Members and approved for allocation on 3 September 2024, and the site's viability should therefore be reassessed. On page 396, the SA states that the north-eastern part of Exmo_20 lies within a mineral safeguarding area, but that this largely coincides with the 400 metre buffer where development would not be allowed in any case. Again, this position is not carried through into the Local

Plan, which continues to allow development, including buildings, within the upper 400 metres of the site. The Local Plan should reflect the SA conclusions by removing land within 400 metres of the Pebblebed Heaths SAC/SPA/SSSI from the allocation and revising the settlement boundary accordingly. This inconsistency is particularly acute in relation to access, as the proposed access road would need to pass through land which, according to the SA, should not be developed. This creates a direct conflict between the Local Plan proposals and the SA conclusions, further undermining deliverability and viability. Finally, on page 399, the SA states that mitigation for impacts on the Exe Estuary and Pebblebed Heaths SPAs would be considered through the Habitats Regulations Assessment, but that for areas of Exmo_04 and Exmo_20 within 400 metres of the Pebblebed Heaths, mitigation would not be possible. Exmo_04 was amended to exclude the most sensitive area, resulting in Exmo_04a. No equivalent amendment has been made to Exmo_20, with no clear justification for this inconsistency. In line with the *People over Wind* ruling, mitigation cannot be assumed to justify site selection where likely significant effects cannot be excluded. The Local Plan should therefore accord with the SA by excluding land within 400 metres of the Pebblebed Heaths from Exmo_20 and revising the settlement boundary. Without this, and given the cumulative reduction in site area from the falsely claimed 85 hectares, the allocation of Exmo_20 is not justified, not viable and unsound.

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: On page 392 of the Sustainability Appraisal, Exmo_20 is described as extending to approximately 85 hectares, and a site of this size was presented to the Strategic Planning Committee on 3 September 2024. The scale of the site was clearly a material consideration, and Members were attracted by the perceived ability of a site of this size to accommodate development and associated mitigation, leading to the decision to include Exmo_20 in the draft Local Plan. However, the evidence presented to Members was not accurate, as the 85 hectare site shown did not in fact exist as an available site. The land promoted through the HELAA and subsequently available for allocation was significantly and materially smaller. Availability is one of the three HELAA tests and is a fundamental requirement in assessing site suitability. The presentation of a larger, unavailable site therefore misrepresented the true development potential and mitigation capacity of Exmo_20. This discrepancy is particularly significant given the site's proximity to the Pebblebed Heaths SAC/SPA/SSSI, where scale and land take are directly relevant to the ability to address impacts through avoidance and mitigation. In line with the People over Wind ruling, mitigation cannot be assumed or relied upon to justify site selection in advance of a lawful Appropriate Assessment. Presenting an inflated site area prior to completion of the HRA materially undermines the evidential basis of the decision. As Members were asked to make a strategic allocation decision on the basis of incorrect and misleading evidence regarding site size and availability, the decision to include Exmo_20 is not soundly based, is procedurally flawed, and the allocation is therefore unjustified and unsound.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: On page 390 of the Sustainability Appraisal, it is stated that sites on the north-eastern side of Exmouth, including Exmo_04 and Lymp_09, 10, 13, 14 and 17, lie especially close to the Pebblebed Heaths and that development of these sites could lead to some of the greater adverse impacts. The SA further states that a large part of Exmo_04 falls within the 400 metre exclusion zone on account of domestic cat predation and recreation impacts. This is incorrect. The 400 metre exclusion zone relates to urban effects, principally cat predation and urbanisation, not recreational impacts, which are assessed separately through access and visitor pressure mitigation. This demonstrates a misapplication of the Habitats Regulations framework by the LPA in its role as Competent Authority. On page 391, Exmo_20 is considered without similar reference to “greater adverse impacts”, despite being the largest site and directly adjacent to the Pebblebed Heaths SAC/SPA/SSSI. This represents an inconsistent and unbalanced assessment within the SA. The latest HRA identifies an “inherent conflict” between development at Exmo_20 and the integrity of the European site, yet this is not clearly reflected or reconciled within the SA conclusions. Furthermore, Exmo_20 was selected for inclusion in the Local Plan prior to the completion of the Appropriate Assessment, contrary to the People over Wind CJEU ruling, which requires that mitigation cannot be relied upon to screen out likely significant effects. The reliance on future mitigation strategies, in the absence of a complete and robust HRA (a Core Submission Document), undermines the legality of the allocation. The subsequent introduction of references to the Strategic Nature Area and draft Nature Recovery Network, following the First Regulation 19 consultation, further indicates that material biodiversity considerations have been added after site selection. In accordance with

paragraphs 180 and 181 of the NPPF (December 2023), this evidence highlights the site's role in establishing coherent ecological networks, including as supporting habitat for Section 41 species such as the ground-nesting Nightjar. The allocation of Exmo_20 should therefore be reassessed in light of this evidence, as its current justification is not legally compliant, unjustified and unsound.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: On page 390 of the Sustainability Appraisal, it is stated that sites on the north-eastern side of Exmouth, including Exmo_04 and Lypm_09, 10, 13, 14 and 17, lie especially close to the Pebblebed Heaths and that development of these sites could lead to some of the greater adverse impacts. The SA further states that a large part of Exmo_04 falls within the 400 metre exclusion zone on account of domestic cat predation and recreation impacts. This is incorrect. The 400 metre exclusion zone relates to urban effects, principally cat predation and urbanisation, not recreational impacts, which are assessed separately through access and visitor pressure mitigation. This demonstrates a misapplication of the Habitats Regulations framework by the LPA in its role as Competent Authority. On page 391, Exmo_20 is considered without similar reference to “greater adverse impacts”, despite being the largest site and directly adjacent to the Pebblebed Heaths SAC/SPA/SSSI. This represents an inconsistent and unbalanced assessment within the SA. The latest HRA identifies an “inherent conflict” between development at Exmo_20 and the integrity of the European site, yet this is not clearly reflected or reconciled within the SA conclusions. Furthermore, Exmo_20 was selected for inclusion in the Local Plan prior to the completion of the Appropriate Assessment, contrary to the People over Wind CJEU ruling, which requires that mitigation cannot be relied upon to screen out likely significant effects. The reliance on future mitigation strategies, in the absence of a complete and robust HRA (a Core Submission Document), undermines the legality of the allocation. The subsequent introduction of references to the Strategic Nature Area and draft Nature Recovery Network, following the First Regulation 19 consultation, further indicates that material biodiversity considerations have been added after site selection. In accordance with paragraphs

180 and 181 of the NPPF (December 2023), this evidence highlights the site's role in establishing coherent ecological networks, including as supporting habitat for Section 41 species such as the ground-nesting Nightjar. The allocation of Exmo_20 should therefore be reassessed in light of this evidence, as its current justification is not legally compliant, unjustified and unsound.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Exmo_20 is incorrectly listed as a reasonable alternative on pages 386 and 387. The site was assessed in the HELAA as unsuitable and unachievable, not merely unachievable as stated. In addition, the site as submitted was not available, despite availability being one of the three HELAA tests, and this was not properly checked. The site therefore failed all three HELAA assessments. No evidence is provided demonstrating that site access, mineral constraints or proximity to the Pebblebed Heaths can be satisfactorily addressed. The proposed access arrangements and impacts on the Pebblebed Heaths SAC/SPA/SSSI rely on a viable mitigation strategy and supporting HRA, neither of which are provided within the Local Plan evidence base, despite the HRA being a Core Submission document. Furthermore, Exmo_20 was selected for inclusion in the Local Plan prior to the Appropriate Assessment being undertaken, which is contrary to the People over Wind ruling. The site's inclusion is therefore not legally compliant, unjustified and unsound.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is incorrectly listed as a reasonable alternative on pages 386 and 387. The site was assessed in the HELAA as unsuitable and unachievable, not merely unachievable as stated. In addition, the site as submitted was not available, despite availability being one of the three HELAA tests, and this was not properly checked. The site therefore failed all three HELAA assessments. No evidence is provided demonstrating that site

access, mineral constraints or proximity to the Pebblebed Heaths can be satisfactorily addressed. The proposed access arrangements and impacts on the Pebblebed Heaths SAC/SPA/SSSI rely on a viable mitigation strategy and supporting HRA, neither of which are provided within the Local Plan evidence base, despite the HRA being a Core Submission document. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 was assessed in the HELAA as unsuitable and/or unachievable and, in accordance with the Site Selection Methodology (May 2022), would have failed site sifting at that stage. On this basis, the site would be expected to be identified as a failed site (blue) on the plan figure at page 384. The Plan does not clearly explain why Exmo_20 has departed from this outcome, and its subsequent inclusion in the draft Local Plan is therefore not clearly justified and is unsound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Sustainability Appraisal has undergone significant changes since the First Regulation 19 consultation and now reads as a materially different document, providing substantially different justification, particularly in relation to the inclusion of HELAA-failed sites such as Exmo_20. The revised appraisal appears to have been reworked in response to consultation feedback on earlier shortcomings, rather than forming part of the evidence base that informed the original site selection decisions. As a result, it is unclear how decisions taken prior can reasonably rely on a subsequently revised appraisal to alter conclusions from unsound to sound. Further reliance is now placed on the revised Site Selection Methodology (v2, December 2024), which appears to have been introduced retrospectively to support the allocation. Taken together, the inclusion of Exmo_20 in the draft Local Plan is not clearly justified and remains unsound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Sustainability Appraisal accompanying the Second Regulation 19 draft represents a significant change from the version consulted on at the First Regulation 19 stage. It now provides materially different reasoning, particularly in relation to the inclusion of HELAA-failed sites such as Exmo_20. The revised appraisal appears to have been substantially amended in response to consultation feedback, rather than forming part of the evidence that originally informed site selection. This creates uncertainty as to whether the allocation of Exmo_20 was evidence-led, or whether the appraisal has been revised to support a decision already made. The later reliance on the revised Site Selection Methodology (v2, December 2024) further reinforces concerns of post-hoc justification. As such, the allocation of Exmo_20 is not clearly justified and the Plan is therefore unsound.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is unsound because it relies on future agreements, strategies and evidence that do not currently exist, meaning the Local Plan cannot demonstrate that the site is deliverable or effective. Development depends on a whole-site masterplan, multi-landowner agreement, cost-apportionment mechanisms, highway solutions, mineral safeguarding resolution and extensive mitigation, none of which are secured at plan stage. The cumulative cost and complexity of these requirements raise serious viability risks, increasing the likelihood that mitigation, infrastructure or affordable housing would be reduced through later negotiation. A sound Local Plan should resolve these conflicts through site selection, not defer them to planning applications. Parts of the site fall within a Mineral Safeguarding Area, creating an unresolved policy conflict. The allocation also performs poorly in climate terms, increasing car dependency, emissions and loss of existing carbon-storing habitats. Given the Plan's over-allocation of housing, the inclusion of such a constrained and high-risk site has not been justified against less problematic alternatives. Exmo_20 should therefore be removed or fundamentally reconsidered.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is not sound and is not legally compliant because it conflicts with paragraph 16(d) of the National Planning Policy Framework (December 2023). That paragraph requires plans to be clearly written, unambiguous, and based on robust and up-to-date evidence, so that it is evident how decision-makers should apply policies to development proposals. The Plan is based on an incorrect housing requirement, arising from the failure to use the most recent Office for National Statistics (ONS) data available at the time, as required by the MHCLG Housing and Economic Needs Assessment guidance. The annual housing need figure of 1,188 dwellings, quoted at paragraph 3.11 of the Plan, was calculated in February 2025, before the publication of the 2024 ONS household projections, and is therefore out of date and invalid. Applying the most recent ONS data reduces the annual housing need figure to 1,156 dwellings. When the Plan's own 80% delivery assumption is applied, this equates to 925 dwellings per year, resulting in a 22-year plan requirement of 20,342 dwellings (without rounding distortion). This represents a reduction of 567 dwellings compared to the figures used in the Plan. This over-allocation is material. Numerous Local Plan policies rely on an asserted overriding housing need to justify harm to heritage assets, protected landscapes, biodiversity and internationally designated sites. Where the underlying housing requirement is overstated, the justification for allocating highly constrained and mitigation-heavy sites — such as Exmo_20 — falls away. This is particularly significant given the site's reliance on multiple, complex and unproven mitigation strategies to address impacts on the Pebblebed Heaths SPA/SAC/SSSI. Further concerns arise from additional numerical and mathematical errors identified in evidence documents HOU-002 (October 2025) and HOU-001 (November 2025). These documents underpin the

Plan's housing strategy and spatial distribution. Until these errors are corrected and the evidence base reconsulted upon, the housing figures cannot be relied upon. Taken together, the reliance on outdated data, the presence of unresolved calculation errors, and the resulting lack of clarity about the true scale of housing need mean that the Plan does not meet the requirements of paragraph 16(d). The housing requirement is ambiguous, inadequately evidenced, and incapable of providing a clear basis for decision-making. In these circumstances, the continued allocation of Exmo_20 — a site with substantial and unresolved environmental constraints — cannot be justified and should be removed from the Plan unless and until the housing evidence base is corrected, updated, and subject to further consultation.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is not sound because it conflicts with Paragraph 109 of the National Planning Policy Framework (December 2023), which requires development to be located and designed to make effective use of sustainable transport modes, and to ensure that opportunities to promote walking, cycling and public transport are fully taken up, having regard to the site's location and characteristics. Exmo_20 is poorly related to existing settlements. The main vehicular access point is approximately 2.3 miles by road from the centre of Budleigh Salterton and 4.0 miles by road from the centre of Exmouth. This distance, combined with the site's elevation and surrounding topography, significantly limits the realism of walking and cycling as everyday travel choices. These constraints are not evident from the Local Plan policy maps and have not been adequately addressed in the supporting evidence. As a result, the allocation would be heavily reliant on private car travel for access to shops, services, education, healthcare and employment. This directly conflicts with Policy TR01, which requires walking and cycling to be the primary modes of transport, and with paragraph 11.6 of the Local Plan, which seeks to locate development where sustainable travel choices are genuinely available. In addition, the proximity of Exmo_20 to Budleigh Salterton, a lower-tier settlement, has not been properly considered. A development of this scale risks placing disproportionate pressure on Budleigh Salterton's services and infrastructure, undermining the settlement hierarchy and directing growth towards a town that is not identified as a focus for such expansion. Taken together, the distance from services, topographical constraints, reliance on car travel and failure to properly consider impacts on neighbouring settlements mean that Exmo_20 does not represent a sustainable location for development. The allocation is therefore unsound, as it is not

justified, not consistent with national policy, and conflicts with the Local Plan's transport and spatial strategy.

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The allocation of Exmo_20 is not sound because it promotes development in a location that would be inherently car-dependent, contrary to the requirements of the National Planning Policy Framework (December 2023) and the Local Plan's transport strategy. Paragraphs 92 and 109 of the NPPF require development to be located and designed so as to reduce the need to travel, support healthy lifestyles, and enable access to services by walking, cycling and public transport. Paragraph 109 in particular requires that opportunities to promote sustainable transport modes are taken up, depending on the nature and location of the site. Exmo_20 fails this test. The site is physically separated from Exmouth and Budleigh Salterton, with primary access proposed from the B3179, resulting in a long and indirect route to reach everyday services such as shops, schools, healthcare and employment. It has not been demonstrated that a sufficient range of regularly needed local services can be accessed by walking or cycling from the site in a safe, direct and realistic manner. This failure is compounded by recent changes to Local Plan Policy TR01, which now require walking and cycling to be the first and mandatory mode of travel, rather than merely an aspiration. The Exmo_20 allocation directly conflicts with this requirement, as its isolated location and access arrangements would necessitate frequent car use for routine daily activities. The internal layout of the site further reinforces car dependency. Housing is proposed at the southern part of the allocation, while the main access point is located on the B3179 to the north, meaning residents would be required to drive approximately one kilometre within the site before even reaching the public highway for every outbound and return journey. This is incompatible with the concept of sustainable, walkable neighbourhoods. As a result, the Exmo_20 allocation would generate significant and

unavoidable vehicle movements, increasing traffic, carbon emissions and air pollution, and undermining the Plan's stated objectives for sustainable transport and healthy communities. The allocation is therefore in direct conflict with Policies TR01 and TR03, paragraphs 3.6 and 11.2 of the Local Plan, and the NPPF's requirement for development to be genuinely sustainable in both location and design. Accordingly, the Exmo_20 allocation is unsound, as it is not justified by its location, is not consistent with national policy, and would undermine the Plan's own transport strategy.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmouth has a well-documented history of flooding, including serious events in 1960, 1983 and 2012, and is already recognised as having multiple and significant flood-risk pathways. Withycombe Brook, which flows through some of the most densely populated parts of the town, already experiences flood risk even before the effects of climate change are fully taken into account. The Exmo_20 site sits above Exmouth on greenfield land, with surface water and tributaries draining directly into Withycombe Brook. Large-scale development here would increase runoff and could worsen flood risk downstream, putting existing homes and communities at greater risk. Despite this, the Local Plan does not demonstrate that a sequential, risk-based approach has been properly applied to avoid development in locations that could increase flooding. In the absence of clear evidence that flood risk can be safely managed now and in the future, the Exmo_20 allocation is unsound and should be reconsidered.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 site forms part of a Strategic Nature Area that acts as an essential buffer between Exmouth and the Pebblebed Heaths, as well as a wildlife corridor linking the Heaths to the coast. It supports important habitats, veteran trees, ancient woodland and hedgerows, and provides key foraging habitat for the European Nightjar, a protected species and a main reason for the Heaths' international designation. Developing this site would undermine the conservation objectives of the Pebblebed Heaths SPA/SAC/SSSI by fragmenting habitats and weakening this buffer. Devon County Council is currently progressing plans to designate the area as part of a Local Nature Recovery Area, reflecting its importance for nature recovery under the Environment Act. Devon Wildlife Trust has stated that development of Exmo_20 is inappropriate and that it is unlikely the site could be developed without causing significant harm to the integrity of the protected heathlands. Given the site's recognised role in nature recovery and the availability of less sensitive alternatives, the Exmo_20 allocation is unsound and should be removed.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 would surround St John in the Wilderness Church, a Grade II* listed building of the highest significance, and would cause serious and irreversible harm to its setting. The church and churchyard sit within a rare, tranquil and dark-sky landscape that reflects its historic “wilderness” character. A large housing development encircling this site would fundamentally change that setting, regardless of any buffer left around the church. Historic England has raised strong concerns, noting that much of Exmo_20 lies within the church’s setting and that development could cause considerable harm. They also warn that the proposed access road from the B3179 would further damage the setting and increase future development pressure. Historic England advises that development should instead be limited to less sensitive areas, with the site boundary reduced or the scale of development significantly restricted. Given the importance of this heritage asset and the clear risk of harm, the Exmo_20 allocation is unsound and should be removed or substantially reduced.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation has no clear or viable access strategy. The Plan proposes that most traffic would access the site via the B3179, but making this work would require major highway alterations that are uncertain, uncosted and not confirmed by Devon County Council. Traffic from Exmo_20 would also run directly alongside the Pebblebed Heaths SAC/SPA, increasing congestion and air pollution. The Council's own Habitats Regulations Assessment states that there is insufficient certainty to rule out adverse effects on the integrity of the Pebblebed Heaths due to air quality impacts linked to traffic on the B3179. Despite this, Exmo_20 remains allocated, which is contrary to the precautionary principle and the legal requirement to prioritise avoidance over mitigation. The mitigation strategy itself confirms that mitigation cannot be assumed without evidence. Until it can be demonstrated with scientific certainty that access and traffic impacts can be resolved without harm to the Pebblebed Heaths, the Exmo_20 allocation is unsound and should be removed or reconsidered.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 site lies immediately next to the Pebblebed Heaths SAC/SPA/SSSI, making it highly unlikely that SANGs or on-site open space could successfully prevent increased recreational use of the Heaths by new residents. Activities such as dog walking, cycling and walking are therefore likely to increase, causing harm to protected habitats and species. The European Nightjar, a ground-nesting bird and key reason for the SPA designation, is particularly vulnerable: evidence shows that even a single disturbance or predation event can cause nesting failure. The risk of cat predation and disturbance increases the closer housing is built to the Heaths, and there is no practical way to prevent people or domestic cats from accessing the protected area. The RSPB has stated that mitigation for sites closest to the Heaths, particularly Exmo_20, is unlikely to be effective and that there is a significant risk that SANGs will not prevent damaging recreational pressure or other indirect impacts. In the absence of a proven and deliverable mitigation strategy, planning law requires a precautionary approach. Until it can be clearly demonstrated that harm to the Pebblebed Heaths can be avoided, the Exmo_20 allocation should be removed or substantially reduced.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 site sits immediately next to the Pebblebed Heaths, one of the most environmentally sensitive and highly protected areas in East Devon. Development here would place significant pressure on habitats and species that the planning system is legally required to protect. A 400-metre buffer has been proposed as mitigation, but strong evidence shows this is not enough. Domestic cats can roam far beyond 400 metres, particularly in semi-rural areas, and the European Nightjar, a ground-nesting bird that is a key reason for the Heaths' protected status, is extremely vulnerable to disturbance and predation. Research shows that even a single disturbance or predation event can cause nesting failure. For this reason, a much wider buffer is needed, alongside strict controls on lighting, access and recreation. At present, the Exmo_20 allocation depends on a mitigation strategy and habitat assessment that have not yet been shown to work. Current assessments openly acknowledge unresolved risks. In these circumstances, planning law requires a precautionary approach, yet the site has still been included in the Plan. Environmental organisations share these concerns. Devon Wildlife Trust has highlighted the site's important role as a buffer between Exmouth and protected land, while the East Devon National Landscape Partnership has stated that a 400m buffer is inadequate and has supported either removing the site or significantly reducing its scale and moving development closer to the existing town. Natural England has also advised that development should be pulled further away from the Heaths and that a substantial green buffer should be secured to protect the designated sites. Given the availability of alternative sites with fewer environmental constraints, and the fact that the Plan already allocates more housing than is required,

there is no clear justification for pursuing a development here that carries such high and unresolved ecological risk.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI, the Exmo_20 allocation relies on significant habitat and species mitigation that has not been demonstrated as achievable or viable. The mitigation strategy itself states that “it was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA”, while the Plan HRA confirms that “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” Despite this, the site was selected on 03.09.24 (with no option for reconsideration) and the Regulation 19 draft Local Plan approved on 11.12.24 on the assumption that a mitigation strategy would subsequently be developed, prior to the Appropriate Assessment undertaken in the 30.01.25 HRA. This approach is contrary to the CJEU People Over Wind ruling and the required precautionary principle, particularly in light of the CJEU Dutch N judgment. Furthermore, where sites with known mitigation requirements are selected, the Mitigation Hierarchy in NPPF paragraph 32 requires clear justification. This stage has not been undertaken. The Exmo_20 allocation is therefore difficult to justify, given the availability of alternative, less mitigation-dependent sites and the Plan’s housing over-allocation arising from the failure to apply the latest mandatory ONS data. Devon Wildlife Trust, in its first Regulation 19 response, stated that “the allocation site currently serves an important function as a buffer between the urban area of Exmouth and the highly designated land to the north,” and that development would result in the degradation and loss of ecologically supportive environments beyond designated boundaries. Accordingly, the Local Planning Authority has failed to demonstrate compliance with its duties as Competent Authority under the Conservation of Habitats and Species Regulations.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is not sound because the allocation lies adjacent to land supporting glow-worm populations, a light-sensitive species highly vulnerable to artificial night-time lighting and increased disturbance. While the policy acknowledges the need to protect tranquillity and to avoid street lighting in certain locations, it does not identify glow-worms or address the specific risks posed by development-related lighting, vehicle movements, illuminated paths or residential security lighting associated with around 700 new homes. The Plan relies on later assessments rather than demonstrating at plan stage that impacts on this sensitive species can be avoided, which is inconsistent with national biodiversity policy and undermines the effectiveness of the allocation

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is not sound because it relies heavily on imprecise and subjective wording to manage significant impacts arising from a very large allocation. Key safeguards are not defined or measurable, including the extent of the “extensive area” around St John in the Wilderness church, what constitutes “modest levels” of development for secondary access, and how far the housing number may vary from “around 700 homes”. This ambiguity reduces certainty, weakens enforceability, and increases the risk that constraints are eroded through later negotiation, meaning the policy is not effective

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is not sound because the allocation depends on the delivery of a wide range of essential infrastructure and mitigation measures that are not defined with sufficient certainty at plan stage. While the policy allocates “social and community facilities”, around 700 homes and at least 2ha of employment land, it defers key matters to a future masterplan, access strategy, cost-apportionment mechanisms across multiple land parcels, future highway mitigation, and complex ecological mitigation including SANGs and buffering/fencing arrangements. The Plan does not demonstrate that these requirements can be viably funded, phased and delivered together, creating a high risk of delay or dilution of requirements and undermining the effectiveness and justification of the allocation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is not sound because it is located in a highly sensitive ecological context and relies on a complex package of mitigation measures (including a 400m constraint related to the Pebblebed Heaths, buffers for nightjar foraging, restrictions on parking near the SAC/SPA, and delivery of developer-provided SANGs with buffering/fencing and restricted onward access). The Plan does not map or quantify the effect of these constraints on developable area or demonstrate at plan stage that the required mitigation is deliverable, enforceable and effective for a development of around 700 homes plus employment and community uses. This introduces substantial uncertainty and undermines consistency with national policy requiring avoidance of harm to protected sites

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is not sound because it allocates a major mixed-use urban extension in a location closely related to the East Devon National Landscape without robust plan-stage evidence that adverse effects on the National Landscape and its setting can be avoided. The policy relies on vague future measures such as “sensitive design”, screening, and avoiding street lighting, but does not demonstrate how the scale of development and access requirements can be reconciled with landscape protection, nor does it specify how “enhancement of natural beauty” will be delivered in a clear and enforceable way. This is not justified and is not consistent with national policy protections for designated landscapes.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is not sound because the transport and access strategy for a development of around 700 homes, employment land and community uses is insufficiently defined or evidenced. The policy relies on future assessments to resolve access onto the B3179, despite the sensitivity of this route adjacent to the East Devon National Landscape and the need to balance highway safety with landscape protection. The Plan does not demonstrate that the scale of traffic generated can be safely and sustainably accommodated, nor that reliance on sustainable travel is realistic at this location, undermining both the justification and effectiveness of the allocation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Rethink the access to the site

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is not sound because significant parts of the site lie within a Mineral Safeguarding Area for sand and gravel, where development is restricted unless mineral resources are proven unviable or extracted in advance. The Plan allocates a very large mixed-use development without demonstrating that these mineral constraints can be resolved in practice or without undermining delivery, heritage protection, landscape quality or tranquillity. This creates an unresolved conflict between housing allocation and mineral safeguarding policy, introduces substantial uncertainty, and undermines both the justification and effectiveness of the allocation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is not sound because it identifies St John in the Wilderness church as a highly sensitive heritage asset requiring protection of its setting and tranquillity, yet still allocates around 700 new homes, employment land and community uses without demonstrating that this scale of development can be delivered without harm. The policy relies on future heritage assessments and an undefined “extensive area” where built development will not be allowed, rather than evidencing at plan stage that the proposed quantum is compatible with heritage protection. This approach defers fundamental conflicts to later stages, creates uncertainty, and is not justified or consistent with national heritage policy.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Mark Nicholls

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 is not sound because the allocation of “around 700 new homes”, alongside at least 2ha employment land and community uses, is not transparently justified against the policy’s own stated constraints. The Plan requires built development to be concentrated in the southern part of the site and requires an “extensive” no-build area around St John in the Wilderness church to protect its setting and tranquillity, but does not quantify these constraints or demonstrate that the residual developable area can accommodate the stated scale. This indicates a numbers-led allocation rather than a constraints-led capacity and introduces a high risk of overdevelopment pressure or non-delivery, meaning the policy is not justified and is not effective.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I am submitting an objection to the proposed Exmo 20 Site. It is disappointing that I have to do this again after last year's submissions which I believe were in excess of 1,200 objections.

It is difficult to understand how this site could be considered when there are so many negative points relating to this area being developed such as :

- Increased flood risks from the development. There are already issues in this area and building works and new infrastructure will severely aggravate flood waters. The risks and damage will be even more exaggerated as our climate changes (extremely heavy & consistent downpours). The area will not cope.
- Wildlife and habitat destruction: The 'safety' boundary mentioned in the plan will not prevent permanent damage to the pebblebeds and surrounding woodlands. These will be destroyed forever with the loss of a beautiful English environment and it's wildlife.
- Transport routes and road traffic : The local road infrastructure is not appropriate to deal with significant increases in traffic. The roads are already falling apart as it is and we know that national & local government have not got the funding to even resolve the current issues. This will lead to a serious deterioration in quality of life and mental

health. *** This could also lead to an increase in loss of life with additional traffic on these local routes. They are not safe !

- Pollution : Increased traffic will obviously lead to higher levels of pollution which further deteriorates peoples' health and the environment.
- St John in the Wilderness : The proposed development will severely impinge on this beautiful historic church and site. It was sited here as a place of peace for worship and contemplation. This will destroy the special fabric of this holy area.
- Tourism : People from all over the UK visit Devon to enjoy the special and beautiful environment here. Supersized developments such as Exmo 20 will damage the landscapes and environment altering it forever into another suburban sprawl.
- Development size: We all appreciate the requirement for additional housing but this should be shared between areas. 700 + houses are far too many in this site for all the reasons mentioned above and more. There needs to be more controlled allocations to achieve the overall housing targets.

Lastly, and I know it is not normally used as an objection point but this development will clearly erode the fabric of East Devon's rural heritage and can never be replaced once development starts.

I sincerely hope that mine and others' objections will be seriously considered and debated.

health. *** This could also lead to an increase in loss of life with additional traffic on these local routes. They are not safe !

- Pollution : Increased traffic will obviously lead to higher levels of pollution which further deteriorates peoples' health and the environment.
- St John in the Wilderness : The proposed development will severely impinge on this beautiful historic church and site. It was sited here as a place of peace for worship and contemplation. This will destroy the special fabric of this holy area.
- Tourism : People from all over the UK visit Devon to enjoy the special and beautiful environment here. Supersized developments such as Exmo 20 will damage the landscapes and environment altering it forever into another suburban sprawl.
- Development size: We all appreciate the requirement for additional housing but this should be shared between areas. 700 + houses are far too many in this site for all the reasons mentioned above and more. There needs to be more controlled allocations to achieve the overall housing targets.

Lastly, and I know it is not normally used as an objection point but this development will clearly erode the fabric of East Devon's rural heritage and can never be replaced once development starts.

I sincerely hope that mine and others' objections will be seriously considered and debated.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy TR03 in the Local Plan. The proposed location on Exmo_20 and it's distance from amenities means that there are no viable options to create sustainable travel alternatives to using cars. Research findings around the distances from the site to local services show that using cars will be by far the preferred choice of transportation for residents which directly contradicts Policy TR03. Due to Exmo_20's restricted access arrangements, the development would generate significant amounts of vehicle movements just to access services within Exmouth and the neighbouring settlements using the B3179. Due to the site's steep topography and remote location from services, any walking or cycling routes will provide limited viable alternative options to using a car. The local plan notes that congestion is a particular issue in Western East Devon, and with this site having no direct access to Dinan Way and the A376, the significant amounts of vehicle movements from this site will be on rural B roads, locally notorious for being congested and substandard.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Kayleigh Ojaim

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with the LPA assertion that Exmouth has the necessary infrastructure in place. Despite being a tier 1 settlement Exmouth does not have sufficient infrastructure and services for the existing population. With the increased population resulting from Exmo_20 there will be excessive strain on an already bowing services. Even if the proposed development brings financial contributions towards infrastructure etc it will not add another Doctors surgery or dentist – the current provisions of which are already insufficient for the existing population of Exmouth. GPs in Exmouth are already facing wait times of 3+ weeks to acquire an appointment. Similarly Exmouth does not have enough Police resource to cover the current requirements of the town without extending the size dramatically. The proposed development on Exmo_20 does not include provision for another primary or secondary school - within the last 3 years numerous Exmouth children have had to travel 30-40 mins to attend school in Cranbrook due to there being no capacity at Exmouth Community College. The original plans for the nearby Goodmores development included a primary school which has yet to even begin development, further increasing strain on local schools. The existing sewerage system in Exmouth is so inadequate that sewage is discharged into the sea on a very regular basis and the beach is often closed for swimming. Exmouth's problem with sewerage has been featured on national news several times, highlighting the scale of the problem it has. Other developments have added significantly to the sewerage problem in recent years. The Goodmores Development (off Dinan Way in Exmouth) is not anywhere near finished so the impact that will have on the town, in the short and long term, is unknown. However, increased flooding and sewerage issues have increased since the build went

ahead. Maintaining access to essential amenities and services is crucial for the well-being and quality of life of existing residents.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the

relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan or at least reduce the number of houses in line with the corrected figures.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 states that “vehicular access, to accommodate modest levels of development, will be allowed for southern site parts from the road ‘Southern Wood’.” No information is given as to what exactly forms the ‘southern site parts’, how many houses this comprises, nor the measures that will prevent the entire site using an access point via Southern Wood. It should therefore be assumed that any entrance to the site via Southern Wood would be available to the entire site of 700 homes. The Government Centre for Social Research published a study in June 2024 on Car Ownership that stated amongst its key findings under 1.1.1. that “the proportion of households with one car has remained at around 45% and the proportion with two or more vehicles has increased from 8% to 34%.” So it is safe to assume that with 700 homes there will be around 1000 vehicles on the proposed site of Exmo_20. It is also worth noting that the average cars per household in Southern Wood currently is more than 2 cars per household which supports the likely quantity of cars in Exmo_20. While Southern Wood is a quiet cul de sac, the road connecting it to the nearest main route is Meadow View Road which is constantly full of parked cars and at numerous points it is only passable for one vehicle at a time. Vehicles have to regularly stop and give way, sometimes reversing to create space, and cars will regularly be stuck on Dinan Way, unable to even turn in to Meadow View Road. It’s also worth noting that Meadow View Road on which had regular scheduled bus services cancelled due to lack of accessibility. It is ludicrous to think that 1000 vehicles taking an average of 2 trips per day, would not make the situation considerably worse than it already is. Any properly conducted assessment that took place around school pick up times and rush hours would see how unfeasible Southern Wood is as an access point. Furthermore, any access via Southern Wood would

necessitate a bridge being built over Withycombe brook at the end of Southern Wood. We have not seen the plans for a potential bridge at the bottom of the road yet and so do not know the infrastructure behind it but given the positioning of the brook it would need to be substantial and inevitably seriously negatively impact Southern Wood and its residents as well and the woodland habitat surrounding the bridge. Once the bridge is in place the precious parking spaces at the bottom of Southern Wood will be removed forcing more cars to park on the road, adding to the parking and road accessibility issues already faced by existing residents. When access off the Salterton Road or through the ready built Liverton Business Park via B3178, or the B3179 is easier, more practical and most importantly safer.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel as it has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. It is clear to anyone who knows this area that walking or cycling will not be the first choice of transport from the proposed site of Exmo_20 for people to do their shopping/ work/ school run etc because the distance is too great and the LPA have failed to prove otherwise. Studies cited in the Local Plan show that most people prefer to walk if their destination is within 0.5 miles, that beyond the distance of 1 mile cars are the dominant mode of travel and that beyond 2 miles trips on foot are few. Exmo_20 is significantly further than 0.5 miles or even 1 mile from essential infrastructure and services therefore walking or cycling as first choice of transport is unviable. Providing walking routes, cycle paths or public transport will do little to reduce the amount of car journeys this development would generate because the steep local topography and distance to access essential infrastructure and services is too far. It will also be a difficult location for those without car access and cause social exclusion. It is also worth noting that the existing infrastructure of the surrounding roads is not capable of accommodating the increased demand that Exmo_20 would cause. Access for buses, which would have an increased demand, would also be very difficult. A bus service through Meadow View Road (next to the proposed site) was cancelled several years ago

for this very reason proving this is not a sustainable option. From a safety concern Emergency Vehicles such as Fire Engines and Ambulances would without doubt have access issues.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Turning the natural drainage the site current provides through trees and grassland into a concrete jungle invites a huge flood risk, particularly to all of the existing houses and businesses bordering Withycombe Brook. The proposed site of Exmo_20 sits upstream of Exmouth on the main rainwater catchment area of Withycombe Brook. The subsoil is heavy clay, the impermeable nature of which makes soakaways ineffective and the land is often waterlogged. Building on this steep site would significantly exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. In addition there will be the potential pollution added to flood waters from construction activities. A site entrance via Southern Wood has been included in the plan for Exmo_20 that would require a large bridge to be built over Withycombe Brook that runs along the end of Southern Wood (it would NOT be possible to access the site from Southern Wood without a bridge being built). Withycombe Brook regularly floods and there has been land erosion as a result of flooding to the area at the bottom of Southern Wood where the bridge would need to be built and surrounding homes. The bridge itself could also cause a build up of debris causing further flooding. A nearby development, Goodmores,

is still under construction and we are already seeing swathes of mud and flood water covering areas of the main access road that is Dinan Way. Water run off from Exmo_20 would inevitably compound this issue due to the location of the proposed site.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm." A development the size of Exmo_20 surrounding St. John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote and tranquil surroundings of the church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA has completely disregarded their duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with policy TR03 in the Local Plan. The proposed location on Exmo_20 and it's distance from amenities means that there are no viable options to create sustainable travel alternatives to using cars. Research findings around the distances from the site to local services show that using cars will be by far the preferred choice of transportation for residents which directly contradicts Policy TR03. Due to Exmo_20's restricted access arrangements, the development would generate significant amounts of vehicle movements just to access services within Exmouth and the neighbouring settlements using the B3179. Due to the site's steep topography and remote location from services, any walking or cycling routes will provide limited viable alternative options to using a car. The local plan notes that congestion is a particular issue in Western East Devon, and with this site having no direct access to Dinan Way and the A376, the significant amounts of vehicle movements from this site will be on rural B roads, locally notorious for being congested and substandard.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

ALLOCATION OF Exmo_20 is in conflict with the LPA assertion that Exmouth has the necessary infrastructure in place. Despite being a tier 1 settlement Exmouth does not have sufficient infrastructure and services for the existing population. With the increased population resulting from Exmo_20 there will be excessive strain on an already bowing services. Even if the proposed development brings financial contributions towards infrastructure etc it will not add another Doctors surgery or dentist – the current provisions of which are already insufficient for the existing population of Exmouth. GPs in Exmouth are already facing wait times of 3+ weeks to acquire an appointment. Similarly Exmouth does not have enough Police resource to cover the current requirements of the town without extending the size dramatically. The proposed development on Exmo_20 does not include provision for another primary or secondary school - within the last 3 years numerous Exmouth children have had to travel 30-40 mins to attend school in Cranbrook due to there being no capacity at Exmouth Community College. The original plans for the nearby Goodmores development included a primary school which has yet to even begin development, further increasing strain on local schools. The existing sewerage system in Exmouth is so inadequate that sewage is discharged into the sea on a very regular basis and the beach is often closed for swimming. Exmouth's problem with sewerage has been featured on national news several times, highlighting the scale of the problem it has. Other developments have added significantly to the sewerage problem in recent years. The Goodmores Development (off Dinan Way in Exmouth) is not anywhere near finished so the impact that will have on the town, in the short and long term, is unknown. However, increased flooding and sewerage issues have increased since the build went

ahead. Maintaining access to essential amenities and services is crucial for the well-being and quality of life of existing residents.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the “most recent data published at the time” ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan’s housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states “Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals”.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA(6) Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20 states that “vehicular access, to accommodate modest levels of development, will be allowed for southern site parts from the road ‘Southern Wood’.” No information is given as to what exactly forms the ‘southern site parts’, how many houses this comprises, nor the measures that will prevent the entire site using an access point via Southern Wood. It should therefore be assumed that any entrance to the site via Southern Wood would be available to the entire site of 700 homes. The Government Centre for Social Research published a study in June 2024 on Car Ownership that stated amongst its key findings under 1.1.1. that “the proportion of households with one car has remained at around 45% and the proportion with two or more vehicles has increased from 8% to 34%.” So it is safe to assume that with 700 homes there will be around 1000 vehicles on the proposed site of Exmo_20. It is also worth noting that the average cars per household in Southern Wood currently is more than 2 cars per household which supports the likely quantity of cars in Exmo_20. While Southern Wood is a quiet cul de sac, the road connecting it to the nearest main route is Meadow View Road which is constantly full of parked cars and at numerous points it is only passable for one vehicle at a time. Vehicles have to regularly stop and give way, sometimes reversing to create space, and cars will regularly be stuck on Dinan Way, unable to even turn in to Meadow View Road. It’s also worth noting that Meadow View Road on which had regular scheduled bus services cancelled due to lack of accessibility. It is ludicrous to think that 1000 vehicles taking an average of 2 trips per day, would not make the situation considerably worse than it already is. Any properly conducted assessment that took place around school pick up times and rush hours would see how unfeasible Southern Wood is as an access point. Furthermore, any access via Southern Wood would

necessitate a bridge being built over Withycombe brook at the end of Southern Wood. We have not seen the plans for a potential bridge at the bottom of the road yet and so do not know the infrastructure behind it but given the positioning of the brook it would need to be substantial and inevitably seriously negatively impact Southern Wood and its residents as well and the woodland habitat surrounding the bridge. Once the bridge is in place the precious parking spaces at the bottom of Southern Wood will be removed forcing more cars to park on the road, adding to the parking and road accessibility issues already faced by existing residents. When access off the Salterton Road or through the ready built Liverton Business Park via B3178, or the B3179 is easier, more practical and most importantly safer.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel as it has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. It is clear to anyone who knows this area that walking or cycling will not be the first choice of transport from the proposed site of Exmo_20 for people to do their shopping/ work/ school run etc because the distance is too great and the LPA have failed to prove otherwise. Studies cited in the Local Plan show that most people prefer to walk if their destination is within 0.5 miles, that beyond the distance of 1 mile cars are the dominant mode of travel and that beyond 2 miles trips on foot are few. Exmo_20 is significantly further than 0.5 miles or even 1 mile from essential infrastructure and services therefore walking or cycling as first choice of transport is unviable. Providing walking routes, cycle paths or public transport will do little to reduce the amount of car journeys this development would generate because the steep local topography and distance to access essential infrastructure and services is too far. It will also be a difficult location for those without car access and cause social exclusion. It is also worth noting that the existing infrastructure of the surrounding roads is not capable of accommodating the increased demand that Exmo_20 would cause. Access for buses, which would have an increased demand, would also be very difficult. A bus service through Meadow View Road (next to the proposed site) was cancelled several years ago

for this very reason proving this is not a sustainable option. From a safety concern Emergency Vehicles such as Fire Engines and Ambulances would without doubt have access issues.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Turning the natural drainage the site current provides through trees and grassland into a concrete jungle invites a huge flood risk, particularly to all of the existing houses and businesses bordering Withycombe Brook. The proposed site of Exmo_20 sits upstream of Exmouth on the main rainwater catchment area of Withycombe Brook. The subsoil is heavy clay, the impermeable nature of which makes soakaways ineffective and the land is often waterlogged. Building on this steep site would significantly exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. In addition there will be the potential pollution added to flood waters from construction activities. A site entrance via Southern Wood has been included in the plan for Exmo_20 that would require a large bridge to be built over Withycombe Brook that runs along the end of Southern Wood (it would NOT be possible to access the site from Southern Wood without a bridge being built). Withycombe Brook regularly floods and there has been land erosion as a result of flooding to the area at the bottom of Southern Wood where the bridge would need to be built and surrounding homes. The bridge itself could also cause a build up of debris causing further flooding. A nearby development, Goodmores,

is still under construction and we are already seeing swathes of mud and flood water covering areas of the main access road that is Dinan Way. Water run off from Exmo_20 would inevitably compound this issue due to the location of the proposed site.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan, or at the very least reduce the size of Exmo_20 and ensure that it is not accessed through Southern Wood.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Julia Ojaim

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging(a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26)aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate t consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to

be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan". I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the Local Plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm." A development the size of Exmo_20 surrounding St. John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote and tranquil surroundings of the church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is taken from a quotation from the Gospel of St John: 'I am the voice of one calling in the wilderness, make straight the way of the Lord.' – St John will now be calling god from a housing development of 700 homes instead of the current wilderness surrounding this Grade II* listed 14th century church.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA has completely disregarded their duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heath" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove Exmo_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result in degradation

and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

There's a multitude of reasons why this proposed development is a ridiculous idea: It is too close to our precious pebblebed heaths. Exmouth and Budleigh have struggling sewage disposal facilities already. ECC is massive already and in some years has to bus pupils who live within catchment to Cranbrook. The roads are already ridiculously busy. A development will just add to this and increase accidents. The Ting Tong bend is particularly notorious. Why is a development necessary with a declining birth rate? Is this really the best place to put a development? Rockbeare has already been ruined by the advent of Cranbrook with The Jack in The Green now surrounded by houses. it should be re-named Jack in the Housing Estate. St John's in the Wilderness would need to be re-named if the absolute destruction of Exmouth's green belt is allowed to go ahead. Once it's gone, it's gone. Building should be on previously developed sites and we should be looking at existing unoccupied buildings.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Scrap the idea of carving up the green belt. Remove Exmo_20 from the Local Plan.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Para109 of the NPPF December 2023 and therefore unsound. It also conflicts with Para 11.6 of the Local Plan and Policy TR01. The main vehicular access point for Exmo_20 is just over 2 miles from the centre of Budleigh Salterton by road and 4 miles from the centre of Exmouth. The site allocation would overwhelm Budleigh and conflict with the settlement hierarchy. The topography of the local area and the siting of this project makes the potential cycling and walking options much less viable, which is not apparent on the policy maps. There will therefore be a huge increase in the volume of cars in the area

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Allocation of Exmo_20 is in conflict with par. 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D) of the Local Plan. A development the size of Exmo_20 surrounding St. John in the Wilderness Church (Grade 2* listed) will have significant adverse affects on the remote, tranquil surroundings of the Church and Churchyard. The area around the Church and surrounding buildings, a medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a wilderness setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. Historic England state in their response to the Regulation 19 consultation that "Exmo_20 currently covers a very large area to the East and Northeast of Exmouth. Much of this falls within the setting of the grade 2* listed Church of St. John in the Wilderness and its Churchyard. Development could result in considerable harm to the setting of this building which the NPPF identifies as an asset of the highest significance (Paragraph 206b).....we are concerned by the proposal to bring a long access road from the B3179 to the North. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the South of the site should be explored.....Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the South then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified" Allocation of Exmo_20 is in conflict with Para 165 of the NPPF December 2023. It also conflicts with Para 3.6, policy AR01(b) of the Local Plan and

therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook is only mentioned as a footnote in Table 5-3; Watercourses in East Devon District.

Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 and 2012 recorded. Withcombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the tow, having tributaries and run-off directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:
Remove Exmo_20 from the local plan

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John’s (Exmo_20)) that “new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths” there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Chrissie Parrott

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

Exmo_20

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncosted highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Because as a resident of this area I am very concerned & would like to be present.

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process, not the December 2024 amended version, presented in the 1 st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6, 11.2 & 11.6 of the Local Plan. Exmo_20's limited access arrangements would significantly increase the need for car travel from the main access point proposed on the B3179 to access facilities and services, being 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road, therefore an unsustainable location for development. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt. In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind”. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Dear EDDC,

I'm objecting to the housing development proposal for the local plan site Exmo-20 on several grounds:

As a keen birdwatcher and nature lover, I'm very concerned about damage to the Special Site of Scientific Interest (heathland in Exmo_20) and loss of habitat for wildlife including hedgerows and ancient trees. There will be a loss of feeding ground for birds and other wildlife linked to our protected coastline. As you know we are one of the world's most nature depleted countries already. Housing developers will often make promises to plant more trees and hedgerows, but these are invariably not looked after properly and don't thrive, as is the case with thousands of trees planted along the A14 in East Anglia, which have mostly died. But the developers were allowed to tick a box and not follow through with aftercare. Also saplings can't replace ancient or mature trees and hedgerows, it takes years for them to establish.

We will lose good agricultural land, leading to increased food miles because we will have to import more food instead of growing it in the UK, there will also be an increased risk of flooding caused by run-off because of concreting over fields. We are already experiencing increased flooding due to winter storms, and this will be exacerbated.

The narrow roads will experience more traffic jams with increased cars in the area, all leading to a gigantic bottleneck on A376 road to Exeter from Exmouth; there is insufficient infrastructure (and there will be more and more potholes because of increased traffic including HGVs going to industrial sites).

Our already insufficient sewerage systems won't be able to cope with more sewerage from houses, this will lead to polluted beaches which damages our tourism reputation in Exmouth. I'm a keen sea swimmer and many of the group I swim with feel very frustrated at how limited we are with the times we can now swim, due to the amount of sewage being dumped in the sea.

Please consider my objections, whilst I appreciate we need more housing, our SSI's need protecting, as does our farmland and nature and we need to be supporting nature recovery more urgently.

Many thanks *** Personal details have been removed ***

Dear Sirs

I write to object in the strongest terms, to the proposal to build on this land.

National Landscapes should never be built upon. They are priceless assets for all wildlife therein, and to the people who enjoy these areas as an amenity.

Once the land is lost it cannot be regained. Nor can the nature and wildlife be relocated. We live in one of the most nature depleted countries in the Western World. Do not make it even worse.

Exmouth does not need more homes on its outskirts. It needs affordable central housing.

In addition there will be increased traffic chaos, and stress on the water/sewage infrastructure, which cannot cope with the current situation.

Yours faithfully

*** Personal details have been removed ***

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: If you're finding it too difficult to navigate the site please do get in touch SU Objection 1. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states "It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA" and the Plan HRA states "there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks." This site was selected on 03.09.24 (without option to reconsider), with the Regulation 19 draft Local Plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU "People over Wind" ruling and the required precautionary approach, particularly relevant considering the CJEU "Dutch N" ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that "The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land

to the north. Development within the proposed allocation would result in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 2. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" *Ibis* 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a

reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.” I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed

development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection 4. Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with paragraph 3.6, policies TR01, OL09 and PB04 and Paragraphs 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncostered highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is "currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)", due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states "Mitigation cannot be assumed without evidence (People over wind; Sweetman)". The Exmo_20 site's inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Objection 5. Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness

and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified”

Objection 6. Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that “The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon’s Nature Recovery Strategy; these areas should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. Objection 7. Allocation of Exmo_20 is in conflict with paragraph 170b of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses

in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property. Objection 8. Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

Objection 9. Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st & 2nd Regulation 19 evidence library falsely claiming to be, with no record of the May 2022 version. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected since the site failed the HELAA stage, being not suitable or achievable. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

Objection 10. Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from

the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps. Objection 11. The Exmo_20 allocation is in conflict with paragraph 16(d) of NPPF December 2023 and is unsound and not legally compliant. The Plan has an over-supply of housing allocations, due to not using the "most recent data published at the time" ONS data, as is mandatory (MHCLG Housing and economic needs assessment). The 1,188 figure quoted in 3.11 was calculated in February 2025 prior to the 2024 ONS data being published and is therefore invalid. This figure should be reduced to 1,156 with 80% being 925 and with a 22-year plan requirement of 20,342 (not incurring rounding errors). This is a reduction of 567. Many policies within the plan rely on an overriding need to justify impact or harm and since the Plan figures are incorrect, there is no justification, not least in the Mitigation Hierarchy assessment. Exmo_20 must be removed from the plan due to the multiple mitigation strategies required with regarding its impact on the Internationally and Nationally designated Pebblebed Heath SPA/SAC/SSSI. Further numerical and mathematical errors are found in evidence documents HOU-002 October 2025 and HOU-001 November 2025. These need to be corrected and reconsulted upon as these figures are the foundation of the Local Plan's housing policies. Furthermore Paragraph 16(d) of NPPF December 2023 states "Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals". -----

----- LIST OF POLICIES REFERRED TO IN SUGGESTED
OBJECTIONS (FOR YOUR REFERENCE ONLY) National Planning Policy Framework (NPPF) December 2023 Paragraph 16c states that plans should be shaped by early, proportionate and effective engagement between plan-makers and communities...local organisations and statutory consultees. Paragraph 16d states that Plans should contain policies that are clearly written and unambiguous, so it is evident how a decision maker should react to development proposals. Paragraph 25 states that Strategic policy-making authorities should engage with their local communities... relevant bodies including Local Nature Partnerships. Paragraph 32 states that Local Plans and spatial development strategies should be informed throughout their preparation by a sustainability appraisal that meets the relevant legal requirements. This should demonstrate how the plan has addressed relevant economic, social and environmental objectives...Significant adverse impacts on these objectives should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where significant adverse impacts are unavoidable, suitable mitigation measures should be proposed (or, where this is not possible, compensatory measures should be considered). Paragraph 73b states that sites should be on land which is adjacent to existing settlements, proportionate in size to them and not compromise the

protection given to areas or assets of particular importance. Paragraph 92 states that when considering edge of centre and out of centre proposals, preference should be given to accessible sites which are well connected to the town centre. Paragraph 109 states that Significant development should be focussed on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine need of transport modes. Paragraph 114 states that In assessing sites that may be allocated for development in plans...it should be ensured that; b) safe and suitable access to the site can be achieved for all users, and d) any significant impacts from the development on the transport network (in terms of capacity and congestion) or on highway safety, can be cost effectively mitigated to an acceptable degree. Paragraph 170b states that development should not increase flood risk elsewhere Paragraph 180 states that Planning decisions should contribute to and enhance the natural and local environment by d) minimising impacts on and providing net gains for biodiversity. e) preventing new and existing development from contributing to.... unacceptable levels of soil, air, water or noise pollution. Paragraph 181 states that Plans should distinguish between the hierarchy of international, national and locally designated sites and allocate land with the least environmental or amenity value. Paragraph 185a states that plans should identify, map and safeguard components of local wildlife-rich habitats and wider ecological networks, including the hierarchy of international, national and locally designated sites of importance for biodiversity, wildlife corridors and stepping stones that connect that connect them; and areas identified by national and local partnerships for habitat management, enhancement, restoration or creation. Paragraph 186a states that if significant harm to biodiversity resulting from a development cannot be avoided (through locating on an alternative site with less harmful impacts), adequately mitigated or, as a last resort, compensated for, then planning permission should be refused. Paragraph 186b states that development within or outside a site of special scientific interest, and which is likely to have an adverse effect on it should not normally be permitted. Paragraph 186c states that development resulting in the loss or deterioration of irreplaceable habitats should be refused unless there are wholly exceptional reasons. Paragraph 188 states that the presumption in favour of sustainable development does not apply where the plan is likely to have a significant effect on a habitats site unless an appropriate assessment has concluded that the plan will not adversely affect the integrity of the habitats site. Paragraph 191 states that Planning decisions should ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on the ...natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should c) limit the impact of light pollution from artificial light on...intrinsically dark landscapes and nature conservation. Paragraph 206 states that any harm to the significance of a designated heritage asset from development within its setting should require clear justification. Assets of the highest significance, notably....grade I and II * listed buildings should be

wholly exceptional. 2nd Regulation 19 Local Plan Policy PB01 states that international followed by nationally designated sites must be given uppermost protection. Where assessment fails to rule out effects on integrity development proposals will not be permitted unless mitigation measures are established that can be shown to be effective with clarity provided in respect of means and assurance of implementation. Where avoidance of adverse impacts cannot be achieved proposals will only proceed if there is no alternative and there are imperative reasons of overriding public interest. Policy PB02 states that development proposals that would cause an adverse effect upon Regionally and Locally important wildlife sites will not be permitted unless they cannot be located on alternative sites that would cause less or no harm, and the public benefits of the proposal clearly outweigh the impacts. Policy PB03 states that development proposals which would result in the degradation or degradation of irreplaceable habitats will be refused unless there are wholly exceptional reasons and a suitable compensation strategy exists: this includes impacts through direct, adjacent, or indirect pathways, including lighting and pollution. Policy PB04 states that proposed plans must not adversely affect the integrity of sites protected under the Conservation of Habitats and Species Regulations 2017 Policy OL01d states that development will only be permitted where it will not harm the aesthetic and perceptual factors such as “tranquillity, wildness and dark skies”. Policy OL02 states that development in a NL, or outside but affecting its setting or appearance, will only be permitted where it avoids harm and contributes to the protection, conservation and enhancement of the special qualities. Policy OL09 states that permission will not be granted for development which would result in pollution that cannot be adequately mitigated. Policy TR01 proposes that walking, wheeling, cycling and public transport are the first natural choice for short local journeys, or as part of a longer journey. Policy TR03 states that where development is likely to generate significant amounts of people and/or vehicle movements, planning permission will not be granted unless they can identify measures to secure new sustainable travel arrangements, taking into account...the scale of the development and the availability of public transport, and walking and cycling opportunities. Where there are severe cumulative adverse impacts associated with additional traffic demand and it is not possible to address such impacts planning permission should be refused. Policy HE02 states that proposals for development will be expected to be sympathetic to listed buildings and their settings. Policy AR01b states that development should be safe for its lifetime without increasing or exacerbating flood risk elsewhere. Paragraph 3.6 promotes a sustainable pattern of development that balances development needs with environmental constraints. It prioritises development in sustainable locations while protecting the district’s outstanding open countryside. Paragraph 11.2 promotes focussing significant development at locations which are, or can be Made sustainable through offering a genuine choice of transport modes. Paragraph 11.6 states that most people prefer to walk if their destination is within 1.6km (1 mile), typically 800m (0.5 miles). Factors such as topography also influence walking choices. Paragraph 13.10

aims to protect irreplaceable habitats and important features. Paragraph 13.11 states that some habitats, including ancient woodlands and veteran trees are irreplaceable due to their age, uniqueness and biodiversity. Paragraph 13.24 states that East Devon has diverse but fragmented habitats and aims to enhance biodiversity by increasing habitat areas and connecting isolated habitats.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Do not access the site via Southern Wood.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: Voices should be heard

Full name: Colin and Christine Pilcher

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmouth and Budleigh Salterton are town settlements each with distinctly different characteristics much valued by their respective residents and visitors. The proposed development will serve to inappropriately link the two to the detriment of both. It would put strain on existing public services of both towns and lead to an unacceptable increase in traffic on the the B3179 which is the main and only realistic route from Budleigh Salterton to Exeter, the M5 Motorway and A30.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Fern Purchall

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I and my husband strongly oppose to this plan, because this is destroying natural beauty, affecting peoples lives who live in the area and just really badly affecting this beautiful area.

My Mum, Nan and Great Nan are also buried at the church yard at St John's In The Wilderness, the fields and the general area surrounding it and the natural beauty around it is a very beautiful space to see, I love seeing the horses in the fields when I visit them at the church yard and it's just genuinely a very beautiful area. This church and fields are very peaceful and putting in so many houses will distrubt visiting being a nightmare to travel to as it's so narrow to drive though and not making it peaceful for someone like me to visit a loved one at the church yard the fields and natural beauty is always so calm and lovely and quiet when I go up to the cemetery. Many of us are very upset with this plan because of how this is going to affect everything and how much more busier things are going to be. It will be a nightmare putting in these so many houses in this beautiful area, meaning there will be so much traffic and destroying the natural peaceful feeling.

I understand people need houses but please just consider everything who is opposing their thoughts and feelings, especially with people who live there and the wildlife and how this will affect someone like me going to visit loved ones and gow this will interrupt the peaceful feeling of this beautiful old area, please find it in your hearts to consider

everyone who opposes the plan because there are many of us who want to keep this beautiful area and protect its future and preserve it much as we can.

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with Paragraph 109 of the NPPF December 2023 and therefore unsound. It also conflicts with Policy TR01 and Paragraph 11.6 of the Local Plan. The main vehicular access point for Exmo_20 is 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road. This site allocation would overwhelm Budleigh Salterton and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. The site's and the local area's topography makes the potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

Full name: Thomas A L Ingram

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA has tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process. After 11th December 2024 (the date the draft local plan was approved to proceed to Regulation 19 publication) it was altered and a December 2024 amended version, not in fact used for site selection, but presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected. Extracts below: Stage 2: Site Sifting 1.8 Following the 'long list' of sites identified in Stage 1, a 'sifting' process will be carried out to ensure that only 'reasonable alternatives' are considered further. Only sites which meet criteria a), b) and c) are carried forward to Stage 3. These criteria are shown in figure 2 below. criteria a) Site is assessed as 'suitable, available and achievable' in the HELAA6 Subtext point 6 states: It is assumed that sites within 400m of the Pebblebed Heaths SAC will be ruled out as being unsuitable in the HELAA but, if not, such sites should be sifted out at Stage 2.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Move the settlement boundary away from the Pebblebed Heaths -Revert to 20b as previously proposed

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan. Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 165 of the NPPF December 2023. It also conflicts with paragraph 3.6, policy AR01(b) of the Local Plan and therefore unsound. In the Strategic Flood Risk Assessment Level 1 Withycombe Brook appears is only mentioned as a footnote in Table 5-3: Watercourses in East Devon District. Exmouth is noted as having numerous and significant flood risk pathways, with fluvial flooding in 1960, 1983 & 2012 recorded. Withycombe Brook currently has significant flood risk areas without yet considering current and future impacts from climate change. The greenfield Exmo_20 site sits above the town, having tributaries and runoff directly flowing into Withycombe Brook which flows through the most populous wards in East Devon. The LPA have not employed the required sequential, risk-based approach to site selection so as to avoid flood risk to people and property.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Internationally and Nationally designated Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the internationally designated SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats, in accordance with the Environment Act 2021. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats. Devon Wildlife Trust states in their response to Regulation 19 that "The entirety of the proposed Exmo_20 allocation lies within a Strategic Nature Area...identified for its nationally important habitats and woodlands and diversity of species including birds, insects, mammals and amphibians. SNAs are a key part of Devon's Nature should be targeted for enhancement and it is not appropriate to consider allocation of this land for development....It is beyond the scope (of this letter) to detail the range and diversity of sensitive habitats and species which are supported by NNRS/SAC/SPA/SSSI designations, which would be exposed to significant detrimental effects were the site to be subject to development...We do not believe that

it is feasible to develop this site without causing significant adverse effects on the integrity of the SAC. We strongly urge East Devon District Council not to include this proposed allocation within its Local Plan”. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings, a Medieval Saxon settlement site, is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it, regardless of a buffer zone being left around it. HISTORIC ENGLAND state in their response to the regulation 19 consultation that "Exmo_20 currently covers a very large area to the east and northeast of Exmouth. Much of this falls within the setting of the grade II* listed Church of St John in the Wilderness and its churchyard. Development could result in considerable harm to the setting of this building, which the NPPF identifies as an asset of the highest significance (Paragraph 206b) we are concerned by the proposal to bring a long access road from the B3179 to the north. This could itself result in significant harm to the setting, while opening up the area to future pressure for development and associated harm. Alternative access to the south of the site should be explored...Should this evidence demonstrate that the proposed development can be accommodated in less sensitive areas to the south, then the site boundary should be amended accordingly. If this is not possible then the range and quantum of proposed uses should be restricted to those which can be justified"

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

-Remove Exmo_20 from the Local Plan, -Reduce the size of Exmo_20, -Do not access the site via B3179, -Move the settlement boundary away from the Pebblebed Heaths - Revert to 20b as previously proposed

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 92, and 114b, 114d, 180e & 181 of the NPPF Dec 2023 and therefore unsound and not legally compliant. It also conflicts with policies TR01, OL09 and PB04 and Paragraphs 3.6 and 11.2 of the Local Plan. There is no viable access to the site. The current proposal is to have the majority/bulk of the access onto the B3179, but to make this viable would require major, uncertain and uncoded highway works, not confirmed by Devon County Council. Cumulative and in-combination effects on B3179 must be considered, both in terms of traffic congestion and air pollution affecting the Pebblebed Heaths. The Habitats Regulations Assessment (18.11.25) confirms there is “currently not sufficient certainty to rule out adverse effects in integrity in relation to...air quality (EAST DEVON PEBBLEBED HEATHS SAC/SPA)”, due to the primary access to Exmo_20 being onto the B3179 which would send traffic along the boundary of the Pebblebed Heath. Allocation of Exmo_20 is contradictory to the precautionary approach which must be demonstrated and goes against the Mitigation Hierarchy of avoidance over mitigation (made mandatory by the Environment Act 2021). The Mitigation Strategy states “Mitigation cannot be assumed without evidence (People over wind; Sweetman)”. The Exmo_20 site’s inclusion in the plan is unlawful due to there being no reasonable scientific certainty presented for mitigation. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated

feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind” ruling and the required precautionary approach, particularly relevant considering the CJEU “Dutch N” ruling. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32, the LPA has not undertaken this stage and the Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and that the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. DEVON WILDLIFE TRUST stated in their 1st Regulation 19 response that “The allocation site currently serves an important function of acting as a buffer between the urban area of Exmouth and the highly designated land to the north. Development within the proposed allocation would result

in degradation and loss of ecologically supportive environments outside the designated site boundaries”. The LPA demonstrates a cavalier attitude and widespread failings in its duties as the Competent Authority under the Conservation of Habitats and Species Regulations. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: Its is contrary to many adopted policies in the Local Plan

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Remove EXMO_20 as a site being considered for housing development

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proposed development of site EXMO_20 is fundamentally flawed for the following reasons:- 1) Roads that would serve the site are woefully inadequate and any increased traffic flow along the B3179 would add to the numerous accidents that already occur on that road. 2) The drainage and sewer system in Exmouth & Budleigh is notorious for its lack of capacity and it clearly cannot cope with its current loads with regular weekly discharges of sewage into the Exe and the sea. If consent were to be granted then I recommend that a Grampian Condition be imposed to ensue that the developer, land owner and SWW prove that sufficient new sewage infrastructure will be provided to cope with the additional load on the system. 3) Exmouth only has one secondary school and there is no capacity for any additional pupils - the subject site could house between 250 and 500 children of secondary school age. 4) Doctors surgeries and hospital facilities are already at full stretch and there is no additional capacity to provide

healthcare for the residents of the new estate who could number as many as 3000. 5) The development proposed at Exmo_20 would inevitably bring hundreds of cats and dogs to the area to the great detriment to Woodbury Common Pebblebed Heaths(SAC/SPA). Developing Exmo_20 is contrary to POLICY PB01 of the local plan. There is no provision for any SANG. The extra dogs which could number as many as 1000 will also no doubt be taken to the beach and foul there too. and not in accordance with the mitigation strategy. 6) Exmo_20 would destroy the "tranquillity, wildness and dark skies" of the countryside, which is contrary to POLICY OL01. 7) Developing Exmo_20 would fragment and isolate habitats and destroy wildlife corridors, contrary to PARAGRAPH 13.23 of the Local Plan. It would be detrimental to irreplaceable habitats, veteran trees and species rich hedgerows across the site, contrary to PARAGRAPH 13.9. 8) Exmo_20 would have significant adverse effects on St John in the Wilderness Grade II* listed church and churchyard, drastically altering the peaceful setting for worship which currently exists for the congregation. This is contrary to POLICY HEO. 9) The development of Exmo_20 will cause increased risk of flooding. The site is upstream of Exmouth on the main rainwater catchment area of Withycombe Brook, on a subsoil of heavy clay which makes soakaways ineffective. It would exacerbate the already identified flood risk through the lower lying land at the bottom of the site and down through Withycombe. This is in conflict with POLICY ARO1B. 10) The location is not sustainable and would increase the need for car travel and increase traffic congestion, in conflict with PARAGRAPH 11.2. It is unsustainable development. It is isolated and people would need to travel much further than 800m to existing key services and facilities, contrary to PARAGRAPH 11.6. It is too far (and too steep) from any town centre for people to use walking or cycling as their choice of transport. This is contrary to POLICY TR01. 11) The main access point of Exmo_20 is significantly closer to Budleigh Salterton than Exmouth, making Budleigh its most convenient and accessible town. The services and infrastructure of Budleigh (High Street, Doctor's, school, beach etc) would be the obvious choice for residents of Exmo_20. This would lead to coalescence of Budleigh and Exmouth, contrary to POLICY OL05 of the local Plan. 12) Development of the site would further encroach on the important gap separating Exmouth from Lypstone and Budleigh which will lead to the three settlements eventually coalescing to become one ugly urban sprawl.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: Remove EXMO_20 from the Local Plan

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Robert Oliver Kathro

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I have reviewed all of the comments (objections) to this and the previous consultation that relate to the St. Johns road site. I support all of the comments.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: It cannot be made compliant, the site must be removed from the proposals as it is incompatible with multiple policies as listed in the comments that I have referred to.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The St Johns road proposal comprises an extraordinarily large number of dwellings and for all the reasons stated by others who object it should not be included in the plan. No houses should be built there.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will

be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: There are no modifications that will make it sound. This consultation like many others is biased in favour of the proposals

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: Like many consultations it is biased in favour and presumes that the proposals are sound when they are clearly not.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I am not confident that the hearing will be unbiased.

Full name: MR MARK L KENT

Proposal:

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Exmo_20's allocation is in conflict with paragraph 32 of the NPPF Dec 2023 and therefore unsound. The LPA tried to retrospectively change the Site Selection Methodology (SSM) to justify Exmo_20. The SSM dated May 2022 is the one used for the Regulation 18 process, not the December 2024 amended version, presented in the 1st Regulation 19 evidence library falsely claiming to be. This behaviour is potentially in conflict with the Nolan Principles. The original May 2022 version, used for the Regulation 18 stage, has wording that does not allow Exmo_20 to be selected

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6, 11.2 & 11.6 of the Local Plan. Exmo_20's limited access would significantly increase the need for car travel from the main access point proposed (B3179) to access facilities and services, being 2.3 miles from the centre of Budleigh Salterton by road and 4.0 miles from the centre of Exmouth by road, therefore an unsustainable location for development. This allocation would overwhelm Budleigh and conflict with the settlement hierarchy. Budleigh Salterton has not been taken into account by the LPA when considering the Exmo_20 allocation. Policy TR01 now states that walking/cycling must be the natural first choice for transport, which cannot be achieved for Exmo_20. The site's and local area's topography makes potential cycling and walking options less viable, which is not apparent on the policy maps.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 25, 180d, 181, 185a, 186a, 186c, 188 & 191 of the NPPF December 2023 and is unsound. It also conflicts with Policies PB01, PB02, PB03, PB04 and paragraphs 3.6, 13.10, 13.11 & 13.24 of the Local Plan. The Exmo_20 site is part of the Strategic Nature Area 368, identified as an important buffer between Exmouth and the Pebblebed Heaths SPA/SAC/SSSI, supporting habitat for Nightjar foraging (a key qualifying species for the SPA designation and a Section 41 Principle Importance species), and a wildlife corridor between the Pebblebed Heaths and the Coast. Development of Exmo_20 would undermine the conservation objectives of the SPA. Devon County Council are in the final stages of designating this site as a Local Nature Recovery Area as part of their Local Nature Recovery Strategy (to be published in March '26) aimed at combining existing wildlife sites and extending habitats. The site contains many veteran trees, ancient woodlands, and hedgerows which are at risk of becoming fragmented habitats.

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraph 206 of the NPPF December 2023 and therefore unsound. It is also in conflict with Policies HE02 and OL01(D.) of the Local Plan. A development the size of Exmo_20 surrounding St John in the Wilderness Church (grade II* listed) will have significant adverse effects on the remote, tranquil surroundings of the church and churchyard. The area around the church and surrounding buildings is characterised by dark skies and a sense of remoteness; a 'wilderness' setting which would be irreversibly harmed by having a housing development encircling it.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. 3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that just one event leading to predation is enough to end a nesting attempt. In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. 1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk, it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that just one event leading to predation is enough to end a nesting attempt. Not only is it functionally linked supporting foraging habitat for the Nightjar but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: REMOVE EXMO_20 FROM LOCAL PLAN

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185, 186b, 188 & 191c, of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Being adjacent to the Pebblebed Heaths SAC/SPA/SSSI the allocation relies on significant habitats and species mitigation, which has yet to be shown as achievable and viable; the mitigation strategy states “It was not possible to screen out a Likely Significant Effect for other units within the EDPH SAC and SPA” and the Plan HRA states “there is inherent conflict in that the growth proposed in the Plan would exceed threshold levels and there is, as yet, no means to mitigate or address the risks.” This site was selected on 03.09.24 (without option to reconsider), with the draft local plan approved on 11.12.24, on the assumption that a mitigation strategy would be forthcoming, prior to undertaking an appropriate assessment in the 30.01.25 HRA, contrary to CJEU “People over Wind”. Furthermore selecting sites with known mitigation requirements requires clear justification when assessing allocations against the Mitigation Hierarchy as set out in NPPF paragraph 32.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.:

Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. A minimum of 400m adjacent to the Pebblebed Heath SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)]. Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heath SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a

precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”. The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory. NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA. I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly. 3. Allocation of Exmo_20 is in conflict with paragraphs 16c, 32, 181, 185, 186b, & 188 of the NPPF December 2023 and therefore unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan. Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? Ibis, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest

to the designated heathlands (particularly Land at St John's (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development". "The RSPB is very concerned that the St John's allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes. In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands." I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: remove EXMO_20 from the local plan

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: Yes

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: Yes, I wish to participate in hearing session(s)

6. If you wish to participate in the hearing session(s), please outline why you consider this to be necessary.: I would like my voice to be heard

1(b). Does your comment relate to one of the changes listed above?: No

1(c). If the comment is related to a site, please state the site reference here::
Exmo_20

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I object to EXMO_20

Allocation of Exmo_20 is in conflict with paragraphs 92 & 109 of the NPPF December 2023 and policies TR01 and TR03, and therefore unsound. It also conflicts with paragraph 3.6 & 11.2 of the Local Plan.

Exmo_20 would significantly increase the need for car travel, resulting in more car journeys via a convoluted route from the main access point proposed on the B3179 to access facilities and services. It has not been demonstrated that sufficient regularly needed local services can be accessed by cycling/walking and changes to Policy TR01 increase the conflict between the Local Plan policies and the Exmo_20 allocation as walking/cycling being a likely first choice for transport is now considered mandatory rather than desirable. The isolated location and Exmo_20's B3179 access arrangements would provide unsustainable development, generating significant amounts of vehicle movements for residents to access services within Budleigh Salterton & Exmouth. With housing proposed at the southern part of the site, using the B3179 as the access point would require a minimum of 1km on-site driving every time residents went anywhere and returned home.

Allocation of Exmo_20 is [also] in conflict with paragraphs 16c, 32, 73b (specifically footnote 38 & 7) 180d, 180e, 181, 185a, 186a, 186b, 188 & 191c of the NPPF December 2023 and is unsound & not legally compliant. It also conflicts with paragraph 3.6, policies PB01, PB02, PB03, PB04 and OL02 of the Local Plan.

A minimum of 400m adjacent to the Pebblebed Heaths SAC/SPA/SSSI must be excluded from the Exmo_20 site. As this is mitigation for potential cat predation (amongst other urban effects) and in more rural areas cats can roam over 2km [Hall et al., 2016; Metsers, Seddon, & van Heezik, 2010] [HRA 4.10], and considering the ground nesting Nightjar is a qualifying feature of the SPA, so a clear and significant predation risk; it would seem precautionary for this distance to be significantly more than the pragmatic 400m [Underhill-Day, 2005] currently proposed as it is recognised that “just one event leading to predation is enough to end that nesting attempt” [Langston, R. H. W., Liley, D., Murison, G., Woodfield, E., Clarke, R. T. "What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus* ?" Ibis 149.s1(2007)].

Exmo_20's current inclusion is reliant on a yet to materialise mitigation strategy and HRA, the current versions cannot support the Plan. In the absence of these, it is imperative that a precautionary approach is employed, which would at the very least be to remove a minimum of the 400m of the site adjacent to the Pebblebed Heaths SAC/SPA/SSSI. Not only is it functionally linked supporting foraging habitat for the ground-nesting European Nightjar (a key qualifying species for the SPA designation and a Section 41 Principle Importance species) but a significantly greater buffer will also be required to mitigate for recreational use, with direct impacts noted as dogs off leads, cycling & walking, which is also yet to be assessed at a site level and therefore a precautionary approach must be applied at strategic level. This view is reflected by multiple ecology professionals from various bodies such as DWT and RSPB, with East Devon National Landscape Partnership stating in their response to the 1st Regulation 19 consultation that “A 400m buffer to the protected site does not seem significantly large enough to protect the site from disturbance and damage caused by increased visitor numbers, traffic and other associated access issues. It also further fragments the surrounding habitat making the priority habitats contained within the protected site vulnerable to degradation and erosion, which would be in conflict to the new targets set by government to East Devon National Landscape.... As such, East Devon National Landscape supports the non-adoption of this site as development land. Or if non-adoption is not possible due to other demands, such as housing, we support significant reassessment of the scale and boundary of the development, including a reduced housing number and concentration of development closer to the existing town

settlement thus preserving a greater rural boundary between the site and Pebblebed Heaths”.

The Exmo_20 allocation would be hard to justify since there were multiple other viable & less mitigation-reliant sites to select and the Plan has an over-supply of housing allocations, due to not using the latest ONS data, as is mandatory.

NATURAL ENGLAND state in their response that “the policy is not yet clear where employment uses would be located and understandably offers developers some latitude. Natural England therefore recommends that the policy should require a natural buffer in the northeast of the site along the B3179 road...there may be opportunity to pull the settlement boundary away from the SAC/SPA and secure a green buffer area via S106 outside of it. This would appear to be clear, sound planning which more effectively communicates the planning restrictions approach around the East Devon Heaths SAC/SPA.”

Due to the Exmo_20 site being adjacent Pebblebed Heaths SAC/SPA/SSSI it would be difficult to provide suitable SANGS of adequate characteristics and geographic convenience to dissuade residents from substantial recreational activities on the Pebblebed Heaths SAC/SPA/SSSI such as dog walking, cycling & walking, thereby causing harm to the highly designated protected habitats and species. It should be noted that “just one event leading to predation is enough to end that nesting attempt” [Langston, R.H.W., Liley, D., Murison, G., Woodfield, E. & Clarke, R.T. (2007) What effects do walkers and dogs have on the distribution and productivity of breeding European Nightjar *Caprimulgus europaeus*? *Ibis*, 149, 27–36.] In the absence of information relating to this, a precautionary approach should be applied by the Competent Authority, the LPA. The RSPB state in their response to the 1st Reg 19 consultation that “In the RSPB’s view, mitigation measures for those allocations closest to the designated heathlands (particularly Land at St John’s (Exmo_20) are less likely to be effective to avoid damaging impacts on the SPA/SAC heathland habitats and species, and additional nitrogen deposition from the increase in traffic emissions arising from new development”. “The RSPB is very concerned that the St John’s allocation in particular will have damaging impacts on the designated heathland SAC/SPA (direct and indirect loss of potential foraging habitat to development or change of use of existing farmland to green infrastructure/public open space for the proposed development, increase in cat predation on ground nesting birds that are a designated feature of the heathland SPA, increase in damaging recreational use of the designated

heathland, including dogs off leads, if residents of the proposed new housing choose to use the designated heathland for daily recreational purposes.

In the RSPB view, there is a significant risk that SANG provision and public open space for the proposed development will not be sufficient to prevent damaging increase of recreational usage of the designated heathlands arising from the new residential population. Whilst SD01 explicitly states (in reference to St John's (Exmo_20)) that "new homes and other development that would result in unacceptable impacts will not be permitted within 400 metres of the Pebblebed Heaths" there is no means of preventing people or domestic cats from accessing the heathland and the risk of that happening is increased the closer new dwellings (which increase the local resident cat population as well as new residents in need of land for daily recreational needs, including dog walking) are built to heathlands."

I reserve the right to comment further if, and when, a supporting HRA and supporting mitigation strategy can be provided for the Local Plan and request that I be notified accordingly.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: The proximity to the Pebblebed Heaths is too great and will undoubtedly lead to disturbance of the unique wildlife of this site. I do not believe a 400m buffer is sufficient to mitigate against these impacts. The additional public pressure 700 new homes will generate from dog walkers in particular will have significant impacts together with the high likelihood that domestic cats from the site will predate sensitive birds and invertebrates such as butterflies. They also predate lizards and snakes. This must not be allowed to happen. Once this special wildlife are lost it is extremely hard to replace. The wildlife of the Pebblebed heaths need to be able to move outside of the area itself they cannot be expected to remain in the boundaries so 400m is a zone in which the wildlife may move so a further buffer zone is needed from the 400m point of about the same again to minimise impacts on this sensitive flora and fauna. Also, migratory birds may be deterred from accessing the Pebblebed heathland because of the disturbance caused by both the building works and the new conurbation with associated people and traffic movements and also the additional night time lighting which will appear. Additional issues that a development of this size will cause include a significant increase in sewerage loading. The Exmouth sewerage system is already overloaded and regularly causing operation of the storm overflows which are affecting water quality in the watercourses and of course at our bathing beaches. Until this excessive operation of storm overflows is stopped this development should not proceed and nor should any others in this sewerage catchment. Then there is the impact of the additional vehicles and vehicle movements in this area. Exmouth already suffers congestion problems especially at peak times of day this development would add additional loading to some

significant congestion hotspots and to the problems of congestion on the Exmouth-Exeter Road.

Proposal:

5. Development in the Towns and Villages

1. To which part of the Development in the Towns and Villages chapter does your representation relate?: Policy

1(a). Please write down the paragraph, policy or figure number that your representation relates to.: SD01

1(b). Does your comment relate to one of the changes listed above?: Yes

1(c). If the comment is related to a site, please state the site reference here.:
Exmo_20

2. Do you consider that this part of the Development in the Towns and Villages chapter is legally compliant?: No

2(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not legally compliant. Please be as precise as possible.: I consider that allocation Exmo_20 is not legally compliant for the following reasons: 1. Failure to comply with the Habitats Regulations: Exmo_20 includes land within 400 metres of the Pebblebed Heaths SAC/SPA. The Local Plan acknowledges that development resulting in unacceptable impacts within this buffer will not be permitted. However, the plan allocates approximately 700 dwellings and associated employment land without demonstrating, at plan-making stage, compliance with the Conservation of Habitats and Species Regulations 2017. The site and its immediate environs support, or functionally support, nightjars, a qualifying feature of the Pebblebed Heaths SPA, including known and potential foraging areas. The scale of development proposed would increase recreational pressure, lighting, noise and habitat fragmentation, all of which are recognised impact pathways for nightjars. In the absence of evidence that concludes, beyond reasonable scientific doubt, that the allocation will not adversely affect the integrity of the SAC/SPA, the plan fails to meet the statutory requirements of Regulation 63. 2. Failure to comply with duties relating to protected and notable species: The site and its close environs are known to support beavers, deer and glow-worms, species which are material considerations in planning and relevant to the duties under section 40 of the Natural Environment and Rural Communities Act 2006 to conserve and enhance biodiversity. Glow-worms are particularly sensitive to habitat loss and artificial lighting, both of which are inherent to a development of this scale. The plan allocates the site without demonstrating how impacts on these species can be avoided or mitigated, relying instead on future assessment. This approach fails to demonstrate legal compliance at plan-making stage. The proposal also includes access works and development affecting the landscape. The policy requires development to

conserve and enhance natural beauty, avoid street lighting, and ensure sensitively designed infrastructure: it is unrealistic that a development of this scale and intensity can meet these requirements without unacceptable landscape, natural and visual harm, particularly in the northern parts of the site. 3. Failure to comply with Mineral Safeguarding requirements: The northern part of Exmo_20 lies within a Mineral Safeguarding Area for sand and gravel resources, including Pebblebed geology. The Local Plan states that development within such areas will not be permitted unless supported by a robust Mineral Resource Assessment demonstrating that the resource is not of current or potential economic value, or unless prior extraction is undertaken. By allocating the site without establishing that these requirements can be met, the plan risks sterilising a safeguarded mineral resource and is not legally compliant with the adopted minerals planning framework. 4. Failure to demonstrate compliance with statutory heritage duties: The allocation affects the setting and tranquillity of the listed St John in the Wilderness Church. While the policy refers to future heritage assessment and buffers, the plan does not demonstrate how the statutory duty under section 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 has been satisfied at allocation stage. Reliance on future mitigation is insufficient to demonstrate legal compliance. For the reasons above, allocation Exmo_20 fails to demonstrate compliance with the Habitats Regulations, biodiversity duties, mineral safeguarding requirements, and statutory heritage duties. Insufficient work has been done and therefore the chapter is not legally compliant insofar as it relates to the Exmo_20 site.

2(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter legally compliant, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter legally compliant. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.:

Given the extent and interaction of the identified legal failures - in particular the inability to demonstrate compliance with Regulation 63 of the Conservation of Habitats and Species Regulations 2017, the unresolved sterilisation of a Mineral Safeguarding Area, and the failure to discharge statutory biodiversity and heritage duties at plan-making stage - modification of the policy wording alone would be insufficient to remedy the legal non-compliance. The only lawful modification is the removal of allocation Exmo_20 in its entirety from the Development in the Towns and Villages chapter. This is necessary because the allocation relies on the deferral of fundamental legal tests and mitigation to future project-level assessment, which is not permissible where there is reasonable scientific doubt as to adverse effects on an internationally protected site and where safeguarded mineral resources may be irreversibly sterilised. Retaining the allocation would therefore continue to place the plan in conflict with statutory requirements.

3. Do you consider that this part of the Development in the Towns and Villages chapter is sound?: No

3(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter is not sound. Please be as precise as possible.: I consider this part of the Development in the Towns and Villages chapter to be not sound because, for the reasons set out above, allocation Exmo_20 is not justified, not effective, and not consistent with national policy. In particular, the allocation relies on the deferral of fundamental constraints - including compliance with the Habitats Regulations, mineral safeguarding, biodiversity duties, landscape protection and heritage impacts - to future assessment and mitigation. This means the policy is not based on a proportionate or robust evidence base, cannot be delivered in a legally compliant manner, and fails to demonstrate that the identified impacts can be avoided or made acceptable. Accordingly, the policy does not meet the tests of soundness set out in national planning policy.

3(c). Please set out the modification(s) you consider necessary to make this part of the Development in the Towns and Villages chapter sound, in respect of any matters you have identified above. You will need to say why each modification will make this part of the Development in the Towns and Villages chapter sound. It will be helpful if you are able to put forward your suggested revised wording for the relevant policy or paragraph. Please be as precise as possible.: For the reasons set out above, allocation Exmo_20 is not justified, not effective and not consistent with national policy. These deficiencies arise from fundamental and unresolved constraints relating to internationally protected habitats, biodiversity, mineral safeguarding, landscape and heritage, which cannot be resolved through policy refinement or additional criteria. Accordingly, the only modification capable of making this part of the Development in the Towns and Villages chapter sound is the removal of allocation Exmo_20 in its entirety. Delete all references to allocation Exmo_20 (Land at St John's, Exmouth) from the Development in the Towns and Villages chapter and the Policies Map.

4. Do you consider that this part of the Development in the Towns and Villages chapter complies with the duty to cooperate?: No

4(b). If no, please give details of why you consider this part of the Development in the Towns and Villages chapter fails to comply with the duty to co-operate. Please be as precise as possible.: No. The allocation of Exmo_20 relies on unresolved strategic matters requiring cooperation with statutory bodies, which have been deferred rather than resolved at plan-making stage, and therefore fails to demonstrate compliance with the duty to cooperate.

5. If your representation is seeking a modification to the plan, do you consider it necessary to participate in examination hearing session(s)?: No, I do not wish to participate in hearing session(s)

Full name: Philippe Planel
